Note:

The designation of geographical entities in this report, and the presentation of the material, does not imply the expression of any opinion whatsoever on the part of the African Chiroptera Project, managing editors, or other collaborating individuals or organizations concerning the legal status of any country, territory, or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries. Furthermore, the views expressed in this report do not necessarily reflect those of any of the collaborating organizations.

This is a print report generated from the data contained in the 2007 version of the African Chiroptera Database. The resulting views and outputs are based solely on the data contained within the tables in this database.

Managing Editors:

Victor Van Cakenberghe, Teresa C. Kearney and Ernest C.J. Seamark

Taxonomic Advisory Committee:

Victor Van Cakenberghe (University of Antwerp, Belgium), Teresa C. Kearney (Transvaal Museum, South Africa), Peter J. Taylor (Durban Natural History Museum, South Africa), Petr Benda (National Museum (Natural History), Prague, Czech Republic), and Nancy Simmons (American Museum of Natural History, USA).

Table of Contents:

Introduction	1
Taxa accounts	6
ORDER CHIROPTERA Blumenbach, 1779	6
SUBORDER PTEROPODIFORMI.....	8
INFRAORDER PTEROPODIFORMACEI.....	8
Superfamily PTEROPODOIDEA	8
Family PTEROPODIDAE Bonaparte, 1838	8
Subfamily MACROGLOSSINAE Gray, 1866	9
Genus <i>Megaloglossus</i> Pagenstecher, 1885.....	9
<i>Megaloglossus woermanni</i> Pagenstecher, 1885.....	9
Subfamily PTEROPODINAE Gray, 1821	10
Genus <i>Casinycteris</i> Thomas, 1910.....	11
<i>Casinycteris argynnis</i> Thomas, 1910.....	11
Genus <i>Eidolon</i> Rafinesque, 1815.....	12
<i>Eidolon dupreanum</i> (Schegel, 1867).....	12
<i>Eidolon helvum</i> (Kerr, 1792).....	13
<i>Eidolon helvum helvum</i> (Kerr, 1792).....	13
Genus <i>Epomophorus</i> Bennett, 1836.....	15
<i>Epomophorus angolensis</i> Gray, 1870.....	15
<i>Epomophorus anelli</i> Bergmans and Van Strien, 2004.....	16
<i>Epomophorus gambianus</i> (Ogilby, 1835).....	17
<i>Epomophorus gambianus crypturus</i> Peters, 1852.....	18
<i>Epomophorus gambianus gambianus</i> (Ogilby, 1835).....	19
<i>Epomophorus gambianus pousarguesi</i> Trouessart, 1904.....	19
<i>Epomophorus grandis</i> (Sanborn, 1950).....	20
<i>Epomophorus labiatus</i> (Temminck, 1837).....	21
<i>Epomophorus labiatus minor</i> Dobson, 1880.....	23
<i>Epomophorus minimus</i> Claessen & De Vree, 1991.....	24
<i>Epomophorus wahlbergi</i> (Sundevall, 1846).....	25
Genus <i>Epomops</i> Gray, 1866.....	27
<i>Epomops buettikoferi</i> (Matschie, 1899).....	27
<i>Epomops dobsonii</i> (Bocage, 1889).....	28
<i>Epomops franqueti</i> (Tomes, 1860).....	29
Genus <i>Hypsignathus</i> H. Allen, 1862.....	30
<i>Hypsignathus monstrosus</i> H. Allen, 1862.....	30
Genus <i>Lissonycteris</i> K. Andersen, 1912.....	32
<i>Lissonycteris angolensis</i> (Bocage, 1898).....	32
<i>Lissonycteris angolensis angolensis</i> (Bocage, 1898).....	33
<i>Lissonycteris angolensis ruwenzorii</i> (Eisentraut, 1965).....	33
<i>Lissonycteris goliath</i> Bergmans, 1997.....	34
<i>Lissonycteris petraea</i> Bergmans, 1997.....	34
<i>Lissonycteris smithii</i> (Thomas, 1908).....	35
Genus <i>Micropteropus</i> Matschie, 1899.....	36
<i>Micropteropus intermedius</i> Hayman, 1963.....	36
<i>Micropteropus pusillus</i> (Peters, 1868).....	37
Genus <i>Myonycteris</i> Matschie, 1899.....	38
Subgenus <i>Myonycteris</i> (<i>Myonycteris</i>) Matschie, 1899.....	38
<i>Myonycteris (Myonycteris) brachyptera</i>	38
<i>Myonycteris (Myonycteris) relicta</i> Bergmans, 1980.....	39
<i>Myonycteris (Myonycteris) torquata</i> (Dobson, 1878).....	40
<i>Myonycteris (Myonycteris) torquata leptodon</i> K. Andersen, 1908.....	40
<i>Myonycteris (Myonycteris) torquata torquata</i> (Dobson, 1878).....	41
<i>Myonycteris (Myonycteris) torquata wroughtoni</i> K. Andersen, 1908.....	41
Subgenus <i>Myonycteris</i> (<i>Phygetis</i>) K. Andersen, 1912.....	42
<i>Myonycteris (Phygetis) brachycephala</i> (Bocage, 1889).....	42
Genus <i>Nanonycteris</i> Matschie, 1899.....	43
<i>Nanonycteris veldkampii</i> (Jentink, 1888).....	43
Genus <i>Plerotes</i> K. Andersen, 1910.....	44

<i>Plerotes anchietae</i> (de Seabra, 1900)	44
Genus <i>Pteropus</i> Erxleben, 1777	45
<i>Pteropus aldabrensis</i> True, 1893	45
<i>Pteropus livingstonii</i> Gray, 1866	46
<i>Pteropus niger</i> (Kerr, 1792)	48
<i>Pteropus rodricensis</i> Dobson, 1878	49
<i>Pteropus rufus</i> E. Geoffroy St.-Hilaire, 1803	50
<i>Pteropus seychellensis</i> A. Milne-Edwards, 1877	51
<i>Pteropus subniger</i> (Kerr, 1792)	52
<i>Pteropus voeltzkowi</i> Matschie, 1909	53
Genus <i>Rousettus</i> Gray, 1821	54
<i>Rousettus aegyptiacus</i> (E. Geoffroy St.-Hilaire, 1810)	55
<i>Rousettus lanosus</i> Thomas, 1906	57
<i>Rousettus madagascariensis</i> G. Grandidier, 1929	58
<i>Rousettus obliviosus</i> Kock, 1978	59
Genus <i>Scotonycteris</i> Matschie, 1894	60
<i>Scotonycteris ophiodon</i> Pohle, 1943	60
<i>Scotonycteris zenkeri</i> Matschie, 1894	61
INFRAORDER RHINOLOPHIFORMACEI	62
Superfamily RHINOLOPHOIDEA	62
Family HIPPOSIDERIDAE Lydekker, 1891	62
Subfamily Hipposiderinae Lydekker, 1891	62
Genus <i>Asellia</i> Gray, 1838	63
<i>Asellia patrizii</i> de Beaux, 1931	63
<i>Asellia tridens</i> (E. Geoffroy St.-Hilaire, 1813)	64
Genus <i>Cloeotis</i> Thomas, 1901	65
<i>Cloeotis percivali</i> Thomas, 1901	65
Genus <i>Hipposideros</i> Gray, 1831	67
<i>Hipposideros abae</i> J.A. Allen, 1917	68
<i>Hipposideros beatus</i> (K. Andersen, 1906)	68
<i>Hipposideros caffer</i> (Sundevall, 1846)	69
<i>Hipposideros camerunensis</i> Eisentraut, 1956	71
<i>Hipposideros commersoni</i> (E. Geoffroy St.-Hilaire, 1813)	72
<i>Hipposideros curtus</i> G.M. Allen, 1921	73
<i>Hipposideros cyclops</i> (Temminck, 1853)	74
<i>Hipposideros fuliginosus</i> (Temminck, 1853)	75
<i>Hipposideros jonesi</i> Hayman, 1947	76
<i>Hipposideros lamottei</i> Brosset, 1985	77
<i>Hipposideros megalotis</i> (Heuglin, 1861)	78
<i>Hipposideros ruber</i> (Noack, 1893)	78
Genus <i>Triaenops</i> Dobson, 1871	80
<i>Triaenops auritus</i> G. Grandidier, 1912	80
<i>Triaenops furculus</i> Trouessart, 1906	80
<i>Triaenops persicus</i> Dobson, 1871	81
<i>Triaenops rufus</i> Milne-Edwards, 1881	82
Family MEGADERMATIDAE H. Allen, 1864	83
Genus <i>Cardioderma</i> Peters, 1873	83
<i>Cardioderma cor</i> (Peters, 1872)	83
Genus <i>Lavia</i> Gray, 1838	84
<i>Lavia frons</i> (E. Geoffroy St.-Hilaire, 1810)	84
Family RHINOLOPHIDAE Gray, 1825	85
Subfamily Rhinolophinae Gray, 1825	85
Genus <i>Rhinolophus</i> Lacépède, 1799	85
<i>Rhinolophus adami</i> Aellen and Brosset, 1968	86
<i>Rhinolophus alcyone</i> Temminck, 1853	87
<i>Rhinolophus blasii</i> Peters, 1867	88
<i>Rhinolophus capensis</i> Lichtenstein, 1823	89
<i>Rhinolophus clivosus</i> Cretzschmar, 1828	90
<i>Rhinolophus darlingi</i> K. Andersen, 1905	92
<i>Rhinolophus deckenii</i> Peters, 1867	93

	<i>Rhinolophus denti</i> Thomas, 1904.....	94
	<i>Rhinolophus eloquens</i> K. Andersen, 1905.....	97
	<i>Rhinolophus euryale</i> Blasius, 1853.....	98
	<i>Rhinolophus ferrumequinum</i> (Schreber, 1774).....	99
	<i>Rhinolophus fumigatus</i> Rüppell, 1842.....	100
	<i>Rhinolophus guineensis</i> Eisentraut, 1960.....	101
	<i>Rhinolophus hildebrandtii</i> Peters, 1878.....	102
	<i>Rhinolophus hillorum</i> Koopman, 1989.....	103
	<i>Rhinolophus hipposideros</i> (Bechstein, 1800).....	103
	<i>Rhinolophus landeri</i> Martin, 1838.....	105
	<i>Rhinolophus maclaudi</i> Pousargues, 1897.....	106
	<i>Rhinolophus maendeleo</i> Kock, Csorba and Howell, 2000.....	107
	<i>Rhinolophus mehelyi</i> Matschie, 1901.....	107
	<i>Rhinolophus ruwenzorii</i> J. Eric Hill, 1942.....	108
	<i>Rhinolophus sakejensis</i> Cotterill, 2002.....	108
	<i>Rhinolophus silvestris</i> Aellen, 1959.....	109
	<i>Rhinolophus simulator</i> K. Andersen, 1904.....	110
	<i>Rhinolophus swinnyi</i> Gough, 1908.....	111
	<i>Rhinolophus ziama</i> Fahr, Vierhaus, Hutterer and Kock, 2002.....	112
	Superfamily RHINOPOMATOIDEA	113
	Family RHINOPOMATIDAE Dobson, 1872	113
	Genus <i>Rhinopoma</i> E. Geoffroy St.-Hilaire, 1818.....	113
	<i>Rhinopoma hardwickii</i> Gray, 1831.....	113
	<i>Rhinopoma macinnesi</i> Hayman, 1937.....	115
	<i>Rhinopoma microphyllum</i> (Brünnich, 1782).....	116
	SUBORDER VESPERTILIONIFORMI.....	117
	INFRAORDER NOCTILIONIFORMACEI.....	117
	Superfamily NOCTILIONOIDEA	117
	Family MYZOPODIDAE Thomas, 1904	118
	Genus <i>Myzopoda</i> Milne-Edwards and A. Grandidier, 1878.....	118
	<i>Myzopoda aurita</i> Milne-Edwards and A. Grandidier, 1878.....	118
	<i>Myzopoda schliemanni</i> Goodman, Rakotondraparany and Kofoky, 2007....	118
	INFRAORDER NYCTERIFORMACEI.....	120
	Superfamily NYCTEROIDEA	120
	Family EMBALLONURIDAE Gervais, 1855	120
	Genus <i>Coleura</i> Peters, 1867.....	121
	<i>Coleura afra</i> (Peters, 1852).....	121
	<i>Coleura seychellensis</i> Peters, 1868.....	122
	Genus <i>Emballonura</i> Temminck, 1838.....	123
	<i>Emballonura atrata</i> Peters, 1874.....	123
	<i>Emballonura tiavato</i> Goodman, Cardiff, Ranivo, Russell, and Yoder, 2006..	124
	Genus <i>Saccolaimus</i> Temminck, 1838.....	126
	<i>Saccolaimus peli</i> (Temminck, 1853).....	126
	Genus <i>Taphozous</i> E. Geoffroy St.-Hilaire, 1818.....	127
	<i>Taphozous hamiltoni</i> Thomas, 1920.....	128
	<i>Taphozous hildegardeae</i> Thomas, 1909.....	129
	<i>Taphozous mauritanus</i> E. Geoffroy St.-Hilaire, 1818.....	130
	<i>Taphozous nudiventris</i> Cretzschmar, 1830.....	132
	<i>Taphozous perforatus</i> E. Geoffroy St.-Hilaire, 1818.....	133
	<i>Taphozous perforatus perforatus</i> E. Geoffroy St.-Hilaire, 1818.....	134
	<i>Taphozous perforatus sudani</i> Thomas, 1915.....	134
	Family NYCTERIDAE Van der Hoeven, 1855	135
	Genus <i>Nycteris</i> G. Cuvier and E. Geoffroy, 1795.....	135
	<i>Nycteris arge</i> Thomas, 1903.....	136
	<i>Nycteris aurita</i> (K. Andersen, 1912).....	137
	<i>Nycteris gambiensis</i> (K. Andersen, 1912).....	138
	<i>Nycteris grandis</i> Peters, 1865.....	139
	<i>Nycteris hispida</i> (Schreber, 1774).....	141
	<i>Nycteris intermedia</i> Aellen, 1959.....	143
	<i>Nycteris macrotis</i> Dobson, 1876.....	144

<i>Nycteris madagascariensis</i> G. Grandidier, 1937	146
<i>Nycteris major</i> (K. Andersen, 1912)	147
<i>Nycteris nana</i> (K. Andersen, 1912)	148
<i>Nycteris parisii</i> (de Beaux, 1923)	148
<i>Nycteris thebaica</i> E. Geoffroy St.-Hilaire, 1818	149
<i>Nycteris vinsoni</i> Dalquest, 1965	153
<i>Nycteris woodi</i> K. Andersen, 1914	154
INFRAORDER VESPERTILIONIFORMACEI	155
Superfamily MOLOSSOIDEA Simmons, 1998	155
Family MOLOSSIDAE Gervais, 1856	155
Subfamily Molossinae Gervais, 1856	155
Genus <i>Chaerephon</i> Dobson, 1874	156
<i>Chaerephon aloysiisabaudiae</i> (Festa, 1907)	157
<i>Chaerephon ansorgei</i> (Thomas, 1913)	158
<i>Chaerephon bemmelini</i> (Jentink, 1879)	159
<i>Chaerephon bivittatus</i> (Heuglin, 1861)	159
<i>Chaerephon chapini</i> J.A. Allen, 1917	160
<i>Chaerephon gallagheri</i> (Harrison, 1975)	162
<i>Chaerephon jobimena</i> Goodman and Cardiff, 2004	162
<i>Chaerephon leucogaster</i> (A. Grandidier, 1869)	163
<i>Chaerephon major</i> (Trouessart, 1897)	164
<i>Chaerephon nigeriae</i> Thomas, 1913	165
<i>Chaerephon nigeriae nigeriae</i> Thomas, 1913	166
<i>Chaerephon nigeriae spillmanni</i> (Monard, 1933)	166
<i>Chaerephon pumilus</i> (Cretzschmar, 1826)	166
<i>Chaerephon russatus</i> J.A. Allen, 1917	169
<i>Chaerephon tomensis</i> (Juste and Ibáñez, 1993)	170
Genus <i>Mops</i> Lesson, 1842	171
Subgenus <i>Mops</i> (<i>Mops</i>) Lesson, 1842	171
<i>Mops</i> (<i>Mops</i>) <i>condylurus</i> (A. Smith, 1833)	171
<i>Mops</i> (<i>Mops</i>) <i>congicus</i> J.A. Allen, 1917	173
<i>Mops</i> (<i>Mops</i>) <i>demonstrator</i> (Thomas, 1903)	174
<i>Mops</i> (<i>Mops</i>) <i>leucostigma</i> (G.M. Allen, 1918)	175
<i>Mops</i> (<i>Mops</i>) <i>midas</i> (Sundevall, 1843)	175
<i>Mops</i> (<i>Mops</i>) <i>midas miarensis</i> (A. Grandidier, 1869)	177
<i>Mops</i> (<i>Mops</i>) <i>midas midas</i> (Sundevall, 1843)	177
<i>Mops</i> (<i>Mops</i>) <i>niangarae</i> J.A. Allen, 1917	178
<i>Mops</i> (<i>Mops</i>) <i>niveiventer</i> Cabrera and Ruxton, 1926	179
<i>Mops</i> (<i>Mops</i>) <i>trevori</i> J.A. Allen, 1917	180
Subgenus <i>Mops</i> (<i>Xiphonycteris</i>) Dollman, 1911	181
<i>Mops</i> (<i>Xiphonycteris</i>) <i>brachypterus</i> (Peters, 1852)	181
<i>Mops</i> (<i>Xiphonycteris</i>) <i>nanulus</i> J.A. Allen, 1917	182
<i>Mops</i> (<i>Xiphonycteris</i>) <i>petersoni</i> (El Rayah, 1981)	183
<i>Mops</i> (<i>Xiphonycteris</i>) <i>spurrelli</i> (Dollman, 1911)	183
<i>Mops</i> (<i>Xiphonycteris</i>) <i>thersites</i> (Thomas, 1903)	184
Genus <i>Mormopterus</i> Peters, 1865	185
<i>Mormopterus acetabulosus</i> (Hermann, 1804)	185
<i>Mormopterus acetabulosus acetabulosus</i> (Hermann, 1804)	186
<i>Mormopterus acetabulosus natalensis</i> (A. Smith, 1847)	186
<i>Mormopterus jugularis</i> (Peters, 1865)	186
Genus <i>Myopterus</i> E. Geoffroy St.-Hilaire, 1818	187
<i>Myopterus daubentonii</i> Desmarest, 1820	187
<i>Myopterus whitleyi</i> (Scharff, 1900)	188
Genus <i>Otomops</i> Thomas, 1913	189
<i>Otomops madagascariensis</i> Dorst, 1953	189
<i>Otomops martiensseni</i> (Matschie, 1897)	190
<i>Otomops martiensseni icarus</i> Chubb, 1917	190
<i>Otomops martiensseni martiensseni</i> (Matschie, 1897)	191
Genus <i>Platymops</i> Thomas, 1906	191
<i>Platymops setiger</i> (Peters, 1878)	191

	<i>Platymops setiger macmillani</i> Thomas, 1906.....	192
	<i>Platymops setiger setiger</i> (Peters, 1878).....	192
Genus	Sauromys Roberts, 1917	193
	<i>Sauromys petrophilus</i> (Roberts, 1917)	194
	<i>Sauromys petrophilus erongensis</i> (Roberts, 1946)	195
	<i>Sauromys petrophilus haagneri</i> (Roberts, 1917).....	195
	<i>Sauromys petrophilus petrophilus</i> (Roberts, 1917)	196
	<i>Sauromys petrophilus umbratus</i> (Shortridge & Carter, 1938).....	196
Genus	Tadarida Rafinesque, 1814.....	197
	<i>Tadarida aegyptiaca</i> (E. Geoffroy St.-Hilaire, 1818).....	197
	<i>Tadarida aegyptiaca aegyptiaca</i> (E. Geoffroy St.-Hilaire, 1818)	198
	<i>Tadarida aegyptiaca bocagei</i> (Seabra, 1900)	198
	<i>Tadarida fulminans</i> (Thomas, 1903).....	199
	<i>Tadarida lobata</i> (Thomas, 1891)	200
	<i>Tadarida teniotis</i> (Rafinesque, 1814).....	201
	<i>Tadarida ventralis</i> (Heuglin, 1861).....	202
Superfamily	VESPERTILIONOIDEA Gray, 1821	203
Family	MINIOPTERIDAE Dobson, 1875.....	203
Genus	Miniopterus Bonaparte, 1837	203
	<i>Miniopterus africanus</i> Sanborn, 1936	204
	<i>Miniopterus fraterculus</i> Thomas and Schwann, 1906.....	205
	<i>Miniopterus gleni</i> Peterson, Eger and Mitchell, 1995.....	206
	<i>Miniopterus inflatus</i> Thomas, 1903	207
	<i>Miniopterus inflatus inflatus</i> Thomas, 1903	207
	<i>Miniopterus inflatus rufus</i> Sanborn, 1936.....	207
	<i>Miniopterus majori</i> Thomas, 1906	208
	<i>Miniopterus manavi</i> Thomas, 1906	209
	<i>Miniopterus minor</i> Peters, 1867	210
	<i>Miniopterus natalensis</i> (A. Smith, 1833)	211
	<i>Miniopterus schreibersii</i> (Kuhl, 1817)	213
Family	VESPERTILIONIDAE Gray, 1821.....	215
Subfamily	Kerivoulinae Miller, 1907	216
Genus	Kerivoula Gray, 1842.....	216
	<i>Kerivoula africana</i> Dobson, 1878.....	217
	<i>Kerivoula argentata</i> Tomes, 1861.....	218
	<i>Kerivoula cuprosa</i> Thomas, 1912.....	219
	<i>Kerivoula eriophora</i> (Heuglin, 1877).....	220
	<i>Kerivoula lanosa</i> (A. Smith, 1847)	221
	<i>Kerivoula phalaena</i> Thomas, 1912	222
	<i>Kerivoula smithii</i> Thomas, 1880	223
Subfamily	Myotinae Tate, 1942.....	224
Genus	Cistugo Thomas, 1912.....	224
	<i>Cistugo lesueuri</i> Roberts, 1919	224
	<i>Cistugo seabrae</i> Thomas, 1912	226
Genus	Myotis Kaup, 1829	227
	<i>Myotis anjouanensis</i> (Dorst, 1960).....	229
	<i>Myotis blythii</i> (Tomes, 1857).....	230
	<i>Myotis bocagii</i> (Peters, 1870)	231
	<i>Myotis bocagii bocagii</i> (Peters, 1870)	232
	<i>Myotis bocagii cupreolus</i> Thomas, 1904.....	232
	<i>Myotis capaccinii</i> (Bonaparte, 1837)	233
	<i>Myotis dieteri</i> M. Happold, 2005	234
	<i>Myotis emarginatus</i> (E. Geoffroy St.-Hilaire, 1806)	235
	<i>Myotis goudoti</i> (A. Smith, 1834).....	235
	<i>Myotis morrisoni</i> Hill, 1971	236
	<i>Myotis myotis</i> (Borkhausen, 1797).....	237
	<i>Myotis nattereri</i> (Kuhl, 1817).....	238
	<i>Myotis punicus</i> Felten, 1977	239
	<i>Myotis scotti</i> Thomas, 1927	239
	<i>Myotis tricolor</i> (Temminck, 1832)	240

<i>Myotis welwitschii</i> (Gray, 1866)	241
Subfamily Vespertilioninae Gray, 1821	243
Genus <i>Barbastella</i> Gray, 1821	244
<i>Barbastella barbastellus</i> (Schreber, 1774)	244
Genus <i>Eptesicus</i> Rafinesque, 1820	246
<i>Eptesicus bottae</i> (Peters, 1869)	247
<i>Eptesicus floweri</i> (de Winton, 1901)	249
<i>Eptesicus hottentotus</i> (A. Smith, 1833)	250
<i>Eptesicus platyops</i> (Thomas, 1901)	255
<i>Eptesicus serotinus</i> (Schreber, 1774)	256
Genus <i>Glauconycteris</i> Dobson, 1875	258
<i>Glauconycteris alboguttata</i> J.A. Allen, 1917	258
<i>Glauconycteris argentata</i> (Dobson, 1875)	259
<i>Glauconycteris beatrix</i> Thomas, 1901	259
<i>Glauconycteris curryae</i> Eger and Smith, 2001	260
<i>Glauconycteris egeria</i> Thomas, 1913	260
<i>Glauconycteris gleni</i> Peterson and Smith, 1973	261
<i>Glauconycteris humeralis</i> J.A. Allen, 1917	261
<i>Glauconycteris kenyacola</i> Peterson, 1982	262
<i>Glauconycteris machadoi</i> Hayman, 1963	262
<i>Glauconycteris poensis</i> (Gray, 1842)	262
<i>Glauconycteris superba</i> Hayman, 1939	263
<i>Glauconycteris variegata</i> (Tomes, 1861)	264
Genus <i>Hypsugo</i> Kolenati, 1856	265
<i>Hypsugo anchietae</i> (de Seabra, 1900)	265
<i>Hypsugo ariel</i> (Thomas, 1904)	267
<i>Hypsugo crassulus</i> (Thomas, 1904)	268
<i>Hypsugo eisentrauti</i> (Hill, 1968)	270
<i>Hypsugo musciculus</i> (Thomas, 1913)	271
<i>Hypsugo savii</i> (Bonaparte, 1837)	272
Genus <i>Laephotis</i> Thomas, 1901	274
<i>Laephotis angolensis</i> Monard, 1935	275
<i>Laephotis botswanae</i> Setzer, 1971	276
<i>Laephotis namibensis</i> Setzer, 1971	277
<i>Laephotis wintoni</i> Thomas, 1901	278
Genus <i>Mimetillus</i> Thomas, 1904	280
<i>Mimetillus moloneyi</i> (Thomas, 1891)	280
<i>Mimetillus thomasi</i> Hinton, 1920	281
Genus <i>Neoromicia</i> Roberts, 1926	282
<i>Neoromicia "incertae-sedis"</i>	282
<i>Neoromicia brunneus</i> (Thomas, 1880)	283
<i>Neoromicia capensis</i> (A. Smith, 1829)	285
<i>Neoromicia cf_melckorum</i> Roberts, 1919	288
<i>Neoromicia flavescens</i> (de Seabra, 1900)	289
<i>Neoromicia guineensis</i> (Bocage, 1889)	290
<i>Neoromicia helios</i> (Heller, 1912)	291
<i>Neoromicia humbloti</i> (A. Milne-Edwards, 1881)	292
<i>Neoromicia malagasyensis</i> (Peterson, Eger and Mitchell, 1995)	293
<i>Neoromicia matroka</i> (Thomas and Schwann, 1905)	294
<i>Neoromicia melckorum</i> (Roberts, 1919)	295
<i>Neoromicia rendalli</i> (Thomas, 1889)	296
<i>Neoromicia somalicus</i> (Thomas, 1901)	298
<i>Neoromicia tenuipinnis</i> (Peters, 1872)	300
<i>Neoromicia zuluensis</i> (Roberts, 1924)	302
Genus <i>Nyctalus</i> Bowdich, 1825	304
<i>Nyctalus azureum</i> (Thomas, 1901)	304
<i>Nyctalus lasiopterus</i> (Schreber, 1780)	305
<i>Nyctalus leisleri</i> (Kuhl, 1817)	305
<i>Nyctalus noctula</i> (Schreber, 1774)	306
Genus <i>Nycticeinops</i> Hill & Harrison, 1987	307

<i>Nycticeinops schlieffenii</i> (Peters, 1859)	307
Genus <i>Otonycteris</i> Peters, 1859.....	309
<i>Otonycteris hemprichii</i> Peters, 1859.....	309
Genus <i>Pipistrellus</i> Kaup, 1829	310
<i>Pipistrellus "incertae-sedis"</i>	310
<i>Pipistrellus aero</i> Heller, 1912.....	311
<i>Pipistrellus cf. kuhlii</i> Volleth, Bronner, Göpfert, Heller, von Helversen and Yong, 2001	311
<i>Pipistrellus deserti</i> Thomas, 1902	312
<i>Pipistrellus hanaki</i> Hulva and Benda, 2004	314
<i>Pipistrellus hesperidus</i> (Temminck, 1840).....	314
<i>Pipistrellus hesperidus broomi</i> Roberts, 1948.....	315

Introduction

The purpose of the African Chiroptera Report is to collate published information on, and specimen records of, African bats. The advent of the internet provides an opportunity for large amounts of information to be easily and economically updated and accessible, which is particularly important for taxonomic information. The electronic, web-based nature of the information is intended to allow information on African bats to be corrected/ updated more frequently than a printed format allows, and to be available to users in an affordable form that can be manipulated to their specific requirements. It is hoped this tool will facilitate research and conservation planning, and possibly stimulate interactions across different areas of research. The report is generated from data collated in the African Chiroptera Database and will hopefully grow and develop with the addition of new and corrected information.

As was indicated in the 2006 release, an African Chiroptera Taxonomic Advisory Committee was established to guide the development of this resource, and this Committee has made valuable contributions regarding the incorporation of suggested changes/corrections, in particular in relation to the taxonomy, into this report. The report is currently most comprehensive in the presentation of information on all known synonyms, for presently accepted taxa of African bat species. Having a high Chiroptera diversity, there are currently 11 families, 54 genera and 273 species, recognized in the report, occurring in Africa. The synonym information is still largely based on work by Meester et al. (1986), Koopman (1993), and Simmons (2005). The work of Simmons (2005) is still generally followed in the report for the status of lower taxonomic groups, and we are especially indebted to this publication. Unlike the 2006 release, the taxonomy of the higher orders in this report is not conservative. The report also incorporates more information on the whereabouts of type specimens, name combinations, and spelling variations and errors/*lapsus calami* in names.

The incorporation of information other than taxonomic information (see the various section headings in the description of the layout below) has been slower, and is currently patchy in its execution across the taxa. Information that may answer specific requirements of a user, i.e. more information about the voucher specimens, or specimen collectors, has been drawn from across the database and is presented in separate appendices. Published identification keys for African bat species, have, where necessary, been updated to include current names, and are presented in an appendix. A start has also been made, in an appendix, to make images available of type specimens.

At the time the 2007 report was generated the African Chiroptera Database contained 24,891 specimen records, of which 24,069 (96.7 %) were known to species level. Of the specimens identified to species 22,167 (92.0 %) had sufficient locality and coordinate data to allow plotting of all the localities of all species in Africa (Figure 1) and species distribution maps, presented within each species account, covering 201 of the 273 species. These maps probably indicate biases in relation to the collections from which data has currently been obtained. It is estimated that about 100,000 to 150,000 specimen records are available for African Chiroptera in collections around the world, and hence the 2007 report has probably captured about 16.5 - 25% of these records.

Any mistakes, misrepresentation of data, or omitted publications can be reported to the managing editors of the database (AfricanChiropteraReport@Africanbats.org). This will allow corrections and updates to be made in the next report. It is envisaged that over the next few years the report and database will grow exponentially, hence the report will continue to be released annually, around July.

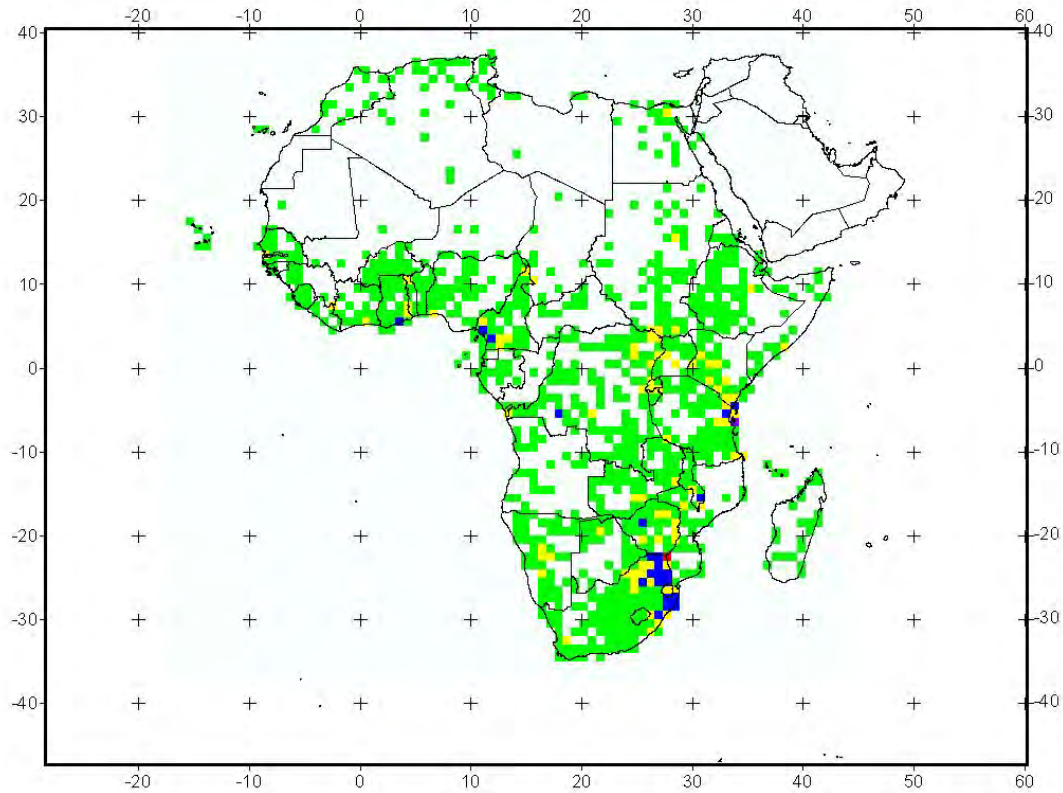

Figure 0: Distribution of different bat species in Africa, calculated in one degree grid size from the species data in the African Chiroptera Database 2007. Green= 1-8 species; yellow= 9-17 species; blue= 18-25 species; purple= 26-34 species; red= 35-42 species.

LAYOUT OF ACCOUNTS

The **taxa** are presented in alphabetical order, top down (Order, Suborder, Infraorder...etc.).

In the **synonyms list**, an asterisk (*) in front of the year indicates that the synonym represents the original name for the taxon. This also reveals instances where it is not necessarily the oldest name that has taken precedence. The use of colours denotes the following: **red** – first name used; **blue** – name currently in use; **green** – valid synonyms; **black** – name combinations, spelling variations and errors/*lapsus calami*. A question mark (?) in the position of the year indicates that the first use of a particular name combination has not yet been determined.

Information relating to the following section headings, or citations to relevant publications, may also be presented in an account if information relating to these sections has been published or communicated (e.g. "pers. Comm." or "unpublished report"), and has been entered in the database. If a section is included in an account, but information has not yet been found or entered into the database, it will be recorded as "Unknown".

Taxonomy: Provides a brief history of previous studies in systematics, giving a summary of different conclusions arising from different methodologies and the resulting taxonomic debates. Much of this information has been taken from Simmons (2005).

Common names: Common names used, in a variety of different languages.

Etymology of name: Information about the origin/meaning of the name.

Similar species: Information about other taxa, with which there has been a recorded mistake in identification.

Palaeontological / archaeological records: Any records identified from palaeontological or archaeological sites.

Conservation status: This section is split into two categories: **Global** - provides information on past and present Red data assessments of the global populations of a species and; **Regional** - provides information on past and present Red data assessments of regional or country specific assessments of a species.

General distribution: Distribution of the taxa in Africa, and extra-limital to Africa. Much of this information also comes from Simmons (2005). Additional records are indicated by a reference to its source.

Geographic variation: Any known variation within a taxon across its distribution.

General description of external morphology: Information about the outward appearance that may distinguish a taxon.

General description of cranial and dental morphology: Information about the skull, mandible and teeth that may be distinguishing characters of a taxon.

Detailed morphology: More detailed description of some structure of a taxon, i.e. for the baculum, tragus, hyoid, or wingshape.

Functional morphology: Information on any work that has related morphological structure to function.

Sexual dimorphism: Any known variation within a taxon between males and females.

Echolocation: Information about the echolocation call of a taxon.

Molecular biology: Information in this section is currently separated into three categories for information on **DNA**, **Karyotype**, and **Protein/allozyme**. The following abbreviations are used in the description of the karyotype: $2n$ – diploid number, FN – fundamental number of autosomal chromosome arms, BA – total number of biarmed autosomal chromosomes, X – female sex chromosome, and Y - male sex chromosome.

Habitat: Information about the environment in which a taxon has been recorded.

Behaviour: Information about the timing and actions of a taxon.

Roost: Indicates where a taxon settles during the day and at night.

Migration: Any records of period movement from one geographic area to another.

Feeding/diet: Records of behaviour in relation to feeding, and what is eaten.

Predators: Records of other species know to eat the taxon in question.

Population: Information in this section is separated into two categories: **structure** – in relation to any organization between individuals, and **density** – in relation to the number of

individuals.

Lifespan: Records relating to how long individuals of a taxon are known to live for.

Reproduction and ontogeny: Information relating to the biology associated with producing further members of a species, and the growth/development over the course of a lifespan.

Mating: Information relating to the behaviour associated with producing further members of a species.

Post-natal development: Information relating to changes that occur after birth.

Parasites: Information in this section is separated into two categories: **ectoparasites** – parasites living outside the body, and **endoparasites** – parasites living within the body.

Viruses: Any known viruses carried by a taxon.

Utilization/significance: Information about how a taxon may be used or viewed by people.

Distribution map:

The species distribution maps should still be viewed with some caution, since these are based on voucher specimen records currently included in the African Chiroptera Database. Hence, the actual distribution of the taxon might be more extensive than indicated on the maps, and the voucher specimen classification/identification may not be accurate. Additionally, it needs to be pointed out that due to variety of reasons not all voucher specimen localities have been plotted, i.e. no X, Y co-ordinates could be found, or these co-ordinates fall outside the country where this locality is supposed to be located. Voucher specimen localities that were not plotted are, however, indicated in the Appendices dealing with voucher specimens. Similarly the position of the point within a country does not necessarily confirm its presence at that spot on the map, as data has currently only been screened to fall within its associated country of representation.

Distribution based on voucher specimens:

This is a calculated paragraph, where information is derived from information in the African Chiroptera Database, and provides a list of countries from which there are voucher specimens. A note of caution in viewing this data is that it is based on voucher specimen information currently in the African Chiroptera Database, hence there may be voucher specimen records that have not yet been included in the database, and voucher specimen classification/identification may not be accurate. Again, if you have any knowledge of omissions or errors in relation to voucher specimens, please send this information to the managing editors of the database (AfricanChiropteraReport@Africanbats.org) for inclusion in the next revision.

An additional, calculated query indicates through the use of colour in the country name, the period of time when voucher specimens were last collected from a country. **Green** indicates that voucher specimens have been collected within the past 20 years, **blue** within the past 20-50 years, **orange** within the past 50-100 years, and **red** if the last voucher specimens were collected more than 100 years ago. Country names in **black** represent countries for which voucher specimens currently have no associated date of collection. The purpose of this ranking is to assist researchers and conservation planners to focus attention on species and areas where further collecting needs to be done to ascertain data on current presence in an area.

FUTURE OF THE REPORT

The current managing editors felt this project may have a better chance of being a successful tool for some time into the future, by encouraging contributions of data and information from interested individuals and organizations. It is hoped the African Chiroptera Report will continue to grow and develop with many more contributions of new and corrected information, i.e. verification of specimens, and specimen voucher records to the database from interested individuals and organizations. Not assigning individual names to authorship/editorship of the report has also been an intentional decision, to try and develop "ownership" of the project among all individuals and organizations who contribute to the database. It is envisaged that each release of the report, being built on the foundation of the previous report, will retain the information of whom and in what capacity they contributed to the project in a particular cycle. It is also planned that in the future, the release of the sequel server web-based TAXIS database will allow user's access to the African Chiroptera Database, which will include interactive keys to the taxa.

Taxa accounts

ORDER CHIROPTERA Blumenbach, 1779

- *1779. **CHIROPTERA** Blumenbach, Handbuch der Naturgeschichte: 58.
- 1821. **CHEIROPTERA** Gray, pp 299. Proposed as a class.
- 1822. **CHEIROPTERA** Flemming, pp. xxxii
- 1889. **PTETICA** Ameghino, Not seen, but Ameghino's Obras Completas 6: 586. PTETICA included not only CHIROPTERA but a hypothetical "PROCHIROPTERA".
- 330. **DERMAPTERA** Aristotle, ca. 330 B.C. Non-Linnean but noted here for the sake of interest.

Higher classification of the Chiroptera follows Alonso-Zarazaga (2005), Eick *et al.* (2005), Hutcheon and Kirsch (2006), and Teeling *et al.* (2005).

The chiropteran monophyly/diphily debate that raged over the last decade or so has been quelled by recent molecular studies (Allard *et al.*, 1999; Miyamoto *et al.*, 2000; Murphy *et al.*, 2001a;b; Liu *et al.*, 2001) that have unequivocally demonstrated bat monophyly, and thereby dispelled the "flying primate" hypothesis (e.g. Pettigrew, 1986). Molecular analysis reject any close relationship among bats, flying lemurs and tree shrews (once grouped in the cohort Archonta), and instead support a sister-taxon relationship between Chiroptera and Eulipotyphla (Murphy *et al.*, 2001a;b), which together are the sister-group of the Ferungulata clade (Nikaido *et al.*, 2001, Waddell *et al.*, 2001), in the supercohort Laurasiatheria (also represented by carnivores, pangolins, cetartiodactyls, eulipotyphlans and perissodactyls) (Murphy *et al.* 2001a;b; Madsen *et al.* 2001; Eizirik *et al.*, 2001; Scally *et al.*, 2001; Nikaido *et al.*, 2001; Springer *et al.* 2001).

Studies using molecular techniques to investigate higher level relationships within Chiroptera have challenged the monophyly of Microchiroptera, as supported by morphological characters associated with laryngeal echolocation (see list of references in Simmons 1994), and altered the traditional subordinal division of bats as Megachiroptera and Microchiroptera. Recent analyses of nuclear and mtDNA gene sequences (Teeling *et al.*, 2000; Springer *et al.*, 2001; Teeling *et al.*, 2002; 2003; Hoofer *et al.*, 2003; Hutcheon and Kirsch, 2004; Teeling *et al.*, 2005; Eick *et al.*, 2005) now strongly support an alliance of megachiropterans and rhinolophoids (excluding Nycteridae) in one suborder, and all other microbats and nycterids in the other suborder. Although these independent studies identified similar subordinal groups, Teeling *et al.* (2002; 2003; 2005), and Springer *et al.* (2001) named

the two rearranged Chiropteran suborders as: "Yinpterochiroptera" (including Pteropodidae, Rhinolophidae - includes Hipposideros, Megadermatidae, Craseonycteridae and Rhinopomatidae) [Springer *et al.*, 2001, also include Nycteridae in the Yinpterochiroptera] and "Yangochiroptera" (including Emballonuridae, Nycteridae, Noctilionidae, Mormoopidae, Phyllostomidae, Natalidae, Furipteridae, Thyropteridae, Myzopodidae, Vespertilionidae, Mystacinidae, and Molossidae), whereas Hutcheon and Kirsch (2004; 2006) and Eick *et al.* (2005: 1876), following the Principal of Typification (International Code of Zoological Nomenclature, 1999), named the two Chiropteran suborders as: "Pteropodiformes" (including the Pteropodidae, Rhinolophidae, Hipposideridae, Megadermatidae, and Rhinopomatidae) and "Vespertilioniformes" (including Emballonuridae, Nycteridae, Noctilionidae, Mormoopidae, Phyllostomidae, Natalidae, Furipteridae, Thyropteridae, Myzopodidae, Vespertilionidae, Mystacinidae, Miniopteridae and Molossidae). These studies showing microbat paraphyly indicate that the complex suite of morphological innovations for nasal emission of laryngeal echolocation pulses found in rhinolophoid bats either evolved independently at least twice, or once with the subsequent loss in Pteropodidae (Simmons and Geisler, 1998, Springer *et al.*, 2001). This also has implications for the evolution of flight, where many features of flight and ventilation are either directly related or functionally correlated with echolocation (Teeling *et al.*, 2000). Hence, morphological characters previously suggested as synapomorphies of microchiropterans (e.g. features of the inner ear and post-cranial skeleton) have probably also evolved independently, together with the evolution of laryngeal echolocation (Teeling *et al.*, 2000).

Contrary to an earlier suggestion that included Furipteridae, Natalidae, Thyropteridae, and Myzopodidae in the Rhinolophoidea clade (Simmons and Geisler, 1998), the recent

molecular studies have confirmed an expanded superfamily, Noctilionoidea, which includes the families Noctilionidae, Furipteridae, Phyllostomidae, Mormoopidae, Mystacinidae, and Thyropteridae (Teeling *et al.*, 2002; Hooper *et al.*, 2003; Van den Bussche and Hooper, 2004; Teeling *et al.*, 2005; Eick *et al.*, 2005). However, placement of some families is still controversial, since the results of Teeling *et al.* (2005) showed good support for the basal position of Myzopodidae within Noctilionoidea, while those of Hooper *et al.* (2003) did not place Myzopoda within the Noctilionoidea, but rather in a basal position to all other “yangochiropterans”; Emballonuridae, Vespertilionoidea, Noctilionoidea. While Eick *et al.* (2005) also indicated Myzopodidae to be basal to the Vespertilionoidea, Noctilionoidea and Emballonuroidea (see figure 1 in Eick *et al.*, 2005: 1874), their finding apparently had no significant nodal support and alternative topologies could not be rejected by the data (Eick *et al.*, 2005).

The other superfamilies recognised by the molecular studies are the Rhinolophoidea (including the families Rhinolophidae, Megadermatidae, Craseonycteridae, and Rhinopomatidae), Emballonuroidea (including the families Emballonuridae and Nycteridae), and Vespertilionoidea (including the families Vespertilionidae, Mollosidae, Natalidae, and Miniopteridae) (Eick *et al.*, 2005; Teeling *et al.*, 2005 [although no miniopterids were included in this study], Springer *et al.*, 2001; Hooper *et al.*, 2003) [although no miniopterids were included in this study]. Springer *et al.* (2001) also recognised the superfamily Pteropodoidea.

Both Eick *et al.* (2005) and Teeling *et al.* (2005) also found similar sister taxa groups between the families, with Furipteridae and Noctilionidae (probably what was meant by Noctilionoidea in Eick *et al.* (2005)), and Nycteridae and Emballonuridae being sister taxa.

Many families can be diagnosed by unique morphological apomorphies and/or combinations of plesiomorphic and apomorphic features that strongly suggest monophyly (Miller 1897; 1907; Hill 1974; Van Valen 1979; Koopman 1984; 1994; Griffiths and Smith 1991; Corbet and Hill 1992; Griffiths *et al.* 1992; Griffiths 1994). The principal exception is Vespertilionidae, a diverse group that comprises between five and eight subfamilies in different classifications: Kerivoulinae, Miniopterinae, Murininae, Tomopeatinae, Vespertilioninae, Nyctophilinae (included within Vespertilioninae by Koopman (1994) and Volleth and Heller (1994)), Antrozoinae (named as a subfamily by Miller (1897) but subsequently included either within Nyctophilinae (e.g. Hill and Smith, 1984) or Vespertilioninae (e.g. Koopman, 1993; 1994), and Myotinae (usually included as a tribe within Vespertilioninae (Koopman, 1994) but here raised to subfamily rank following the suggestion of Volleth and Heller (1994). The molecular work of Hooper and Van Den Bussche (2003) suggested four subfamilies in the family Vespertilionidae: Vespertilioninae, Myotinae, Kerivoulinae and Murininae, with the subfamily Miniopterinae being elevated to family level, Miniopteridae. However, the intron results of Eick *et al.* (2005) were not able to reject or support alternative hypotheses that Miniopteridae was the sister taxa of Molossidae, and not the sister taxa of Vespertilionidae.

SUBORDER PTEROPODIFORMI

1821. *FRUCTIVORAE* Grey, pp. 299. Named at ordinal rank.
 1855. *FRUGIVORA* Giebel, pp. 991.
 1866. *Pterocynes* Haeckel, pp. clx. *Nomen oblitum*.
 1875. *MEGACHIROPTERA* Dobson, pp. 346.
 1875. *MICROCHIROPTERA* Dobson, pp. 346. In part.
 2001. *YINPTEROCHIROPTERA* Springer, Teeling, Madsen, Stanhope, and De Jong, Proceedings of the National Academy of Science 98(11): 6423.
 2004. *PTEROPODIFORMES* Hutcheon and Kirsch, Journal of Mammalian Evolution 11(1): ??
 *? *PTEROPODIFORMI* The name of the suborder is based on *Pteropus* Brisson, 1762 (type of Pteropodidae Gray, 1821).

The suborder name follows the typified name proposed for standardization of nomenclature of used by Hutcheon and Kirsch (2004, 2006), but higher taxa by Alonso-Zarazaga (2005). with the ending changed to follow the format

INFRAORDER PTEROPODIFORMACEI

- *? *PTEROPODIFORMACEI* The name of the Infraorder is based on *Pteropus* Brisson, 1762 (type of Pteropodidae Gray, 1821).

Superfamily PTEROPODOIDEA

- *? *PTEROPODIDEA* The name of the superfamily is based on *Pteropus* Brisson, 1762 (type of Pteropodidae Gray, 1821).

Family PTEROPODIDAE Bonaparte, 1838

1821. *Cephalotidae* Gray,
 1821. *Pteropidae* Gray, London Med. Repos., 15: 299
 *1838. *PTEROPODIDAE* Bonaparte, Type genus: *Pteropus* Erxleben, 1777
 1842. *Harpyidae* H. Smith,

Taxonomy:

The taxonomy of the Pteropodidae follows that of Bergmans (1988; 1989; 1991; 1994; 1997) and Simmons (2005: 313-350).

Corbet and Hill (1992: 55) refer to Handley (1980) for a discussion on the correct formation of the family name. Simmons (2005: 313) suggests that the relationships among the pteropodid genera are not yet fully resolved, and no subfamilial or tribal groups were recognized pending a thorough reevaluation of pteropodid classification.

Common names:

Czech: kalonovití. Dutch: Grote fruitvleermuizen, Vliegende honden. English: Old World Fruit bats. Finnish: Hedelmäpakot. German: Flughunde. Norwegian: Flyvende hunder, kalong.

Subfamily MACROGLOSSINAE Gray, 1866

1866. *Macroglossina* Gray, Not included in Simmons (2005) since it was not proposed as family name, but as a subdivision within the Pteropodidae (Simmons, pers. comm.).
- *1866. *MACROGLOSSINAE* Gray,
1875. *Macroglossi* Dobson, Type genus: *Macroglossus* F. Cuvier, 1824
1891. *Carponycteriinae* Lydekker, Type genus: *Carponycteris* Lydekker, 1891
1898. *Kiodotinae* Palmer,

Genus *Megaloglossus* Pagenstecher, 1885

- *1885. *Megaloglossus* Pagenstecher, Zool. Anz., 8: 245. Publication date: 27 April 1885. Type species: *Megaloglossus woermanni* Pagenstecher, 1885.
1891. *Trygenycteris* Lydekker, Mammals Living and Extinct, p. 655. Type species: *Megaloglossus woermanni* Pagenstecher, 1885. Proposed to replace *Megaloglossus*, thought to be preoccupied by *Megaglossa* Rondani, 1865 (Diptera): see Allen (1939: 63).

Common names:

English: African Long-tongued Fruit-bats, African Nectar Fruit-bats.

Megaloglossus woermanni Pagenstecher, 1885

- *1885. *Megaloglossus woermanni* Pagenstecher, Zool. Anz., 8: 245. Type locality: Gabon: Ssibange farm. Type specimen: ZMB 54589 (Holotype; ad, F, skin and skull; collector: H. Soyaux; collection date: 21 January 1885, old number 9489; see Bergmans, 1997: 60, 63;). Publication date: 27 April 1885.
1966. *Megaloglossus woermanni prigoginii* Hayman, Ann. Kon. Mus. Mid. Afr. Zool. Wetensch., (8) 154: 26. Type locality: Democratic Republic of the Congo: Kiliza, 1370 m, [03 42 S 28 10 E] Type specimen: RMCA 32577 (ad M, skin and skull, collector A. Prigogine, original number 1248, collection date 25 May 1964; see Bergmans, 1997: 60).
1997. *Megaloglossus woermanni prigoginei*: Bergmans, Beaufortia, 47 (2): 59. Lapsus.
2003. *Megaloglossus woermanni*: Giannini and Simmons, Cladistics, 19 (6): 508. Lapsus.

Taxonomy:

See Bergmans and Van Bree (1972), Bergmans (1997) and Simmons (2005:326 - 327).

Common names:

English: Woermann's Long-tongued Fruit-bat, Woermann's bat, Woermann's fruit bat, Nectar bat, African Long-tongued bat. French: Macroglosse de Woermann

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ao).

General distribution:

Guinea (Fahr and Ebigbo, 2003: 128), Liberia, Côte d'Ivoire (Henry *et al.*, 2004: 24), Togo and Nigeria (Capo-Chichi *et al.*, 2004: 161), over Central African Republic (Morvan *et al.*, 1999: 1195) to Uganda (Kityo and Kerbis, 1996: 58), Congo Republic (Dowsett *et al.*, 1991: 259), S Zaire, and N Angola; Bioko.

Figure 1. Distribution of *Megaloglossus woermanni*

Distribution based on voucher specimens: Cameroon, Congo (Democratic Republic of the), Gabon, Ghana.

Subfamily PTEROPODINAE Gray, 1821

1866. *Epomophorina* Gray, Not included in Simmons (2005) since it was not proposed as family name, but as a subdivision within the Pteropodidae (Simmons, pers. comm.).
1881. *Harpyiinae* Robin, Included with a question mark in the synonymy of the Nyctimeninae by Corbet and Hill (1992: 77).
1907. *Harpionycterinae* Miller, Bull. U.S. Natl. Mus., 57: 77. Type genus: *Harpionycteris* Thomas, 1896. Recognized as a valid subfamily by Corbet and Hill (1980, 1992), Hill and Smith (1984), Bergmans (1997: 69). Publication date: 29 June 1907.
1912. *Cynopterinae* K. Andersen, Bergmans (1997: 69) considers this a valid subfamily in which he includes the genera *Cynopterus*, *Ptenochirus*, *Megaerops*, *Dyacopecterus*, *Balionycteris*, *Chironax*, *Thoopterus*, *Sphaerias*, *Aethalops*, *Penthetor*, *Latidens*, *Alionycteris*, *Otopteropus*, *Haplonycteris*.
1912. *Epomophorinae* K. Andersen, Considered as a valid subfamily by Bergmans (1997: 69) who includes the tribes Epomophorini Gray, 1866 (*Epomophorus*, *Micropteropus*, *Hypsignathus*, *Epomops*, *Nanonycteris*), Myonycterini Lawrence and Novick, 1963 (*Myonycteris*, *Lissonycteris*, *Megaloglossus*), Scotonycterini Bergmans, 1997 [new tribe] (*Scotonycteris*, *Casinycteris*), Plerotini Bergmans, 1997 [new tribe] (*Plerotes*)?
1912. *Pteropinae* K. Andersen, Bergmans (1997: 64) assigned it to Gray, 1821
1912. *Rousettinae* K. Andersen, Bergmans (1997: 69) recognizes the Rousettinae as a separate subfamily in which he included the tribes Rousettini Andersen, 1912 (*Rousettus*, *Eonycteris*, *Eidolon*) and Dobsoniini Andersen, 1912 (*Dobsonia*, *Aproteles*).
1970. *Cynopterini* Koopman and J.K. Jones Jr., Not included in Simmons (2005) since it was not proposed as family name, but as a subdivision within the Pteropodidae (Simmons, pers. comm.).
1970. *Dobsoniina* Koopman and J.K. Jones Jr., Not included in Simmons (2005) since it was not proposed as family name, but as a subdivision within the Pteropodidae (Simmons, pers. comm.).
1970. *Rousettina* Koopman and J.K. Jones Jr., Not included in Simmons (2005) since it was not proposed as family name, but as a subdivision within the Pteropodidae (Simmons, pers. comm.).

Genus *Casinycteris* Thomas, 1910

1910. *Casinycteris* Thomas, Ann. Mag. nat. Hist., ser. 8, 6 (31): 111. Type species: *Casinycteris argynnis* Thomas, 1910. . Publication date: 1 July 1910.

Taxonomy:
Revised by Bergmans (1991).

Common names:
English: Short-palate Fruit-bats, Short-palated Fruit-bats.

Casinycteris argynnis Thomas, 1910

- *1910. *Casinycteris argynnis* Thomas, Ann. Mag. Nat. Hist., ser. 8, 6 (31): 111. Type locality: Cameroon: Ja River, Bitey [03 13 N 12 22 E, 2 000 ft (=610 m)]. Type specimen: BMNH 1911.5.5.1 (ad F, collector G.L. Bates, collection date: 19 November 1909, original number 502). Publication date: 1 July 1910.

Taxonomy:
See Bergmans (1991) and Simmons (2005: 315-316).

Common names:
English: Golden Short-palate Fruit-bat, Yellow-winged Short-palate Fruit-bat, Thomas's Short-palate Fruit-bat, Short-palated fruit bat; Golden Short-palated fruit bat. French: Chauve-souris frugivore à palais court, Casinyctère.

Conservation status:
Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004k).

General distribution:
Cameroon over Central African Republic (Lunde *et al.*, 2001: 537) to E Democratic Republic of the Congo.

Distribution based on voucher specimens:
Cameroon, Congo (Democratic Republic of the).

Figure 2. Distribution of *Casinycteris argynnis*

Genus *Eidolon* Rafinesque, 1815

- *1815. *Eidolon* Rafinesque, *Analyse de la Nature*, p. 45. Type species: *Pteropus stamineus* E. Geoffroy Saint-Hilaire, 1803 (= *Vespertilio vampyrus helvus* Kerr, 1792)
1861. *Pterocyon* Peters, *Monatsb. k. preuss. Akad. Wiss. Berlin*, p. 423. Type species: *Pterocyon paleaceus* Peters, 1861 (= *Vespertilio vampyrus helvus* Kerr, 1792)
1881. *Leiponyx* Jentink, *Notes Leyden Mus.*, 3: 60. Type species: *Leiponyx büttikoferi* Jentink, 1881 (= *Vespertilio vampyrus helvus* Kerr, 1792). Publication date: April 1881.
1882. *Liponyx* Forbes, *Zool. Rec.*, 18: Mamm. p. 13 [for 1881]. Emendation of *Leiponyx* Jentink, 1881. Preoccupied by *Liponyx* Vieillot, 1816; a bird (see Meester *et al.*, 1986: 27).

Taxonomy:

Revised by Bergmans (1991). See Simmons (2005: 320).

Etymology of name:

From the Greek for phantom (see DeFrees and Wilson, 1988: 4).

Common names:

English: Straw-coloured Fruit-bats, Eidolon fruit bats.

Eidolon dupreanum (Schlegel, 1867)

- *1867. *Pteropus dupréanus* Schlegel, In Schlegel and Pollen: *Proc. zool. Soc. Lond.*, 1866, III: 419. Type locality: Madagascar: Nossi Bé. Publication date: April 1867.

Taxonomy:

Koopman (1993a: 140) mentioned Schlegel, 1867 as author, but Allen (1939a: 54), Peterson *et al.* (1995: 22) and Russ *et al.* (2001) mention Pollen, 1866, in Schlegel and Pollen, *Proc. Zool. Soc. Lond.*, 1866: 419. Meester *et al.* (1986: 28), DeFrees and Wilson (1988: 1) mention Schlegel and Pollen, 1867 as authors, but in the references of the latter only Schlegel is mentioned as author. Reviewed by Bergmans (1991) and Peterson *et al.* (1995). See Simmons (2005: 321 and comments under *E. helvum* pg. 321).

(HeV) viruses, with an overall contamination of 19.2%, but the Tioman (TiV) virus was not detected in any of the samples.

Common names:

English: Madagascan Straw-coloured Fruit-bat, Madagascan fruit bat, Malagasy straw-colored fruit bat. French: Roussette malgache couleur paille, Roussette jaune de Madagascar

Conservation status:

Global- Not assessed (IUCN 2004).

General distribution:

Madagascar.

Viruses:

In Madagascar during 2003 - 2004, Lehle *et al.* (2007) found both the Nipah (NiV) and Hendra

Figure 3. Distribution of *Eidolon dupreanum*

Distribution based on voucher specimens:
Madagascar.

Eidolon helvum (Kerr, 1792)

- *1792. *Vespertilio vampyrus helvus* Kerr, In Linnaeus: Animal Kingdom, 1 (1): xvii, 91. Type locality: Senegal: no specific locality, but fixed by K. Andersen, 1907: 504; see Meester *et al.* (1986: 28), DeFrees and Wilson (1988: 1), Harrison and Bates (1991). Publication date: February 1792.

Taxonomy:

Meester *et al.* (1986) state that "The extralimital *dupreanum* Schlegel and Pollen, 1866, from Madagascar and *sabaeum* Andersen, 1907, from Arabia are treated as subspecies of *E. helvum* by Hayman and Hill (1971)." *E. dupreanum* is here retained as a separate species and *sabaeum* is considered an extralimital subspecies and is therefore not included here. See Simmons (2005: 321).

Common names:

Afrikaans: Geel vrugtevlermuis. English: African Straw-coloured Fruit-bat, Straw-colored Fruit Bat, Straw-coloured Flying Fox. French: Roussette jaune, Roussette des palmiers africaine, Roussette paillée. German: Palmenflughund. Portuguese: Morcego frugivoro gigante.

Etymology of name:

From the Latin "*helvus*" (=dun-coloured), referring to the straw colour on their shoulders; the back, rump and hind limbs are normally various shades of brown (see DeFrees and Wilson 1988: 4, Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC (IUCN 2004; Mickleburgh *et al.*, 2004x).

Regional- South Africa- considered a vagrant not assessed, doesn't breed in SA (Friedmann and Daly 2004).

General distribution:

Gambia (Kock *et al.*, 2002: 78), Senegal, Guinea (Fahr and Ebigo (2003: 128) over Mali (Meinig, 2000: 104), Côte d'Ivoire (Henry *et al.*, 2004: 24), Benin (Capo-Chichi *et al.*, 2004: 161), Niger (Bergmans (1990) in Cotterill, 2001: 55) to Ethiopia over Uganda (Kityo and Kerbis, 1996: 58), Republic of the Congo (Dowsett *et al.*, 1991:

259), Zambia (Cotterill, 2001: 54), Malawi (Ansell and Dowsett, 1988: 28), Zimbabwe, Angola, Namibia, Botswana, Mozambique (Cotterill, 2001: 54) to South Africa; SW Arabia, Oman, Yemen; islands in Guinea Gulf and off E Africa.

Molecular biology:

Karyotype: Matthey (1962) reported $2n = 34$ (see Rautenbach *et al.* 1993).

Distribution based on voucher specimens:

"Africa", Angola, Cameroon, Congo (Democratic Republic of the), Gabon, German East Africa, Namibia, Rwanda, South Africa, Sudan, Tanzania, Togo, Unknown country, Zambia.

Figure 4. Distribution of *Eidolon helvum*

Eidolon helvum helvum (Kerr, 1792)

- *1792. *Vespertilio vampyrus helvus* Kerr, In Linnaeus: Animal Kingdom, 1 (1): xvii, 91. Type locality: Senegal: no specific locality. Fixed by K. Andersen, 1907: 504; see Meester *et al.* (1986: 28), DeFrees and Wilson (1988: 1), Harrison and Bates (1991). Publication date: February 1792.
1803. *Pteropus stramineus* E. Geoffroy Saint-Hilaire, Cat. Mamm. Mus. nat. Hist. nat., Paris, p. 48. Type locality: Sudan: Senaar. Harrison (1964: 44) refers to Sherborn to indicate that the 1803 paper has never been published. The next available date for this name is 1810: Ann. Mus. Nat. Hist., Paris, 15: 95.
1809. *Vespertilio caninus* var. *b* Goldfuss, Vergl. Naturbeschr., Säugethiere, p. 98.

- Preoccupied by *V. caninus* Blumenbach, 1797: see Meester *et al.* (1986: 28).
1861. *Pterocyon paleaceus* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 423. Type locality: Sudan: Senaar. Originally "Africa", but restricted to Senaar by Matschie (1899: 62): see Meester *et al.* (1986: 28), DeFrees and Wilson (1988: 1).
1862. *Pteropus mollipilosus* H. Allen, Proc. Acad. Nat. Sci. Philadelphia, 13 (11): 159 (for 1861). Type locality: Gabon: "Gaboona".
1865. *Pteropus palmarum* Heuglin, Leopoldina (Halle), 5 (3 & 4): 34. Type locality: Sudan: Senaar. Originally "Middle and Upper White Nile and between Senaar and Fazogli along the Blue Nile", but subsequently fixed as Senaar by Koopman (1975: 360): see Meester *et al.* (1986: 28), DeFrees and Wilson (1988: 1). Date: June 1865.
1866. *Xantharpyia leucomelas* Fitzinger, in Heuglin and Fitzinger. Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 54: sect. 1, pt. 10, p. 544. Type locality: Sudan: Kordofan, Bahr-el-Azrak, Bahr-el-Abiad, Sennaar. Originally "Upper Nile lands", but subsequently fixed to Senaar by Koopman (1975): see Meester *et al.* (1986: 28), DeFrees and Wilson (1988: 1).
1881. *Leiponyx büttikoferi* Jentink, Notes Leyden Mus., 3: 59. Type locality: Liberia: St. Paul's river, Millsburg. Publication date: April 1881.
1953. *Pterocyon palaeceus* Ellerman, Morrison-Scott and Hayman, Southern African Mammals, p. 44. Lapsus: see Meester *et al.* (1986: 28).
1975. *Pterocyon palaceus* Koopman, Bull. Am. Mus. Nat. Hist., 154 (4): 357. Lapsus: see Meester *et al.* (1986: 28).
2000. *Eidolon helvum annobonensis* Juste, Ibáñez and Machordom,

General distribution:

See species, with the exception of SW Arabia.

Genus *Epomophorus* Bennett, 1836

1835. *Pteropus* Ogilby, Proc. zool. Soc. Lond., 1835, III (xxxi): 100. Preoccupied by *Pteropus* Erxleben, 1777. Publication Date: 9 October 1835.
- *1836. *Epomophorus* Bennett, Proc. zool. Soc. Lond., 1835, III (xxxiv): 149. Type species: *Pteropus whitei* var. *epomophorus* Bennett, 1836 (= *Pteropus gambianus* Ogilby, 1835). Publication date: 12 February 1836.
1853. *Pachysoma* Temminck, Esquisses zool. Côte de Guinée, p. 64. Preoccupied by *Pachysoma* MacLeay, 1821, a genus of Coleoptera: see Boulay and Robbins (1989: 1). Not *Pachysoma* I. Geoffroy Saint-Hilaire, 1828.

Taxonomy:

Revised by Bergmans (1988), who transferred *Micropteropus grandis* to this genus. A key to this genus is presented in Boulay and Robbins (1989) and Claessen and De Vree (1991: 227). See Simmons (2005: 322).

Etymology of name:

From the Greek "epi" (=upon), "omos" (=shoulder), and "phoros" (=bearing), referring to the conspicuous tufts of hair on the shoulders of the males (see Boulay and Robbins 1989: 4).

Common names:

English: Epauletted Fruit-bats. French: Chauve-souris à épaulettes. German: Epaulettenflughund.

Distribution based on voucher specimens:

Namibia.

Epomophorus angolensis Gray, 1870

- *1870. *Epomophorus macrocephalus* var. *angolensis* Gray, Cat. Monkeys, Lemurs, Fruit-eating Bats Brit. Mus., p. 125. Type locality: Angola: Benguela. Type specimen: BMNH 1864.1.9.4.
- ? *Epomophorus angolensis*: Name combination.

Taxonomy:

See Bergmans (1988) and Simmons (2005: 322).

Common names:

Afrikaans: Angola-witkolvrugtevlermuis. English: Angolan Epauletted Fruit-bat. French: Roussette à épaulettes d'Angola.

Etymology of name:

Named from a specimen taken at Benguela, Angola (see Smithers 1983: 56, Taylor 2005).

Conservation status:

Global- Rare (Groombridge 1994); LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004a).

General distribution:

W Angola, NW Namibia.

Distribution based on voucher specimens:

Angola, Namibia.

Figure 5. Distribution of *Epomophorus angolensis*

Epomophorus anelli Bergmans and Van Strien, 2004

- *2004. *Epomophorus anelli* Bergmans and Van Strien, Acta Chiropt., 6 (2): 258. Publication date: The volume is for "September 2004", but the paper has been accepted on 16 October 2004. Type locality: Malawi: Kasungu National Park, Lisanthu [13 00 S 33 10 E, 1 000 m]. Type specimen: ZMA 21.693b (holotype: ad M, alcoholic and skull, collector H. Jachmann, orig nr #25, collection date 19 March 1982. paratype: 1 almost ad F, skin and skull, ZMA 26.105, collector N.J. Van Strien #162, 19 May 1988 (Lifupa Camp - 13.05 S 30.05 E , 1050m): see Bergmans and Van Strien, 2004: 258 - 259).

Taxonomy:

Not recognized in Simmons (2005), as description published while book in press. See Bergmans and Van Strien (2004).

Common names:

No names suggested at this time.

Etymology of name:

In honour of Mr. W.F.H. Ansell for his important contributions to the mammalogy of Malawi and other African countries (see Bergmans and Van Strien, 2004: 262).

Conservation status:

Global- Not assessed (IUCN 2004).

General distribution:

Malawi.

Distribution based on voucher specimens:

Malawi.

Figure 6. Distribution of *Epomophorus anelli*

Epomophorus gambianus (Ogilby, 1835)

- *1835. *Pteropus gambianus* Ogilby, Proc. zool. Soc. Lond., 1835, III (xxxi): 100. Type locality: Gambia: Banjul. Restricted by Kock *et al.* (2002: 80). Publication date: 9 October 1835.
1835. *Epomophorus gambianus* Ogilby, Name combination.
1836. *Pteropus epomophorus* Bennett, Proc. zool. Soc. Lond., 1835, III (xxxiv): 149. Type locality: Gambia: Gambia. Publication date: 12 February 1836.
1898. *Epomophorus guineensis* Bocage, J. Sci. mat. phys. nat., Lisboa, ser. 2, 5: 136, fig. 3. Type locality: Guinea Bissau: Bolama. Publication date: June 1898.
1960. *Epomophorus gambianus parvus* Ansell, Rev. Zool. Bot. afr., 61: 160. Type locality: Zambia: Zambezi (originally Balovale) district, restricted to Chingi [13 01 S 22 44 E] by Ansell (1978: 17). Type specimen: BMNH 1959.610.

Taxonomy:

See Boulay and Robbins (1989), Claessen and De Vree (1990) and Simmons (2005: 322).

Common names:

Afrikaans: Gambiaanse witkolvrugtevlermuis.
 English: Gambian Epauletted Fruit bat, Gambian Epauletted Bat. French: Epomophore de Gambie, Chauve-souris à épaulettes de Gambie.

Etymology of name:

Named as the species was described from a specimen from Gambia in West Africa (see Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004h).

Regional- South Africa- DD ver 3.1 (2001) as *E. g. crypturus* (Friedmann and Daly 2004).

General distribution:

Senegal over Guinea (Fahr and Ebigbo, 2003: 128), Mali (Meinig, 2000: 104), Benin (Capo-Chichi *et al.*, 2004: 161), Central African Republic (Morvan *et al.*, 1999: 1195) to W Ethiopia; S Tanzania to Angola, Botswana, Namibia, Zambia, Zimbabwe, Malawi (Happold and Happold, 1997: 813), and South Africa.

Molecular biology:

Karyotype - Peterson and Nagorsen (1975) recorded the following for specimens identified as *E. gambianus* from Zimbabwe: $2n = 35$, FN = 68, BA = 34. They also recorded for specimens identified as *E. crypturus* (here considered a synonym of *E. gambianus*), $2n = 35$ for a male, and $2n = 36$ for a female (Peterson and Nagorsen, 1975).

Figure 7. Distribution of *Epomophorus gambianus*

Distribution based on voucher specimens:

"Africa", Benin, Botswana, Burkina Faso, Cameroon, Central African Republic, Chad, Congo (Democratic Republic of the), Cote D'Ivoire, Ethiopia, Ghana, Guinea, Malawi, Mali, Mozambique, Namibia, Niger, Nigeria, Senegal, Sierra Leone, South Africa, Sudan, Swaziland, Tanzania, The Gambia, Togo, Unknown Country, Zambia, Zimbabwe.

Epomophorus gambianus crypturus Peters, 1852

- *1852. *Epomophorus crypturus* Peters, Naturw. Reise Mossamb., Säugethiere, p. 26, pl. 5, pl. 13, f. 1 - 6. Type locality: Mozambique: Tete. Type specimen: ZMB 10080 (Lectotype; designated by Andersen 1912: 537). 4 paralectotypes also designated by Andersen (1912).
1960. *Epomophorus gambianus parvus* Ansell, Rev. Zool. Bot. afr., 61: 160. Type locality: Zambia: Zambezi (originally Balovale) district, restricted to Chingi [13 01 S 22 44 E] by Ansell (1978: 17). Type specimen: BMNH 1959.610.
1986. *Epomophorus crypturus parvus* Meester, Rautenbach, Dippenaar and Baker, Transvaal Museum Monograph, 5: xx. Name combination.
1988. *Epomophorus gambianus crypturus* Bergmans, Beaufortia, 38 (5): xx. Name combination.
- ? *Epomophorus angolensis* Not of Gray, 1870
- ? *Epomophorus gambianus* Not of Ogilby, 1835

Taxonomy:

Bronner *et al.* (2003) state that *Epomophorus crypturus* was previously afforded full species status (Corbet and Hill 1980); Swanepoel *et al.* 1980; Honacki *et al.* 1982; Meester *et al.* 1986; Claessen and De Vree 1990, 1991; Simmons (2005: 322). However, following Bergmans (1988, 1997), Boulay and Robbins (1989) and Koopman (1993a), we treat it as a subspecies of *E. gambianus*.

Meester *et al.* (1986): states that Koopman (1966) considers the possibility that the extralimital *E. anurus* Heuglin, 1864, may be conspecific with *crypturus*. This would extend the range of *crypturus* to Uganda, Rwanda, southern Sudan, Ethiopia, Eritrea and westwards to Nigeria. However, Kock (1969a) and Koopman (1975) regard *anurus* instead as a synonym of the extralimital *E. labiatus* (Temminck, 1837), while Hayman and Hill (1971) retain it as a separate species, so that a close relationship with *crypturus* does not seem to be indicated. Further uncertainty surrounds the status of *E. gambianus parvus*. Ansell (1978), while treating *parvus* as a subspecies of *gambianus*, expresses doubt whether *parvus* can be distinguished at species level from *crypturus*, and suggests that *crypturus* and *gambianus* are conspecific, with *parvus* as an intermediate subspecies or a stage in a cline

running between them. Koopman (in Honacki *et al.*, 1982) retains *gambianus* as a separate species, but includes *parvus* in *crypturus*, without specifying whether or not he regards it as subspecifically distinct. While acknowledging that this problem remains to be solved we shall provisionally treat *parvus* as a taxon of *crypturus*.

Common names:

Peters's Epauletted Fruit Bat.

Etymology of colloquial name:

In honour of W.C.H. Peters who in 1852 published a monumental work on zoological material collected mainly in the Tete District of Mozambique (Smithers, 1983: 58).

Conservation status:

Global assessment- LC ver 3.1 (2001) assessed as *Epomophorus crypturus* (IUCN 2004; Mickleburgh *et al.*, 2004b).
Regional- South Africa- DD ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Zambia, Tanzania, SE Dem Rep. Congo, Mozambique, Malawi, Zimbabwe, Botswana, Namibia, South Africa (Simmons 2005: 322).

Epomophorus gambianus gambianus (Ogilby, 1835)

- *1835. *Pteropus gambianus* Ogilby, Proc. zool. Soc. Lond., 1835, III (xxxi): 100. Type locality: Gambia: Banjul. Restricted by Kock *et al.* (2002: 80). Publication date: 9 October 1835.
1835. *Pteropus macrocephalus* Ogilby, Proc. zool. Soc. Lond., 1835, III (xxxi): 101. Type locality: Gambia: Gambia. Publication date: 9 October 1835.
1835. *Epomophorus gambianus* Ogilby, Name combination.
1835. *Pteropus megacephalus* Swainson, On the natural history and classification of quadrupeds, p. 92. Type locality: West Africa: no specific locality.
1836. *Pteropus whitei* Bennett, Trans. Zool. Soc. Lond., 2 (1): 37, pl. 6, pl. 7. Type locality: Gambia: Gambia. Type specimen: BMNH 1907.1.1.232. Publication date: 2 October 1836.
1838. *Epomophorus whitii* Gray, Mag. Zool. Bot., 2 (12): 504. Publication date: 1 February 1838. Name combination and incorrect subsequent spelling, see Boulay and Robbins (1989: 1). Publication date: 1 February 1838.
1898. *Epomophorus guineensis* Bocage, J. Sci. mat. phys. nat., Lisboa, ser. 2, 5: 136, fig. 3. Type locality: Guinea Bissau: Bolama. Publication date: June 1898.
1899. *Ep[omophorus (Epomophorus)] zechi* Matschie, Megachiroptera Berlin Mus., p. 46, pl 10, fig. 3 a-c. Type locality: Benin: Togoland, Kunjuruma (location from lectotype: see G.M. Allen (1939a: 56). - Boulay and Robbins (1989: 1) mention "Accra, Goldkuste [=Ghana], Gross-Popo, Misahoho in Togoland, Lagos [Nigeria], restricted to Kunjuruma, Togoland [=Benin] by Andersen (1912)".) Preface by Matschie is dated 14 May 1899.
1950. *Epomophorus reii* Aellen, Rev. Suisse Zool., 57: 559. Type locality: Cameroon: Rei Boubouba. Type specimen: ? (ad F, collection date 13 September 1947, original number N 1437; 2 paratypes).
- ? *Epomophorus anurus* Not of Heuglin, 1864.
- ? *Epomophorus gambianus gambianus*: Name combination.
- ? *Epomophorus sp.*

Taxonomy: ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004h).
 Simmons (2005:322) does not include *crypturus*.

Common names: Gambian Epauletted Fruit Bat.
 General distribution: Senegal and Gambia to Central Africa Republic, east to Sudan, Ethiopia, S to Malawi and Botswana (Simmons 2005: 322).

Conservation status: Global- LR/lc (Baillie and Groombridge 1996); LC

Epomophorus gambianus pousarguesi Trouessart, 1904

- *1904. *Epomophorus pousarguesi* Trouessart, Cat. Mamm. Viv. Foss., Suppl.: 55. Type locality: Central African Republic(?): Grande Brousse between Yabanda and Mpoko. Boulay and Robbins (1989: 1) mention "Africa Occ.-Centrali, a fl. Chari (Inter Yabanda et Mpoko), reg. Lac. Chad. Central African Republic; restricted to 'along the track between Mpoko (near Makorou) and Yabanda' by Bergmans (1978b)". The type locality is sometimes given as "Eastern Congo, Shari region". Description based on *E. macrocephalus* Pousargues (not Ogilby) see G.M. Allen (1939a: 56). Type specimen: MNHN 1892-1020.
- ? *Epomophorus gambianus* Not of Ogilby, 1835.
- ? *Epomophorus gambianus pousarguesi*: Name combination.

Taxonomy: Recognized as a subspecies (Simmons 2005: 322).

Epomophorus grandis (Sanborn, 1950)

- *1950. *Micropteropus grandis* Sanborn, Publ. Cult. Comp. Diamantes Angola, 10: 55. Type locality: Angola: Lunda, Dundo.
1988. *Epomophorus grandis* Bergmans, Beaufortia, 38 (5): xx. Name combination.

Taxonomy:

Transferred from *Micropteropus* to *Epomophorus* by Bergmans (1988). See Simmons (2005: 322).

Common names:

English: Sanborn's Epauletted Fruit-bat, Lesser Angolan epauletted fruit bat. French: Epomophore de Sanborn, Petit Epomophore frugivore d'Angola.

Conservation status:

Global- Rare (Groombridge 1994); EN (Baillie and Groombridge 1996); DD (Hilton-Taylor 2000); DD ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004d).

General distribution:

N Angola, S Republic of the Congo.

Epomophorus labiatus (Temminck, 1837)

- *1837. *Pteropus labiatus* Temminck, Monogr. Mamm., 2: 83, pl. 39. Type locality: Sudan: Blue Nile province, Sennar (originally given as "Abyssinia"; see Horáček, Hanak and Gaisler (2000: 96)). Type specimen: RMNH 27342 (Lectotype; F, juv, type leg. dr. Paolo Emilio Botta; see Kock, 1969: 18).
1842. *Pteropus schoënsis* Rüppell, Mus. Senckenberg., 3 (2): 131. Type locality: Ethiopia: Shoa. Type specimen: SMF 4370 (M, imm, skin and skull; leg. E. Rüppell, 1841, old catalog II.A.13a; see Kock, 1969: 18; Mertens (1925: 20) mentions it as a juv F).
1860. *Epomophorus labiatus*: Tomes, Proc. zool. Soc. Lond., 28: 55 - 56. Name combination.
1860. *Epomophorus schoënsis*: Tomes, Proc. zool. Soc. Lond., 28: 55 - 56. Name combination.
1864. *Epomophorus anurus* Heuglin, Type locality: Sudan: Bahr-el-Ghazal, Bongo (Originally: "Gebied zw. Wau am Djur River und dem Getti River im Westen": see Kock (1969: 18)). Two syntypes: SMNS 1090 (M, imm) and SMNS 1091 (F, ad).
1877. *Pteropus (Epomophorus) anurus*: Heuglin, Reise in Nordost-Afrika: 16 - 17. Name combination.
1877. *Pteropus (Epomophorus) labiatus*: Heuglin, Reise in Nordost Afrika, 2: 15 - 16. Name combination.
1877. *Pteropus (Epomophorus) schovanus*: Heuglin, Reise in Nordost Afrika, 2: 18. Emendation of *schoënsis* (see G.M. Allen, 1939a: 56; Kock, 1969: 18)
1880. *Epomophorus minor* Dobson, Proc. Zool. Soc. Lond., 1879, IV: 715. Type locality: Tanzania: Zanzibar. Type specimen: BMNH 79.9.12.4 (imm) -. Publication date: April 1880. Considered a valid species by Kock (1969: 18 - 24), Koopman (1975: 363), Ansell and Dowsett (1988: 27), but see Claessen and De Vree (1991).
1899. *Ep[omophorus (Epomophorus)] doriae* Matschie, Megachiroptera Berlin Mus., p. 54. Type locality: Eritrea: Bogos country [=Keren region]. Type specimens: ZMB 5384 (Holotype; F, ad, skin), ZMB 10079 (Holotype; skull), vendor Gerrard; see Kock, 1969: 18).
1912. *Epomophorus gambianus* K. Andersen, 538
1912. *Epomophorus gambianus* Thomas, 270
1915. *Epomophorus gambianus* Schwarz, 59
1921. *Epomophorus anurus* Thomas et al, 1
1935. *Epomophorus gambianus* Braestrup, 86
1936. *Epomophorus labiatus minor* G.M. Allen and Lawrence, Bull. Mus. comp. Zool., 79 (3): 45. Name combination. (Locality suggestive of *labiatus* rather than *Epomophorus minor* Dobson, 1880).
1939. *Epomophorus gambianus* Monard, 52
1950. *Epomophorus gambianus* Rousselot, 233
1950. *Epomophorus reii* Aellen, 559; (type locality: Cameroon: Rei Bouba.)
1959. *Epomophorus gambianus* Booth, 28
1960. *Epomophorus labiatus anurus*: Harrison, J. East. Afr. nat. Hist. Soc., 23 (7) (104): 287. Name combination.
1965. *Epomophorus anurus* Rosevear, 100
1965. *Epomophorus gambianus* Rosevear, 94 (in part: not the specimens mentioned from the Congolese Republic, Northern Rhodesia and Gaboon)
1966. *Epomophorus crypturus*: Hayman, Misonne and Verheyen, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., (8) 154: 23 (in part: specimen IRSN 10677 from "Kilwezi"- lable reads Kilubwezi). Not of Peters, 1852.
1968. *Epomophorus gambianus* Van Orshoven et al, 182
1971. *Epomophorus gambianus* Hayman and Hill, 7; (in part: not the specimens from Katanga, Zambia and Rhodesia)
1971. *Epomophorus sp.* Hill and Morris, 29
1972. *Epomophorus anurus* Adam et al., 59
1972. *Epomophorus gambianus* Dorst et al, 396
1973. *Epomophorus gambianus* Eisentraut, 356
1974. *Epomophorus gambianus* Ayensu, 702
1974. *Epomophorus gambianus* Largen, Kock and Yalden, 227
1974. *Epomophorus labiatus labiatus* Largen, Kock and Yalden, Mon. Zool. ital., (N.S.) 16 (Suppl. 5): 226-227. Name combination.

1975. *Epomophorus gambianus* Poche, 41
 1975. *Epomophorus gambianus* Eisentraut, 78
 1975. *Epomophorus gambianus* Jeffrey, 955
 1975. *Epomophorus gambianus* Koopman, 364
 1977. *Epomophorus reii* Baud, 203
 1978. *Epomophorus gambianus* Kock, 119
 1978. *Epomophorus gambianus* Koopman et al, 2
 1978. *Epomophorus gambianus* Happold et al, 74
 1980. *Epomophorus gambianus* Robbins, 85
 1982. *Epomophorus gambianus* Marshall et al,
 1982. *Epomophorus gambianus* Schlitter *et al.*, 138; (in part: the specimen quoted from De Pousargues is in fact the holotype of *Epomophorus pousarguesi* Trouessart, 1904)
 1984. *Epomophorus gambianus* Koch-Weser, 261
 1986. *Epomophorus gambianus* Tuttle, 540-558. Not of Ogilby, 1835
 1987. *Epomophorus anurus* Happold, 43
 1988. *Epomophorus gambianus gambianus* Bergmans, 84 - 92
 1996. *Epomophorus anarus* Kityo and Kerbis, J. East Afr. Nat. Hist., 85: xx. Lapsus.

Taxonomy:

Includes *anurus* and *minor*; see Claessen and De Vree (1991), but see also Bergmans (1988) and Simmons (2005: 322 - 323).

Common names:

English: Little Epauletted Fruit-bat, Ethiopian Epauletted Fruit-bat. French: Epomophore d'Ethiopie, Roussette labiée.

Etymology of name:

From the Latin "*labiatus*" for lipped.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004c).

General distribution:

Nigeria to Ethiopia, and Djibouti (Pearch *et al.* (2001: 392); and south to Uganda (Kityo and Kerbis, 1996: 59), Republic of the Congo, Malawi, Saudi Arabia and Yemen. Senegal records are probably erroneous (see Bergmans, 1988), although Capo-Chichi *et al.* (2004: 161) do refer to these records.

Molecular biology:

Karyotype - Dulic and Mutere (1973b) recorded the diploid number as $2n=36$.

Figure 8. Distribution of *Epomophorus labiatus*

Distribution based on voucher specimens: Burundi, Chad, Congo (Democratic Republic of the), Eritrea, Ethiopia, German East Africa, Kenya, Malawi, Rwanda, Somalia, Sudan, Tanzania, Uganda, Unknown country, Zambia.

Epomophorus labiatus minor Dobson, 1880

- *1880. *Epomophorus minor* Dobson, Proc. Zool. Soc. Lond., 1879, IV: 715. Type locality: Tanzania: Zanzibar. Type specimen: BMNH 1879.9.12.4. Publication date: April 1880. Considered a valid species by Kock (1969: 18 - 24), Koopman (1975: 363) and Ansell and Dowsett (1988: 27), but see Claessen and De Vree (1991).

- ? *Epomophorus anurus* Not of Heuglin, 1864
 ? *Epomophorus labiatus*
 ? *Epomophorus labiatus anurus* Not of Heuglin, 1864
 ? *Epomophorus labiatus minor*: Name combination.
 ? *Epomophorus pusillus*

Taxonomy:

Recognized as a full species by Simmons (2005: 323).

Conservation status:

Global- Unknown.

Common names:

Minor Epauletted Fruit Bat

General distribution:

Ethiopia, Somalia, Sudan, Kenya, Rwanda, SE Dem. Rep. Congo, Zambia, Tanzania, Zanzibar, Uganda, Malawi (Simmons 2005: 323).

Etymology of name:

From the Latin "*minor*" (= smaller).

Epomophorus minimus Claessen & De Vree, 1991

1837. *Pteropus labiatus*: Temminck, Mon. Mammal., 2: 83 - 84. Partim. One of the type specimens, an adult male, which later disappeared (Claessen and De Vree, 1991: 216).
1861. *Epomophorus labiatus*: Tomes, Proc. zool. Soc. Lond., 29: 11. Partim.
1899. *Ep[omophorus (Epomophorus)] schoensis*: Matschie, Megachiroptera Berlin Mus., p. 44, 53. Partim. Not of Rüppell, 1842.
1930. *Epomophorus minor*: Zammarano, Le colonie Italiane: 146. Not of Dobson, 1880.
1939. *Epomophorus labiatus minor*: G.M. Allen, Bull. Mus. comp. Zool., 83: 56. Partim. Not of Dobson, 1880.
1971. *Epomophorus labiatus labiatus*: Hayman and Hill, Order Chiroptera: 6 - 7. Partim.
1984. *Epomophorus labiatus anurus*: Aggundey and Schlitter, Ann. Carnegie Mus., 53 (5): 124. Animals from Katilo. Not of Heuglin, 1864.
- *1991. ***Epomophorus minimus*** Claessen and De Vree, Senckenb. Biol., 71: 216. Type locality: Ethiopia: Shewa, Bahadu [10 05 N 40 37 E, 600 m]. Type specimen: SMF 44238 (Holotype, ad F, alcoholic and skull, collector M. Largen, collection date: 3 - 7 May 1971, original number 16194).

Taxonomy:

Included in *E. minor* by Bergmans (1988).
Recognized as a full species by Claessen and De Vree (1991); Simmons (2005: 323).

Common names:

English: Least Epauletted Fruit-bat, East African Epauletted Fruit-bat. French: Petit Epomophore.

Etymology of name:

From the Latin for smallest.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004i).

General distribution:

Ethiopia to Uganda (Kityo and Kerbis, 1996: 58) and Tanzania.

Distribution based on voucher specimens:

[Ethiopia](#), [Kenya](#), [Somalia](#), [Tanzania](#), Uganda.

Figure 9. Distribution of *Epomophorus minimus*

Epomophorus wahlbergi (Sundevall, 1846)

1846. *Pteropus haldemani* Hallowell, Proc. Acad. Nat. Sci. Philadelphia, 3 (3): 52. Type locality: West Africa: no specific locality. Allen (1939a: 56) suggests that the specimen might possibly have come from Liberia. Considered a valid species by Schutt and Simmons (1998: 27). Publication date: prior to July 1846.
- *1846. *Pteropus Wahlbergi* Sundevall, Öfvers. K. Svenska Vet.-Akad. Forh. Stockholm, 3 (4): 118. Type locality: Republic of South Africa: Natal, near Port Natal [=Durban] (originally: "Prope Port-Natal et in Caffraria interiore occisus" see Acharya (1992: 1)).
1870. *Epomophorus macrocephalus* var. *unicolor* Gray, Cat. Monkeys, Lemurs, Fruit-eating Bats Brit. Mus., p. 125. Type locality: Mozambique: Zambesi, Shupanga [18 S, J]. Type specimen: BMNH 1864.8.16.1.
1899. *Epomophorus (Epomophorus) neumanni* Matschie, Megachiroptera Berlin Mus., p. 43, 50. Type locality: Kenya: Mombasa. This is the locality of the lectotype: see G.M. Allen (1939a: 57). Acharya (1992: 1) mentions "No type originally designated. Type locality restricted to "Mombassa, British East Africa (=Kenya) by Anderson (1912: 524)". - Matschie mentioned 14 May 1899 under his introduction.
1899. *Epomophorus (Epomophorus) stuhlmanni* Matschie, Megachiroptera Berlin Mus., p. 50. Type locality: Tanzania: Usaramo, Vikindo. This is the locality of the lectotype: see G.M. Allen (1939a: 56). Acharya (1992: 1) mentions "No type originally designated. Type locality restricted to Vikindo, Usaramo, German East Africa [=Tanzania] by Andersen (1912: 527)." In part (see G.M. Allen, 1939a: 56). - -. Matschie mentioned 14 May 1899 under his introduction.
1899. *Epomophorus (Epomophorus) zenkeri* Matschie, Megachiroptera Berlin Mus., p. 44, 46. Type locality: Angola: Cabinda, Chinchoxo. G.M. Allen (1939a: 56) mentioned the lectotype from Chinchoxo, Cabinda, Angola. Acharya (1992: 1) mentions "No type originally designated. Type locality restricted to Chinchoxo, Cabinda, Angola by Anderson (1912: 524)." -. Matschie mentioned 14 May 1899 under his introduction.
- ? *Epomophorus crypturus* Not of Peters, 1852.
- ? *Epomophorus gambianus* Not of Ogilby, 1836.
- ? *Epomophorus wahlbergi haldemani*: Name combination.
- ? *Epomophorus wahlbergi wahlbergi*: Name combination.
- ? *Epomophorus wahlbergi*: Name combination.

Taxonomy:

Reviewed by Acharya (1992). See Simmons (2005: 323).

Etymology of name:

Named after Johan August Wahlberg, explorer, hunter and outstanding collector of zoological material in Southern Africa. He was killed in 1856 by a wounded elephant near Savuti in northern Botswana (see Gyldenstolpe 1933; Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004e).

Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Cameroon to Somalia, south over Republic of the Congo (Dowsett *et al.*, 1991: 259) to Angola, Botswana, Malawi (Happold and Happold, 1997: 815), Zambia (Cotterill, 2002: 6), Zimbabwe, (possibly Namibia - Cotterill, 2004: 260) and South Africa (Liberian records probably erroneous); Pemba and Zanzibar Islands.

Molecular biology:

Figure 10. *Epomophorus wahlbergi*

Common names:

Afrikaans: Wahlberg se vrugtevlermuis, Wahlberg-witkolvrugtevlermuis. English: Wahlberg's Epauletted Fruit-bat. French: Epomophore frugivore de Wahlberg, Roussette à épauettes de Wahlberg. Portuguese: Morcego frugivoro de Wahlberg.

Karyotype - $2n = 36$, FN = 68 (Dulic and Mutere, 1973b; Peterson and Nagorsen, 1975; Dulic and Mutere 1977). Dulic and Mutere (1973b; 1977) reported BA = 17, whereas Peterson and Nagorsen (1975) reported BA = 36.

Distribution based on voucher specimens: "Africa", "Congo", Angola, Congo (Democratic Republic of the), Equatorial Guinea, Ethiopia, Gabon, Ghana, Kenya, Malawi, Mozambique, Namibia, Somalia, South Africa, Sudan, Swaziland, Tanzania, Tanzania [=former Tanganyika], Uganda, Unknown Country, Zambia, Zimbabwe.

Figure 11. Distribution of *Epomophorus wahlbergi*

Genus *Epomops* Gray, 1866

- *1866. *Epomops* Gray, Cat. Monkeys, Lemurs, Fruit-eating Bats Brit. Mus., p. 126. Type species: *Epomophorus franqueti* Tomes, 1860

Taxonomy:

Reviewed by Bergmans (1989). See Simmons (2005: 323).

Common names:

English: Clamorous Fruit-bats, Noisy Fruit-bats, Singing Fruit-bats, Epauletted bats, Epaulet bats, African Epauletted bats.

Epomops buettikoferi (Matschie, 1899)

- *1899. *Ep[omophorus (Epomophorus)] büttikoferi* Matschie, Megachiroptera Berlin Mus., p. 43, 45. Type locality: Liberia: Junk river, Schlieffelinsville. Type specimen: RMNH, M. Matschie dated his introduction to 14 May 1899.
2000. *Epomops buettikoferi* Konstantinov, Pema, Labzin and Farafonova, *Plecotus et al.*, 3: xxx. Lapsus.
- ? *Epomophorus (Epomops) franqueti buettikoferi*: Name combination.
- ? *Epomops buettikoferi*: Name combination.

Taxonomy:

See Bergmans (1989) and Simmons (2005: 323).

Common names:

English: Buettikofer's Clamorous Fruit-bat, Buettikofer's epauletted bat, Buettikofer's epauletted fruit bat, Büttikofer's Fruit Bat. French: Epomophore de Buettikofer, Roussette de Buettikofer.

Etymology of name:

In honour of J. Büttikofer, who collected animals in Liberia.

Conservation status:

Global- VU (Groombridge 1994); VU (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004w).

General distribution:

Guinea over Côte d'Ivoire (Henry *et al.*, 2004: 24) to Nigeria.

Figure 12. Distribution of *Epomops buettikoferi*

Distribution based on voucher specimens: Cote D'Ivoire.

Epomops dobsonii (Bocage, 1889)

*1889. *Epomophorus dobsonii* Bocage, J. Sci. mat. phys. nat., Lisboa, ser. 2, 1 (1): 1, 14. Type locality: Angola: Benguela district, Quindumbo. Publication date: March 1889.

Frequently mentioned as *dobsoni*.

? *Epomops dobsonii*: Name combination.

Taxonomy:

See Bergmans (1979b; 1989) and Simmons (2005: 323).

Distribution based on voucher specimens:

Rwanda, Zambia.

Common names:

Afrikaans: Dobson se vrugtevlermuis, Dobson-vrugtevlermuis. English: Dobson's fruit bat, Dobson's epauletted fruit bat, Dobson's epauletted bat, singing fruit bat. French: Epomophore de Dobson, Roussette de Dobson.

Etymology of name:

Named after George Edward Dobson who, among his many other papers on bats, published a Catalogue of the Chiroptera in the collection of the British Museum in 1878 (see Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004aa).

General distribution:

Angola to Rwanda, Tanzania, Malawi, and N Botswana, Zambia, Zimbabwe, and possibly Namibia (see a.o. Cotterill, 2004: 260).

Figure 13. Distribution of *Epomops dobsonii*

Epomops franqueti (Tomes, 1860)

- *1860. *Epomophorus franqueti* Tomes, Proc. Zool. Soc. Lond., 1860, I: 54, pl. 75. Type locality: Gabon: "Gabon". Publication date: February - May 1860.
1862. *Epomophorus comptus* H. Allen, Proc. Acad. Nat. Sci. Philadelphia, 13 (11): 158 (for 1861). Type locality: West Africa: -. G.M. Allen (1939a: 57) mentioned "=Gaboan". Publication date: Volume 13 issue 11 covers the meetings of June-July 1861, but was probably only printed in 1862.
1910. *Epomops franqueti strepitans* K. Andersen, Ann. Mag. Nat. Hist., ser. 8, 5 (25): 106. Type locality: Nigeria: Asaba. Type specimen: BMNH 1895.5.3.7. Publication date: 1 January 1910.
- ? *Epomophorus (Epomops) franqueti*: Name combination.
- ? *Epomops franqueti franqueti / strepitans*: Name combination.
- ? *Epomops franqueti franqueti*: Name combination.
- ? *Epomops franqueti*: Name combination.

Taxonomy:

See Bergmans (1989) and Simmons (2005: 324).

Common names:

English: Franquet's Clamorous Fruit-bat, Franquet's fruit bat, Franquet's epauletted fruit bat, singing fruit bat. French: Chien volant à épaulettes du Congo, Epomophore de Franquet, Roussette de Franquet.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004z).

General distribution:

Ivory Coast over Benin (Capo-Chichi *et al.*, 2004: 161), Central African Republic (Morvan *et al.*, 1999: 1195), Uganda (Kityo and Kerbis, 1996: 59) to Sudan, Uganda, NW Tanzania, N Zambia, Congo Republic (Dowsett *et al.*, 1991: 259), and Angola.

Molecular biology:

Karyotype - In Kenya, Peterson and Nagorsen (1975) recorded $2n = 36$.

Distribution based on voucher specimens:

Benin, Cameroon, Congo (Democratic Republic of the), Equatorial Guinea, Gabon, Ghana, Liberia, Nigeria, Tanzania, Togo.

Figure 14. Distribution of *Epomops franqueti*

Genus *Hypsignathus* H. Allen, 1862

1862. *Sphyrocephalus* A. Murray, Proc. zool. Soc. Lond., 1862, I: 8. Publication date: June 1862. Type species: *Sphyrocephalus labrosus* Murray, 1862 (= *Hypsignathus monstrosus* H. Allen, 1861). Preoccupied by *Sphyrocephala* Westwood, 1848, a dipteran and *Sphyrocephalus* Schmarda, 1859, a turbellarian; see Langevin and Barclay (1990: 1).
1862. *Zygaenocephalus* A. Murray, Proc. zool. Soc. Lond., 1862, I: pl. 1. Publication date: June 1862. Type species: *Zygaenocephalus labrosus* Murray, 1862 (= *Hypsignathus monstrosus* H. Allen, 1861). This name was attached to the plate illustrating Murray's description of *Sphyrocephalus* and serves as a replacement for *Sphyrocephalus* Murray, 1862: see Langevin and Barclay (1990: 1 - L199).
- *1862. *Hypsignathus* H. Allen, Proc. Acad. Nat. Sci. Philadelphia, 13 (11): 156 (for 1861). Publication date: Volume 13 issue 11 covers the meetings of June-July 1861, but was probably only printed in 1862. Type species: *Hypsignathus monstrosus* H. Allen, 1861.
- ? *Epomophorus (Hypsignathus)*: Name combination.
- ? *Hypsignathus*: Lapsus.

Taxonomy:

Revised by Bergmans (1989). See Simmons (2005: 324).

Common names:

English: Hammer-headed bats. French: Hypsignathe.

Hypsignathus monstrosus H. Allen, 1862

1862. *Sphyrocephalus labrosus* A. Murray, Proc. Zool. Soc. Lond., 1862, I: 8. Type locality: Nigeria: Old Calabar river. Type specimen: BMNH 1862.1.23.1[b]. Publication date: June 1862. The publication contains 14 January 1862 as date, but see Duncan (1937) for the actual publication date.
1862. *Zygaenocephalus labrosus* A. Murray, Proc. zool. Soc. Lond., 1862, I: pl. 1. Publication date: June 1862. Name combination.
- *1862. *Hypsignathus monstrosus* H. Allen, Proc. Acad. Nat. Sci. Philadelphia, 13 (11): 157 (for 1861). Type locality: Western Africa: (Gabon). Publication date; Volume 13 issue 11 covers the meetings of June-July 1861, but was probably only printed in 1862.
1876. *Epomophorus macrocephalus* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 474. Type locality: Gabon: Dongila.
1899. *Hypsignathus haldemani* Matschie, Sitzb. Ges. Naturf. Freunde Berlin, p. 29. Not *Pteropus haldemani* Halowell, 1846: See Langevin and Barclay (1990: 1).
- ? *Epomophorus (Hypsignathus) monstrosus*: Name combination.
- ? *Hypsignathus monstrosus* Lapsus.

Taxonomy:

See Langevin and Barclay (1990), Bergmans (1989) and Simmons (2005: 324).

Common names:

English: Hammer-headed bat, Hammer-headed fruit bat. French: Chien volant à tête en marteau, Hypsignathe monstrueux. German: Hammerkopf.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004by).

General distribution:

Sierra Leone over Côte d'Ivoire (Henry *et al.*, 2004: 24), Togo and Nigeria (Capo-Chichi *et al.*, 2004: 161), Central African Republic (Morvan *et*

al., 1999: 1195), Republic of the Congo (Dowsett *et al.*, 1991: 259), Uganda (Kityo and Kerbis, 1996: 59) to W Kenya, south to Zambia and Angola; Bioko. Records from Gambia and Ethiopia are doubtful. Lavrenchenko *et al.* (2004: 131) report a second (and first documented) specimen from Ethiopia.

Activity and Behaviour:

Bradbury (1977) observed females hover in front of selected males before copulation.

Distribution based on voucher specimens:
"Africa", Cameroon, Congo (Democratic Republic
of the), Equatorial Guinea, Gabon, Nigeria, Togo.

Figure 15. Distribution of *Hypsignathus monstrosus*

Genus *Lissonycteris* K. Andersen, 1912

1912. *Rousettus (Lissonycteris)* K. Andersen, Cat. Chiroptera Brit. Mus., I. Megachiroptera, 23: 814. Described as a subgenus of *Rousettus* Gray, 1821. Type species: *Cynonycteris angolensis* Bocage, 1898.

Taxonomy:

Lawrence and Novick (1963) separated *Lissonycteris* from *Rousettus* because of ethological differences concerning the use of the limbs, and the absence of echolocation in *Lissonycteris*. Juste *et al.* (1997) presented allozyme evidence corroborating earlier chromosome studies (Haiduk *et al.* 1980, 1981), DNA-hybridisation results (Kirsch *et al.* 1995) and cladistic analysis (Springer *et al.* 1995) that support the recognition of *Lissonycteris* as a distinct genus. Bergmans (1994: 79; 1997: 136),

Lavrenchenko *et al.* (2004: 136), and Simmons (2005: 325) also consider *Lissonycteris* to be a valid genus.

Common names:

English: Soft-furred Fruit-bats, Smooth-haired Fruit-bats.

Etymology of name:

From the Greek for smooth bat.

Lissonycteris angolensis (Bocage, 1898)

- *1898. *Cynonycteris angolensis* Bocage, J. Sci. mat. phys. nat., Lisboa, ser. 2, 5: 133, 138, text-f. Type locality: Angola: Quibula, Cahata, north of Quanza River, Pungo Andongo [09 40 S 15 35 E, 1 200 m]. Type specimen: Museum Lisbon, T113, syntypes: ad F + juv; mounted, female without skull, juv with skull not removed; collector José d'Anchieta, collection date 1891. Both destroyed by fire in 1978; leaving only one syntype in the BMNH: see Bergmans (1997: 37). Publication date: June 1898.
1920. *Rousettus (Lissonycteris) crypticola* Cabrera, Bol. R. Soc. esp. Hist. nat., 20: 106. Type locality: Equatorial Guinea: Bioko, Malabo, Basilé, cave of San Fernando. Type specimen: MNCN 53 / 20-II-25-5 (F; skin only (skull ?), collector D. Manuel M. De la Escalera, collection date: 26 July 1919, Paratype: juv M: MNCN 54, see Ibáñez and Fernández, 1989: 7; Bergmans, 1997: 35). Publication date: March 1920.
- ? *Lissonycteris angolensis*: Name combination.

Taxonomy:

Peterson *et al.* (1995: 48) include *angolensis* in the genus *Myonycteris*. Simmons (2005: 325) recognizes *goliath*, *petraea*, *ruwenzorii* and *smithii* as subspecies of *angolensis*, indicating that more than one species may be present in this complex.

(IUCN 2003); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ar).

General distribution:

Senegal; Gambia (Kock *et al.*, 2002: 80), Togo and Nigeria (Capo-Chichi *et al.*, 2004: 161), and Angola to Ethiopia and Mozambique; Bioko; Republic of the Congo (Dowsett *et al.*, 1991: 259), Uganda (Kityo and Kerbis, 1996: 60).

Common names:

Afrikaans: Bocage se vrugtevlermuis, Bocage-vrugtevlermuis. English: Angolan Soft-furred Fruit-bat, Angolan Long-haired Fruit-bat, Angolan rousette, Angolan fruit bat, Bocage's Fruit-bat, Long-haired rousette, Canon Smith's Rousette. French: Rousette à longs poils, Rousette d'Angola, Rousette de Bocage. Portuguese: Morcego Frugivoro de Bocage.

Etymology of name:

Referring to the country where the type specimen was collected.

Conservation status:

Global- LR/lc assessed as *Rousettus angolensis*

Distribution based on voucher specimens:
 Angola, Cameroon, Equatorial Guinea, Nigeria,
 Tanzania, Togo, Zambia.

Figure 16. Distribution of *Lissonycteris angolensis*

Lissonycteris angolensis angolensis (Bocage, 1898)

- *1898. *Cynonycteris angolensis* Bocage, J. Sci. mat. phys. nat., Lisboa, ser. 2, 5: 133, 138, text-f. Type locality: Angola: Quibula, Cahata, north of Quanza River, Pungo Andongo [09 40 S 15 35 E, 1 200 m]. Type specimen: Museum Lisbon, T113, syntypes: ad F + juv; mounted, female without skull, juv with skull not removed; collector José d'Anchieta, collection date 1891. Both destroyed by fire in 1978; leaving only one syntype in the BMNH: see Bergmans (1997: 37). Publication date: June 1898.

? *Lissonycteris angolensis angolensis*: Name combination.

Etymology of name: was collected.
 Referring to the country where the type specimen

Lissonycteris angolensis ruwenzorii (Eisentraut, 1965)

- *1965. *Rousettus angolensis ruwenzorii* Eisentraut, Bonn. zool. Beitr., 16 (1/2): 3. Type locality: Uganda: Ruwenzori East [1 575 m].

? *Lissonycteris angolensis ruwenzorii*: Name combination.

Common names: Etymology of name:
 English: Ruwenzori Long-haired rousette. French: Referring to the area where the type specimen
 Rousette à longs poils du Ruwenzori. was collected.

Lissonycteris goliath Bergmans, 1997

- *1997. *Lissonycteris angolensis goliath* Bergmans, Beaufortia, 47: 46. Type locality: Zimbabwe: Inyanga, Gleneagles (Estate) [18 17 S 32 54 E]. Type specimen: NHMZ 59831 (ad F, skin and skull, collector M. Stuart Irwin *et al.*, collection date 19 March 1970; coll nr T1854; 8 paratypes; see Bergmans, 1997: 46).
2001. *Lissonycteris goliath* Cotterill, Durban Mus. Novit., 26: xx. Name combination.

Taxonomy:

Bergmans (1997) showed that craniological characters also distinguish *Lissonycteris* from *Rousettus*, and assigned the specimens from Zimbabwe to a new subspecies (*L. a. goliath*). Liberally applying the evolutionary species concept, which holds that any diagnosable or allopatric population is a valid species, Cotterill (2001e) elevated *goliath* to full species rank.

Common names: English:
Harrison's fruit bat.

Etymology of name:

Referring to the biblical giant with the same name.

Conservation status:

Global- VU A3c+4c ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ay).

General distribution:

Zimbabwe, Mozambique.

Distribution based on voucher specimens:
Zimbabwe.

Figure 17. Distribution of *Lissonycteris goliath*

Lissonycteris petraea Bergmans, 1997

- *1997. *Lissonycteris angolensis petraea* Bergmans, Beaufortia, 47: 44. Type locality: Ethiopia: 10 km from Agaro at the road to Jimma. Type specimen: MNHN CG 1972.482 (ad M, alcoholic and skull, collector J. Dorst *et al.*, collection date 10-13 June 1968, coll nr 4017; 10 paratypes; see Bergmans, 1997: 44).
2001. *Lissonycteris petraea* Cotterill, Durban Mus. Novit., 26: xx. Name combination.

Taxonomy:

Simmons (2005: 325) states that the status of *petraea* remains unclear, but recognized it as a subspecies of *angolensis*.

Common names:

English: Petra fruit bat.

General distribution:

Ethiopia.

Distribution based on voucher specimens:

Ethiopia.

Conservation status:

Global- VU A4c ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004at).

Lissonycteris smithii (Thomas, 1908)

- *1908. *Rousettus smithii* Thomas, Ann. Mag. Nat. Hist., ser. 8, 2 (10): 375. Type locality: Sierra Leone: no specific locality. Grubb *et al.* (1998: 67) mention that the type locality is almost certainly Freetown, according to Rosevear (1965: 84). Type specimen: BMNH 1908.9.11.1 (nearly ad F, collected and presented by Canon F.C. Smith). Publication date: 1 October 1908.
- ? *Lissonycteris smithii*: Name combination.

Taxonomy:

Mentioned as *smithii* by Allen (1939a: 63), Meester *et al.* (1986: 30), Koopman (1993), Bergmans (1997: 33), Grubb *et al.* (1998: 67), Kock *et al.* (2002: 79), but as *smithi* by Peterson *et al.* (1995: 48), who also consider it a valid species in the genus *Myonycteris*. Kock *et al.* (2002: 79) include it as subspecies in *angolensis*, due to clinal differentiation (as does Bergmans, 1997: 33). Simmons (2005: 325) follows Kock *et al.*, (2002) who support Bergmans (1997) who treat *smithii* as a subspecies of *angolensis*.

Conservation status:

Global- LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004am).

General distribution:

Bioko, Burkina Faso, Ghana, Guinea, Guinea Bissau, Ivory Coast, Liberia, Nigeria, Sierra Leone, Togo, Senegal.

Distribution based on voucher specimens:

Sierra Leone.

Common names:

English: Smith's fruit bat.

Genus *Micropteropus* Matschie, 1899

- *1899. *Micropteropus* Matschie, Megachiroptera Berlin Mus., p. 36, 57. Type species: *Epomophorus pusillus* Peters, 1867. Described as subgenus of *Epomophorus* Bennett, 1836. Matschie dated his introduction on 14 May 1899.
2004. *Micropterus*: Henry, Barrière, Gautier-Hion and Colyn, J. Trop. Ecol., 20: 24. Lapsus.
- ? *Epomophorus* Not of Bennett, 1836

Taxonomy:

Revised by Bergmans (1989), who transferred *grandis* from this genus to *Epomophorus*. See Simmons (2005: 327).

Etymology of name:

From the Greek "*micros*" (=small) and "*Pteropus*" (=wing-footed) (see Owen-Ashley and Wilson, 1998: 4).

Common names:

English: Lesser Fruit-bats, Dwarf epauletted fruit bats.

Micropteropus intermedius Hayman, 1963

1889. *Epomophorus pusillus* Noack, Zool. Jb. Syst., 4: 206. Not of Peters, 1868. Partim. See Kock (1987b: 220).
1953. *Micropteropus grandis* Ellerman, Morrison-Scott and Hayman, Southern African mammals: 49. Not of Sanborn, 1950. In part. See Kock (1987b: 220).
1956. *Micropterus grandis* Leleup, Ann. Mus. r. Congo belge, (Sci. zool.), 46: 76. Not of Sanborn, 1950. Lapsus.
- *1963. *Micropteropus intermedius* Hayman, Publ. Cult. Comp. Diamantes Angola, 66: 100. Type locality: Angola: Lunda, Dundo. Type specimen: BMNH 1962.2073.
1969. *Micropteropus pusillus* Kock, Abh. Senckenberg. naturforsch. Ges., 521: 24. Not of Peters, 1868. In Part. See Kock (1987b: 220).
- ? *Micropterus (sic) intermedius*: Name combination. Lapsus.

Taxonomy:

See Bergmans (1989) and Simmons (2005: 327).

Common names:

English: Hayman's Lesser Fruit-bat, Hayman's dwarf epauletted fruit bat, Hayman's Epauletted Fruit Bat. French: Roussette naine de Hayman.

Conservation status:

Global- Rare (Groombridge 1994); VU (Baillie and Groombridge 1996); DD (Hilton-Taylor 2000); DD ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004a).

General distribution:

N Angola, SE Democratic Republic of the Congo.

Distribution based on voucher specimens:

Angola, Cameroon.

Figure 18. Distribution of *Micropteropus intermedius*

Micropteropus pusillus (Peters, 1868)

1860. *Epomophorus schoënsis* Tomes, Proc. zool. Soc. Lond., 1860, I: 56. Publication date: February - May 1860. Not of Rüppell, 1842.
1860. *Epomophorus schoensis*: Tomes, Name combination.
- *1868. *Epomophorus pusillus* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 870 (for 1867). Type locality: Nigeria: Yoruba (see Bergmans, 1989. Grubb *et al.* (1998: 70) state that "Peters in effect renamed *Epomophorus schoënsis* Tomes and therefore Tomes's type locality [= "Gambia" - fixed by Andersen, 1912: 559] must stand, even though his syntypes are evidently no longer in existence". However, see Kock *et al.* (2002: 82) for a discussion on the type locality). -
2004. *Micropteropus pusillus* Henry, Barrière, Gautier-Hion and Colyn, J. Trop. Ecol., 20: 24. Lapsus.
- ? *Epomophorus (Micropteropus) pusillus*: Name combination.
- ? *Micropteropus pusillus*: Name combination.
- ? *Nanonycteris veldkampii* Not of Jentink, 1888

Taxonomy:

See Bergmans (1989), Owen-Ashley and Wilson (1998) and Simmons (2005: 327).

Common names:

English: Peters' Lesser Fruit-bat, Peters's Dwarf Epauletted Fruit Bat, Dwarf Epauletted Fruit Bat.
French: Roussette naine de Peters.

Etymology of name:

From the Latin "*pusillus*" (=very small) (see Owen-Ashley and Wilson, 1998: 4).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ak).

General distribution:

Gambia over Guinea (Fahr and Ebigbo, 2003: 128), Mali (Meinig, 2000: 104), Côte d'Ivoire (Henry *et al.*, 2004: 24), Benin (Capo-Chichi *et al.*, 2004: 161), Central African Republic (Morvan *et al.*, 1999: 1195), Uganda (Kityo and Kerbis, 1996: 59) to Ethiopia, south to Republic of the Congo (Dowsett *et al.*, 1991: 259), Angola, Zambia, Burundi, and Tanzania.

Distribution based on voucher specimens:

Angola, Congo (Democratic Republic of the), Gabon, Ghana, Guinea-Bissau, Nigeria, Tanzania, Togo.

Figure 19. Distribution of *Micropteropus pusillus*

Genus *Myonycteris* Matschie, 1899

- *1899. *Myonycteris* Matschie, Megachiroptera Berlin Mus., p. 61, 63. Type species: *Cynonycteris torquata* Dobson, 1878. Originally described as subgenus of *Xantharpyia*. Matschie dated his introduction on 14 May 1899.
1912. *Myonycteris*: K. Andersen, Name combination.

Taxonomy: bats, Dwarf Epauletted Bat, Lesser Epauletted Bat.
 Two subgenera are presently recognized
Myonycteris and *Phygetis* (Koopman 1994;
 Simmons 2005: 328). Revised by Bergmans
 (1976; 1997).

Etymology of name:
 Derived from the Greek "mys" (= mouse) and
 "nycteris" (= bat) meaning mouse-like bat.

Common names:
 English: Collared Fruit-bats, Little Collared Fruit-

Subgenus *Myonycteris* (*Myonycteris*) Matschie, 1899

- *1895. *Myonycteris* Matschie, Megachiroptera Berlin Mus., p. 61, 63. Type species: *Cynonycteris torquata* Dobson, 1878.

Myonycteris* (*Myonycteris*) *brachyptera

- ? *brachyptera* Mentioned by Peterson *et al.* (1995: 48) only with the remark "La situation exacte de ce taxon suppose une étude plus poussée". [The exact situation of this taxon needs a more thorough study].

Myonycteris (Myonycteris) relicta Bergmans, 1980

- *1980. *Myonycteris relicta* Bergmans, Zool. Meded. Rijksmus. Nat. Hist. Leiden, 55 (14): 126. Type locality: Kenya: Coast Prov., Shimba Hills, Lukore area, Mukanda River. Type specimen: RMNH 27909 (ad M, collector R.N. Kyongo, collection date 30 July 1978: see Bergmans, 1997: 56).
- ? *Myonycteris (Myonycteris) relicta*: Name combination.

Taxonomy:

Bronner *et al.* (2003) state that *Myonycteris relicta* was described by Bergmans (1980) based on the re-identification of a specimen from the Nguru Mountains, and two specimens from the Usambara Mountains, in Tanzania. Peterson *et al.* (1995: 48) regarded *M. relicta* as a species of *Rousettus*, in contrast to Koopman (1982; 1993a: 143), Corbet and Hill (1991), Koopman (1993a: 143), Bergmans (1997) and Simmons (2005: 328) who retained this taxon in *Myonycteris*.

Tanzania; Zimbabwe. Recently, a female specimen captured in Haroni Forest (Zimbabwe) in 1973 and originally identified incorrectly as *Rousettus (=Lissonycteris) angolensis*, was re-identified as *Myonycteris relicta* (Cotterill 1995; Bergmans 1997), thereby providing the first record of this species in the southern African subregion.

Common names:

English: East African Collared Fruit-bat, Relict Collared Fruit-bat, East African Little Collared Fruit Bat, Bergmans's Small Fruit Bat. French: Chauve-souris frugivore à collier d'Afrique orientale, Roussette du Kenya, Myonyctère d'Afrique orientale.

Etymology of name:

First described by Wim Bergmans after examining and reclassifying specimens previously ascribed to *Rousettus (Lissonycterus) angolensis* and following his discovery of the type specimen from the Mukonda River in Kenya (see Taylor 2005).

Conservation status:

Global- VU (Groombridge 1994); VU (Baillie and Groombridge 1996); VU A4c ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bi).

General distribution:

Shimba Hills, Kenya; Nguru and Usambara Mtns,

Figure 20. Distribution of *Myonycteris (Myonycteris) relicta*

Distribution based on voucher specimens:
Kenya, Tanzania.

Myonycteris (Myonycteris) torquata (Dobson, 1878)

1870. *Cynopterus collaris* Gray, Not of Kolenati, not of Geoffroy. Cat. Monkeys, Lemurs, Fruit-eating Bats Brit. Mus., p. 123. Type locality: Angola?: W Africa, Lower Congo; Angola (see G.M. Allen, 1939a: 58). Type specimen: BMNH 1843.9.27.2.
- *1878. *Cynonycteris torquata* Dobson, Cat. Chiroptera Brit. Mus., p. 71, 76, pl. 5, fig. 1. Type locality: Angola: N Angola, Lower Cuanza region, Golungo Alto. Type specimen (lectotype): BMNH 1866.1.20.4 (ad M, alcoholc and skull, collector F. Welwitsch, collection date 1853-1860: see Bergmans, 1997: 49). Publication date: June 1878. Grubb *et al.* (1998: 68) indicate "definite restriction of the type locality is not possible at present (Bergmans, 1976: 210 - 211)". Bergmans (1997: 49) indicates that Bergmans (1976) restricted the type locality to "Lower Cuanza Region" and the area was restricted to Golungo Alto by Crawford-Cabral (1989).
- ? *Myonycteris (Myonycteris) torquata*: Name combination.
- ? *Myopterus torquata*: Name combination.

Taxonomy:

See Hayman and Hill (1971), Peterson *et al.* (1995), Bergmans (1976; 1997) and Simmons (2005: 328). Subspecies follow Koopman (1994), but see Bergmans (1997).

Common names:

English: Little Collared Fruit-bat. French: Petite Chauve-souris frugivore à collier, Petite Myonyctère.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cb).

General distribution:

Sierra Leone, Guinea (Fahr and Ebigbo, 2003: 128), Côte d'Ivoire (Henry *et al.*, 2004: 24), Togo and Nigeria (Capo-Chichi *et al.*, 2004: 161), over Central African Republic (Morvan *et al.*, 1999: 1195) to Uganda (Kityo and Kerbis, 1996: 59), Ethiopia (1st record: Lavrenchenko *et al.*, 2004: 136), south to Republic of the Congo (Dowsett *et al.*, 1991: 259), Angola and Zambia; Bioko.

Distribution based on voucher specimens:

Angola, Angola (?), Congo (Democratic Republic of the), Cote D'Ivoire, Equatorial Guinea, Sierra Leone, Zambia.

Figure 21. Distribution of *Myonycteris (Myonycteris) torquata*

Myonycteris (Myonycteris) torquata leptodon K. Andersen, 1908

- *1908. *Myonycteris leptodon* K. Andersen, Ann. Mag. Nat. Hist., ser. 8, 2 (11): 450. Type locality: Sierra Leone: Sierra Leone. Type specimen: BMNH 1891.2.13.1 (ad M, skin and skull, collector J. Hickman, Esq., collection date: prior to 1891). Publication date: 1 November 1908.
- ? *Myonycteris (Myonycteris) torquata leptodon*: Name combination.
- ? *Myonycteris torquata leptodon*: Name combination.

Myonycteris (Myonycteris) torquata torquata (Dobson, 1878)

- *1878. *Cynonycteris torquata* Dobson, Cat. Chiroptera Brit. Mus., p. 71, 76, pl. 5, fig. 1. Type locality: Angola: N Angola, Lower Cuanza region, Golungo Alto. Type specimen (lectotype): BMNH 1866.1.20.4 (ad M, SA, collector F. Welwitsch, collection date 1853-1860: see Bergmans, 1997: 49). Publication date: June 1878. Grubb *et al.* (1998: 68) indicate "definite restriction of the type locality is not possible at present (Bergmans, 1976: 210 - 211)". Bergmans (1997: 49) indicates that Bergmans (1976) restricted the type locality to "Lower Cuanza Region" and the area was restricted to Golungo Alto by Crawford-Cabral (1989)
- ? *Myonycteris (Myonycteris) torquata torquata*: Name combination.
- ? *Myonycteris torquata torquata*: Name combination.

Myonycteris (Myonycteris) torquata wroughtoni K. Andersen, 1908

- *1908. *Myonycteris wroughtoni* K. Andersen, Ann. Mag. nat. Hist., ser. 8, 2 (11): 450. Type locality: Democratic Republic of the Congo: Uele district, Likandi river [=Litaki river]. Type specimen: BMNH 1907.7.8.25 (ad M, skin and skull, collector Alexander-Gosling expedition, collection date 18 April 1906: see Andersen, 1908: 450; Bergmans, 1997: 50). Publication date: 1 November 1908.
- ? *Myonycteris (Myonycteris) torquata wroughtoni*: Name combination.
- ? *Myonycteris torquata wroughtoni*: Name combination.

Etymology of name: (1908: 450).
 In honour of Mr. R.C. Wroughton, who assisted in working out the mammals collected during the Alexander-Gosling Expedition: see Andersen

Subgenus *Myonycteris* (*Phygetis*) K. Andersen, 1912

1912. *Phygetis* K. Andersen, Cat. Chiroptera Brit. Mus., 1: 579. Type species: *Cynonycteris brachycephala* Bocage, 1889.
 1993. *Phylletis* Juste and Ibáñez, p. 222

Myonycteris* (*Phygetis*) *brachycephala (Bocage, 1889)

- *1889. *Cynonycteris brachycephala* Bocage, J. Sci. mat. phys. nat., Lisboa, ser. 2, 1 (3): 198. Type locality: São Tomé and Príncipe: São Tomé Island. Type specimen: MLZA 449a/ "holotipo T114" (ad F, mounted, skull, collector F. Newton/Pires, collection date 1868; destroyed by fire in 1978: see Bergmans, 1997: 53). Publication date: December 1889.
 1898. *brachycephalus* Seabra, J. Sci. mat. phys. nat., Lisboa, ser. 2, x: xxx.
 ? *Myonycteris* (*Phygetis*) *brachycephala*: Name combination.
 ? *Myonycteris brachycephala*: Name combination.

Taxonomy:

Reviewed by Bergmans (1997). See Simmons (2005: 328).

General distribution:

São Tomé Isl (Gulf of Guinea).

Common names:

English: Sao Tomé collared fruit bat. French: Name Chauve-souris frugivore à collier de Sao Tome, Myonyctère de Sao Tome.

Distribution based on voucher specimens:

São Tomé and Príncipe.

Conservation status:

Global- VU (Groombridge 1994); VU (Baillie and Groombridge 1996); EN (Hilton-Taylor 2000); EN B1ab(iii) ver 3.1 (2001) (IUCN 2004; Juste *et al.*, 2004b)

Genus *Nanonycteris* Matschie, 1899

- *1899. *Nanonycteris* Matschie, Megachiroptera Berlin Mus., p. 36, 58. Described as a subgenus of *Epomophorus* Bennett, 1836. Type species: *Epomophorus veldkampii* Jentink, 1888. Matschie dated his introduction on 14 May 1899.
- ? *Epomophorus* Not of Gray, 1836

Taxonomy:

Revised by Bergmans (1989). See Simmons (2005: 328).

Common names:

English: Dwarf Fruit-bats, Little Flying Cow.

Nanonycteris veldkampii (Jentink, 1888)

- *1888. *Epomophorus veldkampii* Jentink, Notes Leyden Mus., 10: 51. Type locality: Liberia: Fisherman Lake, Buluma. Type specimen: ? (ad F, alcoholic, collector: Büttikofer and Sala). Publication date: April 1888.
2000. *Nanonycteris veldkampii* Konstantinov, Pema, Labzin and Farafonova, Plecotus *et al.*, 3: 145. Lapsus.
- ? *Epomophorus (Nanonycteris) veldkampii*: Name combination.
- ? *Nanonycteris veldkampii*: Name combination.

Taxonomy:

See Bergmans (1989) and Simmons (2005: 328).

Common names:

English: Veldkamp's Dwarf Fruit-bat, Veldkamp's bat, Little Flying Cow, Flying Calf. French: Chauve-souris de Veldkamp, Petite vache-volante, Nanonyctère.

Etymology of name:

Jentink (1887: 52) states: "I call this new species *veldkampii*, as Büttikofer wishes to connect the name of one of his Liberian friends with this new acquisition. Mr. Veldkamp, at present Consul for the Netherlands in Liberia, has helped our travellers as much as he could, has promoted their investigations in every way and finally assisted to Sala's funeral."

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cd).

General distribution:

Guinea over Côte d'Ivoire (Henry *et al.*, 2004: 24), Togo, Benin, Nigeria (Capo-Chichi *et al.*, 2004: 161; 1st record for Benin) to Central African Republic.

Figure 22. Distribution of *Nanonycteris veldkampii*

Distribution based on voucher specimens:
Angola, Ghana, Liberia, Togo.

Genus *Plerotes* K. Andersen, 1910

- *1910. *Plerotes* K. Andersen, Ann. Mag. nat. Hist., ser. 8, 5 (25): 97. Publication date: 1 January 1910. Type species: *Epomophorus anchietæ* Seabra, 1900.

Taxonomy:

Revised by Bergmans (1989). See Simmons (2005: 333).

Common names:

English: Plerote Fruit-bats, Plerotes Fruit-bats.

French: Plérote d'Anchieta.

Etymology of name:

From the Greek "*plerotes*" meaning one who renders full or complete.

Plerotes anchietæ (de Seabra, 1900)

- *1900. *Epomophorus anchietæ* de Seabra, J. Sci. mat. phys. nat., Lisboa, ser. 2, 6: 116. Type locality: Angola: Benguela, Galanga. Publication date: August 1900.
1900. *Epomophorus anchietæ* de Seabra, Current spelling.
- ? *Epomophorus n. sp.*
- ? *Nanonycteris veldkampii* Not of Jentink, 1888.
- ? *Plerotes ancheilæ* Lapsus.
- ? *Plerotes anchietæ*: Name combination.
- ? *Plerotes anchietai* Lapsus (?).

Taxonomy:

Koopman (1993a: 145) mentions this name as *anchietai*, whereas G.M. Allen (1939a: 59) and Kock *et al.* (1998: 114) use *anchietæ*. See Simmons (2005: 333).

Common names:

English: Anchieta's Plerote Fruit-bat, Benguela Fruit-bat, d'Anchieta's fruit bat, Anchieta's Fruit Bat. French: Chauve-souris frugivore d'Anchieta.

Conservation status:

Global- Rare (Groombridge 1994); VU (Baillie and Groombridge 1996); DD (Hilton-Taylor 2000); DD ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cj).

General distribution:

Angola, Zambia, S Democratic Republic of the Congo, Malawi.

Genus *Pteropus* Erxleben, 1777

- *1777. *Pteropus* Erxleben, Systema Regni Animalis, ed. 2: 12, 153. Type species: *Vespertilio vampirus niger* Kerr, 1792. G.M. Allen (1939a: 59), Corbet and Hill (1992: 57), and Simmons (2005) mention Brisson, 1762 [Règne Animal, ed. 2, pp. 13, 153] as author. This name, however, is not available (see Hopwood, 1947).
1799. *Spectrum* Lacépède, Tabl. Div. Subd. Orders Genres Mammifères, p. 15. Type species: *Vespertilio vampirus niger* Kerr, 1792. Preoccupied by *Spectrum* Scopoli, 1777 [Lepidoptera] (see Allen, 1939a: 59; Corbet and Hill, 1992: 57; Pavlinov *et al.*, 1995: 62; Miller and Wilson, 1997: 1; Jones and Kunz, 2000: 1)
1866. *Eunycteris* Gray, Proc. zool. Soc. Lond., 1866, I: 64. Type species: *Pteropus phaiops* Temminck, 1837 (= *Pteropus melanopogon* Peters, 1867). Publication date: May 1866.
1870. *Pselaphon* Gray, Cat. Monkeys, Lemurs, Fruit-eating Bats Brit. Mus., p. 110. Type species: *Pteropus pselaphon* Layard, 1829.
1899. *Sericonycteris* Matschie, Megachiroptera Berlin Mus., p. 6, 30. Type species: *Pteropus rubricollis* E. Geoffroy Saint-Hilaire, 1810 (= *Pteropus subniger* Kerr, 1792). Originally described as a subgenus of *Pteropus*. Matschie dated his introduction on 14 May 1899.
1907. *Desmalopex* Miller, Bull. U.S. natl. Mus., 57: 60. Type species: *Pteropus leucopterus* Temminck, 1853. Publication date: 29 June 1907.

Taxonomy:

See Bergmans (1991) and Simmons (2005: 334).

Etymology of name:

From the Greek "*pteron*" meaning wing, feather, fin and "*pous*" meaning foot (Jones and Kunz, 2000: 5).

Common names:

Czech: kalon. Dutch: Kalongs. English: Flying-foxes, Flying Foxes.

Pteropus aldabrensis True, 1893

- *1893. *Pteropus aldabrensis* True, Proc. U.S. Natl. Mus., 16: 533. Type locality: Seychelle Islands: Aldabra Island. Publication date: 14 July 1893.

Taxonomy:

See Simmons (2005: 334).

General distribution:

Known only from the type locality, Seychelles, Aldabra Isl.

Common names:

English: Aldabra flying fox, Aldabra flying-fox.
French: Renard volant d'Aldabra. Spanish: Zorro volador de Aldabra.

Conservation status:

Global- CR C2a(i) ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cu).
CITES - Appendix II.

Pteropus livingstonii Gray, 1866

- *1866. *Pteropus livingstonii* Gray, Proc. Zool. Soc. Lond., 1866, I: 66. Type locality: Comoro Islands: Anjouan Island. Type specimen: BMNH 1863.12.11.2. Publication date: May 1866.
1971. *Pteropus livingstonei* Hayman and Hill, Order Chiroptera, p. 10. Lapsus.

Taxonomy:

See Bergmans (1991); Simmons (2005: 339) and Smith and Leslie (2006: 1).

females have been difficult to collect in the wild (Clark *et al.*, 1997; Trehwella *et al.*, 1995a; Young *et al.*, 1993; Smith and Leslie 2006: 2).

Common names:

Dutch: Zwarte Komorenkalong, Schoudervlekkalong. English: Comoro Black flying fox, Comoro flying fox, Black Flying-fox, Livingstone's flying fox, Comores flying fox. French: Renard volant noir. Spanish: Zorro volador de Livingston.

Echolocation:

Not known to echolocate.

Molecular biology:

DNA - Unknown.

Karyotype - Unknown.

Protein / allozyme - Unknown.

Palentological / archaeological records:

No fossils are known (Smith and Leslie (2006: 2).

Habitat:

See Smith and Leslie (2006: 3).

Conservation status:

Global- EN (IUCN Conservation Monitoring Centre 1988; IUCN 1990; Groombridge 1994); CR (Baillie and Groombridge 1996); CR A1c+2cd, B1+2c, C2a (Mickleburgh *et al.*, 2002: 22); CR A4c ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ah).

CITES- Appendix II

See Smith and Leslie (2006: 4) for discussion.

Habits:

See Smith and Leslie (2006).

Roost:

See Smith and Leslie (2006).

Migration:

Intra-island movement among roosts is likely, but interisland movement is unknown (Smith and Leslie 2006: 3).

General distribution:

Is endemic to two of the four Comoro Islands: Anjouan (formerly Johanna) and Moheli (Trehwella *et al.*, 2001; Smith and Leslie 2006: 1).

Food / diet:

See Smith and Leslie (2006: 3).

Predators:

See Smith and Leslie (2006).

Geographic variation:

See Smith and Leslie (2006: 1).

Population:

Structure and density - See Smith and Leslie (2006: 1).

General description of external morphology:

See Smith and Leslie (2006: 1).

Activity and behaviour:

See Smith and Leslie (2006: 1).

General description of cranial and dental morphology:

Unknown.

Reproduction and ontogeny:

See Smith and Leslie (2006: 2).

Detailed morphology:

For a description of the cranium, teeth, ear and tragus, and wingshape and aspect ratio see Smith and Leslie (2006: 1-2).

Mating:

See Smith and Leslie (2006).

Post-natal development:

Unknown.

Functional morphology:

Unknown.

Parasites:

Unknown.

Sexual dimorphism:

It is not clear if sexual dimorphism occurs in *P. livingstonii* because sufficient numbers of adult

Life-span:
Unknown.

Viruses:
Unknown.

Utilization:
Unknown.

Anthropophilous:
Unknown.

Distribution based on voucher specimens:
Comoro Islands.

Figure 23. Distribution of *Pteropus livingstonii*

Pteropus niger (Kerr, 1792)

- *1792. *Vespertilio vampirus niger* Kerr, In Linnaeus: Animal Kingdom, 1: xvii, 90. Type locality: Mascarene Islands: Réunion Island (France). Publication date: February 1792.
1803. *Pteropus fuscus* E. Geoffroy Saint-Hilaire, Cat. Mamm. Mus. Nat. Hist. nat., Paris: 46. Type locality: Réunion and Madagascar: no specific locality.
1804. *Vespertilio mauritanus* Hermann, Observationes zoologicae, p. 19. Type locality: Mauritius: no specific locality.
1808. *Pteropus rufus* Tiedemann, Zool., 1808: 535. Type locality: Madagascar: Madagascar. Not of E. Geoffroy Saint-Hilaire, 1803, but see Bergmans (1990).
1810. *Pteropus vulgaris* E. Geoffroy Saint-Hilaire, Ann. Mus. Hist. Nat. Paris, 15: 92. Type locality: Réunion and Madagascar: no specific locality.
1895. *Pteropus pteropus* Merriam, Science, N.S. 1: 376. Type locality: Réunion and Madagascar: no specific locality. Publication date: 5 April 1895.
- ? *Pteropus niger*: Name combination.

Taxonomy:

See Bergmans (1991) and Simmons (2005: 341).

Common names:

English: Greater Mascarene flying fox, Mascarene Flying-fox, Mauritian flying fox.
 French: Renard volant de l'île de Mascarene.
 Spanish: Zorro volador negro de Mauricio.

Conservation status:

Global- IUCN - VU: A1d+2cd. Extinct on Réunion Isl (See Cheke and Dahl 1981). VU A1d+2cd ver 2.3 (1994).

CITES- Appendix II

General distribution:

Mascaren Isls (Réunion Isl, Mauritius Isl, subfossil on Rodriguez Isl).

Distribution based on voucher specimens:

Mauritius, Tanzania.

Figure 24. Distribution of *Pteropus niger*

Pteropus rodricensis Dobson, 1878

- *1878. *Pteropus rodricensis* Dobson, Cat. Chiroptera Brit. Mus., p. 36. Type locality: Mascarene Islands: Rodrigues Island. Type specimen: BMNH 1876.3.11.1. Publication date: June 1878.
1907. *Pteropus mascarinus* Mason, Ann. Mag. Nat. Hist., ser. 7, 20 (117): 221. Type locality: ? : 15 mi (=22 km) NE Mauritius, Round island (La Ronde). Type specimen: BMNH 1925.8.10.1. Publication date: 1 September 1907.

Taxonomy:

See Bergmans (1991) and Simmons (2005: 343).

General distribution:

Rodrigues Isl, Round Isl near Mauritius Isl (Mascarene Isls).

Common names:

Dutch: Rodriguez vliegende hond; German: Rodriguez-Flughund. English: Rodriguez flying fox, Rodrigues Flying Fox. French: Renard volant de l'île de Rodriguez. Spanish: Zorro volador de la isla Rodrigues.

Distribution based on voucher specimens: Mauritius.

Conservation status:

Global- EN (IUCN Conservation Monitoring Centre 1986; 1988; IUCN 1990; Groombridge 1994); CR (Baillie and Groombridge 1996); CR: B1+3d (Mickleburgh *et al.*, 2002: 22); extinct on Round Island. CR B1ac(iv) ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ai).

U.S. ESA- Endangered.

CITES - Appendix II.

Pteropus rufus E. Geoffroy St.-Hilaire, 1803

- *1803. *Pteropus rufus* E. Geoffroy Saint-Hilaire, Cat. Mamm. Mus. nat. Hist. nat., Paris, 47. Type locality: Madagascar: Madagascar. Restricted to North and Central Madagascar by Andersen (1908) (See Peterson *et al.*, 1995: 14).
1810. *Pteropus edwardsii* E. Geoffroy Saint-Hilaire, Ann. Mus. Hist. Nat. Paris, 15: 92. Type locality: Madagascar: Madagascar. Renaming of *P. rufus* E. Geoffroy Saint-Hilaire, 1803 (see G.M. Allen, 1939a: 60). Mentioned as *edwardsi* by Koopman (1993a).
1816. *Pteropus madagascariensis* Oken, Lehrb. Naturg. Jena, 3 (2): 936. Type locality: Madagascar: Madagascar. Renaming of *P. edwardsii* E. Geoffroy Saint-Hilaire, 1810 (see G.M. Allen, 1939a: 60).
1825. *Pteropus phaiops* Temminck, Monogr. Mamm., 1: 178. Type locality: Madagascar: Madagascar.
1908. *Pteropus rufus princeps* K. Andersen, Ann. Mag. nat. Hist., ser. 8, 2 (10): 367. Type locality: Madagascar: Fort-Dauphin. Type specimen: BMNH 1891.11.30.10 (M; see Peterson *et al.*, 1995: 14). Publication date: 1 October 1908.

Taxonomy:

See Bergmans (1991) and Simmons (2005: 343-344). Commonly cited from "E. Geoffroy, 1803. Cat. Mamm. Mus. Nat. Hist. Nat. Paris, p. 47", but this work was never published, see Appendix I. Actually a nomen nudum.

Common names:

English: Madagascan flying fox, Madagascan flying-fox, Red flying fox, Madagascar Fruit Bat, Madagascar Flying Fox. French: Renard volant malgache, Renard volant roux. Spanish: Zorro volador de Madagascar.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); VU A2b+3d ver 3.1 (2001) (IUCN 2004; Participants of CBSG CAMP Madagascar Mammal Workshop 2004).

CITES- Appendix II.

General distribution:

Madagascar.

Viruses:

In Madagascar during 2003 -2004, lehle *et al.* (2007) found the Nipah (NiV), Hendra (HeV) and Tioman viruses, with an overall contamination of 2.3%.

Figure 25. Distribution of *Pteropus rufus*

Pteropus seychellensis A. Milne-Edwards, 1877

- *1877. *Pteropus seychellensis* A. Milne-Edwards, Bull. Sci. Soc. Philom. Paris, ser. 7, 2: 221. Type locality: Seychelle Islands: Mahe Island.
1880. *Pteropus comorensis* Wallace, Island Life, p. 400. Type locality: Comoro Islands: -. G.M. Allen (1939a: 60) and Simmons (2005) mention J.M. Nicoll, 1908 as author, since the original description by Wallace (1880) is actually a nomen nudum. Type specimens: BMNH 1906.6.3.15 (Syntype); BMNH 1906.6.3.16 (Syntype); BMNH 1906.6.3.14 (Syntype).

Taxonomy:

Hill (1971b: 574) included *aldabrensis*, but we follow Bergmans (1991) and Simmons (2005: 344) who considers this to be a separate species.

Common names:

English: Seychelles flying fox, Seychelles fruit bat. French: Renard volant des Seychelles. Spanish: Zorro volador de las Seychelles.

Conservation status:

Global- VU assessed as *P. s. aldabrensis* (IUCN Conservation Monitoring Centre 1988; IUCN 1990); LR/lc Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cr).

CITES- Appendix II.

General distribution:

Seychelle Isls, Aldabra Isl, Comoro Isls, Mafia Isl (off Tanzania).

Distribution based on voucher specimens:
Comoro Islands.

Figure 26. Distribution of *Pteropus seychellensis*

Pteropus subniger (Kerr, 1792)

- *1792. *Vespertilio vampyrus subniger* Kerr, In Linnaeus: Animal Kingdom, 1: xvii, 91. Type locality: Mascarene Islands: Réunion Island (France). Publication date: February 1792.
- 1802. *Spectrum rubidum* Daudin, In Buffon: Hist. Nat. Quadrupèdes, Didot ed., 14: 188. The year of publication might not be correct (see G.M. Allen, 1939a: 61).
- 1803. *Pteropus fuscus* Desmarest, Nouv. Dict. Hist. Nat., 19: 544. Type locality: Mascarene Islands: Réunion Island (France): no specific locality. Not of E. Geoffroy Saint-Hilaire, 1803, see G.M. Allen (1939a: 61).
- 1803. *ruber* E. Geoffroy Saint-Hilaire, Cat. Mamm. Mus. nat. Hist. nat., Paris
- 1810. *Pteropus rubricollis* E. Geoffroy Saint-Hilaire, Ann. Mus. Hist. Nat. Paris, 15: 93. Type locality: Réunion: no specific locality.
- 1814. *torquatus* G. Fischer, Zoognosia, 3: 553.
- 1815. *Pteropus collaris* Illiger, Abh. K. Preuss. Akad. Wiss. Berlin, 78, 4. "According to Andersen (1912), it looks like the publication was part of series dated 1804-1811, but actually appeared in 1815 in the section on E. African Islands." Simmons (pers.comm.).
- 1837. *vulgaris* Temminck, Monogr. Mamm.
- ? *Pteropus subniger*: Name combination.

Taxonomy:

See Bergmans (1991) and Simmons (2005: 344).

Common names:

English: Dark flying fox, Lesser Mascarene Flying Fox. French: Petit Renard volant de Mascarene. Spanish: Zorro volador oscuro de Mauricio.

Conservation status:

Global- Ex (IUCN Conservation Monitoring Centre 1988; IUCN 1990; Groombridge 1994; Baillie and Groombridge 1996); EX ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ct), probably extinct (see Cheke and Dahl 1981).
CITES - Appendix II.

General distribution:

Réunion and Mauritius Isls (Mascarenes Isls).

Distribution based on voucher specimens:

Mauritius, Mozambique, Réunion.

Figure 27. Distribution of *Pteropus subniger*

Pteropus voeltzkowi Matschie, 1909

- *1909. *Pteropus (Spectrum) voeltzkowi* Matschie, Sitzb. Ges. Naturf. Freunde Berlin, p. 486.
 Type locality: Tanzania: Pemba Island: Fufuni. - Publication date: October 1909.
 ? *Pteropus voeltzkowi*: Name combination.

Taxonomy:

See Bergmans (1991) and Simmons (2005: 346).

Common name:

Dutch: Pemba vliegende hond. English: Pemba Flying-fox. French: Renard volant de Pemba. Spanish: Zorro volador de Voeltzkow.

Conservation status:

Global- VU (IUCN Conservation Monitoring Centre 1988); EN (IUCN 1990; Groombridge 1994); CR (Baillie and Groombridge 1996); CR C2a (Mickleburgh *et al.*, 2002: 22). VU D2 ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cv). CITES - Appendix II.

General distribution:

Pemba Isl (off coast of Tanzania).

Distribution based on voucher specimens:

Tanzania.

Figure 28. Distribution of *Pteropus voeltzkowi*

Genus *Rousettus* Gray, 1821

- *1821. *Rousettus* Gray, London Med. Repos., 15: 299. Type species: *Pteropus Egyptianus* E. Geoffroy Saint-Hilaire, 1810. Not *Pteropus aegyptiacus* Geoffroy, 1818 (see Corbet and Hill, 1992: 67). Publication date: 1 April 1821.
1829. *Cercopteropus* Burnett, Quart. J. Sci., Lit. and Art, pt. 1, art. 5, p. 269. Type species: *Pteropus aegyptiacus* E. Geoffroy Saint-Hilaire, 1818. Publication date: April-June 1829.
1843. *Xantharpyia* Gray, List Spec. Mamm. Brit. Mus., pp. xix, 37. Type species: *Pteropus amplexicaudatus* E. Geoffroy Saint-Hilaire, 1810. Publication date: 13 May 1843.
1844. *Eleutherura* Gray, Mammalia, in Voy. "Sulphur", Zool., 1: 29. Type species: *Pteropus leachii* A. Smith, 1829 (= *Pteropus aegyptiacus* E. Geoffroy Saint-Hilaire, 1810). Preoccupied by *Eleutherura* Gray, 1843; nom. nud. (Meester *et al.*, 1986: 28; Pavlinov *et al.*, 1995: 61). Allen (1939a: 61) indicates that Gray (1843 - List. Spec. Mamm. Brit. Mus., p. xix) is a nomen nudum, but that it is redescribed in the 1844 publication.
1852. *Cynonycteris* Peters, Naturw. Reise Mossamb., Säugethiere, p. 25. Type species: *Pteropus collaris* Liechtenstein [not Illiger] (= *Pteropus aegyptiacus* E. Geoffroy Saint-Hilaire, 1810).
1870. *Senonycteris* Gray, Cat. Monkeys, Lemurs, Fruit-eating Bats Brit. Mus., p. 115. Type species: *Pteropus seminudus* Kelaart, 1850 (= *Pteropus lechenaulti* Desmarest, 1820). Described as subgenus of *Xantharpyia*.
1871. *Stenonycteris* Gray, Cat. Monkeys, Lemurs, Fruit-eating Bats Brit. Mus.. Considered a valid genus by Giannini and Simmons (2003: 504), Lavrenchenko *et al.* (2004: 130), but only a synonym according to Bergmans (1994: 79). Sometimes considered a valid subgenus containing *lanosus*. Allen (1939a: 62), Meester *et al.* (1986: 28), Bergmans (1994: 80), and Kwiecinski and Griffith (1999: 1) assigned this name to *K. Andersen*, Cat. Chiroptera Brit. Mus., 1: 23, 1912.
1879. *Boneia* Jentink, Notes Leyden Mus., 1: 117. Type species: *Boneia bidens* Jentink, 1879. Date: April 1879. Considered a valid (extralimital) subgenus.
1917. *Roussettus*: Lang and Chapin, Bull. Am. Mus. Nat. Hist., 37 (18): xxx. Lapsus. See Bergmans (1994: 82).
1966. *Roussetus*: Brosset, Lapsus. See Bergmans (1994: 82).
1992. *Rossetus*: Agrawal, Das, Chakraborty, Ghose, Mandal, Chakrabo, Zoological Survey of India, State Fauna Series 3: xxx. Lapsus. See Bergmans (1994: 82).

Taxonomy:

Meester *et al.* (1986) mention that the inclusion of *Lissonycteris* as a subgenus of *Rousettus* is open to question. Lawrence and Novick (1963) maintain that *Lissonycteris* should be regarded as a valid genus, more closely related to *Myonycteris* Matschie, 1899, than to *Rousettus*. In this they are followed by Rosevear (1965), Ansell (1978) and Corbet and Hill (1980). Koopman (1975), on the other hand, concludes that although there is a close relationship between *Lissonycteris* and *Myonycteris*, the relationship of *Lissonycteris* with *Rousettus* is sufficiently close for it to be retained as subgenus. Koopman (in Honacki *et al.* 1982) again treats *Lissonycteris* as a subgenus, as is done also by Hayman and Hill (1971). Bronner *et al.* (2003) follow Lawrence and Novick (1963) separated *Lissonycteris* from *Rousettus* because of ethological differences concerning the use of the limbs, and the absence of echolocation in *Lissonycteris*. Juste *et al.* (1997) presented allozyme evidence corroborating earlier

chromosome studies (Haiduk *et al.* 1980, 1981), DNA-hybridisation results (Kirsch *et al.* 1995) and cladistic analysis (Springer *et al.* 1995) that support the recognition of *Lissonycteris* as a distinct genus. See Simmons (2005: 347) for discussion on subgenera.

A key to the species is provided by Kwiecinski and Griffiths (1999: 1, Mammalian Species, 611).

Common names:

English: Rousettes, Rousette Fruit-bats. German: Höhlenflughunde.

Etymology of name:

From the French "*rousette*" for the rosette of glandular hairs on the neck of males (see Flannery, 1995: 304) or from the French "*rousse*" for reddish or reddish brown, referring to the fur colour of the earliest specimens taken in Egypt (see Kwiecinski and Griffiths, 1999: 7).

Rousettus aegyptiacus (E. Geoffroy St.-Hilaire, 1810)

- *1810. *Pteropus Egyptiacus* E. Geoffroy Saint-Hilaire, Ann. Mus. Hist. Nat. Paris, 15: 96. Type locality: Egypt: Giza (Great Pyramid). Originally "la basse Egypte ... le plafond d'une des chambres de la grande Pyramide". See Kwiecinski and Griffith (1999: 1). Type MNHN A.70 (ad F, alcoholic and skull: Qumsiyeh, 1985: 13).
1818. *Pteropus aegyptiacus* E. Geoffroy Saint-Hilaire, Descrip. de l'Egypte, 2: 134, pl. 3, fig. 2. Emendation of *egyptiacus*. Unjustified according to Corbet and Hill (1992: 67), justified according to Kock (2001c).
1823. *Pteropus collaris* Lichtenstein, Verzeichniss der Doubletten des Zool. Mus. K. Univ. Berlin, p. 3, 5. Type locality: Republic of South Africa: "Terra Caffrorum". Preoccupied by *Pteropus collaris* Illiger, 1815; see Kwiecinski and Griffith (1999: 1).
1825. *Pteropus geoffroyi* Temminck, Monogr. Mamm., 1 (5): 197, pl. 15, f. 14, 15. Type locality: Senegal and probably north coast of Africa. Meester *et al.* (1986: 29) mention that the type locality is restricted to Giza, Egypt by Koopman (1975: 361).
1827. *Pteropus amphiplexicaudatus* Temminck, Monogr. Mamm. Type locality: Republic of South Africa: Cape. Probably a lapsus which should be assigned to Roberts (1951: 55) since that author mentions it as "not of Geoffroy", which would probably refer to *amplexicaudatus*.
1829. *Pteropus Leachii* A. Smith, Zool. Journ., 4: 433. Type locality: Republic of South Africa: Gardens about Cape Town. Publication date: May 1829.
1832. *Pteropus hottentottus* Temminck, In Smuts, Enumer. Mamm. Capensium, p. 3. Type locality: South Africa: Cape Province, Cape Town. Mentioned as "*hottentotus*" by Koopman (1993), Simmons (2005), but as *hottentottus* by Allen (1939a: 62), Roberts (1951: 55), Meester *et al.* (1986: 29), Kwiecinski and Griffiths (1999:).
1870. *Eleutherura unicolor* Gray, Cat. Monkeys, Lemurs, Fruit-eating Bats Brit. Mus., p. 117. Type locality: Gabon: "Gaboou". Type specimen: BMNH 1862.8.26.1.
1908. *Rousettus sjöstedtii* Lönnberg, Wiss. Ergebn. Swedischen Zool. Exp. u. Leitung Sjöstedt, Kilimandjaro-Meru, 1: nr 2, p. 7. Type locality: Tanzania: near Tanga, Mkulumusi caves.
1960. *Rousettus aegyptiacus occidentalis* Eisentraut, Bonn. zool. Beitr., 10: 231 (for 1959). Type locality: Cameroon: N side of Cameroon Mountain, Mueli, ca. 600 m [04 23 N 09 07 E]. Type specimen ZFMK 59.450 (ad M, skin and skull, collector Martin Eisentraut, collection date 20 February 1958, original number 648). Publication date: 10 January 1960.
1993. *Rousettus aegyptiacus thomensis* Feiler, Haft and Widmann, Faun. Abh. Staat. Mus. Tierk. Dresden, 19 (4): 22. Type locality: São Tomé and Príncipe: Generosa, Sao Tomé, ca 800 m. Type: MTD 16753 (M, ad, skin and skull; collection date 26 March 1991; 2 paratypes: M + 1; Feiler *et al.*, 1993: 22 - 23).
1993. *Rousettus aegyptiacus tomensis* Juste and Ibáñez, Zool. J. Linn. Soc., 107: 124. Type locality: São Tomé and Príncipe: São Tomé Island, Bindá (Santa Catarina).
1993. *Rousettus aegyptiacus princeps* Juste and Ibáñez, Zool. J. Linn. Soc., 107: 123. Type locality: São Tomé and Príncipe: Príncipe Island, 2 km S of Santoa Antonio de Príncipe, Roca Bela Vista.
- ? *Rousettus aegyptiacus*: Name combination.

Taxonomy:

Corbet and Hill (1992) corrected Geoffroy Saint-Hilaire's spelling of *Rousettus aegyptiacus* to *R. aegyptiacus*, a change endorsed by Koopman (1993: 152), Bergmans (1994). Kock (2001b), however, has presented a detailed and convincing case for regarding *egyptiacus* as an incorrect original spelling and treating *aegyptiacus* as the valid name (Bronner *et al.* 2003). Kock (1969: 16), Qumsiyeh *et al.* (1992: 104) and Horáček *et al.* (2000) state that Geoffroy St.-Hilaire (1818: 134) already corrected the spelling to *aegyptiacus*. Allen (1939a: 62) also indicates that it was a misprint in the 1810

publication, which was corrected in the 1818 publication.

Meester *et al.* (1986) states that while *leachii* is clearly the Southern African subspecies, extending well beyond the limits of this subregion, Hayman and Hill (1971) state that intergradation with *aegyptiacus* may occur in the equatorial zone. Koopman (1975: 361) indicates that in the Sudan there is a hiatus between the ranges of these two sub-species, and he remarks that if they make contact it will be in Ethiopia, north of the equator. See Simmons (2005: 347).

Common names:

Afrikaans: Egiptiese vrugtevelermuis. Arabian: Khafash El Fawakeh, Khafash Masri. Czech: kalon egyptsky. Dutch: Nijlrousettus. English: Egyptian Fruit Bat, Egyptian Rousette, Egyptian Rousette Bat, West African Rousette. French: Rousette égyptienne. Portuguese: Morcego frugivoro do Egípto.

Etymology of name:

The name is derived from the fact that the species was originally described from a specimen from the Great Pyramid of Giza in Egypt (see Smithers, 1983: 63).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cs).

Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Senegal over Togo and Nigeria (Capo-Chichi *et al.*, 2004: 161) to Egypt (incl. Guinea (Fahr and Ebigo, 2003: 128), Central African Republic (Morvan *et al.*, 1999: 1195), Republic of the Congo (Dowsett *et al.*, 1991: 259), Uganda (Kityo and Kerbis, 1996: 59), São Tomé (Juste and Ibáñez, 1993: 906), Ethiopia (Lavrenchenko *et al.*, 2004: 135), Israel, Jordan, Lebanon, S Syria, Cyprus, and Turkey, over Malawi (Ansell and Dowsett, 1988: 28) south to Zambia (Cotterill, 2004: 260), Zimbabwe (Cotterill, 2004: 260), South Africa; S Iran, Pakistan (and possibly adjoining parts of NW India) to Yemen; adjacent small islands.

Molecular biology:

DNA - Unknown.

Karyotype - $2n = 36$, FN= 66, BA 16, and a submetacentric X chromosome (Dulic and Mutere, 1973, 1977).

Protein / allozyme - Unknown.

Figure 29. Distribution of *Rousettus aegyptiacus*

Distribution based on voucher specimens: Angola, Cameroon, Egypt, Egypt ?, Ethiopia, Kenya, [Mozambique](#), Rwanda, São Tomé and Príncipe, [South Africa](#), Tanzania, Unknown country, Zambia, [Zimbabwe](#).

Rousettus lanosus Thomas, 1906

- *1906. *Rousettus lanosus* Thomas, Ann. Mag. Nat. Hist., ser. 7, 18 (104): 137. Type locality: Uganda: Ruwenzori East, Mubuku Valley, 13,000 ft (3,962 m). Originally "Ruwenzori East at 13,000 ft", but restricted to Mubuku Valley by Hayman *et al.* (1966: 30) (see Bergmans, 1994: 109). Type specimen: BMNH 1906.7.1.2. Publication date: 1 August 1906.
1909. *Rousettus kempfi* Thomas, Ann. Mag. Nat. Hist., ser. 8, 4 (24): 543. Type locality: Kenya: southern slopes Mt. Elgon, Kirui's, Twere, 6,000 ft (2,000 m) [c 00 46 N 34 37 E]. Type specimen: BMNH 1910.4.1.6 (sad M, Rudd collection, collection date 16 September 1909, original number 269). Publication date: 1 December 1909.

Taxonomy:

Revised by Bergmans (1994), but see Simmons (2005: 348).

Common names:

English: Mountain Rousette, Long-haired Rousette, Woolly Rousette, Ruwenzori Long-haired Rousette. French: Rousette à longs poils.

Etymology of name:

From the Greek/Latin? "*lanosus*" for woolly.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cw).

General distribution:

Uganda (Kityo and Kerbis, 1996: 60), Kenya, Tanzania, S + W(?) Ethiopia (Bergmans, 1994: 79), E Democratic Republic of the Congo, S Sudan, Rwanda (? Bergmans, 1994: 79), Malawi (First record: Bergmans, 1994: 79).

Figure 30. Distribution of *Rousettus lanosus*

Distribution based on voucher specimens: Egypt, Kenya, Rwanda, Sudan, Tanzania, Uganda.

Rousettus madagascariensis G. Grandidier, 1929

- *1929. *Rousettus madagascariensis* G. Grandidier, Bull. Acad. Malgache, (N.S.) 11: 91, pl. 4 text-figs. (skull) (for 1928). Type locality: Madagascar: Beforona, Grand Fôret de l'Est (between Tananarive [=Antananrivo] and Andevoranto, E Madagascar). Type specimen: MCZ 45432 (ad M, body in alcoholic and skull, received from G. Grandidier from the Académie Malgache, collection date: 1917, see Bergmans, 1994: 119; Peterson *et al.*, 1995: 49; Helgen and McFadden, 2001: 141).

Taxonomy:

Considered a subspecies of *lanosus* by Hayman and Hill (1971: 12); but see Bergmans (1977a) and Simmons (2005: 348).

Bergmans (1994: 119) indicates that the year of publication is often cited as 1928, but Tome XI of the Bulletin de l'Académie Malgache, Nouvelle Série, for 1928, in which it appeared, was published in 1929.

Helgen and McFadden (2001: 141) indicate that it might even be published in 1930.

Viruses:

In Madagascar during 2003 -2004, lehle *et al.* (2007) found both the Tioman (TiV) virus, with an overall contamination of 20.0%, but the Nipah (NiV) and Hendra (HeV) viruses were not detected.

Distribution based on voucher specimens:
Madagascar.

Common names:

English: Madagascan Rousette, Madagascar Rousette. French: Roussette de Madagascar.

Conservation status:

Global- LR/nt ver 2.3 (1994).

General distribution:

Madagascar.

Predators:

Goodman and Griffiths (2006) in Madagascar found that *R. madagascariensis* constituted 81.3% of the total biomass predated by the barn owl (*Tyto alba*).

Rousettus obliviosus Kock, 1978

- *1978. *Rousettus (Rousettus) obliviosus* Kock, in Olembo, Castelino, and Mutere: Proc. 4th Int. Bat Res. Conf. Nairobi, p. 208. Type locality: Comoro Islands: Grand Comoro, near Boboni [640 m]. Type specimen: ZFMK 58207 (ad M, collector Voeltzkow, original number 60, collection date 3 August 1903).

Taxonomy:

Considered a valid species by Koopman (1993a: 153), Bergmans (1994: 79), Wilson and Cole (2000: 40), and Simmons (2005: 348), but as a subspecies of *madagascariensis* by Peterson *et al.* (1995: 48).

Common names:

English: Comoro rousette. French: Roussette des Comores.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cq).

General distribution:

Comoro Islands.

Distribution based on voucher specimens:

Comoro Islands, South Africa.

Figure 31. Distribution of *Rousettus obliviosus*

Genus **Scotonycteris** Matschie, 1894

- *1894. *Scotonycteris* Matschie, Sitzb. Ges. Naturf. Freunde Berlin, p. 200. Type species: *Scotonycteris zenkeri* Matschie, 1894.

Taxonomy:

Reviewed by Bergmans (1991). See Simmons (2005: 349).

Common names:

English: Harlequin Fruit-bats, Tear-drop Fruit-

bats, West African fruit bats.

Etymology of name:

From "Scoto" meaning darkness and the Greek "nycteris" meaning bat.

Scotonycteris ophiodon Pohle, 1943

- *1943. *Scotonycteris ophiodon* Pohle, Sitzb. Ges. Naturf. Freunde Berlin, p. 76 (for 1942). Type locality: Cameroon: Kribi, Bez, Bipindi [03 06 N 10 30 E]. -
1946. *Scotonycteris ophiodon cansdalei* Hayman, Ann. Mag. Nat. Hist., ser. 11, 12 (95): 766 (for 1945). Type locality: Ghana: Central province, Oda district, Oda [05 55 N 00 56 W]. Type specimen: BMNH 1946.229 (ad F, skin and skull, collector G.S. Cansdale, collection date 24 December 1945, original number 420). Publication date: 19 September 1946.

Taxonomy:

See Simmons (2005: 349).

Common names:

English: Snake-toothed Harlequin Fruit-bat, Pohle's Harlequin Fruit-bat, Snake-toothed Tear-drop Fruit-bat, Pohle's Tear-drop Fruit-bat, Pohle's fruit bat. French: Roussette de Pohle.

Etymology of name:

From "ophiodon" meaning snake-toothed.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); EN A4c ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004oc).

General distribution:

Liberia over Côte d'Ivoire (Henry *et al.*, 2004: 24) to Republic of the Congo.

Distribution based on voucher specimens:

Cameroon, Ghana.

Figure 32. Distribution of *Scotonycteris ophiodon*

Scotonycteris zenkeri Matschie, 1894

- *1894. *Scotonycteris zenkeri* Matschie, Sitzb. Ges. Naturf. Freunde Berlin, p. 202. Type locality: Cameroon: Yaunde. -
1904. *Scotonycteris bedfordi* Thomas, Abstr. Proc. Zool. Soc. Lond., 4: 14. Type locality: Equatorial Guinea: Bioko, Fish Town. Type specimen: BMNH 1904.7.1.28 (F, collector: E. Seimund, collection date: 2 January 1904, original number 31) Publication date: 8 March 1904.
1947. *Scotonycteris zenkeri occidentalis* Hayman, Ann. Mag. Nat. Hist., ser. 11, 13 (103): 503 (for 1946). Type locality: Ghana: Oda province, Oda. Type specimen: BMNH 1946.898 (ad F, skin and skull (ex alcoholic), collector G.S. Cansdale, collection date 1946). Publication date: 25 June 1947.

Taxonomy:

See Simmons (2005: 349).

Common names:

English: Zenker's Harlequin Fruit-bat, Zenker's Tear-drop Fruit-bat, Zenker's fruit bat. French: Roussette de Zenker.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bm).

General distribution:

Liberia over Côte d'Ivoire (Henry *et al.*, 2004: 24), Nigeria (Capo-Chichi *et al.*, 2004: 161), to Republic of the Congo and E Democratic Republic of the Congo; Bioko.

Distribution based on voucher specimens:

Cameroon, Equatorial Guinea, Ghana.

INFRAORDER RHINOLOPHIFORMACEI

- *? **RHINOLOPHIFORMACEI** The name of the Infraorder is based on *Rhinolophus* Lacépède, 1799 (type of RHINOLOPHIDAE Gray, 1825).
 ? *Yinochiroptera*

Superfamily RHINOLOPHOIDEA

- *? **RHINOLOPHOIDEA** The name of the Superfamily is based on *Rhinolophus* Lacépède, 1799 (type of RHINOLOPHIDAE Gray, 1825).

Family HIPPOSIDERIDAE Lydekker, 1891

1860. *Phyllorrhina* Koch, Pavlinov *et al.* (1995: 75) mention *Phyllorrhina* with a question mark as synonym of Hipposideridae.
 1866. *Rhinonycterina* Gray,
 *1891. *Hipposiderinae* Lydekker, Mammals Living and Extinct, p. 657. Type genus: *Hipposideros* Gray, 1831.
 1941. *Coelopsinae* Tate, Mentioned as a synonym of the Hipposideridae by Pavlinov *et al.* (1995: 84).

Taxonomy:

Considered a subfamily of the Rhinolophidae by Koopman (1993a: 169), Schutt and Simmons (1998: 28), but see Harrison and Bates (1991: 51), Corbet and Hill (1992: 104), Peterson *et al.* (1995: 66), Hutson *et al.* (2001: 16), Simmons (2005: 365), who consider this to be a valid family. Hooper and Van Den Bussche (2003: 10 - 12) suggest that the Hipposideridae might not be monophyletic, with *Triaenops* being different, although they state this might be the result of inadequate sampling.

Common names:

English: Old-World leaf-nosed bat, Trident bats, Leaf-nosed bats. German: Rundblattnasen.
 Norwegian: Rundbladneser, falske hesteskoneser.

Subfamily Hipposiderinae Lydekker, 1891

1860. *Phyllorrhina* Koch, Pavlinov *et al.*, (1995: 75) mentions *Phyllorrhina* with a question mark as synonym of Hipposideridae.
 1866. *Rhinonycteris* Gray,
 *1891. *Hipposiderinae* Lydekker, Mammals Living and Extinct, p. 657. Type genus: *Hipposideros* Gray, 1831.
 1941. *Coelopsinae* Tate, Mentioned as a synonym of the Hipposideridae by Pavlinov *et al.* (1995: 84).

Genus ***Asellia*** Gray, 1838

1838. *Asellia* Gray, Mag. Zool. Bot., 2 (12): 493. Publication date: 1 February 1838. Type species: *Rhinolophus tridens* E. Geoffroy Saint-Hilaire, 1813.

Taxonomy:

Allen (1939a: 78) mentioned that *Asellia* was originally described as subgenus of *Hipposideros*.

Etymology of name:

From the Greek "*asellia*" meaning without saddle, referring to the absence of a sella.

Common names:

English: Lesser Trident Bats, Trident Bats, Trident Leaf-nosed Bats. French: *Asellia*, Chauve-souris à 3 endentures.

Asellia patrizii de Beaux, 1931

- *1931. *Asellia patrizii* de Beaux, Ann. Mus. civ. Stor. nat. Genova, 55: 186. Type locality: Ethiopia: Dancalia, Gaare. Publication date: 6 June 1931.

Taxonomy:

See Simmons (2005).

General distribution:

N Ethiopia and islands in the Red Sea.

Common names:

English: Patrizi's Lesser Trident Bat, Patrizi's trident leaf-nosed bat. French: *Asellia* de Patrizi.

Conservation status:

Global- VU (Baillie and Groombridge 1996); VU D2 ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004m).

Asellia tridens (E. Geoffroy St.-Hilaire, 1813)

- *1813. *Rhinolophus tridens* E. Geoffroy Saint-Hilaire, Ann. Mus. Hist. Nat. Paris, 20: 260, pl. 5 (Grubb *et al.*, 1998: 82 mention p. 265). Type locality: Egypt: Qena, near Luxor (Kock (1969: 122), Corbet and Hill (1992: 116) and Horáček *et al.* (2000: 98) only mention "Egypt". Kock (1969: 122) also indicates that E. Geoffroy (1818: 127) restricted the type locality to "Grab der Könige (=Theben, Luxor)". Type specimen: MNHN A.235 + 237 (Syntypes: MNHN A.235; ad M, alcoholic (skull not removed); MNHN 237: ad F; alcoholic (skull not removed); see Qumsiyeh (1985: 41)); BMNH 1912.11.14.2. Publication date: 1813.
1881. *Phyllorhina tridens murraiana* Andersen, Catalogue of Mammalia preserved in the Indian Museum Calcutta, Vol. I: 113. type locality: Pakistan: Karachi.
1918. *Asellia tridens diluta* K. Anderson, Ann. Mag. nat. Hist., ser. 9, 2 (10): 375. Type locality: Algeria: Algerian Sahare, El Golea. Type specimen: BMNH 1912.11.14.2 (F, collector Dr. E. Hartert, collection date 16 May 1912, original number 42, presented by Lord Rothschild; see Andersen (1918: 379). Publication date: 1 October 1918.
1931. *Asellia tridens italosomalica* de Beaux, Ann. Mus. civ. Stor. nat. Genova, 55: 190. Type locality: Somalia: Oddur. Publication date: 6 June 1931.
1937. *Asellia tridens pallida* Laurent, Mammalia, 1: 111. Type locality: Morocco: Anti Atlas, Oued Tata.
- ? *Asellia tridens*: Name combination.

Taxonomy:

Simmons (2005: 366) assigned *A. tridens diluta* to J. Anderson (1881), which would make this form Asian. However, no description is found in J. Anderson's publication, but a description is found in Andersen (1918: 379). Therefore it is suggested that *diluta* be assigned to Anderson 1918 and not 1881.

Molecular biology:

DNA - Unknown.

Karyotype - Baker *et al.* (1974) reported 2«n» = 50, FN = 60, a subtelocentric X chromosome and an acrocentric Y chromosome. Baker *et al.* (1975) reported BA = 14.

Protein / allozyme - Unknown.

Common names:

English: Geoffroy's Lesser Trident Bat, Trident Leaf-nosed Bat, Trident bat. French: *Asellia* à trois endentures, Chauve-souris trident, Trident. German: Dreizackblattnase.

Etymology of name:

So named because of the three-pronged process at the top of the nose-leaves and noticeably short ears (Taylor 2005).

Conservation status:

Global- LR/Lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004).

General distribution:

Pakistan over Afghanistan, Iraq, Iran, Syria to Saudi Arabia, Yemen, Oman, Sinai peninsula (NE Egypt) and Israel and Jordan; Egypt over S Libya (Horáček *et al.*, 2000: 99), Tunisia (Horáček *et al.*, 2000: 99), Algeria (Horáček *et al.*, 2000: 99) to Morocco, Senegal, Gambia (Kock *et al.*, 2002: 86), Chad, Sudan, Ethiopia (Lavrenchenko *et al.*, 2004: 147), and S Somalia; Socotra (Yemen); perhaps Zanzibar.

Figure 34. Distribution of *Asellia tridens*

Distribution based on voucher specimens:
Algeria, Egypt, Unknown country.

Genus *Cloeotis* Thomas, 1901

- *1901. *Cloëotis* Thomas, Ann. Mag. nat. Hist., ser. 7, 8 (43): 28. Publication date: 1 July 1901.
 Type species: *Cloëotis percivali* Thomas, 1901.
 ? *Cloëotis*: Current spelling.

Taxonomy:
 Reviewed by Hill (1982).

Etymology of name:
 From "*cloëotis*" meaning short-eared.

Common names:
 English: Short-eared Trident Bats, Short-eared Bats, African Trident Bats, African Trident-nosed Bats, Trident-nosed Bats.

Cloeotis percivali Thomas, 1901

- *1901. *Cloëotis Percivali* Thomas, Ann. Mag. Nat. Hist., ser. 7, 8 (43): 28. Type locality: Kenya: Coast Prov., N of Mombasa, Takaungu. Type specimen: BMNH 1901.5.1.11 (Holotype, M, presented by Mr. A.B. Percival, collection date: 15 February 1901). Publication date: 1 July 1901.
 1917. *Cloëotis percivali australis* Roberts, Ann. Transv. Mus., 5: 264. Type locality: Republic of South Africa: W Transvaal, Rustenburg district, Mooimeisiesfontein [25 01S 27 37E]. Type specimen: TM 1690 (Holotype: ad F, skin and skull, collector: W. Powell, collection date: 28 May 1915) Publication date: 16 May 1917. Considered a valid subspecies by Taylor (1998: 41).
 ? *Cloeotis percivali*: Current spelling.

Taxonomy:
 Meester *et al.*, (1986: 43 - 44) recognized two subspecies *percivali* and *australis*.

Conservation status:
 Global- LR/nt (Baillie and Groombridge 1996); VU A2bc+A3bc, C1 ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ac).
 Regional- South Africa- Indeterminate (Smithers 1986); CR A2a ver 3.1 (2001) (Friedmann and Daly 2004). Swaziland- DD ver 3.1 (2001) (Monadjem *et al.*, 2003).

General distribution:
 Kenya, Tanzania, S Democratic Republic of the Congo, Mozambique, Zambia, Zimbabwe, SE Botswana; South Africa (incl. Swaziland, Transvaal, N KwaZulu Natal (Seamark, 2005a: 3)).

Echolocation:
 See Taylor (1999).

Molecular biology:
 DNA - Unknown.
 Karyotype - $2n = 40$ (Rautenbach *et al.*, 1993).
 Protein / allozyme - Unknown.

Figure 35. *Cloeotis percivali*

Common names:
 Afrikaans: Drietand-bladneusvlermuis. English: Percival's Short-eared Trident Bat, Percival's trident bat, Short-eared Trident Bat, African Trident Bat, East African trident bat. French: Asellia d'Afrique orientale, Phyllorine à petites oreilles. Portuguese: Morcego tridentado. SiSwati- Lilulwane.

Etymology of name:
 In honour of Mr. A.B. Percival, collector of the type specimen.

Figure 36. Distribution of *Cloeotis percivali*

Distribution based on voucher specimens:
Congo (Democratic Republic of the), Kenya,
South Africa, Swaziland, Zambia, Zimbabwe.

Genus *Hipposideros* Gray, 1831

- *1831. *Hipposideros* Gray, Zool. Misc., 1: 37. Publication date: 1831. Type species: *Vespertilio speoris* Schneider, 1800.
1834. *Hipposiderus* Gray, Proc. zool. Soc. Lond., 1834, II (xviii): 53. Publication date: 26 September 1834. Unjustified emendation (see Meester *et al.*, 1986: 41; Pavlinov *et al.*, 1995: 84; Decher and Fahr, 2005: 1).
1837. *Phyllorhina*: Bonaparte, Iconogr. Fauna ital., 1, fasc. 21: 3. Type species: *Rhinolophus diadema* E. Geoffroy Saint Hillaire, 1813. Publication date: 1837. Preoccupied by *Phyllorhina* Leach, 1816 (see Pavlinov *et al.*, 1995: 84; although they do not explicitly mention its preoccupation). Allen (1939a: 79) indicated that it was described as a subgenus of *Rhinolophus*.
1866. *Chrysonycteris* Gray, Proc. zool. Soc. Lond., 1866, I: 82. Publication date: May 1866. Type species: *Hipposideros fulvus* Gray, 1838.
1866. *Gloionycteris* Gray, Proc. zool. Soc. Lond., 1866, I: 82. Publication date: May 1866. Type species: *Rhinolophus armiger* Hodgson, 1835.
1866. *Macronycteris* Gray, Proc. zool. Soc. Lond., 1866, I: 82. Publication date: May 1866. Type species: *Rhinolophus gigas* Wagner, 1845.
1866. *Rhinophylla* Gray, Proc. zool. Soc. Lond., 1866, I: 82. Publication date: May 1866. Type species: *Phyllorhina labuanensis* Tomes, 1859. Preoccupied by *Rhinophylla* Peters, 1965 (see Pavlinov *et al.*, 1995: 84).
1866. *Speorifera* Gray, Proc. zool. Soc. Lond., 1866, I: 82. Publication date: May 1866. Type species: *Rhinolophus vulgaris* Horsfield, 1823 (= *Rhinolophus larvatus* Horsfield).
1871. *Cyclorhina* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 326. Publication date: 1871. Type species: *Phyllorhina obscura* Peters, 1861 and *Phyllorhina doriae* Peters, 1871. Meester *et al.* (1986: 42) retain only *Phyllorhina obscura* Peters as type species, by subsequent designation by Tate (1941: 354).
1871. *Doryrhina* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 314 (Grubb *et al.* (1998: 79) mention p. 324). Publication date: 1871. Type species: *Phyllorhina cyclops* Temminck, 1853.
1871. *Ptychorhina* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 325. Publication date: 1871. Type species: *Rhinolophus caffer* Sundevall, 1846.
1871. *Sideroderma* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 324. Publication date: 1871. Type species: *Phyllorhina fuliginosa* Temminck, 1853.
1871. *Syndesmotus* Peters,
1871. *Syndesmotis* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 329. Publication date: 1871. Type species: *Phyllorhina megalotis* Heuglin, 1862.
1871. *Thyreorhina* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 327. Publication date: 1871. Type species: *Phyllorhina coronata* Peters, 1871.
1902. *Syndesmotus* Waterhouse, Objective synonym of *Syndesmotis* Peters, 1871 (see Simmons, 2005).

Taxonomy:

For review of the genus see Hill (1963a), on which the above synonymy and the treatment that follows are largely based, followed by Meester *et al.* (1986); Koopman (1993a: 170). Hill (1963a), recognizes seven species groups, five are recognized in Africa *speoris*, *bicolor*, *cyclops*, *commersoni*, *megalotis* (Simmons 2005: 367-379).

Common names:

English: Leaf-nosed Bats, Leafnosed Bats, Roundleaf Bats.

Etymology of name:

From the Greek "*hippos*" for horse and "*sideros*" for iron (=horse-iron, horseshoe), an allusion to the shape of the noseleaf.

Distribution based on voucher specimens:

Namibia, South Africa, Swaziland.

Hipposideros abae J.A. Allen, 1917

- *1917. *Hipposideros abae* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 432. Type locality: Democratic Republic of the Congo: Oriental, Uele district, Aba. Type specimen: AMNH 49123 (ad M, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 13 December 1911, original number 1715). Publication date: 29 September 1917.
- ? *Hipposideros abae*: Current spelling.

Taxonomy:

Simmons (2005: 367) places it in the *speoris* species group.

Common names:

English: Aba roundleaf bat, Aba Leaf-nosed Bat.
French: Phyllorine d'Aba.

Etymology of name:

Referring to the locality where the type specimen was collected (Aba).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bs).

General distribution:

Guinea-Bissau to SW Sudan and Uganda (Kityo and Kerbis, 1996: 61; Simmons 2005: 367).

Distribution based on voucher specimens:

Congo (Democratic Republic of the).

Figure 37. Distribution of *Hipposideros abae*

Hipposideros beatus (K. Andersen, 1906)

- *1906. *Hipposideros beatus* K. Andersen, Ann. Mag. nat. Hist., ser. 7, 17 (99): 279. Type locality: Equatorial Guinea: Rio Muni, 15 mi (24 km) from Benito River. Type specimen BMNH 1900.2.5.45 (ad F, alcoholic, collector G.L. Bates, collection date February 1899). Publication date: 1 March 1906.
1957. *Hipposideros beatus maximus* Verschuren, Explor. Parc natl. Garamba, 7: 365. Type locality: Democratic Republic of the Congo: Garamba Nat. Park, Source area of Pidigala-Nord.
- ? *Hipposideros beatus*: Name combination.

Taxonomy:

Simmons (2005: 368) places it in the *bicolor* species group.

Common names:

English: Benito roundleaf bat, Benito leaf-nosed bat, Dwarf Leaf-nosed Bat. French: Phyllorine de Benito.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ck).

General distribution:

Guinea-Bissau, Sierra Leone, Liberia, Ghana, Ivory Coast, Nigeria, Cameroon, Rio Muni (Equatorial Guinea), Gabon, N Democratic Republic of the Congo.

Hipposideros caffer (Sundevall, 1846)

- *1846. *Rhinolophus caffer* Sundevall, Öfvers. K. Svenska Vet.-Akad. Forh. Stockholm, 3 (4): 118. Type locality: Republic of South Africa: Natal, near Port Natal [=Durban] (originally: "Circa Port-Natal inventus"). Type specimen: BMNH 1849.11.22.11 (Syntype, skin) and BMNH 1846.6.2.16.1(skull) (Cotype from Stockholm Museum, labeled "*Hipposideros caffer typicus*" locality Natal). Publication date: 1846.
1852. *Phyllorhina caffra* Peters, Naturw. Reise Mossamb., Säugethiere. Publication date: 1852.
1852. *Phyllorhina gracilis* Peters, Naturw. Reise Mossamb., Säugethiere, p. 36, pl. 7, fig. 1 - 4; pl. 13 fig. 14-15. Type locality: Mozambique: Lower Zambesi River, Tette. - Publication date: 1852.
1861. *Phyllorhina bicornis* Heuglin, Nova Acta Acad. Cæs. Leop.-Carol., Halle, 29 (8): 4, 7. Type locality: Eritrea: Kérén [c 15 45 N 38 20 E]. - (Meester *et al.* (1986: 43) mentioned it as *Phyllorhina bicornis*.)
1898. *Phyllorhina angolensis* Seabra, J. Sci. mat. Phys. Nat., Lisboa, ser. 2, 5: 256. Type locality: Angola: Rio Coroca (Meester *et al.* (1986: 43) indicate "Benguela, Angola, restricted by Hill and Carter (1941: 40), who point out that the name is based on four specimens from Benguela, housed in the Museu Bocage, Lisbon, and one from Rio Coroca, Angola, in the British Museum (Natural History). Koopman (in litt.) points out that as the Museu Bocage had been destroyed by fire the Rio Coroca specimen may be the only remaining of the type series."). Type specimen: BMNH 1906.1.3.2 (Syntype). Publication date: December 1898.
1906. *Hipposiderus tephros* Cabrera, Bol. R. Soc. esp. Hist. nat., 6: 358. Type locality: Morocco: Mogador. Type specimen: MNCN 110 (ad M). Publication date: July 1906.
1917. *Hipposideros nanus* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 434. Type locality: Democratic Republic of the Congo: E Congo, Uele district, Faradje. Type specimen: AMNH 49426 (ad F, alcoholic, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 24 September 1912 [Allen (1917: 434) erroneously mentioned 24 October 1912, see Goodwin (1953: 245)], original number 1689). Publication date: 29 September 1917.
1924. *aurantiaca* de Beaux, ?
1939. *Hipposideros braima* Monard, Arq. Mus. Bocage, Lisboa, 10: 73. Type locality: Guinea Bissau: Bagingarà [12 35 N 14 28 W]. Type specimen: ? (ad F, nr 602). Publication date: March 1939.
1965. *Hipposideros braimah* Rosevear, Bats West Africa, 221, 226. Lapsus for braima Monard, 1939 (see Kock, 1969: 130).
- ? *Hipposideros caffer*: Name combination.

Taxonomy:

Meester *et al.* (1986) state that further extralimital [to Southern Africa] subspecies may include *centralis* Andersen, 1906, *tephros* Cabrera, 1906, *nanus* J.A. Allen, 1917 (Koopman 1975), and also *guineensis* Andersen, 1906, and *niapu* J.A. Allen, 1917 (Hill 1963). Most recent authors appear to regard *ruber* Noack, 1893, as a separate species (Kock 1969, Hayman and Hill 1971, Ansell 1978, Corbet and Hill 1980, Koopman in Honacki *et al.* 1982). Although Hill (1963) and Koopman (1975) regard *ruber* as only subspecifically distinct from *caffer*. Simmons (2005: 368) places *H. caffer* within the *bicolor* species group.

Figure 38. *Hipposideros caffer* (yellow form)

Figure 39. *Hipposideros caffer* (brown form)

Common names:

Afrikaans: Sundevall se bladneusvlermuis, Sundevall-bladneusvlermuis, Kaapse Blaarneusvlermuis. English: Sundevall's Leaf-nosed Bat, Common African Leaf-nosed Bat, Lesser Leaf-nosed bat, Sundevall's roundleaf bat, Cape Leaf-nosed bat, Sundevall's African Leaf-nosed Bat. French: Phyllorine de cafrérie, Phyllorine de Sundevall, Rhinolophe de Cafrerie. Portuguese: Morcego de nariz enfolhado da cafraria.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004au).

Regional- South Africa- DD ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Most of subsaharan Africa (incl. Gambia (Emms and Barnett, 2005: 50), Guinea (Fahr and Ebigo, 2003: 128, as "*Hipposideros cf. caffer*"), Benin (Capo-Chichi *et al.*, 2004: 162), Senegal; Republic of the Congo (Dowsett *et al.*, 1991: 259), Uganda (Kityo and Kerbis, 1996: 61), Zambia (Cotterill, 2002: 5), Zimbabwe, Namibia, Botswana, Angola (Cotterill, 2004: 261)) except the central forested region; Morocco; Mauritania (Padial and Ibáñez, 2005: 240); Ethiopia (Lavrenchenko *et al.*, 2004: 133); SW Saudi Arabia, Yemen, Zanzibar and Pemba.

Echolocation:

See Pye (1972), O'Shea and Vaughan (1980), Fenton (1986), Jones *et al.*, (1993), Taylor (1999) and Taylor *et al.*, (2005).

Molecular biology:

DNA - Unknown.

Karyotype - Dulic and Mutere (1973), Peterson and Nagorsen (1975) and Rautenbach *et al.*, (1993) all reported $2n=32$, $FN=60$, and $BA=30$. Peterson and Nagorsen (1975) and Rautenbach *et al.*, (1993) also agreed on an acrocentric Y chromosome. However, Dulic and Mutere (1973)

reported a metacentric X chromosome, Peterson and Nagorsen (1975) reported a subtelocentric X chromosome, and Rautenbach *et al.*, (1993) reported a submetacentric X chromosome. Protein / allozyme - Unknown.

Figure 40. Distribution of *Hipposideros caffer*

Distribution based on voucher specimens:

Angola, Botswana, Cameroon, Congo (Democratic Republic of the), Equatorial Guinea, Eritrea, Ethiopia, Ghana, Guinea, Kenya, Morocco, Mozambique, Namibia, Rwanda, São Tomé and Príncipe, Somalia, South Africa, Sudan, Swaziland, Tanzania, Unknown country, Zambia, Zimbabwe.

Hipposideros camerunensis Eisenbraut, 1956

- *1956. *Hipposideros camerunensis* Eisenbraut, Zool. Jahrb. Abt. Syst. Oekol. Geogr. Tiere, 84: 526, fig. 6 - 8. Type locality: Cameroon: near Buea. Type specimen ZFMK 79.138 (ad F, collector Martin Eisenbraut, collection date 28 April 1954, original number 506, exchanged from SMNS in 1979, catalog number 5196) Publication date: 27 December 1956.

Taxonomy:

Simmons (2005: 369) as part of the *cyclops* species group.

Common names:

English: Cameroon Leaf-nosed Bat, Greater roundleaf bat, Greater Cyclops, Eisenbraut's leaf-nosed bat. French: Phyllorine du Cameroun, Phyllorine d'Eisenbraut

Etymology of name:

Referring to the country where the type specimen was collected (Cameroon).

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cy).

General distribution:

Cameroon, E Democratic Republic of the Congo, W Kenya.

Distribution based on voucher specimens:

Cameroon.

Figure 41. Distribution of *Hipposideros camerunensis*

Hipposideros commersoni (E. Geoffroy St.-Hilaire, 1813)

- *1813. *Rhinolophus commersoni* E. Geoffroy Saint-Hilaire, Ann. Mus. Hist. Nat. Paris, 20: 263. Type locality: Madagascar: Fort Dauphin. Publication date: 1813.
1845. *Rhinolophus gigas* Wagner, Arch. Naturgesch. Berlin, 11 (1): 148. Type locality: Angola: Benguela. Publication date: 1845.
1852. *Phyllorhina vittata* Peters, Naturw. Reise Mossamb., Säugethiere, p; 32, pl. 6; pl. 13, fig 7 - 13. Type locality: Mozambique?: Cap Delgado group, Ibo Island [12 20 S]. - Publication date: 1852.
1887. *Phyllorhina commersonii* var. *marungensis* Noack, Zool. Jahrb., Syst., 2 (2): 272, pl. 10, fig 31 - 33. Type locality: Democratic Republic of the Congo: W Shore Lake Tanganyika, Marungu, Qua Mpala (=Mpala, =Pala) [06 43 S 29 31 E]. Ansell and Dowsett (1988: 34) refer to Hayman and Hill (1971: 28) who indicate that *marungensis* may be antedated by *vittata* Peters, 1852. Publication date: 7 May 1887.
1891. *Phyllorhina commersoni* var. *thomensis* Bocage, J. Sci. mat. phys. nat., Lisboa, ser. 2, 2: 88. Type locality: São Tomé and Príncipe: São Tomé island. Publication date: September 1891.
1904. *Hipposideros Commersoni mostellum* Thomas, Ann. Mag. Nat. Hist., ser. 7, 13 (77): 385. Type locality: Kenya: Tana River. Type specimen: BMNH 1889.3.8.3 (Holotype, ad M, skin and skull, presented by H.C.V. Hunter, Esq.). Publication date: 1 May 1904.
1906. *H[ipposiderus]. gigas gambiensis* K. Andersen, Ann. Mag. nat. Hist., ser. 7, 17 (97): 42. Type locality: Gambia: Gambia. Type specimen: BMNH 1842.9.27.36 (ad F, alcohol, presented by the Earl of Derby). Publication date: 1 January 1906.
1917. *Hipposideros gigas niangarae* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 438, pl. 51, fig. 1. Type locality: Democratic Republic of the Congo: Uele district, Niangara. Type specimen: AMNH 49103 (ad F, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 2 June 1913, original number 2069). Publication date: 29 September 1917.
1939. *Hipposideros gigas viegasi* Monard, Arq. Mus. Bocage, Lisboa, 10: 70. Type locality: Guinea Bissau: Madina Boé [11 45 N 14 13 W - RMCA records]. Type specimen: RMCA 15305 (M, skin and skull, collector Monard, collection date 09/03/1939, original number 925); RMCA 15306 (F, skin and skull, collector Monard, original number 916). NMBE 5266/9283 (M, original number 915); NMBE 5267/9284 (F, collection date 9 March 1938, original number 908). Monard (1939: 70) mentions a series of 19 specimens (nrs 908 to 926 and 14 skulls). Publication date: March 1939.
- ? *Hipposideros commersoni*: Name combination.

Taxonomy:

Simmons (2005: 369, 372, 377) restricts *H. commersoni* to Madagascar, and assigns *H. gigas*, *H. vittatus* (including *marungensis*) and *H. thomensis* as the mainland forms based on morphology and echolocation differences. Meester *et al.* (1986) state that Hayman and Hill (1971) note that *marungensis* may be antedated by *vittata* Peters, 1852, from Ibo Island, which is more often regarded as a synonym of the subspecies *gigas* Wagner, 1845 (Allen 1939a, Ellerman *et al.* 1953, Hill 1963).

We retain *H. commersoni* until published material is available for review.

Common names:

Afrikaans: Commerson se bladneusvlermuis, Commerson-bladneusvlermuis, Commersonse Blaarneusvlermuis. English: Commerson's Leaf-nosed Bat, Giant Leaf-nosed Bat, Commerson's roundleaf bat. French: Chauve-souris de Commerson à nez feuillu, Phyllorine de

Commerson. Portuguese: Morcego de nariz enfolhado de commerson.

Etymology of name:

Geoffroy's description was based on drawings and notes found among Commerson's papers, after whom Geoffroy named this species (see Smithers 1983: 133, Taylor 2005).

Conservation status:

Global- Not assessed (IUCN 2004). Assessed *Hipposideros gigas* LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004an). Assessed *Hipposideros marungensis* NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004bb). Assessed *Hipposideros thomensis* NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cx). Regional- South Africa- Indeterminate (Smithers 1986); considered a vagrant not assessed, single locality (Friedmann and Daly 2004).

General distribution:

Gambia over Benin (Capo-Chichi *et al.*, 2004: 162), Central African Republic (Lunde *et al.*, 2001: 537), Republic of the Congo (Dowsett *et al.*, 1991: 259) to Ethiopia, south to Angola, Zambia, Zimbabwe, Namibia, Botswana, Transvaal (South Africa), Malawi (Happold and Happold, 1997: 818) and Mozambique; Madagascar; adjacent small islands; Saõ Tomé.

Echolocation:

See Taylor (1999).

Molecular biology:

DNA - Unknown.

Karyotype - $2n = 52$, FN = 60?, and BA = 10? (Rautenbach, *et al.*, 1993).

Protein / allozyme - Unknown.

Predation:

Goodman and Griffiths (2006) in Madagascar found that *H. commersoni* comprised 0.6% of the total biomass predated by the barn owl (*Tyto alba*).

In February 2005 Goodman (2006) in south-western Madagascar observed local people extensively hunting *H. commersoni*, this coincided with the onset of famine in the region.

Figure 42. Distribution of *Hipposideros commersoni*

Distribution based on voucher specimens:

Angola, Botswana, Cameroon, Chad?, Congo (Democratic Republic of the), Ethiopia, Guinea-Bissau, Kenya, Madagascar, Mozambique, Namibia, Réunion, Rwanda, South Africa, Sudan, Tanzania, The Gambia, Unknown country, Zambia, Zimbabwe.

***Hipposideros curtus* G.M. Allen, 1921**

*1921. *Hipposideros curtus* G.M. Allen, Rev. Zool. Afr., 9: 194. Type locality: Cameroon: Littoral, Sakbayeme. Type specimen: MCZ 19305 (Holotype, ad F, body in alcohol, collector: G. Schwab, 1920; see Helgen and McFadden (2001: 142)). Publication date: December 1921.

1937. *Hipposideros sandersoni* Sanderson, Animal Treasure, p. 290 (fig.), p. 296 ("bluish-grey and small"). Type locality: Nigeria: near Mamfe. Publication date: September 1937.

Taxonomy:

Simmons (2005: 370) placed it as part of the *bicolor* species group. Includes *sandersoni* (Hill 1963a: 60).

Common names:

English: Short-tailed Leaf-nosed Bat, Short-tailed roundleaf bat. French: Phyllorine à queue courte.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); VU A3c ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004db).

General distribution:

Cameroon, Bioko, perhaps Nigeria.

Distribution based on voucher specimens:

Cameroon.

Figure 43. Distribution of *Hipposideros curtus*

Hipposideros cyclops (Temminck, 1853)

- *1853. *Phyllorhina cyclops* Temminck, Esquisses zool. Côte de Guinée, p. 75. Type locality: Ghana: "sur la rivière Boutry, côte de Guinée" (=Butry River). Publication date: 1853.
1897. *Rhinolophus micaceus* de Winton, Ann. Mag. Nat. Hist., ser. 6, 20 (120): 524. Type locality: Gabon: 75 mi (112.5 km) from Gaboon, Como River. Type specimen: BMNH 1897.12.1.7 (Holotype, F, collector G.L. Bates, collection date 6 July 1897, original number: GLB 230, notes: Smoked out of hollow tree. Fang name- angon). Publication date: 1 December 1897.
1899. *Hipposideros cyclops*: de Winton, Ann. Mag. nat. Hist., ser. 7, 4 (23): 354. Publication date: 1 November 1899. Name combination.
1917. *Hipposideros langi* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 434, text-fig. 4 - 6. Type locality: Democratic Republic of the Congo: NE Congo, Oriental province, Avakubi. Type specimen: AMNH 49098 (ad M, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 24 January 1914, original number 2481). Publication date: 29 September 1917.

Taxonomy:

Simmons (2005: 370) in the *cyclops* species group. See Decher and Fahr (2005, Mammalian Species, 763).

Common names:

English: Cyclops Leaf-nosed Bat, Cyclops roundleaf bat, Cyclops Bat. French: Phyllorine des Cyclopes.

Etymology of name:

Refers to the one-eyed giants of Greek mythology and alludes to the orifice in the center of the forehead of these bats (see Rosevear, 1965 in Decher and Fahr, 2005: 4).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cn).

General distribution:

From southern Senegal through Gambia, Guinea Bissau, Guinea, Sierra Leone, Liberia, Côte d'Ivoire, Ghana, Togo, Benin to Nigeria; Cameroon, Equatorial Guinea (Rio Muni and Bioko), Gabon, Central African Republic, Republic of the Congo, Democratic Republic of the Congo, S Sudan; Uganda, Kenya, Tanzania (coastal forests and Eastern Arc Mountains) (Decher and Fahr, 2005: 3).

Figure 44. Distribution of *Hipposideros cyclops*

Distribution based on voucher specimens: Cameroon, Congo (Democratic Republic of the), Gabon.

Hipposideros fuliginosus (Temminck, 1853)

- *1853. *Phyllorhina fuliginosa* Temminck, Esquisses zool. Côte de Guinée, p. 77. Type locality: Ghana: no specific locality. (Allen (1939a: 81) mentioned it as "La côte de Guinée". Grubb *et al.* (1998: 79) mention 'Type locality: "La Côte de Guinée'. Jentink (1888b: 167) gave it as 'Côte d'Or, Pays des Aschantes.'). Publication date: 1853.
- ? *Hipposideros fuliginosus*: Name combination.

Taxonomy:

Simmons (2005: 371) as part of the *bicolor* species group.

Common names:

English: Sooty Leaf-nosed Bat, Sooty roundleaf bat, Dusky leaf-nosed bat. French: Phyllorine sombre.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004da).

General distribution:

Liberia, Guinea (Fahr and Ebigbo, 2003: 128) to Democratic Republic of the Congo and Ethiopia.

Distribution based on voucher specimens:

Cameroon, Ghana, Tanzania.

Figure 45. Distribution of *Hipposideros fuliginosus*

Hipposideros jonesi Hayman, 1947

- *1947. *Hipposideros jonesi* Hayman, Ann. Mag. Nat. Hist., ser. 11, 14 (109): 71. Type locality: Sierra Leone: Makeni [08 57 N 12 02 W]. Type specimen: BMNH 1947.629 (ad F, alcoholic and skull, collector Mr. T.S. Jones, collection date 12 December 1946, original number 42). Publication date: 19 November 1947.

Taxonomy:

Simmons (2005: 373) as part of the *bicolor* species group.

Common names:

English: Jones' Leaf-nosed Bat, Jones's roundleaf bat, Western Africa leaf-nosed bat.
French: Phyllorine d'Afrique occidentale.

Etymology of name:

In honour of Mr. T.S. Jones, the collector of the type specimen.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bt).

General distribution:

Sierra Leone and Guinea to Mali, Burkina Faso and Nigeria.

Distribution based on voucher specimens:

Cameroon, Sierra Leone.

Figure 46. Distribution of *Hipposideros jonesi*

Hipposideros lamottei Brosset, 1985

- *1985. *Hipposideros lamottei* Brosset, Mammalia, 48 (4): 548 (for 1984). Type locality: Guinea: Mt. Nimba, Pierre Richaud [07 41 N 08 22 W]. Type specimen: MNHN CG 1984-487 (ad M, collector André Brosset and P. Richaud, collection date December 1983; 4 cotypes MNHN CG 1984-488, 489). Publication date: 1985.

Taxonomy:

Simmons (2005: 373) *bicolor* species group. Distinction from *H. ruber* is not entirely clear (Koopman 1993a: 173; Simmons 2005: 373).

Common names:

English: Lamotte's Leaf-nosed Bat, Lamotte's roundleaf bat, Mount Nimba leaf-nosed bat. French: Phyllorine du Mont Nimba.

Conservation status:

Global- DD (Baillie and Groombridge 1996); CR B1ab(iii) ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bu).

General distribution:

Mt. Nimba on Guinea-Liberia border, but probably more widespread.

Distribution based on voucher specimens:

Guinea.

Figure 47. Distribution of *Hipposideros lamottei*

Hipposideros marisae Aellen, 1954

- *1954. *Hipposideros marisae* Aellen, Rev. Suisse Zool., 61 (24): 474. Type locality: Côte d'Ivoire: Duékoué, White Leopard Rock (Original: roche de la Panthère Blanche). Type specimen (ad M, orig nr 400, collection date: 13 May 1953).

Taxonomy:

Simmons (2005: 374) includes it as part of the *bicolor* species group.

Common names:

English: Marisa's Leaf-nosed Bat, Aellen's Leaf-nosed Bat, Aellen's roundleaf bat. French: Phyllorine d'Aellen.

Etymology of name:

In honour of Mrs. Aellen (Aellen, 1954: 474).

Conservation status:

Global- VU (Baillie and Groombridge 1996); EN A4c ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bv).

General distribution:

Côte d'Ivoire, Liberia, Guinea.

Hipposideros megalotis (Heuglin, 1861)

- *1861. *Phyllorhina megalotis* Heuglin, Nova Acta Acad. Cæs. Leop.-Carol., Halle, 29 (8): 4,8. Type locality: Eritrea: Bogos Land, Keren [c 15 45 N 38 20 E]. Publication date: 1861. (Horáček *et al.* (2000: 98) mention "Monatsber. Königl. Preuss. Akad. Wiss. Berlin: 329". Simmons (pers. comm.) checked this and rejected this reference.)
- ? *Hipposideros megalotis*: Name combination.

Taxonomy:

Placed in the subgenus *Syndesmotis* by Legendre (1982) and Gaucher and Brosset (1990). Horáček *et al.* (2000: 98) include it with a question mark. Simmons (2005: 374) mentions it as part of the *megalotis* species group.

Common names:

English: Large-eared Leaf-nosed Bat, Ethiopian Large-eared Leaf-nosed Bat, Ethiopian Large-eared Roundleaf Bat, Big-eared leaf-nosed bat. French: Phyllorine à grandes oreilles d'Ethiopie.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LR/nt (Hilton-Taylor 2000); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bw).

General distribution:

Ethiopia, Eritrea, Djibouti, Somalia, Kenya, Saudi Arabia.

Hipposideros ruber (Noack, 1893)

- *1893. *Phyllorhina rubra* Noack, Zool. Jahrb. Abt. Syst. Oekol. Geogr. Tiere, 7: 586, pl. 18, fig. 14, 15. Type locality: Tanzania: Eastern Province, Ngerengere River (Allen (1939a: 81) mentioned it as "Lugerrunjere Fluss, Tanganyika Territory". Grubb *et al.* (1998: 80) mention "Type locality: Lugerrunjere Fluss = Ngerengere River, Tanzania - probably Ngerengere village, 32 miles east of Morogor according to Swynnerton, 1945, Proc. Zool. Soc. Lond., 115: 69"). - Publication date: 23 December 1893.
1906. *Hipposiderus caffer centralis* K. Andersen, Ann. Mag. nat. Hist., ser. 7, 17 (99): 275, 277. Type locality: Uganda: Entebbe [Ntebbi]. Type specimen: BMNH 1899.8.4.8 (ad M, skin, presented by Mr. F.J. Jackson, Esq. collection date 5 April 1893). Publication date: 1 March 1906.
1906. *Hipposiderus caffer guineensis* K. Andersen, Ann. Mag. nat. Hist., ser. 7, 17 (99): 275, 278. Type locality: Gabon: 70 mi (105 km) from Gaboon, Como River (almost sea-level). Type specimen: BMNH 1897.12.1.11 (ad F, skin, collector G.L. Bates, Esq., collection date 3 June 1897 original number GLB 215, note- caught under large rock, Fang name-Otan). Publication date: 1 March 1906. Considered a valid subspecies by Grubb *et al.* (1998: 80).
1917. *Hipposiderus caffer niapu* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 431. Type locality: Democratic Republic of the Congo: NE Congo, Niapu. Type specimen: AMNH 49414 (ad M, alcoholic, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 27 January 1914, original number 2322). Publication date: 29 September 1917.
- ? *Hipposideros ruber*: Name combination.

Taxonomy:

Simmons (2005: 376) recognised it as part of the *bicolor* species group, and indicated that the subspecies limits are problematic, and it possible that this species complex includes more than one species.

Common names:

English: Noack's Leaf-nosed Bat, Noack's roundleaf bat, Red leaf-nosed bat. French: Phyllorine rouge.

Etymology of name:

From the Latin "*ruber*" meaning red.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bx).

General distribution:

Senegal over Guinea (Fahr and Ebigbo (2003:

128) mention it as "*Hipposideros cf. ruber*"), Central African Republic (Lunde *et al.*, 2001: 537), Uganda (Kityo and Kerbis, 1996: 61) to Ethiopia, south to Angola, Zambia, Malawi, and Mozambique; Bioko; São Tomé and Príncipe.

Distribution based on voucher specimens: Cameroon, Congo (Democratic Republic of the), Equatorial Guinea, Gabon, Malawi, Nigeria, Rwanda, São Tomé and Príncipe, Tanzania, Uganda.

Figure 48. Distribution of *Hipposideros ruber*

Genus *Triænops* Dobson, 1871

- *1871. *Triænops* Dobson, J. Asiatic Soc. Bengal, 40 (2): 455, pl. 28. Publication date: 28 December 1871. Type species: *Triænops persicus* Dobson, 1871.
 2002. *Trienops* Paniutina, Plecotus *et al.*, pars spec.: 36. Lapsus.

Taxonomy:

Hill (1982) and Garbutt (1999) suggested that *T. rufus* and *T. persicus* be synonymized, this is not supported by Russell *et al.* (2007). The Madagascan species are reviewed by Ranivo and Goodman (2006).

Trident Leaf-nosed Bats, Triple nose-leaf bats.

Etymology of name:

From the Greek "*triaenops*" meaning trident [= 3 pronged fork].

Distribution based on voucher specimens:

Ethiopia.

Common names:

English: Greater Trident Bats, Trident Bats,

Triænops auritus G. Grandidier, 1912

- *1912. *Triænops aurita* G. Grandidier, Bull. Mus. natn. Hist. nat., Paris, 18: 8, fext-fig. Type locality: Madagascar: extreme N Madagascar, near Diégo-Suarez (=Antsiranana). Type specimen: MCZ 45080 (M mummified body with skull not removed, sent by Dr. Mazières, 1910 (see Peterson *et al.*, 1995: 81, Ranivo and Goodman 2006: 974; Helgen and McFadden, 2001: 143). Publication date: 25 January 1912.
 ? *Triænops auritus*: Current spelling.

Taxonomy:

Until recently, only known from the holotype (see Peterson *et al.*, 1995: 81), but additional specimens were reported by Ranivo and Goodman (2006: 977). Included in *furculus* (Hayman and Hill 1971; Koopman 1993a: 175, 1994), but Peterson *et al.*, (1995: 81), Russ *et al.*, (2001), Hutson *et al.*, (2001: 18), Ranivo and Goodman (2006: 974) consider it a valid species.

Conservation status:

Global- DD ver 2.3 (1994) (IUCN 2004).

General distribution:

N and NW Madagascar (see Ranivo and Goodman 2006: 963).

Distribution based on voucher specimens:

Madagascar.

Common names:

English: Grandidier's trident bat.

Triænops furculus Trouessart, 1906

- *1906. *Triænops furcula* Trouessart, Bull. Mus. natn. Hist. nat., Paris, 7: 446. Type locality: Madagascar: W coast of Madagascar, near Tulear, St. Augustine Bay, Sarodrana cave. Type specimen: MNHN 1912-40 (Alcoholic, skull missing; collection date 19 May 1898; old number 1860). Publication date: 1906.
 ? *Triænops furculus*: Current spelling.

Taxonomy:

Hayman and Hill (1971: 30) and Koopman (1993a: 175) included *aurita*, but see Peterson *et al.*, (1995), Russ *et al.*, (2001), Hutson *et al.*, (2001: 18), Simmons (2005: 378), Ranivo and Goodman (2006: 963) who consider it a valid species.

Conservation status:

Global- VU A2c ver 2.3 (1994) (IUCN 2004).

General distribution:

C and SW Madagascar (see Ranivo and Goodman 2006: 963), Aldabra Island.

Distribution based on voucher specimens:

Madagascar.

Common names:

English: Trouessart's trident bat, Madagascar leaf-nosed bat. French: *Triænops malgache*.

Triaenops persicus Dobson, 1871

- *1871. *Triaenops persicus* Dobson, J. Asiatic Soc. Bengal, 40 (2): 455, pl. 18. Type locality: Iran: Fars Province, Shiraz [4 750 ft (=1 448 m)]. Type specimen: BMNH 1876.3.10.3 (Syntype). Publication date: 28 December 1871.
1877. *Triaenops afer* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 913 (for 1876). Type locality: Kenya: Mombasa. - Publication date: 1877.
1968. *Triaenops persicus majusculus* Aellen and Brosset, Rev. Suisse Zool., 75 (14): 450. Type locality: Republic of the Congo: Loudima, Grotte de Doumboula. Type specimen: MNHN 1969-412 (ad M, alcoholic, collector: J.-P. Adam, 19 June 1964; 18 paratypes).

Taxonomy:

Included *rufus* (Hayman and Hill 1971: 30; Hill 1982; Koopman 1993a: 175), but recognized as a valid species by Peterson *et al.*, (1995) and Simmons (2005: 378 - 379). Meester *et al.*, (1986: 44) recognized three subspecies *persicus*, *afer* and *majusculus* from Africa.

Common names:

Afrikaans: Persiese bladneusvlermuis. English: Persian Greater Leaf-nosed Bat, Persian Leaf-nosed Bat, Persian trident bat, Triple leaf-nosed bat. French: *Triaenops de Perse*. Portuguese: Morcego Persa de nariz enfolhado.

Etymology of name:

Originally the species was described from a specimen from Shiraz, Iran (Persia), but has subsequently been found to occur in Arabia and Africa. It is appropriately called the Persian trident bat because, like the short-eared trident bat (*Cloeotis percivali*), it has a three-pronged trident at the top of the nose-leaves (see Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004az).

Distribution:

Somalia, Djibouti (Pearch *et al.* (2001: 398), Ethiopia, Kenya, Tanzania, Uganda, Angola, Zanzibar, Malawi (1st record: Happold and Happold 1997: 819), Mozambique, Yemen, Oman, Republic of the Congo, Iran, Pakistan, and the United Arab Emirates

Echolocation:

See Pye (1972) and Taylor *et al.*, (2005).

Molecular biology:

Karyotype - Dulic and Mutere (1977) reported for *T. afer*, $2n = 36$, FN = 60, BA = 26, the X chromosome a metacentric, and the Y chromosome a small subtelocentric, based on specimens from Kenya.

Figure 49. Distribution of *Triaenops persicus*

Distribution based on voucher specimens:
Congo, Kenya, Mozambique, Zambia, Zimbabwe.

Triaenops rufus Milne-Edwards, 1881

1881. *Triaenops Humbloti* A. Milne-Edwards, C. R. Acad. Sci., Paris, 91: 1035. Type locality: Madagascar: Eastern Madagascar. Type specimen: MNHN 1985-836 (M, alcoholic, skull removed and lost (?); collector Humblot, collection date 1880; other number 184: see Peterson *et al.* (1995: 82). The type series (184 and 184A) contains 3 MM + 3 FF (Peterson *et al.*, 1995). According to Ranivo and Goodman (2006: 974) the skull of the holotype has been mixed up with the skulls of the paratypes (MNHN 1985-838 and 1985-839). Publication date: 1881.
- *1881. *Triaenops rufus* A. Milne-Edwards, C. R. Acad. Sci., Paris, 91: 1035. Type locality: Madagascar: Eastern Madagascar. Type specimen: MNHN 185 (F, alcoholic, skull extracted ? (see Peterson *et al.*, 1995: 82). Ranivo and Goodman (2006: 974) indicate that the skull is still present, but in very bad shape. The type series (185 and 185A) contains 1 M + 3 FF (Peterson *et al.*, 1995). Publication date: 1881.
- ? *Triaenops rufus*: Current spelling.

Taxonomy:

Previously included in *persicus* by Hayman and Hill (1971: 30), Hill (1982), Koopman (1993a: 175), but considered a valid species by Peterson *et al.*, (1995: 82), Russ *et al.*, (2001), Hutson *et al.*, (2001: 18), Goodman *et al.*, (2005: 158), and Simmons (2005: 379).

Common names:

English: Rufous trident bat, Red Madagascan Trident Bat.

Conservation status:

Global: DD ver 2.3 (1994) (IUCN 2004).

General distribution:

E + C Madagascar.

Distribution based on voucher specimens:

Madagascar.

Family MEGADERMATIDAE H. Allen, 1864

- *1864. *Megadermatidae* H. Allen, Monogr. Bats N. Am., pp. xxiii, 1. Type genus: *Megaderma* Geoffroy, 1810.

Taxonomy:

See Handley (1980) [in Corbet and Hill (1992: 89)] for correct formation of family name.

Common names:

English: False Vampire Bats, Large-winged Bats.
Finnish: Valevampyyrit. German: Grossblattnasen, Falsche Vampire. Norwegian: Storøreflaggermus, falske vampyrer.

Genus *Cardioderma* Peters, 1873

- *1873. *Cardioderma* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 488. Type species: *Megaderma cor* Peters, 1872. Publication date: 23 June 1873.

Taxonomy:

See Simmons (2005).

Etymology of name:

From "cardio", meaning heart and "derma" meaning skin (see Csada, 1996: 3).

Common names:

English: Heart-nosed Bats, African False Vampire Bats.

Cardioderma cor (Peters, 1872)

- *1872. *Megaderma cor* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 194. Type locality: Ethiopia: no specific locality. -
? *Cardioderma cor*: Name combination.

Taxonomy:

See Csada (1996, Mammalian Species, 519).

Common names:

Dutch: Hartneusvleermuis. English: Heart-nosed Bat, African Heart-nosed Bat, African False Vampire Bat, Heart-nosed Big-eared Bat. French: Pseudo-vampire à nez en coeur.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004j).

General distribution:

Ethiopia, Djibouti (Pearch *et al.*, 2001: 397), Somalia, Kenya, Uganda, E Sudan, Tanzania, Zanzibar.

Echolocation:

See O'Shea and Vaughan (1980) and Taylor *et al.*, (2005).

Figure 50. Distribution of *Cardioderma cor*

Distribution based on voucher specimens: Egypt, Ethiopia, Kenya, [Tanzania](#), Uganda, Unknown country.

Genus *Lavia* Gray, 1838

- *1838. *Lavia* Gray, Mag. Zool. Bot., 2 (12): 490. Type species: *Megaderma frons* E. Geoffroy Saint-Hilaire, 1810. Publication date: 1 February 1838.
 1846. *Livia* Agassiz, Nomenclator. Zool., Mamm., addenda: p. 6. Lapsus.

Taxonomy:
 See Simmons (2005).

Etymology of name:
 From "*lavo*" meaning fine, elegant, splendid) (see Vonhof and Kalcounis, 1999: 4).

Common names:
 English: Yellow-winged Bats.

Lavia frons (E. Geoffroy St.-Hilaire, 1810)

1800. *Vespertilio megalotis* Bechstein, Type locality: southern Africa: Great Namaqualand, 50 mi [=75 km] N Orange River. Nomen oblitum. See Grubb (2004: 91 - 92) for a discussion.
 *1810. *Megaderma frons* E. Geoffroy Saint-Hilaire, Ann. Mus. Hist. Nat. Paris, 15: 192. Type locality: Senegal: no specific locality.
 1905. *Lavia rex* Miller, Proc. Biol. Soc. Washington, 18: 227. Type locality: Tanzania: Taveta (Kock (1969: 103) locates Taveta in Kenya). Type specimen: USNM 18993/38197 (holotype; ad M, collector Dr. W.L. Abbott, 1899). Publication date: 9 December 1905.
 1907. *Lavia frons affinis* K. Andersen and Wroughton, Ann. Mag. nat. Hist., ser. 7, 19 (110): 138, 140. Type locality: Sudan: White Nile, Kaka. Type specimen: BMNH 1901.8.8.3 (ad M, skin only, collector R.M. Hawker, Esq.). Publication date: 1 February 1907. Not mentioned by Vonhof and Kalcounis (1999: 1).
 ? *Lavia frons*: Name combination.

Taxonomy:
 See Vonhof and Kalcounis (1999, Mammalian Species, 614). Grubb (2004: 91) calls it a "nomen protectum".

Common names:
 English: Yellow-winged Bat, African Yellow-winged Bat. French: Feuille de Daubenton, Megaderme à ailes orangées, Lavia à ailes jaunes. German: Gelbflügelige Großblattnase.

Etymology of name:
 From the Latin "*frons*" meaning forehead (see Vonhof and Kalcounis, 1999: 4).

Conservation status:
 Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004aq).

General distribution:
 Senegal over Benin (possibly) (Capo-Chichi *et al.*, 2004: 162), Uganda (Kityo and Kerbis, 1996: 61) to Ethiopia (Lavrenchenko *et al.*, 2004: 132), Somalia, south to Namibia, Zambia and Malawi; Zanzibar.

Echolocation:
 See Taylor *et al.*, (2005).

Figure 51. Distribution of *Lavia frons*

Distribution based on voucher specimens: Cameroon, Chad, Congo (Democratic Republic of the), Egypt ?, Ethiopia, German East Africa, Ghana, Guinea, Kenya, Liberia, Rwanda, Senegal, Somalia, Sudan, Tanzania, Togo, Uganda, Unknown country, Zambia.

Family RHINOLOPHIDAE Gray, 1825

- *1825. *Rhinolophidae* Gray, Zool. Journ., 2 (6): 242. Type genus: *Rhinolophus* Lacépède, 1799. Corbet and Hill (1992: 90) mention "Bell, 1836: 599" as author.
1855. *Historhina* Van der Hoeven, Handb. Dierkunde.

Taxonomy:

Includes Hipposideridae (treated as a subfamily), see Vaughan (1978: 39) and Koopman and Jones (1970); but also Swanepoel *et al.* (1980: 157). Hill (1982) listed Hipposideridae as a distinct family, without comment and Hill and Smith (1984) retained this separation and discussed the question. Harrison and Bates (1991: 51), Corbet and Hill (1992: 104 - with comment), Pavlinov *et al.* (1995), Peterson *et al.* (1995: 66), Hutson *et al.* (2001: 16) and Simmons (2005: 350) also retained the Hipposideridae as separate family.

Common names:

Czech: vrápencovití. Dutch: Hoefijzerneusvleermuizen, Hoefijzerneuzen. English: Horseshoe bats. Finnish: Hevosenkenkäyököt, Kaviokuonoyököt. German: Hufeisennasen. Norwegian: Hesteskoneser, Ekte hesteskonese.

Etymology of name:

They are called horseshoe bats because the anterior nose-leaf is shaped like a horseshoe.

Subfamily Rhinolophinae Gray, 1825

- *1825. *Rhinolophinae* Gray, Zool. Journ., 2 (6): 242. Type genus: *Rhinolophus* Lacépède, 1799.

Common names:

Czech: vrápencovití. Dutch: Hevosenkenkäyököt, Kaviokuonoyököt. German: Hoefijzerneusvleermuizen, Hoefijzerneuzen. Hufeisennasen. Norwegian: Hesteskoneser, Ekte hesteskoneser. English: Horseshoe bats. Finnish:

Genus *Rhinolophus* Lacépède, 1799

- *1799. *Rhinolophus* Lacépède, Tabl. Div. Subd. Orders Genres Mammifères, p. 15. Type species: *Vespertilio ferrum-equinum* Schreber, 1774. Conserved by Opinion 91 (1926) and Direction 24 (1955) (see Corbet and Hill, 1992: 91).
1816. *Phyllorhina* Leach, System. Catal. Spec. Indig. Mamm. Brit. Mus., p. 5. Type species: *Vespertilio minutus* Montagu, 1808.
1836. *Rhinocrepis* Gervais, Dictionnaire Pittoresque d'Hist. Nat., 4: pt. 318, p. 617. Type species: *Vespertilio ferrum-equinum* Schreber, 1774.
1847. *Aquias* Gray, Proc. zool. Soc. Lond., 1847, XV (clxix): 15. Publication date: 13 April 1847. Type species: *Rhinolophus luctus* Temminck, 1838 / *Rhinolophus trifolius* Temminck, 1834 (Restricted to *R. luctus* by Ellerman *et al.* (1953): see Meester *et al.* (1986: 36)).
1866. *Phyllotis* Gray, Proc. zool. Soc. Lond., 1866, I: 81. Publication date: May 1866. Type species: *Rhinolophus philippinensis* Waterhouse, 1843. Preoccupied by *Phyllotis* Gray, 1837. Not of Waterhouse.
1867. *Caeloephyllus* Peters, Proc. zool. Soc. Lond., 1866, III: 427. Publication date: April 1867. Type species: *Rhinolophus caeloephyllus* Peters, 1867.
1901. *Euryalus* Matschie, Sitzb. Ges. Naturf. Freunde Berlin, p. 225. Type species: *Rhinolophus mehelyi* Matschie, 1901. Described as a subgenus of *Rhinolophus* (see Meester *et al.*, 1986: 36).
1941. *Rhinophyllotis* Troughton, Furred Animals of Australia 1st edn, p. 342. Type species: *Rhinolophus megaphyllus* Gray, 1834. Redescription for *Rhinophyllotis* Iredale and Troughton, 1934, "nomen nudum" (see Meester *et al.*, 1986: 36).
1951. *Rhinomegalophus* Bourret, Bull. Mus. natn. Hist. nat., Paris, ser. 2, 23 (6): 607. Type species: *Rhinomegalophus paradoxolophus* Bourret, 1951.
1973. *Rhinomegaphyllus* Thonglongya, Mammalia, 37: 587. Lapsus for *Rhinomegalophus* Bourret, 1951 (see Eger and Fenton, 2003: 1).
1993. *Rhinilophus* Amr and Qumsiyeh, Ent. News, 104 (1): 44. Lapsus.

Taxonomy:

The radiation (about 15 million years ago) of Rhinolophidae into five main clades apparently occurred rapidly and the distinct clades could be regarded as different genera (Csorba *et al.*, 2003: xvi). Following tradition Csorba *et al.*, (2003: xvi) split the six subgenera (*Aquias*, *Phyllorhina*, *Rhinolophus*, *Indorhinolophus*, *Coelophyllus*, *Rhinophyllotis*) into groups corresponding to smaller lineages in the phylogeny. All African and Palaeartic species are contained within a single clade (Csorba *et al.*, 2003: xvii). This confirms Bogdanowicz (1992) and Bogdanowicz and Owen (1992) who suspected that the relationship was monophyletic. Qumsiyeh *et al.*, (1988) studied protein electrophoresis of a limited number of African taxa, which grouped together in their phylogeny. All African and Palaeartic Rhinolophid species karyotyped show a diploid number of 58, which differs from all other *Rhinolophus* with the exception of some populations of *R. hipposideros* (Zima *et al.*, 1992). Csorba *et al.*, (2003: xvii) note that the geographical distribution of taxa and the phylogeny are strongly congruent.

Species groups recognized by Csorba *et al.*, (2003: xvi), for African taxa:

Rhinolophus adami Aellen and Brosset, 1968

- *1968. *Rhinolophus adami* Aellen and Brosset, Rev. Suisse Zool., 75 (14): 443. Type locality: Republic of the Congo: Kouilou. Type specimen: MNHN 1968-408 (ad F, alcoholic, collector J.-P. Adam, original number 12/8G, 9 January 1967; 3 paratypes).

Taxonomy:

Kock *et al.*, (2000) place it in the *adami* species group, followed by Csorba *et al.*, (2003: xvi, 4 - 5) and Simmons (2005: 351). Species group reviewed by Kock *et al.*, (2000). See Csorba *et al.* (2003: 5) for taxonomic background.

Common names:

English: Adam's Horseshoe Bat, Congo Horseshoe Bat. French: Rhinolophe du Congo.

Etymology of name:

In honour of J.-P. Adam, the collector of the type specimen.

Conservation status:

Global- DD (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004ab).

Rhinolophus: *R. landeri* - *landeri*, *alcyone*, *?guineensis*. *R. Euryale* - *blasii*, *euryale*, *mehelyi*. *R. capensis* - *?capensis*, *?swinyi*, *?denti*, *simulator*. *R. adami* - *?adami*, *?maendeleo*. *R. ferrumequinum* - *ferrumequinum*, *clivosus*, *?silvestris*, *?deckenii*. *R. maclaudi* - *?maclaudi*, *ruwenzorii*. *R. fumigatus* - *fumigatus*, *eloquens*, *hildebrandti*, *darlingi*.

See Csorba *et al.*, (2003: xii - xxiv) for discussion on phylogeny and biogeography of the horseshoe bats.

See Csorba *et al.*, (2003: 1 - 3) for key to species.

Common names:

Czech: vrápenec. Dutch: Hoefijzerneuzen. English: Horseshoe bats.

Etymology of name:

The generic name *Rhinolophus* is derived from the Greek "*rhinos*", a nose, and "*lophos*", a crest, referring to the crest of nose-leaves (Taylor 2005).

Distribution based on voucher specimens:

Cameroon, Egypt, Senegal, [South Africa](#), Tanzania, Togo, [Zambia](#).

General distribution:

Republic of the Congo (Csorba *et al.*, (2003: 5; Simmons 2005: 351).

Distribution based on voucher specimens:

[Congo](#).

Rhinolophus alcyone Temminck, 1853

- *1853. *Rhinolophus alcyone* Temminck, Esquisses zool. Côte de Guinée, p. 80. Type locality: Ghana: Boutry River. Type specimen: RMNH. Allen (1939a: 73) notes: 'Type in Leiden Mus., but description has not "one single word of any value for identifying the species or determining its affinities" - K. Andersen'. Allen (1939a: 73), Kock (1969: 121), Grubb *et al.* (1998: 77) mention 1852 as year of publication.

Taxonomy:

Forms part of the *landeri* species group (Csorba *et al.*, 2003: 55 - 57; Simmons 2005: 351). See Csorba *et al.*, (2003: 56) for remarks on taxonomy.

Common names:

English: Halcyon horseshoe Bat. French: Rhinolophe d'Halcyon.

Etymology of name:

alcyone: "[=Alkuone] mythological name for the kingfisher" and this is sometimes written as "Halcyon". Alkuone herself is the "daughter of Aiolos, who threw herself in the sea, where her husband Keüks (or Ceyx) was drowned. Thetis changed her in a kingfisher and her husband in a seagull".

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004y).

General distribution:

Senegal over Guinea (Fahr and Ebigbo, 2003: 128), Central African Republic (Lunde *et al.*, 2001: 537) to Uganda; SW Sudan, Republic of the Congo (Dowsett *et al.*, 1991: 259), N Democratic Republic of the Congo, and Gabon; Bioko.

Distribution based on voucher specimens:

Ghana.

Rhinolophus blasii Peters, 1867

1857. *Rhinolophus clivosus*: Blasius, Säugethiere Deutschlands: p. 33. Type locality: Italy: no specific locality. Preoccupied by *clivosus* Cretzschmar, 1828 (see Corbet and Hill, 1992: 100 and Pavlinov *et al.* 1995: 81).
- *1867. *Rhinolophus blasii* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 17 (for 1866). Type locality: Italy: SE Europe; restricted to Italy by Ellerman *et al.* (1953: 59) -. Publication date: 1867.
1904. *Rhinolophus empusa* K. Andersen, Ann. Mag. Nat. Hist., ser. 7, 14 (83): 378. Type locality: Malawi: Zomba [15 23 S 35 19 E, 800 - 900 m]. Type specimen: BMNH 1893.7.9.33 (Holotype, ad F, collector Mr. A. Whyte, collection date: January 1893). Publication date: 1 November 1904. Considered a valid subspecies by Ansell and Dowsett (1988: 33), Taylor (1998: 37).
1905. *Rhinolophus andreinii* Senna, Archiv. Zool. Ital., 2: 256, pl. 16, f. 1; pl. 18, f. 7 - 16. Type locality: Eritrea: Adi Ugri. Publication date: 30 September 1905.
1910. *Rhinolophus brockmani* Thomas, Ann. Mag. Nat. Hist., ser. 8, 5 (26): 192. Type locality: Somalia: Upper Sheikh [4 500 ft (=1 372 m)]. Type specimen: BMNH 1909.12.17.4 (Holotype). Publication date: 1 February 1910.
1910. *Rhinolophus blasiusi* Trouessart, Fauna des Mammifères d'Europe, p. 9.

Taxonomy:

Includes *brockmani*; see Koopman (1975: 383). Replacement for *clivosus* Blasius, 1857, which was preoccupied (see Ansell and Dowsett, 1988: 33). Part of the *landeri* species group (Csorba *et al.*, 2003: 57 - 59; Simmons 2005: 351 - 352). See Csorba *et al.*, (2003: 58 - 59) for remarks on taxonomy.

Common names:

Afrikaans: Spitsaalneusvlermuis. Dutch: Blasius-hoefijzerneus. English: Peters's Horseshoe Bat, Blasius's horseshoe bat, Peak-saddle Horseshoe Bat. French: Rhinolophe de Blasius, Rhinolophe à selle pointue. German: Blasius-Hufeisennase. Italian: Rinolofo di Blàsius, Ferro di cavallo di Blàsius. Portuguese: Morcego ferradura de nariz de sela. Spanish: Rinolofo de Blasius.

Etymology of name:

In honour of Johann Heinrich Blasius (1809 - 1870) (see Kozhurina, 2002: 14).

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004x). Regional- South Africa- Indeterminate (Smithers 1986); VU D2 ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Transvaal (South Africa); Swaziland (Monadjem, 2005: 5) to S Democratic Republic of the Congo; Malawi (Happold and Happold, 1997: 818); Ethiopia; Somalia; Morocco; Algeria; Tunisia; Turkey; Yemen, Oman, Israel; Jordan; Syria; Iran; Yugoslavia; Albania; Bulgaria; Rumania; Transcaucasia and Turkmenistan; Afghanistan;

Pakistan; Italy; Greece; Cyprus.

Molecular biology:

DNA - Unknown.

Karyotype - Both Qumsiyeh *et al.* (1986) and Rautenbach (1986) record $2n = 58$, $FN = 60$, $BA = 40$, but differed in the X chromosome being reported in the respective publications as metacentric and submetacentric, and the Y chromosome as acrocentric and metacentric.

Protein / allozyme - Unknown.

Figure 52. Distribution of *Rhinolophus blasii*

Distribution based on voucher specimens: Botswana, Ethiopia, Malawi, Somalia, South Africa, Zambia, Zimbabwe.

Rhinolophus capensis Lichtenstein, 1823

- *1823. *Rhinolophus capensis* Lichtenstein, Verzeichniss der Doubletten des Zool. Mus. K. Univ. Berlin, p. 4. Type locality: Republic of South Africa: Cape Province, Cape of Good Hope.
1860. *Rhinolophus auritus* Sundevall, Kongl. Svenska Vet.-Akad. Handl. Stockholm, ser. 2, 2: no 10, p. 13, footnote. Type locality: Republic of South Africa: Cape of Good Hope, [southern Cape Province,] near Knysna, Belvedere. Type specimen: Stockholm Museum (M, Collection date: 3 April 1854; Victorin; Grill 1859; Mam. Ex. No. 1907: see Andersen (1904b: 456)). Roberts (1951: 63) mentions 1858 as publication date.

Taxonomy:

Part of the *capensis* species group (Csorba *et al.*, 2003: 7 - 8; Simmons 2005: 352). See Csorba *et al.*, (2003: 8) for remarks on taxonomy.

Common names:

Afrikaans: Kaapse saalnevsvlermuis, Kaapse Vlermuis. English: Cape Horseshoe Bat, Southern Africa horseshoe bat. French: Rhinolophe d'Afrique du Sud, Rhinolophe du Cap. Portuguese: Morcego ferradura de cabo.

Etymology of name:

Referring to Cape of Good Hope or the Cape province, from where the type specimen was obtained.

Conservation status:

Global- VU (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004w). Regional- South Africa- NT ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Simmons (2005: 352) follows Ansell and Dowsett, (1988: 33) and Koopman (1993a: 164), who list South Africa, Zimbabwe and Mozambique, but doubt its occurrence outside of South Africa. Koopman (1993a: 164) states that the records from Zambia and Malawi are erroneous. While Griffin (1999: 32) suspects its occurrence in Namibia. Csorba *et al.*, (2003: 8) listed only South Africa.

Molecular biology:

DNA: Unknown.

Karyotypic - Rautenbach (1986) reported $2n = 58$, FN = 60, BA = 4, and the X and Y chromosomes as submetacentric.

Protein / allozyme - Unknown.

Figure 53. Distribution of *Rhinolophus capensis*

Distribution based on voucher specimens:
Kenya, Namibia, South Africa, Tanzania.

Rhinolophus clivus Cretzschmar, 1828

- *1828. *Rhinolophus clivus* Cretzschmar, in Rüppell, Atlas Reise Nördl. Afr., Zool. Säugeth., p. 47. Type locality: Saudi-Arabia: Red Sea Coast, Al Muwaylih (=Mohila) [c 27 49 N 35 30 E]. Type specimen: SMF 4371 (Lectotype, mounted skin, collected by Ed. Rüppell collection date 1826, old catalog: II.F.4.a; see Mertens, 1925: 20). Allen (1939a: 74) mentions 1826 as publication date.
1829. *Rhinolophus geoffroyii* A. Smith, Zool. Journ., 4: 433. Type locality: Republic of South Africa: South Africa (Roberts (1951: 61) nominated Cape Town as type locality; see Meester *et al.*, 1986: 38). Publication date: May 1829. Allen (1939a: 75) mentioned *geoffroyii* as a separate species. Meester *et al.* (1986: 38) follow Ellerman *et al.* (1953: 57) in considering *geoffroyii* as unidentifiable.
1861. *Rhinolophus acrotis* Heuglin, Nova Acta Acad. Cæs. Leop.-Carol., Halle, 29 (8): 4, 10. Type locality: Eritrea: Keren [c 15 45 N 38 20 E]. Type specimen: SMNS 986 (ad M, alcoholic, v. Heuglin, 1862). Publication date: 1861.
1904. *Rhinolophus Andersoni* Thomas, Ann. Mag. Nat. Hist., ser. 7, 14 (80): 156. Type locality: Egypt: Eastern desert of Egypt [c 22 N 35 E] (Kock (1969: 113) mentions: "Eastern Desert, im Gebiet des Wadi Alagi, 22 N 35 E, Sudan"). Type specimen: BMNH 1904.11.4.2 (Holotype, imm, M, collector: Mr. Arthur M. MacKilligin, collection date: 3 August 1903, original number 26). Publication date: 1 August 1904.
1904. *Rhinolophus augur* K. Andersen, Ann. Mag. Nat. Hist., ser. 7, 14 (83): 380. Type locality: Republic of South Africa: Bechuanaland, [=Northern Cape Province], Kuruman [4 000 ft (=1 219 m)]. Type specimen: BMNH 1904.10.1.1 (Holotype, ad M, skin, collector Mr. R.B. Woosnam, collection date: 19 April 1904, original number 26). Publication date: 1 November 1904.
1904. *Rhinolophus augur zambesiensis* K. Andersen, Ann. Mag. Nat. Hist., ser. 7, 14 (83): 383. Type locality: Malawi: Fort Hill (=Chitipa) [09 42 S 33 16 E, 1 300 m]. Type specimen: BMNH 1897.10.1.18 (Holotype, ad M, skin, collector: MR. A White, collection date: July 1896, presented by Sir Harry Johnston, original number: 136). Publication date: 1 November 1904. Considered a synonym of *zuluensis* by Ansell and Dowsett (1988: 32).
1904. *Rhinolophus augur zuluensis* K. Andersen, Ann. Mag. Nat. Hist., ser. 7, 14 (83): 383. Type locality: Republic of South Africa: Natal, Zululand, 20 mi [=32 km] NW Eshowe, Jususie valley [=Insuzi valley] [1 000 ft (=305 m)]. Type specimen: BMNH 1904.5.1.8 (Holotype, ad F, skin, collector Mr. C.H.B. Grant, collection date: 17 November 1903, presented by C.D. Rudd, Esq., original number: 602). Publication date: 1 November 1904. Considered a valid subspecies by Ansell and Dowsett (1988: 32), Taylor (1998: 35 - T217).
1905. *Rhinolophus acrotis brachygnatus* K. Andersen, Ann. Mag. nat. Hist., ser. 7, 15 (85): 73. Type locality: Egypt: Giza. Type specimen: BMNH 1892.9.9.7 (holotype: ad M, alcoholic, collector J. Anderson, collection date 16 December 1891; paratype: imm F; see Qumsiyeh, 1985: 35). Publication date: 1 January 1905.
1916. *Rhinolophus keniensis* Hollister, Smithson. Misc. Coll., 66 (1): 2. Type locality: Kenya: W side Mount Kenya [7 000 ft (=2 134 m)]. Type specimen: USNM 166352 (ad M, alcoholic and skull, collector: Edmund Heller, collection date: 27 August 1909, original number: 1154). Publication date: 10 February 1916.
1934. *Rhinolophus acrotis schwarzi* Heim de Balsac, Bull. Mus. natn. Hist. nat., Paris, (2) 7: 483. Type locality: Algeria: Sahara, Tassai des Azdjers, Djanet. Type specimen: MNHN (ad F, alcoholic, collector: Mission Augiéras Draper). Publication date: November 1934.
1993. *angur* Koopman, Mammal Species of the World: xxx. Lapsus.
- ? *Rhinolophus clivus zuluensis*: Name combination.

Taxonomy:

ferrumequinum species group (Csorba *et al.*, 2003: 35 - 39; Simmons 2005: 353). See Csorba *et al.*, (2003: 36 - 37) for review of taxonomy.

Roberts (1919: 122) points out that *geoffroyii* antedates *augur*, and later (Roberts 1951) regards *augur* as a subspecies of *geoffroyii*.

Allen (1939a) follows Roberts in regarding *geoffroyii* as the prior name, but Ellerman *et al.* (1953) reject this, pointing out that the description does not identify *geoffroyii* and that the type is apparently lost, and therefore propose that the name be discarded as unidentifiable.

© ECJ Seemark & TC Kearney, 2003

Figure 54. *Rhinolophus clivosus*

Common names:

Afrikaans: Geoffroy se saalneusvlermuis, Geoffroy-saalneusvlermuis. Arabian: Khafash abu hadweh arabi. English: Arabian Horseshoe Bat, Cretzschmar's Horseshoe bat, Geoffroy's Horseshoe Bat. French: Fer-à-Cheval de Geoffroy, Rhinolophe de Geoffroy. Portuguese: Morcego ferradura gigante.

Etymology of name:

From the Latin "*clivus*" meaning slope, hill, eminence.

Colloquial name after E. Geoffroy Saint-Hilaire, who collected bats in Egypt during the early part of the nineteenth century (see Taylor 2005).

Palaeontological / archaeological records:

R. clivosus has been recovered from both the upper Pleistocene and very late Holocene at Border Cave and is possibly present in the late Holocene at Nkupe, South Africa (Avery 1991: 6).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004an).

Regional- South Africa- NT ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Turkmenistan to Afghanistan; Arabia and Jordan and Israel to Algeria; Ethiopia (Lavrenchenko *et al.*, 2004: 133); Djibouti (Pearch *et al.*, 2001: 397); subsaharan Africa to Liberia, Cameroon, Uganda (Kityo and Kerbis, 1996: 63), Kenya (Lavrenchenko *et al.*, 2004: 133), and Malawi (Happold and Happold, 1997: 818), Namibia (?) (Cotterill, 2004: 261), Zambia (Cotterill, 2002: 6), Zimbabwe (Cotterill, 2004: 261), Swaziland (Monadjem, 2005: 5) and South Africa.

Echolocation:

See Taylor (1999).

Molecular biology:

DNA - Unknown.

Karyotype - Both Dulic and Mutere (1974) and Rautenbach *et al.* (1993) reported $2n = 58$. However, Dulic and Mutere (1974) reported $FN = 62$, $BA = 6$, a large acrocentric X chromosome, and a small acrocentric Y chromosome, whereas Rautenbach *et al.*, (1993) reported $FN = 60$, $BA = 4$, and submetacentric X and Y chromosomes.

Protein / allozyme - Unknown.

Figure 55. Distribution of *Rhinolophus clivosus*

Distribution based on voucher specimens:

"Africa", Cameroon, Egypt, Eritrea, Ethiopia, Lesotho, Malawi, Mozambique, Namibia, Rwanda, Saudi-Arabia, South Africa, Swaziland, Tanzania, Unknown country, Zambia, Zimbabwe.

Rhinolophus darlingi K. Andersen, 1905

- *1905. *Rhinolophus darlingi* K. Andersen, Ann. Mag. Nat. Hist., ser. 7, 15 (85): 70. Type locality: Zimbabwe: Mashonaland, Mazoe [4 000 ft (=1 219 m)]. Type specimen: BMNH 1895.8.27.1 (Holotype, ad, skin, collector: J. ff. Darling, Esq., collection date: 13 June 1895, original number: 35; 5 paratypes). Publication date: 1 January 1905.
1924. *Rhinolophus darlingi barbertonensis* Roberts, Ann. Transv. Mus., 10: 59. Type locality: Republic of South Africa: SE Transvaal, Barberton District, Louw's creek. Type specimen: TM 2476 (ad F, skin and skull, collector: Austin Roberts, collection date: 14 March 1920, note: Caught in old mine drive) Publication date: 31 January 1924.
1946. *Rhinolophus darlingi damarensis* Roberts, Ann. Transv. Mus., 20: 303. Type locality: Namibia: Damaraland, Okahandja district, Oserikari. Type specimen: TM 9474 (ad F, SS, collector: Austin Roberts, collection date: 10 August 1941, note: Caught in bedroom at night)

Taxonomy:

Includes *barbertonensis*; see Hayman and Hill (1971: 23). *ferrumequinum* species group (Csorba *et al.*, 2003: 39 - 40; Simmons 2005: 354). See Csorba *et al.*, (2003: 40) for taxonomic remarks.

Common names:

Afrikaans: Darling se saalneusvlermuis, Darling-saalneusvlermuis. English: Darling's Horseshoe Bat. French: Fer-à-Cheval de Darling, Rhinolophe de Darling. Portuguese: Morcego ferradura de Darling.

Etymology of name:

In honour of J. ff. Darling, a mining engineer, who first collected this species in Mazoe, Zimbabwe, in the early part of the twentieth century (see Smithers 1983: 126, Taylor 2005).

Palaeontological / archaeological records:

R. darlingi is represented intermittently in the upper Pleistocene and in the very late Holocene at Border Cave (Avery 1991: 6).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004v). Regional- South Africa- NT ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Transvaal (South Africa), Namibia, S Angola, N and W Botswana, Zimbabwe, Zambia (Cotterill, 2004: 261), Malawi, Mozambique, Tanzania.

Echolocation:

See Taylor (1999).

Molecular biology:

DNA - Unknown.

Karyotype - Both Peterson and Nagorsen (1975) and Rautenbach (1986) reported, for specimens from Zimbabwe and South Africa respectively, $2n = 58$, FN = 60, BA = 4, and subtelocentric X and Y chromosomes.

Protein / allozyme - Unknown.

Figure 56. Distribution of *Rhinolophus darlingi*

Distribution based on voucher specimens:

Lesotho, Malawi, Namibia, South Africa, Swaziland, Zimbabwe.

Rhinolophus deckenii Peters, 1867

- *1867. *Rhinolophus deckenii* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 705 (Allen (1939a: 74) mentioned "for 1867, p. 705, 1868"). Type locality: Tanzania: Zanzibar coast (mainland opposite Zanzibar). Type specimen: ZMB 3269 (Holotype; adult F; body in alcohol, skull extracted (missing); collector: von der Decken; collection date: undated).

Taxonomy:

Treated as a subspecies of *clivus* by Hayman and Hill (1971: 23); but see Koopman (1975: 386). *ferrumequinum* species group (Csorba *et al.*, 2003: 41 - 42; Simmons 2005: 354). See Csorba *et al.*, (2003: 41) for remarks on taxonomy.

Common names:

English: Decken's Horseshoe Bat, Eastern Africa horseshoe bat. French: Fer-à-Cheval d'Afrique orientale, Rhinolophe de Decken.

Etymology of name:

In honour of Mr. Von der Decken, collector of the type specimen.

Conservation status:

Global- DD (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004p).

General distribution:

Uganda, Kenya, Tanzania, Zanzibar and Pemba.

Figure 57. Distribution of *Rhinolophus deckenii*

Distribution based on voucher specimens:
Namibia, Tanzania.

Rhinolophus denti Thomas, 1904

- *1904. *Rhinolophus Denti* Thomas, Ann. Mag. Nat. Hist., ser. 7, 13 (77): 386. Type locality: Republic of South Africa: N Cape Province [formerly Bechuanaland], Kuruman [1 300 m]. Type specimen: BMNH 1904.4.8.2 (Holotype, M, collector: R.E. Dent, collection date: 24 January 1904, original number 7). Publication date: 1 May 1904.
1960. *Rhinolophus denti knorri* Eisentraut, Stuttg. Beitr. Naturk., 39: 3. Type locality: Guinea: 12 km W Kolenté, Salung Plateau, Nyembaro [c 10 05 N 12 30 W]. Considered a valid subspecies by Grubb *et al.* (1998: 78).

Taxonomy:

Placed within the *capensis*-group (Csorba *et al.*, 2003: 9 - 10; Simmons 2005: 354). Possibly includes *R. swinnyi* (see Roberts, 1914; Csorba *et al.*, 2003: 9 - 10). Two subspecies are currently recognised, besides the nominate form described from the Northern Cape Province of South Africa (and including Namibia, Botswana and Zimbabwe), also *R. d. knorri* Eisentraut, 1960 from Guinea (and including Ghana) (Csorba *et al.*, 2003: 9 - 10; Simmons 2005: 354). *R. d. knorri* is slightly smaller than the nominate form especially in the length of tibia and ear (Csorba *et al.*, 2003: 9 - 10). See Csorba *et al.*, (2003: 9 - 10) for further remarks on taxonomy.

Common names:

Afrikaans: Dent se saalneusvlermuis, Dent-saalneusvlermuis, Dentse Vlermuis. English: Dent's Horseshoe Bat. French: Rhinolophe de Dent. Portuguese: Morcego ferradura de Dent.

Etymology of name:

In honour of R.E. Dent (Smithers, 1983: 130; Skinner and Smither, 1990; Taylor, 2005), the collector of the type specimen.

Similar species:

R. swinnyi (Shortridge, 1934; Roberts, 1914 ; 1946: 304). Shortridge (1934) was incorrect though in indicating that Hewitt (1913) described a new subspecies of *R. denti*, from Pirie in the Eastern Cape province of South Africa, when it was actually *R. swinnyi piriensis* (Hewitt, 1913: 402).

Palaeontological / archaeological records:

Unknown.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004ak).

Regional- South Africa- Indeterminate (Smithers 1986); NT ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

South Africa (Northern Cape Province (Herseman

and Norton, 1985; Rautenbach, 1986), North West Province (James, 1986), Free State Province (Watson, 1998)), Namibia (Kock and Howell, 1988), Angola, Botswana (Smithers, 1971), Zimbabwe (Smithers and Wilson, 1979: 57 [although Smithers, (1983) indicates three records from northeastern Zimbabwe in Smithers and Wilson (1979) are misidentifications]; Fenton and Bell (1981) [however, there is no way of verifying this published record, see "Echolocation" section], Mozambique (Smithers and Lobao-Tello, 1976), Guinea-Bissau (Simmons 2005: 354), Guinea (Csorba *et al.*, 2003: 9 - 10), Ghana (Csorba *et al.*, 2003: 9 - 10). A record from Gambia is doubtful according to Kock *et al.* (2002: 85), since it is possibly of an adolescent *R. landeri*, as is the record from Ivory Coast that is also apparently a *R. landeri* (see Simmons 2005: 354).

Geographic variation:

See "Taxonomy" section.

General description of external morphology:

See Smithers (1983), Skinner and Smither (1990), Taylor (2000), Csorba *et al.* (2003: 9 - 10), Taylor (2005).

General description of cranial and dental morphology:

See Smithers (1983), Skinner and Smither (1990), Taylor (2000), Csorba *et al.* (2003: 9 - 10), Taylor (2005).

Detailed morphology:

Of the skull, teeth and noseleaves see Csorba *et al.* (2003: 9 - 10).

Functional morphology:

Unknown.

Sexual dimorphism:

Five mensural characters (forearm length, fourth metacarpal length, width across the upper canines, rostral width, and length of the mandibular tooththrow) showed significant variation between the sexes in an analysis of specimens from Koegelbeen Cave in the Northern Cape Province of South Africa (Rautenbach, 1986).

Echolocation:

For bats at Sengwa in Zimbabwe see Fenton and Bell (1981), however, verification of this identification is not possible given the lack of voucher specimens.

Molecular biology:

DNA - Unknown.

Karyotype - Peterson and Nagorsen (1975) reported the diploid number as $2n=58$, $afn=62$, $BA=6$, $X=ST$, $Y=?$, based on specimens from Zimbabwe. These results were supported by Rautenbach (1986) who also reported the Y chromosome to be metacentric. Karyologically identical to *R. swinnyi* (Csorba *et al.*, 2003: 9 - 10).

Protein / allozyme - Unknown.

Habitat:

Found in relatively arid regions (Csorba *et al.*, 2003: 9 - 10). Even the most south easterly record in Africa comes from the drier south-western part of the Free State Province of South Africa (Watson, 1998).

Habits:

In north western Namibia a specimen shot by Shortridge (1934: 52) at "Rua Cana Falls" had a slow fluttering *Kerivoula*-like flight, and several other individuals were observed "circling low among trees and bushes near the Cunene River on bright moonlight nights" (Shortridge, 1934: 52). Found roosting at Drotsky's Cave in Namibia throughout the year (Smithers, 1983; Skinner and Smither, 1990; Taylor, 2005).

Roost:

Shortridge (1934: 52) records finding a single individual, at Louisvale in the Northern Cape Province of South Africa, inside a low water culvert occupied by a small colony of *Nycteris*. Shortridge (1934: 52) also records finding two individuals "hanging from the thatched roof inside a small native house at Kaoko-Otavi" in the north western part of Namibia. Also found in caves (Smithers, 1983; Skinner and Smither, 1990; Taylor, 2005). At Drotsky's Cave in Namibia the bats were "clinging to the sides of stalactites...hanging freely from the sides in open clusters", and were found in semi-dark 90 m from the cave entrance and in total darkness deep in the cave (Smithers, 1983; Skinner and Smither, 1990; Taylor 2005). Notes on an index card for specimens in the Transvaal Museum, from a cave near Warrenton in the Northern Cape Province of South Africa, indicate the cave was wet with water on the floor and dripping from stalactites, and that the bats congregated in separate groups. James (1986: 218) recorded a single

individual at a disused quarry near Buxton in the North West Province, roosting on the ceiling of a "ruined mine structure which formed a 2 x 2 x 20 m cement, semi-dark room in a hillside".

Migration:

Unknown, although see "Habits" section.

Food / diet:

Insectivorous (Smithers, 1983; Skinner and Smither, 1990; Taylor, 2000; Taylor, 2005).

Predators:

Unknown.

Population:

Structure - Unknown.

Density - "Sparsely distributed", with no records of large colonies (Shortridge, 1934:52). At Drotsky's Cave in Namibia the bats were observed "clinging to the sides of stalactites in dozens" (Smithers (1983), Skinner and Smither (1990), Taylor (2005). Herselman and Norton (1985: 92) indicated that this species had not been collected from the Northern Cape province in the "last half century" and could be considered as "extremely rare, possibly extinct, in the Cape Province". Yet, specimens in the Transvaal Museum, collected from the Northern Cape Province of South Africa between 1983 and 1988, indicate that at three different visits; 12, 71 and 15 specimens were taken from Koegelbeen Cave, 12 specimens were taken on a single date from a cave near Warrenton, and 11 specimens were taken on a single date from a locality near Postmasberg.

Lifespan:

Unknown.

Activity and behaviour:

Notes on an index card for specimens in the Transvaal Museum, from a cave near Warrenton in the Northern Cape Province of South Africa, indicate that in on 14th of June 1983 the bats were in torpor.

Reproduction and ontogeny:

Unknown.

Mating:

Unknown.

Post-natal development:

Unknown.

Parasites:

Unknown.

Viruses:
Unknown.

Utilization:
Unknown.

Anthropophilous:
Unknown.

Distribution based on voucher specimens:
Namibia, **South Africa**.

Figure 58. Distribution of *Rhinolophus denti*

Rhinolophus eloquens K. Andersen, 1905

- *1905. *Rhinolophus Hildebrandti eloquens* K. Andersen, Ann. Mag. nat. Hist., ser. 7, 15 (85): 74. Type locality: Uganda: Entebbe. Type specimen: BMNH 1899.8.4.4 (ad, skin, collector: F.J. Jackson, Esq.: see Andersen (1905a: 75)). Publication date: 1 January 1905.
1922. *Rhinolophus hildebrandti perauritus* de Beaux, Atti Soc. ital. Sci. nat., 61: 22. Type locality: Somalia: Territory of the Rahanuin. Publication date: February 1922.
- ? *Rhinolophus eloquens*: Name combination.

Taxonomy:

Included as subspecies in *aethiops* by Kock (1969: 121). Includes *perauritus*; see Koopman (1975: 389). *fumigatus* species group (Csorba *et al.*, 2003: 47 - 48; Simmons 2005: 354). See Csorba *et al.*, 2003: 48) for remarks on taxonomy.

Common names:

English: Eloquent Horseshoe Bat. French: Rhinomophe éloquent.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004u).

General distribution:

Uganda, Ethiopia (Lavrenchenko *et al.*, 2004: 147), S Somalia, S Sudan, NE Democratic Republic of the Congo, Kenya, Rwanda, N Tanzania, Zanzibar and Pemba.

Distribution based on voucher specimens:

Tanzania, Uganda.

Figure 59. Distribution of *Rhinolophus eloquens*

Rhinolophus euryale Blasius, 1853

- *1853. *Rhinolophus euryale* Blasius, Arch. Naturgesch. Berlin, 19 (1): 49, 52, 54. Type locality: Italy: Milan. Publication date: 1853.
1867. *Rhinolophus algirus* Loche, Expl. Sci. Algérie, Zool., Mamm., p. 83. Type locality: Algeria: "Jardin Marengo". Publication date: 1867. Allen (1939a: 74) states that this name is not certainly identifiable, but may possible prove to supersede *barbarus* if the types can be found.
1904. *E[uryalus] atlanticus* K. Andersen and Matschie, Sitzb. Ges. Naturf. Freunde Berlin, 77. Type locality: France: Indre-et-Loire, St. Paterna. -
1904. *E[uryalus] barbarus* K. Andersen and Matschie, Sitzb. Ges. Naturf. Freunde Berlin, 79. Type locality: Morocco: Tangiers. -
1904. *E[uryalus] Cabrerae* K. Andersen and Matschie, Sitzb. Ges. Naturf. Freunde Berlin, 78. Type locality: Spain: Madrid, Alcala de Henares. - Mentioned as *cabrerae* by Trouessart, 1910 (see Cabrera, 1914: 83).
1904. *E[uryalus] meridionalis* K. Andersen and Matschie, Sitzb. Ges. Naturf. Freunde Berlin, 79. Type locality: Algeria: no specific locality. -

Taxonomy:

Revised by DeBlase (1972). Gaisler (2001b: 68) does not recognise subspecies. *euryale* species group (Csorba *et al.*, 2003: 14 - 16; Simmons 2005: 354 - 355). See Csorba *et al.*, (2003: 16) for remarks on taxonomy.

Molecular biology:

DNA - Unknown.

Karyotype - Both Bovey (1949) and Manfredi Romanin *et al.* (1975) reported $2n = 58$, FN = 60.

Protein / allozyme - Unknown.

Common names:

Basque: Ferra-saguzar mediterranea.
 Catalan: Rat penat mediterrani de ferradura.
 Dutch: Paarse hoefijzerneus. English: Mediterranean Horseshoe Bat. French: Rhinolophe euryale. Gallician: Morcego mediterráneo de ferradura. German: Mittelmeerhufeisennase, Mittelmeer-Hufeisennase. Hungarian: kereknyergű patkósorrú denevér. Italian: Rinolofo Euriale, Ferro di cavallo Euriale, ferro di cavallo mediterraneo. Portuguese: Morcego-de-ferradura-mediterrânico. Russian: Yuzhnyj podkovonos. Slovenian: južni podkovnjak. Spanish (Castilian): Murciélago mediterráneo de herradura, Rinolofo mediterráneo de herradura, Murciélago de herradura mediterráneo.

Conservation status:

Global- VU A2c ver 2.3 (1994).

General distribution:

Transcaucasia (incl. Abkhasia) to Israel, Jordan, Syria, and S Europe (Portugal, C France to S Slovakia, Bulgaria, Hungary, Slovenia, Albania, Romania, Greece); Turkey, Turkmenistan; Iran; Algeria; Morocco; Tunisia; various Mediterranean islands; perhaps Egypt.

Figure 60. Distribution of *Rhinolophus euryale*

Distribution based on voucher specimens:
 Algeria, Morocco, Tunisia.

Rhinolophus ferrumequinum (Schreber, 1774)

- *1774. *Vespertilio ferrum-equinum* Schreber, Die Säugethiere, 1 (8): pl. 62, upper fig + 1 (9): 174. Type locality: France: no specific locality. Publication date: 1774.
1792. *major* Kerr, Animal Kingdom. This might be an African form, but we lack further information.
1803. *major* E. Geoffroy Saint-Hilaire, Cat. Mamm. Mus. nat. Hist. nat., Paris. This might be an African form, but we lack further information.
- ? *Rhinolophus ferrumequinum*: Name combination.

Taxonomy:

Revised by Strelkov *et al.*, (1978). *ferrumequinum* species group (Csorba *et al.*, 2003: 42 - 45; Simmons 2005: 355). See Csorba *et al.*, (2003: 44 - 45) for remarks on the taxonomy.

Common names:

Arabian: Khafash abu hadwa kabir. Basque: Ferra-saguzan handia. Catalanian: Rat penat gran de ferradura. Czech: vrápenec velký. Dutch: Grote hoefijzerneus. English: Larger Horseshoe Bat, Greater Horseshoe Bat. French: le grand rhinolophe fer à cheval; Grand Rhinolophe, Grand Fer-à-Cheval. Gallician: Morcego de ferradura grande. German: Große Hufeisennase, Großhufeisennase. Hungarian: nagy patkósorrú denevér, Nagy patkósdenevér. Italian: Rinolofo maggiore, Ferro di Cavallo Maggiore. Maltees: Farfett il-Lejl tan-Nala kbir. Norwegian: Stor hestekonese. Portuguese: Morcego-de-ferradura-grande. Roman: Nas fier-chaval grond. Russian: Bolshoj podkovonos. Slovenian: veliki podkovnjak. Spanish (Castilian): Murciélago grande de herradura, Rinolofo grande de herradura.

Etymology of name:

From the Latin "*ferrum*" meaning iron and "*equus*" meaning horse.

Conservation status:

Global- LR/nt ver 2.3 (1994).

General distribution:

S England (over the Netherlands, Austria, Czech Republic) to Caucasus Mtns (incl. Abkhasia) south (over Portugal, Albania, Greece) to Morocco and Tunisia (but not Egypt) through Jordan and Iran and Himalayas (N India, Nepal, Sikkim) to China and Japan; adjacent small islands.

Molecular biology:

DNA - Unknown.

Karyotype - Makino (1948) and Baker *et al.* (1974; 1975) all reported $2n = 58$, FN = 60, a submetacentric X chromosome, and an acrocentric Y chromosome. Capanna and Civitelli (1964a), however, reported FN = 62.

Protein / allozyme: Unknown.

Rhinolophus fumigatus Rüppell, 1842

- *1842. *Rhinolophus fumigatus* Rüppell, Mus. Senckenberg., 3 (2): 132, 155. Type locality: Ethiopia: Shoa. Type specimens: "SMF II.F.7a & b" (cotypes, gift from Dr. Rüppell, 1841: see Andersen (1904b: 451). Mertens (1925: 20) mentions SMF 4372 (old catalog II.F.7.a, ad, mounted skin, skull not removed) as Lectotype.
1869. *Rhinolophus aethiops* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 637 (for 1868). Type locality: Namibia: Damaraland, Otjimbingue. -
1877. *Rhinolophus macrocephalus* Heuglin, Reise in Nordost Afrika, 2: 22. Type locality: Ethiopia: Adowa. Type specimens: SMNS 1059 (2 syntypes, 1 imm F, 1 ad F: v. Heuglin, 1863: see Andersen (1904b: 451). Publication date: 1877.
1885. *Rhinolophus antinorii* Dobson, Ann. Mus. civ. Stor. nat. Genova, (2) 2: 16. Type locality: Ethiopia: Shoa, Daimbi. Publication date: 22 May 1885.
1905. *Rhinolophus fumigatus exsul* K. Andersen, Ann. Mag. nat. Hist., ser. 7, 15 (85): 74. Type locality: Kenya: Kitui [3 500 ft (= 1 067 m)]. Type specimen: BMNH 1901.5.6.3 (ad, skin, collector Mrs. H. Hinde, collection date: 3 January 1901, original number: 68: see Andersen (1905a: 74)). Publication date: 1 January 1905. Considered a valid subspecies by Ansell and Dowsett (1988: 32).
1913. *Rhinolophus foxi* Thomas, Ann. Mag. Nat. Hist., ser. 8, 11 (63): 314. Type locality: Nigeria: Northern Nigeria, Bauchi plateau, Kabwir [2 500 ft (=762 m)]. Type specimen: BMNH 1913.2.5.1 (Holotype, ad M, collected ad presented by Mr. J.C. Fox, of the Cambridge University Mission, collection date: 14 November 1912, original number 45). Publication date: 1 March 1913.
1914. *acrotis* G.M. Allen, Bull. Mus. comp. Zool. Pre-occupied by *acrotis* Heuglin, 1861.
1917. *Rhinolophus abæ* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 428. Type locality: Democratic Republic of the Congo: Uele district, Aba. Type specimen: AMNH 49113 (ad F, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 15 December 1911, original number 1756). Publication date: 29 September 1917.
1939. *Rhinolophus aethiops diversus* Sanborn, Field Mus. Nat. Hist., Zool. Ser., 24: 42. Type locality: Senegal: Bakel [14 54 N 12 26 W]. Considered a valid subspecies by Grubb *et al.* (1998: 77), but they also remark that it might be a subspecies of *aethiops*. Type specimen: BMNH 1919.7.7.2774.

Taxonomy:

Does not include *eloquens* or *perauritus*, but does include *aethiops*; see Koopman (1975: 389 - 390). *fumigatus* species group (Csorba *et al.*, 2003: 48 - 51; Simmons 2005: 356). See Csorba *et al.*, (2003: 49 - 50) for remarks on taxonomy.

Common names:

Afrikaans: Rüppell se saalneusvlermuis, Rüppell-saalneusvlermuis. English: Rüppell's Horseshoe Bat, Smoky Horseshoe Bat, Abyssinian Horseshoe Bat. French: Rhinolophe de Rüppell. Portuguese: Morcego ferradura da Damarlandia.

Etymology of name:

From the Latin "*fumigat*" meaning smoke. The colloquial name refers to the describer of the species (see Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004aj).
Regional- South Africa- NT ver 3.1 (2001) (Friedmann and Daly 2004).

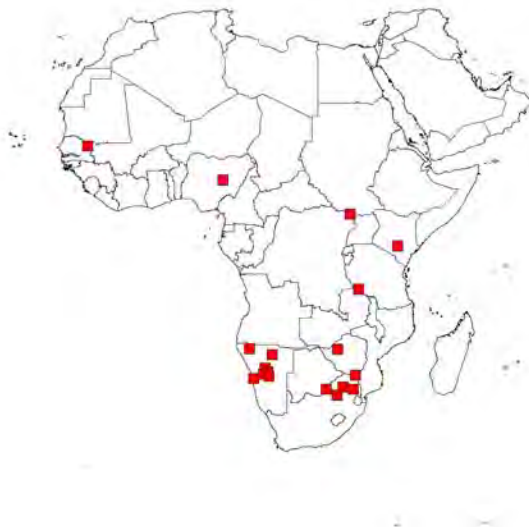

General distribution:

Somalia, Ethiopia, Sudan, Kenya, Tanzania, Rwanda, Burundi, Democratic Republic of the Congo, Nigeria, Sierra Leone, Togo, Benin, Senegal, Gambia, Guinea, Burkina Faso, Ghana, Mali (Meinig, 2000: 105), Benin (Capo-Chichi *et al.*, 2004: 162), Niger, Nigeria, Cameroon, Central African Republic, Zambia, Malawi, Zimbabwe, Mozambique, Angola, Namibia, Botswana (Cotterill, 2004: 261), South Africa.

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach (1986 1459)

Distribution based on voucher specimens:
Congo (Democratic Republic of the), Ethiopia,
Kenya, Namibia, Nigeria, Senegal, South Africa,
Tanzania, Zimbabwe.

Figure 61. Distribution of *Rhinolophus fumigatus*

***Rhinolophus guineensis* Eisentraut, 1960**

*1960. *Rhinolophus guineensis* Eisentraut, Stuttgarter Beitr. Naturk. 39: 1. Type locality: Guinea: Tahire, foot of Kelesi Plateau.

Taxonomy:

Meester *et al.* (1986) state that Rosevear (1965) and Kock (1969) regard *guineensis* Eisentraut, 1960, from Guinea, as subspecifically distinct from *landeri*. Hayman and Hill (1971), on the other hand, consider it a synonym, while Bohme and Hutterer (1978), Csorba *et al.*, (2003: 59 - 61) and Simmons (2005: 356) regard it as a distinct species, sympatric with *landeri* and somewhat larger.

Common names:

English: Guinean Horsehoe Bat (Csorba *et al.*, 2003: 59 - 61; Simmons, 2005).

Etymology of name:

Refers to country from which the type specimen was collected.

Similar species:

See Csorba *et al.* (2003).

Palaeontological / archaeological records:

Unknown.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); VU B2ab(iii) ver 3.1 (2001) (IUCN 2004; Fahr, 2004g).

General distribution:

Senegal, Guinea and Sierra Leone (Csorba *et al.*, 2003; Simmons, 2005). Simmons (2005) also

listed Liberia.

Geographic variation:

Unknown.

General description of external morphology:

See Csorba *et al.* (2003).

General description of cranial and dental morphology:

See Csorba *et al.* (2003).

Detailed morphology:

For a description of the crania, teeth, and noseleaves see Csorba *et al.* (2003).

Functional morphology:

Unknown.

Sexual dimorphism:

Unknown.

Echolocation:

Unknown.

Molecular biology:

DNA, karyotype, protein / allozyme - Unknown.

Habitat:

See Csorba *et al.* (2003).

Habits:

See Csorba *et al.* (2003).

Rhinolophus hildebrandtii Peters, 1878

- *1878. *Rhinolophus hildebrandtii* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 195, pl. 1, f. 1, 1a. Type locality: Kenya: Taita district, Ndi. Type specimen: BMNH 1879.1.21.1 (Holotype).

Taxonomy:

See Pearl (1994, Mammalian Species, 486). *fumigatus* species group (Csorba *et al.*, 2003: 51-53; Simmons 2005: 356). See Csorba *et al.*, (2003: 52) for review of taxonomy.

Republic of the Congo, Uganda (Kityo and Kerbis, 1996: 61). Taylor (1998: 35) mentioned Pleistocene deposits of this species reported by Avery (1991) from Border Cave, northern Maputaland, KwaZulu-Natal.

Figure 62 *Rhinolophus hildebrandtii*

Echolocation:

See Aldridge and Rautenbach (1987), Taylor (1999), and Taylor *et al.*, (2005).

Molecular biology:

DNA - Unknown.

Karyotype - Both Peterson and Nagorsen (1975) and Rautenbach (1986) reported $2n = 58$, $FN = 60$, $BA = 4$, and submetacentric X and Y chromosomes.

Protein / allozyme - Unknown.

Common names:

Afrikaans: Hildebrandt se saalneusvlermuis, Hildebrandt-saalneusvlermuis, Hildebrandtse Vlermuis. English: Hildebrandt's Horseshoe Bat. French: Fer à cheval du Kenya, Fer à cheval d'Hildebrandt, Rhinolophe de Hildebrandt. Portuguese: Morcego ferradura de Hildebrandt.

Etymology of name:

In honour of J.M. Hildebrandt (see Pearl 1994: 3, Taylor 2005).

Palaeontological / archaeological records::

R. hildebrandtii was found in the earlier half of the upper Pleistocene sequence at Border Cave, South Africa (Avery 1991: 6).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs 2004i). Regional- South Africa- NT ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Transvaal (South Africa) and Mozambique, Malawi (Happold and Happold, 1997: 818), Zimbabwe, Zambia, Namibia (?) (Cotterill, 2004: 261) to Ethiopia, S Sudan, and NE Democratic

Figure 63. Distribution of *Rhinolophus hildebrandtii*

Distribution based on voucher specimens:

Congo (Democratic Republic of the), Ethiopia, Kenya, Malawi, Mozambique, South Africa, Tanzania, Tanzania [=former Tanganika], Tanzania [=former Tanganyika], Unknown country, Zambia, Zimbabwe.

Rhinolophus hillorum Koopman, 1989

- *1989. *Rhinolophus hillorum* Koopman, Am. Mus. Novit., 2946: 4. Type locality: Liberia: Lofa county, ca 2 mi SW Voinjama, near Zozoma, John Hegbe farm [08 25 N 09 35 W, 500 m]. Type specimen: AMNH 257044 (ad F, alcoholic and skull, collector Andrew S. Voros, original number 5924, collection date: early October).

Taxonomy:

Considered a synonym of *clivosus* by Koopman (1993a: 164), but see Simmons (2005: 356). See Csorba *et al.*, 2003: 131) for remarks on taxonomy.

Common names:

English: Hill's horseshoe bat.

Etymology of name:

In honour of the two (often confused) eminent mammalogists named John E. Hill: J. Eric (1907-1947), and J. Edwards (1928-1997) (see Koopman, 1989: 5).

Conservation status:

Global- VU A4c; B2ab(iii) ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004s).

General distribution:

Guinea (Fahr *et al.*, 2006a: 72), Liberia, Nigeria, Cameroon.

Figure 64. Distribution of *Rhinolophus hillorum*

Distribution based on voucher specimens:

Liberia.

Rhinolophus hipposideros (Bechstein, 1800)

1792. *minor* Kerr, Animal Kingdom, 99. Pre-occupied by minor Kerr, 1792: 97 (two pages before this) (see Simmons, 2005). Type locality: France. Publication date: February 1792.
- *1800. *Vespertilio hipposideros* Bechstein, Allgemeine Ueber. Vierfüß. Thiere, 2: 629. Type locality: France: no specific locality.
1861. *Rhinolophus miminus* Heuglin, Nova Acta Acad. Cæs. Leop.-Carol., Halle, 29 (8): 4, 6. Type locality: Eritrea: Keren [c 15 45 N 38 20 E]. Type specimen: SMNS 987 (imm, but full-grown M, alcoholic, v. Heuglin, 1862 (?)). Publication date: 1861.
1870. *Rhinolophus eggenhöffner* Fitzinger, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 62 (1): xx. This might be an African form, but we do not have any further information.
1905. *Rhinolophus hipposiderus typicus* K. Andersen, Proc. Zool. Soc. Lond., 1905, II, I (10): 141. Publication date: 7 October 1905. This might be an African form, but we lack any further information.
1918. [*Rhinolophus hipposideros*] *escaleræ* K. Andersen, Ann. Mag. nat. Hist., ser. 9, 2 (10): 378. Type locality: Morocco: Mogador, Ha-ha. Type specimen: BMNH 1910.11.24.2 (F, collector M. de la Escalera, presented by Oldfield Thomas; see Andersen, 1918: 378). Publication date: 1 October 1918.
1937. *Rhinolophus hipposideros vespa* Laurent, Bull. Soc. Hist. Nat. Afrique Nord, 28: 157, tet f. 1-2. Type locality: Morocco: Korifla. Publication date: February 1937.
1978. *eggenhoffner* Corbet, The mammals of the Palaearctic region: xxx. Lapsus. Possibly extralimital.
- ? *Rhinolophus hipposideros*: Name combination.

Taxonomy:

Revised by Felten *et al.* (1977). The status of populations around the Mediterranean, on Mediterranean Islands, and on both sides of the Red see is unclear (see Horáček *et al.*, 2000: 101). *hipposideros* species group (Csorba *et al.*, 2003: 53 - 55; Simmons 2005: 356 - 357). See Csorba *et al.*, (2003: 54) for review of taxonomy.

Common names:

Arabian: Khafash abu hadwa saghir. Basque: Ferra-saguzar txikia. Catalanian: Rat penat petit de ferradura. Czech: vrápenec malý. Dutch: Kleine hoefijzerneus. English: Lesser Horseshoe Bat. French: Petit Rhinolophe, Petit rhinolophe fer à cheval, Petit Fer-à-Cheval. Gallician: Morcego pequeno de ferradura. German: Kleine Hufeisennase, Kleinhufeisennase. Hungarian: kis patkósorrú denevér, Kis patkósdenevér. Italian: Rinolofo minore, Ferro di Cavallo Minore. Maltees: Farfett il-Lejl tan-Nala Zghir. Norwegian: Liten hesteskone. Portuguese: Morcego-de-ferradura-pequeno. Roman: Nas fier-chaval pitschen. Russian: Malyj podkovonos. Spanish (Castilian): Murciélago pequeño de herradura, Rinolofo pequeño de herradura.

Etymology of name:

From the Greek "*ippos*" meaning horse and "*sidero*" meaning iron (see Kozhurina, 2002: 15).

Conservation status:

Global- VU (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004af).

General distribution:

Ireland, the Netherlands, Iberia and Morocco through S Europe (incl. Portugal, Austria, Czech

Republic, Albania, Greece) and N Africa; Ethiopia, Djibouti (Pearch *et al.* (2001: 388); through Israel and Jordan to Kirghizia (incl. Abkhasia) and Kashmir; Arabia; Sudan; Ethiopia (Lavrenchenko *et al.*, 2004: 147).

Molecular biology:

DNA - Unknown.

Karyotype - Capanna *et al.* (1967) reported $2n = 56$, FN = 60.

Protein / allozyme - Unknown.

Figure 65. Distribution of *Rhinolophus hipposideros*

Distribution based on voucher specimens: Algeria, Eritrea, Morocco.

***Rhinolophus landeri* Martin, 1838**

- *1838. *Rhinolophus landeri* Martin, Proc. Zool. Soc. Lond., 1837, V (lviii): 101. Type locality: Equatorial Guinea: Bioko [Formerly Fernando Po]. Type specimen: BMNH 1855.12.26.250 (Holotype). Publication date: 25 May 1838.
1852. *Rhinolophus lobatus* Peters, Naturw. Reise Mossamb., Säugethiere, p. 41, pl. 9; pl. 13. Type locality: Mozambique: S bank Zambesi River, Tette, Sena [17 28 S 35 01 E] (Brown and Dunlop (1997: 1): "Africa orientalis, Sena, Tette" (=Sena, Mozambique) restricted by Moreau *et al.* (1946: 399). Coordinates: see Ansell and Dowsett (1988: 33)). Publication date: 1852. Considered a valid subspecies by Kock (1969: 114), Ansell and Dowsett (1988: 33), Taylor (1998: 37). -
1898. *Rhinolophus angolensis* Seabra, J. Sci. mat. phys. nat., Lisboa, ser. 2, 5: 250. Type locality: Angola: Hanha.
1904. *Rhinolophus Dobsoni* Thomas, Ann. Mag. Nat. Hist., ser. 7, 14 (80): 156, footnote. Type locality: Sudan: Kordofan. Type specimen: BMNH 1847.5.7.49 (Holotype, F). Publication date: 1 August 1904.
1917. *Rhinolophus axillaris* Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 429. Type locality: Democratic Republic of the Congo: Uele district, Aba. Type specimen: AMNH 49175 (ad M, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 17 December 1911, original number 1807). Publication date: 29 September 1917.

Taxonomy:

Meester *et al.* (1986) state that Rosevear (1965) and Kock (1969) regard *guineensis* Eisentraut, 1960, from Guinea, as subspecifically distinct from *landeri*. Hayman and Hill (1971), on the other hand, consider it a synonym, while Bohme and Hutterer (1978), Csorba *et al.*, (2003: 59 - 61) and Simmons (2005: 356) regard it as a distinct species, sympatric with *landeri* and somewhat larger.

Other names associated with *landeri* are *dobsoni* Thomas, 1904, which is either a synonym (Kock 1969) or a valid subspecies (Koopman 1975); and *angolensis* Seabra, 1898, which is listed as a species by Hill and Carter (1941) and Ellerman *et al.* (1953), while Hayman and Hill (1971), Koopman (1975, 1982), Csorba *et al.* (2003: 61 - 63) and Simmons (2005: 357) regard it as a member of the '*landeri* species group. See Csorba *et al.*, (2003: 62) for remarks on taxonomy.

Common names:

Afrikaans: Lander se saalneusvlermuis, Lander-saalneusvlermuis. English: Lander's Horseshoe Bat. French: Rhinolophe de Lander. Portuguese: Morcego ferradura de Lander.

Etymology of name:

Named by Martin after an early West African explorer, Richard Lander (see Rosevear 1965; Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004ap).

Regional- South Africa- Indeterminate (Smithers 1986); NT ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Senegal, Guinea (Fahr and Ebigo, 2003: 128) over Benin (Capo-Chichi *et al.*, 2004: 162) to Ethiopia and Somalia, south (over Republic of the Congo (Dowsett *et al.*, 1991: 259), Zambia, Zimbabwe (Cotterill, 2004: 261) to South Africa and Namibia; Bioko; Zanzibar.

Echolocation:

See O'Shea and Vaughan (1980), Aldridge and Rautenbach (1987), Taylor (1999) and Taylor *et al.*, (2005).

Molecular biology:

DNA - Unknown.

Karyotype - $2n = 58$, FN = 60, BA = 4, and a submetacentric X chromosome (Rautenbach *et al.*, 1993).

Protein / allozyme - Unknown.

Distribution based on voucher specimens:
Cameroon, Congo (Democratic Republic of the),
Equatorial Guinea, Kenya, Malawi, Mozambique,
Namibia, South Africa, Sudan, Tanzania,
Zimbabwe.

Figure 66. Distribution of *Rhinolophus landeri*

Rhinolophus maclaudi Pousargues, 1897

- *1897. *Rhinolophus Maclaudi* Pousargues, Bull. Mus. natn. Hist. nat., Paris, 3: 358, f. 1, 2. Type locality: Guinea: Conakry Island. Type specimen: MNHN 1897-281. Grubb *et al.* (1998: 78) mention 1898 as publication date.

Taxonomy:

R. maclaudi is an ecomorphological outlier having long-ears, which traditionally placed it in the *R. philippinensis* group (Andersen 1905d). Csorba *et al.* (2003: xvii, 63 - 64), states that it is located well inside the Africa clade, in the *maclaudi*-group, and is followed by Simmons (2005: 358). Koopman (1993a: 167) included *ruwenzorii* and *hilli*, but revised by Fahr *et al.*, (2002), who recognizes them as distinct species (followed by Csorba *et al.*, 2003 and Simmons 2005).

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); EN B1ab(iii) ver 3.1 (2001) (IUCN 2004; Fahr 2004e).

General distribution:

Guinea, Liberia (Simmons 2005: 358) and the record from Nigeria indicated in Koopman *et al.* (1995: 6, 19) and Happold (1987: 60 - 61) and included in Csorba *et al.*, (2003: 64) was re-identified as *R. hildebrandtii* (in Fahr *et al.*, 2002: 99).

Common names:

English: MacLaud's Horseshoe Bat. French: Rhinolophe de Maclaud.

Distribution based on voucher specimens:

Guinea.

Etymology of name:

Named in honour of dr. Maclaud, collector of the holotype (Pousargues, 1897: 361).

Rhinolophus maendeleo Kock, Csorba and Howell, 2000

- *2000. *Rhinolophus maendeleo* Kock, Csorba and Howell, Senckenb. biol., 80 (1/2): 234. Type locality: Tanzania: Tanga District, 2.5 km W of Tanga, Mkulumuzi River Gorge, Amboni Cave Forest [05 05 S 39 02 E, 0 - 80 m]. Type specimen: SMF 79643.

Taxonomy:

adami species group (Csorba *et al.*, 2003: 5 - 7; Simmons, 2005: 359). See Csorba *et al.*, (2003: 6) for remarks on taxonomy.

Common names:

English: Maendeleo Horseshoe Bat.

Etymology of name:

From the Swahili "*maendeleo*" for progress; a noun in apposition. Named in allusion to the increasing knowledge of the Tanzanian bat fauna (see Kock *et al.* 2000).

Conservation status:

Global- DD ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004r).

General distribution:

NE Tanzania.

Distribution based on voucher specimens:

Tanzania.

Rhinolophus mehelyi Matschie, 1901

- *1901. *Rhinolophus mehelyi* Matschie, Sitzb. Ges. Naturf. Freunde Berlin, p. 225. Type locality: Romania: Bucharest.
 1955. *Rhinolophus euryale tuneti* Deleuil and Labbé, Bull. Soc. Sci. Nat. Tunisie, 8: 52, 53. Type loc: Tunisia: Cap Bon, El Haouaria cave. Horáček *et al.* (2000: 102) consider it a valid subspecies.
 1993. *tunetae* Koopman, Mammal Species of the World: 167. Lapsus.
 1995. *tunetai* Pavlinov, Borissenko, Kruskop and Jahonton, Arch. Zool. Mus., Mosc. State Univ., 133: 81. Lapsus.

Taxonomy:

Revised by DeBlase (1972). *euryale* species group (Csorba *et al.*, 2003: 17 - 18; Simmons 2005: 359). See Csorba *et al.*, (2003: 17 - 18) for remarks on taxonomy.

Common names:

Catalonian: Rat penat mitjà de ferradura. Dutch: Mehely-hoefijzerneus. English: Mehely's horseshoe bat, Mediterranean Horseshoe Bat. French: Rhinolophe de Méhély, Rhinolophe des forêts. German: Mehely-Hufeisennase. Italian: Rinolofo di Méhély, Ferro di cavallo di Méhély. Portuguese: Morcego-de-ferradura-mourisco. Spanish (Castilian): Murciélago mediano de herradura, Rinolofo mediano de herradura.

Etymology of name:

In honour of Lajos Méhély (1862 - 1952) (see Kozhurina, 2002: 16).

Karyotypic:

Dulic and Soldatovic (1969) reported the diploid number as 2n= 58, aFN=64, X= SM, Y= A. While

Baker *et al.*, (1974, 1975) reported the aFN= 60 and BA= 4.

Conservation status:

Global- VU A2c ver 2.3 (1994) (IUCN 2004).

General distribution:

Portugal, Spain, France, Sardinia, Sicily to Rumania, Yugoslavia, Bulgaria, Greece, Transcaucasia; Morocco, N Algeria (Horáček *et al.*, 2000: 102) to Cyrenaica (Libya); Mediterranean islands, Iran, Iraq, Afghanistan, Asia Minor, Israel, Jordan, Egypt.

Molecular biology:

DNA - Unknown.

Karyotype - Dulic and Soldatovic (1969) reported 2n = 58, FN = 64, a submetacentric X chromosome, and an acrocentric Y chromosome. While Baker *et al.*, (1974, 1975) reported FN = 60 and BA = 4.

Protein / allozyme - Unknown.

Rhinolophus ruwenzorii J. Eric Hill, 1942

- *1942. *Rhinolophus ruwenzorii* J. Eric Hill, Am. Mus. Novit., 1180: 1. Type locality: Democratic Republic of the Congo: Kivu, W slope of Mount Ruwenzori, Buhatu valley [7 500 ft (=2 286 m)] (Fahr *et al.* (2002: 99) mention "S-side of Butahu Valley, 2286 m, W slope Rwenzori Mts., Congo (K.)."). Type specimen: AMNH 82394 (ad F, collector: James P. Chapin, Sage and Matthews [Ruwenzori-Kivu Expedition, collection date: 24 December 1926]). Publication date: 28 July 1942.
1973. *Rhinolophus hilli* Aellen, Period. biol., 75 (1): 101. Type locality: Rwanda: Préfecture de Cyangugu, Uwinka [2 300 m]. Type specimen: ZMUZ(ürich) 126639 (ad F, alcoholic, collector U. Goepel, collection date 25 August 1964). Fahr *et al.* (2002: 108) consider it a valid species.

Taxonomy:

Included in *maclaudi* by Koopman (1993a: 167), see Smith and Hood (1980: 170); but see Fahr *et al.* (2002), Csorba *et al.*, (2003: 65 - 66) and Simmons (2005: 362).

Conservation status:

Global- VU A4c; B1ab(iii) ver 3.1 (2001) assessed as *R. hilli* (IUCN 2004; Fahr 2004f). VU A4c; B1ab(iii) ver 3.1 (2001) (IUCN 2004; Fahr 2004d).

Common names:

English: Ruwenzori horseshoe bat.

General distribution:

E Democratic Republic of the Congo, W Uganda (Kityo and Kerbis, 1996: 60), Rwanda.

Etymology of name:

Referring to the Ruwenzori mountains, where the type specimen was collected.

Distribution based on voucher specimens:

Congo (Democratic Republic of the), [Rwanda](#).

Rhinolophus sakejiensis Cotterill, 2002

- *2002. *Rhinolophus sakejiensis* Cotterill, J. Zool., Lond., 256: 166. Type locality: Zambia: Mwinilunga district, Ikelenge Pedicle between the Sakeji and Zambezi rivers, apprx. 11 km NNE of source of Zambezi river, Kavunda [11 17 S 24 21 E, 1388 m]. Type specimens: NHMZ 29153 (Holotype, ad M, skull and alcoholic, baculum extracted, collector F.P.D. Cotterill, original number FWC 1090, collection date 11 October 1990); NHMZ 29154 (Paratype, sad M, skull and alcoholic, baculum extracted, collector F.P.D. Cotterill, original number FWC 1091, collection 11 October 1990); HZM 1.32236 (Paratype, ad M, skull and alcoholic, baculum extracted, collector F.P.D. Cotterill, original number FWC 1092, collection 11 October 1990).

Taxonomy:

Cotterill (2002: 5) considers it a member of the *ferrumequinum* species group followed by Simmons (2005: 362). See Csorba *et al.*, (2003: 132 - 133) for remarks on taxonomy.

Common names:

English: Sakeji horseshoe bat.

Conservation status:

Global- DD ver 3.1 (2001) (IUCN 2004; Cotterill 2004c).

General distribution:

Only known from the type locality.

Distribution based on voucher specimens:

[Zambia](#).

Figure 67. Distribution of *Rhinolophus sakejiensis*

Rhinolophus silvestris Aellen, 1959

- *1959. *Rhinolophus silvestris* Aellen, Arch. Sci. Genève, 42: 228. Type locality: Gabon: Latourville, N'Dumbu cave. Type specimen: MHNG 965.40 (ad M, alcoholic, collector P. Strinati and Villy Aellen, collection date: 4 August 1957).
- ? *Rhinolophus clivosus silvestris*: Name combination.

Taxonomy:

Considered a subspecies of *clivosus* by Hayman and Hill (1971: 23), but see Koopman (1975: 386), Cotterill (2002), Csorba *et al.*, (2003: 46 - 48) and Simmons (2005: 363). Forms part of the *ferrumequinum* species group (Cotterill 2002; Csorba *et al.*, 2003: 46 - 48); Simmons 2005: 363).

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); VU B2ab(iii) ver 3.1 (2001) (IUCN 2004; Cotterill 2004g).

General distribution:

Gabon, Republic of the Congo.

Common names:

English: Forest Horseshoe Bat. French: Rhinolophe forestier.

Etymology of name:

From the Latin for forest dweller (see Flannery, 1995: 321).

Rhinolophus simulator K. Andersen, 1904

- *1904. *Rhinolophus simulator* K. Andersen, Ann. Mag. Nat. Hist., ser. 7, 14 (83): 384. Type locality: Zimbabwe: Mashonaland, Mazoe. Type specimen: BMNH 1902.2.7.10 (Holotype, ad M, alcoholic, collector J. ff. Darling). Publication date: 1 November 1904.
1914. *Rhinolophus bembanicus* Senna, Annuario Mus. Zool. R. Univ. Napoli, (2) 4: no 9, p. 1, 2, text-fig 1, 2. Type locality: Zimbabwe: Lake Bengueolo [=Lake Bangweulu]. Publication date: 27 March 1914. Ansell and Dowsett (1988: 34) indicate that *bembanicus* might represent a separable species, but the type specimen no longer exists.
1936. *Rhinolophus alcyone alticolus* Sanborn, Field Mus. Nat. Hist., Zool. ser., 20: 108. Type locality: Cameroon: Mount Cameroon [5 800 ft (=1 768 m)]. Publication date: 15 August 1936.

Taxonomy:

Includes *alticolus* and *bembanicus* (see Koopman (1975: 387); Hayman and Hill (1971: 25); Koopman 1993a: 169; Simmons 2005: 363). *capensis* species group (Csorba *et al.*, 2003: 10 - 12; Simmons 2005: 363).

Figure 68. *Rhinolophus simulator*

Common names:

Afrikaans: Bosveldsaalneusvlermuis, Bosveldvlermuis. English: Bushveld Horseshoe Bat. French: Rhinolophe du Bushveld, Rhinolophe du Veld. Portuguese: Morcego ferradura das savanas.

Etymology of name:

The colloquial name refers to its occurrence in savanna woodland in the subregion (see Taylor 2005).

Palaeontological / archaeological records:

R. simulator may be present in the late Holocene at Nkupe, South Africa (Avery 1991: 6).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004a).

Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

South Africa, Swaziland (Monadjem, 2005: 6), Botswana (?), Zambia (Cotterill, 2004: 261) and Malawi (Happold and Happold, 1997: 818) to S Sudan and Ethiopia; Cameroon; Nigeria, Guinea.

Echolocation:

See Taylor (1999).

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach (1986) reported $2n = 58$, FN = 60, BA = 4, and submetacentric X and Y chromosomes.

Protein / allozyme - Unknown.

Figure 69. Distribution of *Rhinolophus simulator*

Distribution based on voucher specimens:

Zimbabwe, Congo (Democratic Republic of the), Ethiopia, Malawi, Nigeria, South Africa, Swaziland, Tanzania, Zambia.

Rhinolophus swinnyi Gough, 1908

- *1908. *Rhinolophus swinnyi* Gough, Ann. Transv. Mus., 1: 71, 2 text-f.. Type locality: Republic of South Africa: Cape Province, W Pondoland, Ngqeleni District [30 40 S 29 02 E] (Meester *et al.* (1986: 41) mentioned it as "Ngqeleni district, west of Port St. Johns, Transkei"). Type specimen: TM 1021 (ad. M, skin and skull, collector: H.H. Swinny, collection date: 22 February 1908, original number: 153), Type specimen: TM 1022 (paratype, ad M, skin and skull, collector: H.H. Swinny, collection date: 23 February 1908, original number: 154, notes: skull found lying loose- may not belong to this specimen [signed A. Roberts]). Publication date: April 1908.
1913. *Rhinolophus swinnyi piriensis* Hewitt, Records Albany Mus., 2: 402. Type locality: Republic of South Africa: E Cape Province, near King William's Town, Pirie. Publication date: 6 February 1913.
1946. *Rhinolophus swinnyi rhodesiae* Roberts, Ann. Transv. Mus., 20: 304. Type locality: Zimbabwe: Limpopo valley, Bezwe river, a tributary of the Wanetsi (? Nuanetsi) River.

Taxonomy:

Koopman (1966, and in Honacki *et al.* 1982) suggests that this species may be conspecific with *denti. capensis* species group (Csorba *et al.*, 2003: 12 - 14; Simmons 2005: 364). See Csorba *et al.*, (2003: 11) for remarks on taxonomy.

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach (1986) reported $2n = 58$, FN = 62, BA = 6, a submetacentric X chromosome and a metacentric Y chromosome.

Protein / allozyme - Unknown.

Common names:

Afrikaans: Swinny se saalneusvlermuis, Swinny-saalneusvlermuis, Swinnyse Vlermuis. English: Swinny's Horseshoe Bat. French: Rhinolophe de Swinny. Portuguese: Morcego ferradura de Swinny.

Etymology of name:

Named after H.H. Swinny, who collected the original specimens from the Nqqueleni district, Eastern Cape (Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Cotterill 2004h).

Regional- South Africa- Indeterminate (Smithers 1986); EN C2a(i) ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

South Africa to Zimbabwe (Cotterill, 2004: 261), Democratic Republic of the Congo, Malawi (Happold and Happold, 1997: 818), and Zanzibar.

Echolocation:

See Taylor (1999).

Figure 70. Distribution of *Rhinolophus swinnyi*

Distribution based on voucher specimens: "Africa", South Africa, Tanzania, Zambia, Zimbabwe.

Rhinolophus ziama Fahr, Vierhaus, Hutterer and Kock, 2002

- *2002. *Rhinolophus ziama* Fahr, Vierhaus, Hutterer and Kock, *Myotis*, 40: 109. Type locality: Guinea: Guinée Forestière, border of "Réserve de la Biosphère du Massif du Ziama", W edge of Sérédou, near Park Station. Type specimen: ZFMK 99.934 (ad M, alcoholic, skull, skeleton; collector H. Vierhaus, collection date 12 August 1992, original nr HV 2590).

Taxonomy:

maclaudi species group (Fahr *et al.*, 2002; Simmons 2005: 365).

General distribution:

SE Guinea, NW Liberia.

Common names:

English: Ziama Horseshoe Bat (1st use Simmons 2005: 365).

Distribution based on voucher specimens:

Guinea.

Etymology of name:

In reference to the protected area near the type locality, the "Réserve de la Biosphère du Massif de Ziama", and as a noun in apposition (Fahr *et al.*, 2002: 110).

Conservation status:

Global- EN B1ab(iii) ver 3.1 (2001) (IUCN 2004; Fahr 2004c).

Superfamily RHINOPOMATOIDEA

Family RHINOPOMATIDAE Dobson, 1872

- *1872. *Rhinopomatidae* Dobson, J. Asiatic Soc. Bengal, 41 (3): 221.
 1907. *Rhinopomidae* Miller, Bull. U.S. natl. Mus., 57: 80. Type genus *Rhinopoma* Geoffroy St.-Hilaire, 1818. Publication date: 27 June 1907.

Taxonomy:

Koopman (1993) and Simmons (2005) assigned the name Rhinopomatidae to Bonaparte, 1838 - Syn. Vert. Syst. In Nuovi Ann. Sci. Nat., Bologna, 2: 111; but see Corbet and Hill (1992: 81) and Van Cakenberghe and De Vree (1994). Revised by Van Cakenberghe and De Vree (1994).

Common names:

Dutch: Muisstaartvleermuizen. English: Mouse-tailed bats. French: Rhinopome, Chauve-souris à queue de souris. German: Mausschwanzfledermäuse. Norwegian: Langhalete flaggermus, klaffneser.

Genus *Rhinopoma* E. Geoffroy St.-Hilaire, 1818

- *1818. *Rhinopoma* E. Geoffroy Saint-Hilaire, Descrip. de l'Egypte, 2: 113. Publication date: 1818. Type: *Vespertilio microphyllus* Brünnich, 1782.
 1854. *Rhinopomus* Gervais, Hist. Nat. des Mammifères, p. 202. Lapsus (Allen, 1939a: 64).

Taxonomy:

Revised by Hill (1977b) and Van Cakenberghe and De Vree (1994).

Allen (1939a: 64) assigned *Rhinopoma* to Oken, 1816, Lehrbuch d. Naturgesch., pt. 3, zool., Sect. 2, p. 926, but this name was rendered "Not Available" by Opinion 417 (International Commission on Zoological Nomenclature, 1956).

and De Vree (1994: 21).

Ethiopian records of *Rhinopoma muscatellum* Thomas, 1903, mentioned by Koopman (1993) represent *Rhinopoma macinnesi* Hayman, 1937 (Van Cakenberghe and De Vree, 1994: 20), therefore *R. muscatellum* is no longer included in the list of African species.

A key of the genus is given in Van Cakenberghe

Rhinopoma hardwickii Gray, 1831

1816. *Rhinopoma brevicaudatum* Oken, Lehrb. Naturg. Jena, 3 (2): 926. Type locality: Egypt: no specific locality. Not available, ICZN Opinion 417, 1956 (see Van Cakenberghe and De Vree, 1994: 14).
 *1831. *Rhinopoma Hardwickii* Gray, Zool. Misc., 1: 37. Type locality: India: India. Type specimen: BMNH GMCM 1.e (ad M, alcoholic, collector Maj. Gen. Hardwicke; see Kock, 1969: 35).
 1866. *Rhinopoma longicaudatum* Fitzinger, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 54 (1): 547. Type locality: Sudan: Sennaar. Nomen nudum: Kock (1969: 35), Van Cakenberghe and De Vree (1994: 14).
 1866. *Rhinopoma sennaariense* Fitzinger, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 54 (1): 547. Type locality: Sudan: Anglo-Egyptian Sudan, near Roseires, Sennaar and Fazoglo [=Fazughli] (Restricted to Fazughli by Kock (1969: 35)). Nomen nudum: see Harrison and Bates (1991: 29), Van Cakenberghe and De Vree (1994: 14). Validated by Kock (1969) according to Qumsiyeh and Jones (1986: 1).
 1868. *Rhinopoma sennareense* Hartmann, Zeitschr. Gesellsch. Erdkde, Berlin, 3 (28/29): 44. Nomen nudum: Van Cakenberghe and De Vree (1994: 14).
 1877. *Rhinopoma senaareense*, *potius senareense* Heuglin, Reise in Nordost Afrika, 2: 24. Publication date: 1877. Emendation of *sennaariense* Fitzinger 1866 (see Kock, 1969: 35); Lapsus: Van Cakenberghe and De Vree (1994: 14).
 1903. *Rhinopoma cystops* Thomas, Ann. Mag. Nat. Hist., ser. 7, 11 (65): 496. Type locality:

- Egypt: Luxor. Type specimen: BMNH 1902.1.17.1 (Holotype, ad F, skin and skull, collected and presented by N.C. Rothschild; see Thomas, 1903: 497; Kock, 1969: 35; Qumsiyeh, 1985: 20). Publication date: 1 May 1903.
1903. *Rhinopoma hardwickei* Thomas, Ann. Mag. nat. Hist., ser. 7, 11 (65): xxx. Publication date: 1 May 1903. Emendation of *hardwickii*, since the species was named after Maj. Gen. Hardwicke, but according to Hill (pers. comm.) this was unjustified since Gray latinized the name.
1954. *Vespertilio brevicauda* Stresemann, Abh. dtsch. Akad. Wiss. Berlin, 1: 172. Type locality: Egypt: Saqqara. Label name from Hemprich, without nomenclatural status, see Kock (1969: 35), Van Cakenberghe and De Vree (1994: 14).
1954. *Vespertilio ferox* Stresemann, Abh. dtsch. Akad. Wiss. Berlin, 1: 172. Type locality: Egypt: Saqqara. Label name from Hemprich, without nomenclatural status, see Kock (1969: 35), Van Cakenberghe and De Vree (1994: 14).
1956. *Rhinopoma hardwickei cystops* Möhres and Kulzer, Verh. dtsch. zool. Ges., 19: 60. Lapsus (see Van Cakenberghe and De Vree, 1994: 15).
1961. *Rhinopoma lardwickei cystops* Madkour, Bull. zool. Soc. Egypt, 16: 50. Lapsus (see Kock, 1969: 35; Van Cakenberghe and De Vree, 1994: 15).
1969. *Rhinopoma hardwickei sennaariense* Kock, Abh. Senckenb. Naturforsch. Ges., 521: 40, 51. Type locality: Sudan: Blue Nile, Fazogli [=Fazughli]. Validation of *sennaariense* Fitzinger, 1866, nomen nudum. Hill (1977) pointed out that *sennaariense* Kock, 1969 is a synonym of *arabium* (see Harrison and Bates, 1991: 30).
1971. *Rhinopoma hardwickei sennaarinense* Hill and Morris, Bull. Br. Mus. nat. Hist. (Zool.), 21 (2): 30. Lapsus (see Van Cakenberghe and De Vree, 1994: 15).
1975. *Rhinopoma sennaariense* Koopman, Bull. Am. Mus. Nat. Hist., 154 (4): 367. Lapsus (see Van Cakenberghe and De Vree, 1994: 15).
1985. *R[hinopoma] h[ardwickei] sinaariense* Qumsiyeh, Spec. Publ. Mus. Texas Tech Univ., 23: 22. Lapsus: attributed to Kock (1969) by Qumsiyeh (1985: 22).
- ? *Rhinopoma hardwickei cystops*: Name combination.
- ? *Rhinopoma hardwickei hardwickei*: Name combination.

Taxonomy:

See Qumsiyeh and Jones (1986, Mammalian Species, 263), Van Cakenberghe and De Vree (1994: 20), Corbet (1978: 40), Koopman (1993a: 155), Van Cakenberghe and De Vree (1994: 14), and Horáček *et al.* (2000: 97) mention this name as *hardwickei*, whereas Qumsiyeh and Jones (1986: 1), Harrison and Bates (1991: 29), Corbet and Hill (1992: 82), Qumsiyeh, Disi and Amr (1992: 104), Bates and Harrison (1997: 35), Benda *et al.* (2004) mention *hardwickii*.

Common names:

Arabian: Khafash abu danab saghir. English: Hardwicke's Mouse-tailed Bat, Lesser Mouse-tailed Bat, Small mouse-tailed bat, Lesser Rat-tailed Bat. French: Rhinopome moyen, Rhinopome de Hardwicke, Chauve-souris à queue de souris, Petit Rhinopome.

Etymology of name:

In honour of Major General Hardwicke, collector of the type specimen.

Conservation status:

Global- VU assessed as *R. hadithaensis* (Baillie and Groombridge 1996); LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Benda 2004b).

General distribution:

Sunda Archipelago (Indonesia); Thailand; Burma (=Myanmar) to Morocco (Benda *et al.*, 2004) (over India, Pakistan, Afghanistan, Iran, Iraq, S Syria, Jordan, Israel, Tunisia (Horáček *et al.*, 2000: 97), Algeria (Horáček *et al.*, 2000: 97), Morocco), south to Mauritania, Nigeria; Ethiopia (Lavrenchenko *et al.*, 2004: 147), Djibouti (Pearch *et al.*, 2001: 392); Socotra Isl (Yemen), Libya. The Kenyan material mentioned by Koopman (1992) belongs to *R. macinnesi* (see Van Cakenberghe and De Vree, 1994: 17 - 18).

Molecular biology:

DNA - Unknown.

Karyotype - Ray-Chandhuri and Pathak (1966) recorded $2n=36$.

Protein / allozyme - Unknown.

Distribution based on voucher specimens:
"Africa", [Algeria](#), [Burkina Faso](#), [Chad](#), [Djibouti](#),
[Egypt](#), [Ethiopia](#), [Mauritania](#), [Morocco](#), [Niger](#),
[Senegal](#), [Somalia](#), [Sudan](#), [Tunisia](#).

Figure 71. Distribution of *Rhinopoma hardwickii*

***Rhinopoma macinnesi* Hayman, 1937**

- *1937. *R[hinopoma] cystops macinnesi* Hayman, Ann. Mag. nat. Hist., ser. 10, 19 (113): 530.
Type locality: Kenya: Lake Rudolf, near Central Island, Bat Island. Type specimen:
BMNH 1936.11.4.45 (ad M, leg. D.G. MacInnes). Publication date: 1 May 1937.

Taxonomy:

Considered a synonym of *hardwicki* by Koopman (1993), but see Van Cakenberghe and De Vree (1994: 20).

Common names:

English: MacInnes's Mouse-tailed Bat.

Etymology of name:

In honour of Mr. D.G. MacInnes, the collector of the type specimen.

Conservation status:

Global- VU: (Baillie and Groombridge 1996); VU D1 ver 3.1 (2001) (IUCN 2004; Aulgnier 2004a).

General distribution:

Kenya, Eritrea, Ethiopia, Somalia.

Distribution based on voucher specimens:

[Eritrea](#), [Ethiopia](#), [Kenya](#), [Somalia](#).

Figure 72. Distribution of *Rhinopoma macinnesi*

Rhinopoma microphyllum (Brünnich, 1782)

- *1782. *Vespertilio Microphyllus* Brünnich, Dyrenes Historie, 1: 50, pl. 6; figs. 1 - 4. Type locality: Egypt: Giza (Corbet and Hill (1992: 82) and Horáček *et al.* (2000: 96) mention "Arabia and Egypt" as type locality. Type locality fixed by Koopman (1975: 366) [but also Aellen 1957, Anderson and de Winton 1902, Kock 1969 - See Schlitter and Qumsiyeh (1996: 1)].). Type specimen: ZMUC (leg. Hasselquist; see Kock, 1969: 54).
1820. *Rhinopoma microphylla* Desmarest, Encycl. Méthod., (Zoologie, Mammalogie) 1: 129. Publication date: 1820. Lapsus.
1859. *Rhinopoma lepsianum* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 222. Type locality: Sudan: Khartoum (Type locality: Blue Nile [See Kock (1969: 58); White Nile, see Koopman (1975: 366): Khartoum]). Type specimen: ZMB 2578 (Lectotype (designated by Kock 1969: 54, 57); M, ad, body in alcohol, skull extracted (by D. Kock in the 1960s); collector: Lepsius; collection date: 1844; see Kock, 1969: 54 -. Publication date: 1859.
1877. *Rhinopoma cordofanicum* Heuglin, Reise in Nordost Afrika, 2: 24. Type locality: Sudan: Jebel Arashkool; W bank of the White Nile [c 14 15 N 32 10 E]. Publication date: 1877. Allen (1939a: 64) mentions Heuglin and Fitzinger, 1866. Sitzb. K. Akad. Wiss. Wien, 54, sec 1, 547 as author. Nomen Nudum. Included in *hardwickei* by Kock (1969: 35).
1969. *Rhinopoma microphyllum tropicalis* Kock, Abh. Senckenb. Naturforsch. Ges., 521: 58. Type locality: Sudan: Kordofan, 2 km NE Kadugli, Jebel Talao [550 m]. Type specimen: SMF 33265 (Type: sad M, skin, skull and skeleton; collection date 12 February 1963; see Kock, 1969: 58 [number 33216???]). Most likely a synonym of *R. m. microphyllum*. If a valid subspecies, *lepsianum* or *cordofanicum* may have priority (see Schlitter and Qumsiyeh, 1996: 1).
1985. *Rhinopoma mircophylum kineari* Bhatnagar and Parveen, Nat. Acad. Sci. Letters, 8 (2): 64. Lapsus for *microphyllum*.

Taxonomy:

See Schlitter and Qumsiyeh (1996, Mammalian Species, 542).

Common names:

Arabic: Khafash abu danab kabir. English: Larger Mouse-tailed Bat, Long-tailed Bat, Greater Mouse-tailed Bat, Rat-tailed Bat, Brünnich's Mouse-tailed Bat, Larger Rat-tailed Bat, Greater Rat-tailed Bat. French: Rhinopome microphyllle, Grand Rhinopome. Indonesian: Kelelawar ekor lembing, Kelelawar Ekor-tikus.

Etymology of name:

From the Greek "*mikros*" meaning small and "*phullon*" meaning leaf (see Schlitter and Qumsiyeh, 1996: 4).

Conservation status:

Global- LR: lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Aulagnier 2004b).

General distribution:

Morocco and Senegal; over Djibouti (Pearch *et al.*, 2001: 393), Egypt, Lebanon, Israel, Jordan, SW Saudi Arabia, Iraq, Iran, Afghanistan, Pakistan and India to Thailand; Sumatra; possibly in Myanmar (see Corbet and Hill, 1992).

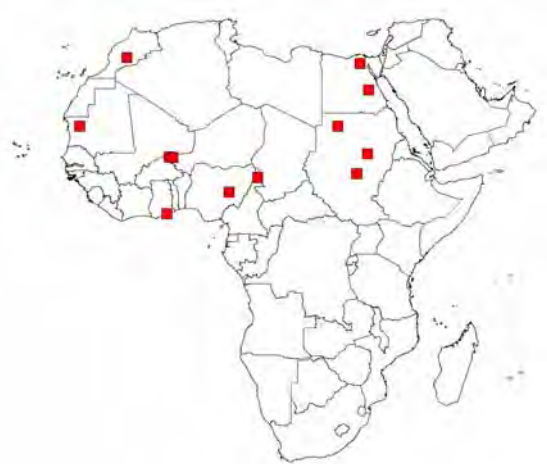

Figure 73. Distribution of *Rhinopoma microphyllum*

Distribution based on voucher specimens: "Africa", "Senegal or Mauritania", Algeria, [Burkina Faso](#), Cameroon, Egypt, Ghana, [Mauritania](#), [Morocco](#), Nigeria, [Sudan](#).

SUBORDER VESPERTILIONIFORMI

1821. *INSECTIVORAE* Gray, pp. 299. Proposed as an order of bats, for the same content as that of MICROCHIROPTERA Dobson 1875.
1855. *Gymnorhina* Giebel, pp. 926.
1866. *ENTOMOPHAGA* Murray, pp. xiv. Not ENTOMOPHAGA Owen 1859, used for didelphoid marsupials.
1866. *Nycterides* Haeckel, pp. clx. *Nomen oblitum*. This may be the use of the Greek name for bat (=Nycteris).
1872. *ANIMALIVORA* Gill, pp. 16.
1875. *MICROCHIROPTERA* Dobson, pp. 346.
1979. *PHYLLOSTOMATIA* Van Valen, pp. 104. Proposed as infraorder.
1979. *VESPERTILIONIA* Van Valen, pp. 109. Proposed as infraorder.
1995. *VESPERTILIIFORMES* Zagorodniuk, Godovanets, Pokynchereda and Kyseliuk, ; also Zagorodniuk *et al.* (1995); Zagorodniuk and Pokynchereda (1997).
1997. *VESPERTILIIFORMES* Zagorodniuk,
1998. *VESPERTILIONIFORMES* Zagorodnyuk, Zagorodnyuk (1998a, b and c); Zagorodniuk (1999, 2001a and b, 2002, 2003a and b, 2004).
2001. *YANGOCHIROPTERA* Springer, Teeling, Madsen, Stanhope, and De Jong, Proceedings of the National Academy of Science 98(11): 6243.
2001. *YINPTEROCHIROPTERA* Springer, Teeling, Madsen, Stanhope, and De Jong, Proceedings of the National Academy of Science 98(11): 6243.
2004. *VESPERTILIONIFORMES* Hutcheon and Kirsch, Journal of Mammalian Evolution 11(1):??
- *? *VESPERTILIONIFORMI* The name of the Infraorder is based on *Vespertilio* Linnaeus, 1758 (type of VESPERTILIONIDAE Gray, 1821).

The suborder name follows the typified name used by Zagorodniuk *et al.* (1995) - Vespertiliiformes, Zagorodniuk (1997) - Vespertiliiformes, Zagorodniuk and Pokynchereda (1997) - Vespertiliiformes, Zagorodnyuk (1998a, b and c) - Vespertilioniformes, Zagorodniuk (1999, 2001a and b, 2002, 2003a and b, 2004) - Vespertilioniformes and Hutcheon and Kirsch (2004, 2006) - Vespertilioniformes, but with the ending changed to follow the format proposed for standardization of nomenclature of higher taxa by Alonso-Zarazaga (2005).

INFRAORDER NOCTILIONIFORMACEI

- *? *NOCTILIONIFORMACEI* The name of the Superfamily is based on *Noctilio* Linnaeus, 1766.

Superfamily NOCTILIONOIDEA

- *? *NOCTILIONOIDEA* The name of the Superfamily is based on *Noctilio* Linnaeus, 1766.

Taxonomy:

The placement of the Family Myzodidae, with in the superfamily Noctilionoidea follows Teeling *et al.* (2005).

Family MYZOPODIDAE Thomas, 1904

- *1904. *Myzopodidae* Thomas, Proc. zool. Soc. Lond., 1904, II, I: 5. Type genus: *Myzopoda* A. Milne-Edwards and A. Grandidier, 1878. Publication date: 1 October 1904.

Common names: Norwegian: Sugeskålflaggermus.
 English: Sucker-footed Bats. German:
 Madagassische Haftscheibenfledermaus.

Genus *Myzopoda* Milne-Edwards and A. Grandidier, 1878

- *1878. *Myzopoda* A. Milne-Edwards and A. Grandidier, Bull. Sci. Soc. Philom. Paris, ser. 7, 2: 220. Type species: *Myzopoda aurita* A. Milne-Edwards and A. Grandidier, 1878. Publication date: 1878.
 1879. *Myxopoda* Dobson, Proc. zool. Soc. Lond., 1878, IV: 871. Publication date: April 1879. Lapsus: see Allen (1939a: 82), Schliemann and Maas (1978: 1).

Myzopoda aurita Milne-Edwards and A. Grandidier, 1878

- *1878. *Myzopoda aurita* A. Milne-Edwards and A. Grandidier, Bull. Sci. Soc. Philom. Paris, ser. 7, 2: 220. Type locality: Madagascar: no specific locality. Type specimen: MNHN 223 (alcoholic, skull not removed: see Peterson *et al.* (1995: 139)). Publication date: 1878.

Taxonomy:

See Schliemann and Maas (1978, Mammalian Species, 116).

Conservation status:
 Global- VU A2c ver 2.3 (1994).

Common names:

English: Golden Bat, Old World sucker-footed bat, Sucker-footed bat, Madagascar sucker-footed bat. French: Chauve-souris malgache à pieds à ventouses, Vespertilion Doré.

General distribution:
 Madagascar.

Distribution based on voucher specimens:
 Madagascar.

Myzopoda schliemanni Goodman, Rakotondraparany and Kofoky, 2007

- *2007. *Myzopoda schliemanni* Goodman, Rakotondraparany and Kofoky, Mammalian Biology 72(2): 65, 68, figs. 2 - 5. Type locality: Madagascar: Province de Mahajanga [= Parc National d'Anarafantsika], Station Forestiere d'Ampijoroa, Jardin Botanique A, [1619.4S, 4648.4E, 160m]. Type specimen: FMNH 177327 (Holotype, ad M, skin, skull and partial post cranial skeleton, collector: S.M. Goodman, collection date: 18 April 2003; original nr: SMG-13624), 3 male and 4 female Paratypes listed. Publication date: 26 March 2007.

Taxonomy:

See Goodman *et al.* (2007).

Conservation status:

Global- Not assessed. But, see Goodman *et al.* (2007).

Common names:

English: Schliemann's sucker-footed bat (Goodman *et al.* 2007).

General distribution:
 Madagascar.

Etymology of name:

The species name was chosen to honour Professor Dr. Harald Schliemann, University of Hamburg, in recognition of his long interest in sucker-footed bats, including several important anatomical studies (e.g. Schliemann 1970; 1971).

Geographic variation:

See Goodman *et al.* (2007).

General description of external morphology:

See Goodman *et al.* (2007).

General description of cranial and dental

morphology:

See Goodman *et al.* (2007).

Detailed morphology:

For a description of the crania, teeth, postcranial skeleton, ears and tragus see Goodman *et al.* (2007).

Functional morphology:

Unknown.

Sexual dimorphism:

Goodman *et al.* (2007) found there is no sexual dimorphism in *M. schliemanni*.

Echolocation:

Unknown.

Molecular biology:

DNA - Unknown.

Karyotype - Unknown.

Protein / allozyme - Unknown.

Habitat:

See Goodman *et al.* (2007).

Habits:

Unknown.

Roost:

See Goodman *et al.* (2007).

Migration:

Unknown.

Food / diet

Unknown.

Predators:

Unknown.

Population:

Structure and density - Unknown.

Lifespan:

Unknown.

Activity and Behaviour:

Unknown.

Reproduction and Ontogeny:

See Goodman *et al.* (2007).

Mating:

Unknown.

Post-natal development:

Unknown.

Parasites:

Unknown.

Viruses:

Unknown.

Utilization:

Unknown.

Anthropophilous:

Unknown.

INFRAORDER NYCTERIFORMACEI

- *? **NYCTERIFORMACEI** The name of the Infraorder is based on *Nycteris* G. Cuvier and E. Geoffroy, 1797 (type Family NYCTERIDAE Van der Hoeven, 1855).

We followed the format proposed for acei and the ending -iformacei. But, for those standardization of nomenclature of higher taxa by without typified names there may well be Alonso-Zarazaga (2005), then for typified names occasions where incertae-sedis is used. this would be standardized, using the connector -

Superfamily NYCTEROIDEA

2005. **EMBALLONUROIDEA** Teeling, Springer, Madsen, Bates, O'Brien, and Murphy, Science 307: 581.
- *? **NYCTEROIDEA** The Superfamily name is based on *Nycteris* G. Cuvier and E. Geoffroy, 1797 (type Family NYCTERIDAE Van der Hoeven, 1855).

Taxonomy: *Nycteris* G. Cuvier and E. Geoffroy, 1795, rather than *Emballonura* Temminck, 1838.
This name is contrary to the superfamily name, EMBALLONUROIDEA, used by Teeling *et al.* (2005). Because, the oldest, typified name is

Family EMBALLONURIDAE Gervais, 1855

- *1855. **Emballonuridae** Gervais, Exped. Partes Cen. Am. Sud., Zool. (Sec. 7), Vol. 1, pt. 2 (Mammifères): 62 footnote. Publication date: 23 July 1855. Type genus: *Emballonura* Temminck.
1865. **Brachyura** Peters, Monatsb. k. preuss. Akad. Wiss. Berlin: xxx. in part: see Pavlinov *et al.* (1995: 74). Simmons (pers. comm.): "This name is a tough one, no type genus was noted and taxa now placed in 5 families were included. I have left it out because it is not clear just what it would be a junior synonym of. There seems no point in restricting it since it is not the oldest name for any of the family groups now recognized. Fixed"
1877. **Taphozoinae** Jerdon, Mammals of India, p. 30.
1907. **Diclidurinae** Miller, Bull. U.S. Natl. Mus., 57: 94. Type genus: *Diclidurus* Wied, 1819. Publication date: 29 June 1907.

Taxonomy: Koopman (1993a: 156) mentions Gervais, 1855 as author, whereas Corbet and Hill (1992: 83) mention Dobson, 1875b: 349. Simmons (2005) recognises two subfamilies: Emballonurinae (including the African genera *Coleura* and *Emballonura*), and Taphozoinae (including the African genera *Saccolaimus* and *Taphozous*).

Etymology of name: The name of this family is derived from the Greek "*emballo*", to throw, and "*oura*", a tail, referring to the tail structure of all its members, which resembles a spear thrown into the ground at an angle (Taylor 2005).

Common names:

English: Sheath-tailed Bats, Tomb Bats, Sac-winged Bats. Finnish: Hautalepakot. German: Flathnasenfreischwänze. Norwegian: Frihalete flaggermus, gravflaggermus.

Genus *Coleura* Peters, 1867

- *1867. *Coleura* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 479. Type species: *Emballonura afra* Peters
 1939. *Coléura* Allen, Bull. Mus. comp. Zool., 83: 65. Lapsus.

Taxonomy:

Key provided in Dunlop (1997, Mammalian Species, 566).

Common names:

English: Sheath-tailed bats, Peters's sheath-tailed bats.

Coleura afra (Peters, 1852)

- *1852. *Emballonura afra* Peters, Naturw. Reise Mossamb., Säugethiere, p. 51, pl. 12, pl. 13, fig. 18, 19. Type locality: Mozambique: Zambezi River, Tete. Type specimen: BMNH 1858.6.18.12 (Syntype). Publication date: 1852.
 1915. *C[oleura] g[allarum] nilosa* Thomas, Ann. Mag. nat. Hist., ser. 8, 15 (90): 576, 577. Type locality: Sudan: Upper Nile, near mouth of Bahr-el-Zeraf. Type specimen: BMNH 1915.3.6.76 (ad M, skinned from spirit, collector: Willoughby P. Lowe, collection date: 3 February 1914, original number 77). Publication date: 1 June 1915. May be valid as a subspecies (Kock 1969, Koopman 1975). In the key presented in the original description on p. 576, the name is given as *C. g. nilosa*, on the description itself (p. 577) it is mentioned as *Coleura gallarum nilosa*.
 1915. *C[oleura] gallarum* Thomas, Ann. Mag. nat. Hist., ser. 8, 15 (90): 576, 577. Type locality: Somalia: [British Somaliland] Zeyla [Zsyla][sealevel]. Type specimen: BMNH 1911.8.2.4 (old F, collected and presented by Dr. R.E. Drake-Brockman, collection date: 29 October 1910, original number: 336, notes- caught in house). Publication date: 1 June 1915. In the key presented in the original description on p. 576, the name is given as *C. gallarum*, on the description itself (p. 577) it is mentioned as *Coleura gallarum*.
 1939. *Coleura kummeri* Monard, Arq. Mus. Bocage, Lisboa, 10: 55, fig. 1. Type locality: Guinee-Bissau: Madina Boé [11 45 N 13 13 W]. Type specimens: NMB 5277, NMB 5278 (syntypes: 1ad F (No. 881) 1 ad M (No. 890); M in alcohol: collection date 5 March 1938; see <http://www.nmb.bs.ch/NaturmuseumBasel/LinksNMB/Sammlung/Kataloge/Mammalia.pdf>). Publication date: March 1939.
 ? *Coleura afra*: Name combination.

Taxonomy:

See Dunlop (1997, Mammalian Species, 566).

2004g).

Common names:

Afrikaans: Skedestertvlermuis. English: Southern Sheath-tailed Bat, African Sheath-tailed Bat, Sheath-tailed Bat, Mozambique Sheath-tailed Bat. French: Emballonure d'Afrique, Chauve-souris à queue gainée d'Afrique, Chauve-souris en fourreau d'Afrique. Portuguese: Morcego de cauda.

General distribution:

Guinea-Bissau over Togo (Capo-Chichi *et al.*, 2004: 161) to Ethiopia (Lavrenchenko *et al.*, 2004: 147), Somalia, and Djibouti (Pearch *et al.*, 2001: 394), south to Angola, Democratic Republic of the Congo, and Mozambique; Yemen.

Echolocation:

See Pye (1980) and Taylor *et al.* (2005).

Etymology of name:

The colloquial name refers to the peculiar situation of the tail, which is enclosed by the interfemoral membrane between the back legs (Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*,

Distribution based on voucher specimens:
 Angola, Congo (Democratic Republic of the),
 Guinea-Bissau, Mozambique, Somalia, Sudan,
 Tanzania, Unknown country.

Figure 74. Distribution of *Coleura afra*

***Coleura seychellensis* Peters, 1868**

- *1868. *Coleura seychellensis* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 367. Type locality: Seychelle Islands: Mahe Island. Type specimen: BMNH 1869.2.19.2 (cotype, ad M, see Thomas, 1915d). Publication date: 1869. Allen (1939a: 65) mentions "1869, for 1868".
- 1915. *C[oleura] silhouettæ* Thomas, Ann. Mag. nat. Hist., ser. 8, 15 (90): 576, 578. Type locality: Seychelle Islands: Silhouette Island. Type specimen: BMNH 1906.3.18.2 (ad M, skin and skull, skinned from spirit, collected and presented by Prof. J. Stanley Gardiner). Publication date: 1 June 1915. In the key on page 576 mentioned as *C. silhouettæ*, and in the description on p. 578 as *Coleura silhouettæ*.

Taxonomy:
 See Simmons (2005).

Common names:
 English: Seychelles sheath-tailed bat. French: Emballonure des Seychelles, Chauve-souris à queue gainée des Seychelles, Chauve-souris à queue en fourreau des Seychelles.

Etymology of name:
 Referring to the island group where the species occurs.

Conservation status:
 Global- EN (IUCN Conservation Monitoring Centre 1988); EN (IUCN 1990); EN (Groombridge 1994); CR (Baillie and Groombridge 1996); CR: B1+2cde, C2b, D (Mickleburgh *et al.*, 2002: 22); CR C2a(i,ii) ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004f).

General distribution:
 Seychelle Isls; possibly Zanzibar. The Zanzibar record is extremely dubious (Simmons 2005).

Habitat:
 See Gerlach and Taylor (2006).

Roost:
 See Gerlach and Taylor (2006).

Food / diet:
 See Gerlach and Taylor (2006).

Distribution based on voucher specimens:
 Seychelle Islands.

Genus *Emballonura* Temminck, 1838

- *1838. *Emballonura* Temminck, Tijdschr. Nat. Gesch. Physiol., 5: 22. Type species: *Emballonura monticola* Temminck, 1838.

Common names:
English: Old World sheath-tailed bats.

Etymology of name:
From Greek for to throw in + tail, an allusion to the perforation of the interfemoral membrane by the tail (Flannery, 1990: 288; 1995: 317).

Emballonura atrata Peters, 1874

- *1874. *Emballonura atrata* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 693. Type locality: Madagascar: "Interior of Madagascar". Type specimen: ZMB 4692 (coll. Dr. J.M. Hildebrandt) (see Peterson *et al.* 1995: 56, Goodman *et al.* 2006: 19).

Taxonomy:
See Simmons (2005).

Common names:
English: Madagascar sheath-tailed bat, Peters's sheath-tailed bat. French: Chauve-souris malgache à queue en fourreau.

Conservation status:
Global- VU A2c ver 2.3 (1994).

General distribution:
E and C Madagascar; Nosy Be (Peterson *et al.* 1995: 57).

Figure 75. Distribution of *Emballonura atrata*

Distribution based on voucher specimens:
Madagascar.

Emballonura tiavato Goodman, Cardiff, Ranivo, Russell, and Yoder, 2006

- *2006. *Emballonura tiavato* Goodman, Cardiff, Ranivo, Russell and Yoder, Am. Mus. Novit., 3538: 1, 6, figs, 2, 3, 4, 5. Type locality: Madagascar: Antsiranana province, Réserve Spéciale d'Ankarana, 2.6 km E Andrafiabe, in forest near Andrafiabe cave [12 55 09 S 49 03 04 E, 50 m]. Type specimen: FMNH 169705 (ad M, skin and skull; collector Steven M. Goodman, collection date: 22 January 2001, original number 11923a). Publication date: 19 October 2006.

Taxonomy: See Goodman <i>et al.</i> (2006b).	Roost: Entrance to caves and rock overhangs (Goodman <i>et al.</i> (2006b).
Etymology of name: From the Malagasy for "like rocks", referring to the tendency of this bat to occur in areas with exposed rock outcrops and caves (see Goodman <i>et al.</i> , 2006b: 6).	Migration: Unknown.
Conservation status: Global- Not assessed. But, see Goodman <i>et al.</i> (2006b).	Food / diet: Lepidoptera (Razakarivony <i>et al.</i> , 2005; Goodman <i>et al.</i> 2006b).
General distribution: Madagascar.	Predators: Unknown.
Geographic variation: Unknown.	Population: Structure & density - Unknown.
General description of external morphology: See Goodman <i>et al.</i> (2006b).	Life-span: Unknown.
General description of cranial and dental morphology: See Goodman <i>et al.</i> (2006b).	Activity and behaviour: Unknown.
Detailed morphology: For a description of the crania, teeth, ears and tragus see Goodman <i>et al.</i> (2006b).	Reproduction and ontogeny: See Goodman <i>et al.</i> (2006b).
Functional morphology: Unknown.	Mating: Unknown.
Sexual dimorphism: Unknown.	Post-natal development: Unknown.
Echolocation: Unknown.	Parasites: Unknown.
Molecular biology: DNA - Unknown. Karyotype - Unknown. Protein / allozyme - Unknown.	Viruses: Unknown.
Habitat: See Goodman <i>et al.</i> (2006b).	Utilization: Unknown.
Habits: Unknown.	Anthropophilious: Unknown.

Distribution based on voucher specimens:
Madagascar.

Figure 76. Distribution of *Emballonura tiavato*

Genus **Saccolaimus** Temminck, 1838

- *1838. **Saccolaimus** Temminck, Tijdschr. Nat. Gesch. Physiol., 5: 14 (Corbet and Hill (1992: 85), Grubb *et al.* (1998: 72) mention "1838: 6 (and 1841a: 277, 279) [C&H]"). Type species: *Taphozous saccolaimus* Temminck, 1838.
1876. **Taphonycteris** Dobson, Proc. zool. Soc. Lond., 1875, IV: 548. Publication date: April 1876. Type species: *Taphozous saccolaimus* Temminck, 1838.

Taxonomy:

Considered a subgenus of *Taphozous* by Ellerman and Morrison-Scott (1951: 104), Corbet and Hill (1980: 45), Corbet and Hill (1992: 85), and Kock and Dobat (2000: 87), but see Barghorn (1977: 5).

Etymology of name:

From the Greek for sack + throat, a reference to the throat pouch often present in members of the genus (Flannery, 1995: 328; 1995b: 401).

Common names:

English: Pouched Bats. French: Saccolaime.

Saccolaimus peli (Temminck, 1853)

- *1853. ***Taphozous peli*** Temminck, Esquisses zool. Côte de Guinée, p. 82. Type locality: Ghana: Boutry River.
- ? ***Saccolaimus peli***: Name combination.

Taxonomy:

See Simmons (2005).

Common names:

English: Pel's Pouched Bat. French :Chauve-souris à queue gainée de Pel, Saccolaime de Pel.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bp).

General distribution:

Liberia over Nigeria (Capo-Chichi *et al.*, 2004: 161) to W Kenya south to Angola.

Distribution based on voucher specimens:

Cameroon, Congo (Democratic Republic of the).

Figure 77. Distribution of *Saccolaimus peli*

Genus *Taphozous* E. Geoffroy St.-Hilaire, 1818

- *1818. *Taphozous* E. Geoffroy Saint-Hilaire, Descrip. de l'Egypte, 2: 113. Publication date: 1818. Type species: *Taphozous perforatus* E. Geoffroy, 1818. Mahoney and Walton (1980: 116) in Grubb *et al.* (1998: 72) considered the date of Geoffroy's publication to be 1813. Gardner and Hayssen (2004: 12) mention that the correct date should be 1818, not 1813 as mentioned on the publication itself.
1922. *Liponycteris* Thomas, Ann. Mag. nat. Hist., ser. 9, 9 (51): 267. Publication date: 1 March 1922. Type species: *Taphozous nudiventris* Cretzschmar, 1830. Valid as a subgenus.
1998. *Tapozous*: Yom-Tov and Kadmon, Div. Distr., 4: 67. Lapsus

Taxonomy:

Some authors (e.g. Allen, 1939a: 66) consider Oken (1816), Lehrbuch d. Naturg., pt. 3., zool., sect 2, p. 926 to be the author of this genus.

Meester *et al.* (1986): Bargho(o)rn (1977), followed by Koopman (in Honacki *et al.* 1982 and in litt.) regards *Saccolaimus* as generically distinct from *Taphozous*, but L.W. Robbins (Abstracts, 4th International Colloquium on Taxonomy and Ecology of African Small Mammals: 33, 1984) states that on the basis of protein electrophoresis and immunology *Taphozous* and *Saccolaimus* are closely related. Only the subgenus *Taphozous*, with two species, occurs in Southern Africa.

Includes *Liponycteris* but not *Saccolaimus*; see Hayman and Hill (1971: 15) and Barghorn (1977: 5). Corbet and Hill (1992: 85) include *Saccolaimus* as a subgenus. A key is provided by Colket and Wilson (1998: 1, Mammalian Species, 597).

Common names:

English: Tomb Bats [Pouched Bats]. French: Chauve-souris des Tombes, Taphien.

Etymology of name:

The name tomb bat originates from the generic name *Taphozous*, which is derived from the Greek "*taphos*", a grave, and "*zoos*", living. The type species of the genus, *T. perforatus*, was taken from a royal tomb in Egypt (see Taylor 2005).

Distribution based on voucher specimens: Senegal.

Taphozous hamiltoni Thomas, 1920

- *1920. *Taphozous hamiltoni* Thomas, Ann. Mag. Nat. Hist., ser. 9, 5 (25): 142. Type locality: Sudan: Ekuatoria, Mongalla. Type specimen: BMNH 1919.12.18.1 (Holotype, ad F, presented by the Wellcome Research Laboratories, collection date: 13 June 1918, originally number 118 of the Stevenson Hamilton collection). Publication date: 1 January 1920.

Taxonomy:

See Simmons (2005).

Common names:

English: Hamilton's Tomb Bat, Hamilton's Naked-rumped Tomb Bat, Hamilton's Naked-bellied Tomb Bat, Kordofan Sheathtail-bat. French: Taphien Kordofan.

Etymology of name:

In honour of Major Stevenson Hamilton, from whose collection the type specimen came from.

Conservation status:

Global- VU (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ap).

General distribution:

S Sudan, Chad, Kenya.

Distribution based on voucher specimens:

Sudan.

Figure 78. Distribution of *Taphozous hamiltoni*

Taphozous hildegardeae Thomas, 1909

- *1909. *Taphozous hildegardeae* Thomas, Ann. Mag. Nat. Hist., ser. 8, 4 (20): 98. Type locality: Kenya: Coast Province, Rabai (near Mombassa) [700 ft (=213 m)]. Type specimen: BMNH 1909.6.12.7 (Holotype). Publication date: 1 August 1909.

Taxonomy:

See Colket and Wilson (1998, Mammalian Species, 597).

Common names:

English: Hildegarde's Tomb Bat. French: Taphien de Hildegarde.

Etymology of name:

In honour of Mrs. Hildegarde Hinde, wife of the collector of the type specimen (see Colket and Wilson, 1998: 3).

Conservation status:

Global- VU (Baillie and Groombridge 1996); VU C1 ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004aj).

General distribution:

Kenya, NE Tanzania, Zanzibar.

Distribution based on voucher specimens:

Kenya.

Figure 79. Distribution of *Taphozous hildegardeae*

Taphozous mauritianus E. Geoffroy St.-Hilaire, 1818

- *1818. *Taphozous mauritianus* E. Geoffroy Saint-Hilaire, *Descrip. De l'Egypte*, 2: 127. Type locality: Mauritius: no specific locality. Publication date: 1818. Mahoney and Walton (1980: 116) in Grubb *et al.* (1998: 72) considered the date of Geoffroy's publication to be 1813. Gardner and Hayssen (2004: 12) mention that the correct date should be 1818, not 1813 as mentioned on the publication itself.
1835. *Taphozous leucopterus* Temminck, *Monogr. Mamm.*, 2: 284, pl. 60. Type locality: Republic of South Africa: "Interior of South Africa". Kock (1969: 71), Meester *et al.* (1986: 31) and Dengis (1996: 1) mention "1838; Tijdschrift voor natuurlijke geschiedenis en physiologie, Amsterdam 5: 12".
1879. *Taphozous dobsoni* Jentink, *Notes Leyden Mus.*, 1: 123, note 32. Type locality: Madagascar: Mohambo. Publication date: April 1879.
1900. *Taphozous maritimus var. cinerascens* Seabra, *J. Sci. mat. phys. nat.*, Lisboa, ser. 2, 6: 77. Type locality: Angola: Benguela. Publication date: August 1900. Lapsus in species name.

Taxonomy:

Koopman (1975) believed that a number of subspecies that have been described are of doubtful value.

See Dengis (1996, *Mammalian Species*, 522).

General distribution:

South Africa (over Botswana, Namibia, Zimbabwe, Zambia (Cotterill, 2004: 260), Congo Republic (Dowsett *et al.*, 1991: 259), Malawi (Ansell and Dowsett, 1988: 29) to Sudan and Somalia over Benin (Capo-Chichi *et al.*, 2004: 162) to Senegal; São Tomé Island (Juste and Ibáñez 1993: 906); Mauritius and Reunion Isls (Mascarene Isls); Madagascar; Assumption Island and Aldabra Island.

Echolocation:

See Taylor (1999), and Taylor (2000: 63).

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach *et al.* (1993) reported for specimens from South Africa, $2n = 42$, $FN = 64$, $BA = 24$, a metacentric X chromosome, and a submetacentric Y chromosome.

Protein / allozyme - Unknown.

Habitat:

Open savanna and forest edges in the wetter northern and eastern parts of the subcontinent (Taylor 2000: 62).

Food / diet:

They feed primarily on moths (Allen *et al.* 1917; termite alates such as *Macrotermes falciger* (Happold and Happold 1988), and other insects (Smithers 1971). See also (Taylor 2000: 62; Taylor 2005: 275).

Figure 80. *Taphozous mauritianus*

Common names:

Afrikaans: Witylvlermuis. English: Mauritian Tomb Bat, Tomb Bat. French: Chauve-souris mauritienne des tombeaux, Chauve-souris des tombes, Taphien de l'île Maurice. Portuguese: Morcego das sepulturas das Maurícias.

Etymology of name:

The specimen from which the species was described came from the island of Mauritius (see Taylor 2005: 274).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bn).

Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly 2004).

Distribution based on voucher specimens:
Angola, Burundi, Cameroon, Cote D'Ivoire,
Equatorial Guinea, Kenya, Madagascar,
Mauritius, Namibia, Nigeria, Rwanda, [South
Africa](#), Sudan, Tanzania, Tanzania [=former
Tanganyika], Uganda, Unknown country, Zambia.

Figure 81. Distribution of *Taphozous mauritanus*

Taphozous nudiventris Cretzschmar, 1830

- *1830. *Taphozous nudiventris* Cretzschmar, in Rüppell, Atlas Reise Nördl. Afr., Zool. Säugeth., 1: 70, fig. 27b. Type locality: Egypt: Giza (Kock (1969: 83) mentions: "Egypt, Nubia" and indicates that Giza is the type locality of the lectotype. Corbet and Hill (1992: 87) only mention "Egypt"). Type specimen: SMF 4310 (lectotype, ad M, mounted skin, skull not removed (Mertens, 1925: 20), collector E. Rüppell, collection date 1824, old catalog II.J.1.a; see Qumsiyeh, 1985: 26). Publication date: 1830-1831 (Allen (1939a: 67) mentioned 1826, whereas Kock (1969: 83) mentioned 1830. Grubb *et al.* (1998: 73) mentions "1830, vel 1831").
1835. *Taphozous nudiventer*: Temminck, Monogr. Mamm., 2: 280. Publication date: 1835-1841. Lapsus (Allen, 1939a: 67).
1877. *Nycticejus serratus* Heuglin, Reise in Nordost Afrika, 2: 35. Type locality: Ethiopia: ?Abyssinia, on the Araschkol and nearby mountains, "Sherq el Aqabah" (see Allen, 1939a: 67). Publication date: 1877. According to Simmons (2005) this is an enigmatic taxon, which is variously referred to either *Taphozous nudiventris* (e.g. Allen 1939a, Koopman 1993a) or *Scotophilus leucogaster* (Allen, 1939a), but which may not represent either of those species. Kock (1969: 83) includes it with a question mark in the synonymy of *Taphozous nudiventris*.
1885. *Taphozous perforatus* var. *assabensis* Monticelli, Ann. Accad. O. Costa de Aspir. Nat. Napoli, ser. 1, 1: 78, pl. 7. Type locality: Eritrea: Assab. Allen (1939a: 67) indicates that Monticelli considered it a synonym of *perforatus*, but Senna (1905), who examined the type, says it is *T. nudiventris*.
1964. *T(aphozous) mudiuemtris*: Walker, Mammals of the World, I: 241. Lapsus

Taxonomy:

See Simmons (2005).

Common names:

Arabian: Khafash Abu Bouz. English: Naked-bellied Tomb Bat, Naked-rumped Tomb Bat, Egyptian sheath-tailed bat, Naked-rumped bat. French: Taphien à croupe nue.

Etymology of name:

From the Latin "*nudus*" meaning naked and "*ventris*" meaning belly.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004br).

General distribution:

Cape Verde (Tranier and de Naurois, 1985), Mauritania, Senegal, and Guinea-Bissau to Egypt, Eritrea (Lavrenchenko *et al.*, 2004: 138), south over Djibouti (Pearch *et al.*, 2001: 396) to Tanzania and Morocco and east over Palestine/Israel, Pakistan and India to Burma (=Myanmar); SE Turkey; one uncertain record in S Algeria (see Horáček *et al.* 2000: 104).

Figure 82. Distribution of *Taphozous nudiventris*

Distribution based on voucher specimens:
Cape Verde, Egypt.

Taphozous perforatus E. Geoffroy St.-Hilaire, 1818

- *1818. *Taphozous perforatus* E. Geoffroy Saint-Hilaire, Descrip. de l'Egypte, 2: 126. Type locality: Egypt: Kom Ombo (Allen (1939a: 66) mentioned "Egypt" only. Restricted to Ombos (=Kom Ombo), between Edfu and Aswan by Kock (1969: 74): see Meester *et al.* (1986: 32). Type specimen: MNHN A.372 (ad unsexed, alcoholic; see Qumsiyeh, 1985: 23). Publication date: 1818. Mahoney and Walton (1980: 116) in Grubb *et al.* (1998: 72) considered the date of Geoffroy's publication to be 1813. Gardner and Hayssen (2004: 12) mention that the correct date should be 1818, not 1813 as mentioned on the publication itself.
1877. *Taphozous maritimus* Heuglin, Reise in Nordost Afrika, 2: 25. Type locality: Sudan: Suakin. Publication date: 1877.
1915. *Taphozous perforatus haedinus* Thomas, J. Bomb. Nat. Hist. Soc., 24: 62. Type locality: Kenya: Northern Guaso Nyiro, Chanler Falls [=Chandler's Falls] 2000' asl. Type specimen: BMNH 1912.7.1.46 (Holotype, ad M, skin, collection date 3 September (??11), original number 756). Publication date: 30 September 1915.

Taxonomy:

Harrison (1958, 1962) regards *sudani* as a separate species, but is not followed in this by subsequent authors (Rosevear 1965, Kock 1969, Hayman and Hill 1971, Koopman 1975). Hayman and Hill (1971) make no attempt to recognize subspecies within *perforatus*, but Kock (1969) recognizes three, *perforatus*, *sudani* and *haedinus*. Koopman (1975) does not agree entirely with the geographic limits suggested by Kock, but appears to accept the validity of the names proposed.

Common names:

Afrikaans: Egiptiese wityflermuis. Arabian: Khafash abu bouz saghir. English: Geoffroy's Tomb Bat, Egyptian Tomb Bat, Tomb Bat. French: Chauve-souris des tombes egyptiennes, Taphien des tombeaux. Portuguese: Morcego das sepulturas do egipto.

Etymology of name:

The specimen from which this species was described was taken by Geoffroy Saint-Hilaire from a royal tomb in Egypt (see Taylor 2005). The specific name *perforatus* refers to the peculiar situation of the tail, which seems to perforate the interfemoral membrane (see Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004as).
Regional- South Africa- Indeterminate (Smithers

1986).

General distribution:

Senegal to Botswana, Namibia (Cotterill, 2004: 260), Mozambique, Ethiopia (Lavrenchenko *et al.*, 2004: 147), Somalia, Djibouti (Pearch *et al.*, 2001: 394) and Egypt; Jordan; S Arabia, S Iran; Pakistan; NW India (Kutch, Kathiawar).

Figure 83. Distribution of *Taphozous perforatus*

Distribution based on voucher specimens: "Africa", Egypt, Kenya, Nigeria, Sudan.

Taphozous perforatus perforatus E. Geoffroy St.-Hilaire, 1818

- *1818. *Taphozous perforatus* E. Geoffroy Saint-Hilaire, Descrip. de l'Egypte, 2: 126. Type locality: Egypt: Kom Ombo (Allen (1939a: 66) mentioned "Egypt" only. Restricted to Ombos (=Kom Ombo), between Edfu and Aswan by Kock (1969: 74): see Meester *et al.* (1986: 32). Type specimen: MNHN A.372 (ad unsexed, alcoholic; see Qumsiyeh, 1985: 23). Publication date: 1818. Mahoney and Walton (1980: 116) in Grubb *et al.* (1998: 72) considered the date of Geoffroy's publication to be 1813. Gardner and Hayssen (2004: 12) mention that the correct date should be 1818, not 1813 as mentioned on the publication itself.
1820. *Taphozous senegalensis* Desmarest, Encycl. Méthod., (Zoologie, Mammalogie) 1: 130. Type locality: Senegal: no specific locality. Publication date: 1820. Based on "le lérot-volant" of Daubenton, Mém. Acad. Paris, p. 366, 1759 (see Allen, 1939a: 66).
1958. *Taphozous perforatus swirae* Harrison, Durban Mus. Novit., 5 (11): 144. Type locality: Nigeria: N Nigeria, Sokoto [13 02 N 05 16 E] (Grubb *et al.* (1998: 72) mention the locality as Sokoyo). Type specimen: BMNH 1967.1226 (collected by Mrs Pamela Swire, skin made up by D.L. Harrison, collection date 26 August 1958, formerly in HZM collection 12.2690). Considered a valid subspecies by Grubb *et al.* (1998: 73), but see Kock (1969: 80 - 81).

Taphozous perforatus sudani Thomas, 1915

- *1915. *Taphozous sudani* Thomas, Ann. Mag. Nat. Hist., ser. 8, 15 (90): 561. Type locality: Sudan: Equatoria Province, Upper Nile, N of Lado, Mongalla. Type specimen: BMNH 1902.7.4.2 (Holotype, ad M, collected and presented by W.L.S. Loat, Esq.). Publication date: 1 June 1915.
1962. *Taphozous sudani australis* Harrison, Occ. Pap. Nat. Mus. S. Rhod., 26B: 763. Type locality: Zimbabwe: Junction between Limpopo and Shashi rivers [22 12 S 29 23 E]. Type specimen: ? ad M, collector Michael P. Stuart Irving *et al.*, Rhodesian School Exploration Society Sentinel Ranch Expedition, collection date: 5 May 1960, original number 9932. Homonym of *T. australis* Gould, 1854, from Australia (Harrison 1964, Kock 1969: 74, Meester *et al.* 1986: 32, Simmons 2005).
1964. *Taphozous sudani rhodesiae* Harrison, Arnoldia, 1 (3): 2. Renaming of *australis* Harrison, 1962, preoccupied.

Etymology of name:

Referring to the country where the type specimen was collected.

Family NYCTERIDAE Van der Hoeven, 1855

1855. *Nycteridae* Van der Hoeven, Handb. Dierkunde, 2nd ed., 2: 1028. Type genus: *Nycteris* Cuvier and Geoffroy, 1795.
1910. *Petaliidae* Miller, Proc. Biol. Soc. Washington, 22: 90. Type genus: *Nycteris* Cuvier and Geoffroy, 1795. Replacement name for Nycteridae Dobson, 1875, due to the fact that Miller (1910) considered the name for the type genus (*Nycteris* Geoffroy 1803) to be antedated by *Nycteris* Borkhausen, 1797).

Taxonomy:

Koopman (1993a) mentions Van der Hoeven (1855) as author whereas Corbet and Hill (1992: 88) mention Dobson, 1875b: 348.

bats. Finnish: Valkopäälepakot. German: Schlitznasenfledermäuse. Norwegian: Hullneser, striflaggermus.

Common names:

Afrikaans: Langoor-vlermuise. English: Slit-faced bats, Hollow-faced bats, Hispid bats, Long-eared

Etymology of name:

The family gets its name from the Greek name for a bat, *Nycteris* (see Taylor 2005).

Genus *Nycteris* G. Cuvier and E. Geoffroy, 1795

1795. *Nycteris* G. Cuvier and E. Geoffroy, Mag. Encyclop., 1 année 2: 186. Type: *Vespertilio hispidus* Schreber, 1774. Gray *et al.* (1999: 1) mention Geoffroy and Cuvier, 1795 as authors.
1803. *Nicteris* Desmarest, Nouv. Dict. Hist. Nat., 15: 501.
1838. *Petalia* Gray, Mag. Zool. Bot., 2 (12): 494. Publication date: 1 February 1838. Type species: *Nycteris Javanicus* E. Geoffroy Saint-Hilaire, 1813.
1866. *Nycterops* Gray, Proc. zool. Soc. Lond., 1866, I: 83. Publication date: May 1866. Type species: *Nycterops pilosa* Gray, 1866 (= *Vespertilio hispidus* Schreber, 1774).
1866. *Pelatia* Gray, Proc. zool. Soc. Lond., 1866, I: 83. Publication date: May 1866. Lapsus.
1977. *Petelia* Lekagul and McNealey, Mammals of Thailand: 107. Lapsus.
1998. *Nyteris* Van Cakenberghe and De Vree, Bonn. zool. Beitr., 48 (2): 123. Lapsus.

Taxonomy:

Meester *et al.* (1986) state that Andersen (1912) divided *Nycteris* into four groups, three of which, viz. *hispidus*, *aethiopicus* (= *macrotis* - Koopman 1965, 1975) and *thebaicus*, occur in Southern Africa. The fourth group (*arge*) is limited to the African forest block.

Etymology of name:

From the Greek "*nykteros*" meaning nocturnal.

Common names:

English: Hollow-faced bats, Slit-faced bats.

Nycteris arge Thomas, 1903

- *1903. *Nycteris arge* Thomas, Ann. Mag. Nat. Hist., ser. 7, 12 (72): 633. Type locality: Cameroon: SW Cameroon, Efulen. Type specimen: BMNH 1904.2.8.2 (Holotype, ad M; alcoholic and skull; collector: Mr. G.L. Bates). Publication date: 1 December 1903.
1910. *Petalia arge*: Thomas and Wroughton, Trans. zool. Soc. Lond., 19 (5) (63): xxx. Name combination.
2002. *Nycteris argae* Fenton and Bogdanowicz, Can. J. Zool., 80: 1008. Lapsus

Taxonomy:

Formerly included *intermedia*; see Hayman and Hill (1971: 19), but see Van Cakenberghe and De Vree (1985).

Common names:

English: Bates's Slit-faced Bat, Nimble Slit-faced Bat. French: Chauve-souris à queue bifurquée, Nyctère de Bates.

Etymology of name:

From the Greek "*argos*" meaning shiny, bright, nimble, swift, rapid.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ca).

General distribution:

Sierra Leone; Central African Republic (Lunde *et al.*, 2001: 537), Republic of the Congo (Dowsett *et al.*, 1991: 259); S and E Democratic Republic of the Congo; Uganda (Kityo and Kerbis, 1996: 60); W + E Kenya (Webala *et al.*, 2004: 171); SW Sudan; NE Angola; Bioko.

Distribution based on voucher specimens:

"Africa", Cameroon, Congo (Democratic Republic of the), Cote D'Ivoire, Côte d'Ivoire, Equatorial Guinea, Ghana, Kenya, Liberia, Nigeria, Sierra Leone, Sudan, Tanzania, Togo, Uganda.

Figure 84. Distribution of *Nycteris arge*

Nycteris aurita (K. Andersen, 1912)

- *1912. *Petalia aurita* K. Andersen, Ann. Mag. Nat. Hist., ser. 8, 10 (59): 547. Type locality: Kenya: Kitui (Allen (1939a: 68) mentions Kilifi). Type specimen: BMNH 1889.1.11.1 (ad F; alcoholic and skull; collector and presenter: G.D. Trevor-Roper). Publication date: 1 November 1912.
1924. *Nycteris aurita*: de Beaux, Atti. Sic. Lig. Sci. Lett., n.s., 3 (1): xxx. Name combination.
1957. *Nycteris hispidata aurita*: Ansell, Ann. Mag. nat. Hist., ser. 12, 10: xxx. Name combination.

Taxonomy:

See Simmons (2005).

Common names:

English: Andersen's Slit-faced Bat. French: Nyctère à longues oreilles. German: Andersens Schlitznasen-Fledermaus.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004af).

General distribution:

Ethiopia (Lavrenchenko *et al.*, 2004: 147), S Somalia, N and E Kenya, NE Tanzania.

Distribution based on voucher specimens:

Ethiopia, Kenya, Somalia, Sudan, Tanzania.

Figure 85. Distribution of *Nycteris aurita*

Nycteris gambiensis (K. Andersen, 1912)

- *1912. *Petalia gambiensis* K. Andersen, Ann. Mag. Nat. Hist., ser. 8, 10 (59): 548. Type locality: Senegal: Dialocote [13 25 N 13 20 W]. Type specimen: BMNH 1911.6.10.10 (ad ?; skin and skull; Collector: G.F. Owen; Original number: A5; Collection date: 7 May 1910). Publication date: 1 November 1912.
1923. *Petalia (Nycteris) thebaica gambiensis*: de Beaux, Atti Soc. ital. Sci. nat., 62: xx. Name combination.
1929. *Nycteris thebaica gambiensis*: Ingoldby, Ann. Mag. nat. Hist., ser. 10, 3: xxx. Name combination
1939. *Nycteris gambiensis*: G.M. Allen, Bull. Mus. comp. Zool., 83: xxx. Name combination.
1975. [*Nycteris*] *gambianus* Koopman, Bull. Am. Mus. Nat. Hist., 154 (4): 381: Lapsus.

Taxonomy:

See Simmons (2005).

Common names:

English: Gambian Slit-faced Bat. French: Nyctère de Gambie.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Bergmans and Fahr 2004).

General distribution:

Senegal, Gambia, Guinea, Sierra Leone, Ghana, Togo, Benin, Burkina Faso.

Distribution based on voucher specimens:

Benin, Burkina Faso, Cote D'Ivoire, Ghana, Guinea, Guinea-Bissau, Nigeria, Senegal, The Gambia, Togo.

Figure 86. Distribution of *Nycteris gambiensis*

Nycteris grandis Peters, 1865

- *1865. *Nycteris grandis* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 358. Type locality: Ghana: vicinity of Elmina (Grubb *et al.* (1998: 76) "Type locality: Usually given as "Guinea" but the type, in the Leiden Museum, was collected in 1863 by Nagtglas, and ascribed to Côte d'Or (Jentink, 1888b: 170). The type locality may be further restricted to the vicinity of Elmina [Ghana] which is the only definite locality Jentink cited for any of the Nagtglas material"). Type specimen: RMNH 27348 (Paralectotype; ad ?; skin; Collector: C.J.M. Nagtglas; Collection date: 1863).
1866. *Nycteris baikii* Gray, Monatsb. k. preuss. Akad. Wiss. Berlin, 1867: 672 (for 1866). Type locality: West Africa: Baikie. Meester *et al.* (1986: 34) mention "Gray in Peters" as author. Nomen nudum.
1912. *Petalia grandis*: K. Andersen, Ann. Mag. nat. Hist., ser. 8, 10 (59): xxx. Name combination.
1923. *Nycteris marica* Kershaw, Ann. Mag. Nat. Hist., ser. 9, 12 (70): 534. Type locality: Tanzania: Kilosa, Tindiga. Type specimen BMNH 1923.8.2.1 (ad ?; skin and skull; Collector: Arthur Loveridge; Collection date: 24 January 1922). Publication date: 1 October 1923.
1925. *Nycteris proxima* Lönnberg and Gyldenstolpe, Ark. Zool., 17B (9): 1. Type locality: Democratic Republic of the Congo: Semliki valley, Kartoushi. Type specimen: ad M; 11 March 1921, orig nr 813: see Lönnberg and Gyldenstolpe (1925: 2). Publication date: 14 May 1925.
1981. *Nycteris grandis marica*: Kock, Senckenbergiana biol., 61 (5/6): xxx. Name combination.
1991. *Nycteris graudis* Baker, Honeycutt and Van den Bussche, Bull. Am. Mus. Nat. Hist., 206: 46. Lapsus

Taxonomy:

See Hickey and Dunlop (2000).

General description of cranial and dental morphology:

See Hickey and Dunlop (2000).

Common names:

Afrikaans: Groot spleetneusvlermuis. English: Large Slit-faced Bat. French: Grand nyctère. German: Große Schlitznase. Portuguese: Morcego grande orelhudo.

Detailed morphology:

For a description of the skull, ears and tragus, and wingshape and aspect ratio see Hickey and Dunlop (2000).

Etymology of name:

From the Greek "*grandis*" meaning magnificent (Brown, 1991; Jaeger 1978, both in Hickey and Dunlop, 2000: 3).

Functional morphology:

Unknown.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cf).

Sexual dimorphism:

N. grandis is not sexually dimorphic in size (Hickey and Dunlop 2000: 1).

General distribution:

Senegal, Guinea (Fahr and Ebigbo, 2003: 128) over Togo (Capo-Chichi *et al.*, 2004: 162), Central African Republic (Lunde *et al.* (2001: 537), Republic of the Congo (Dowsett *et al.*, 1991: 259) to Kenya, Zimbabwe, Malawi (Happold and Happold, 1997: 815), and Mozambique; Zanzibar and Pemba.

Echolocation:

See Taylor (1999) and Hickey and Dunlop (2000).

Molecular biology:

DNA, Karyotype, Protein / allozyme - Unknown.

Habitat:

See Hickey and Dunlop (2000).

Habits:

See Hickey and Dunlop (2000).

Geographic variation:

Unknown.

Roost:

See Hickey and Dunlop (2000).

General description of external morphology:

See Hickey and Dunlop (2000).

Migration:
Unknown.

Food / diet:
See Hickey and Dunlop (2000).

Predators:
Unknown.

Population:
Structure and density - unknown.

Lifespan:
Unknown.

Activity and behaviour:
See Hickey and Dunlop (2000).

Reproduction and ontogeny:
See Hickey and Dunlop (2000).

Mating:
Unknown.

Post-natal development:
Unknown.

Parasites:
Little information is available regarding parasites of *N. grandis* (Hickey and Dunlop 2000).

Viruses:
Keymer (1971) reported "broad trypanosomes" from four of six specimens collected from Zambia.

Utilization:
Unknown.

Anthropophilous:
Unknown.

Figure 87. Distribution of *Nycteris grandis*

Distribution based on voucher specimens:
Benin, Cameroon, Congo, Congo (Democratic Republic of the), Cote D'Ivoire, Equatorial Guinea, Gabon, Ghana, Kenya, Liberia, Nigeria, Tanzania, Tanzania [=former Tanganyika], Togo, Zambia, Zimbabwe.

Nycteris hispida (Schreber, 1774)

- *1774. *Vespertilio hispidus* Schreber, Die Säugethiere, 1 (8): pl. 56 + 1 (9): 169, 188. Type locality: Senegal: no specific locality. Publication date: 1774.
1813. *Nycteris Daubentonii* E. Geoffroy Saint-Hilaire, Ann. Mus. Hist. Nat. Paris, 20: 19. Type locality: Senegal: no specific locality. Publication date: August 1813.
1840. *Nycteris hispida*: Wagner, Die Säugethiere in Abbildungen nach der Natur. xxx. Name combination.
1843. *Nycteris poensis* Gray, Cat. Spec. Mamm. Brit. Mus., p. 24. Type locality: Equatorial Guinea: Fernando Po. Type specimen: BMNH 1855.12.26.252 (Intended specimen: F, skin and skull (= *Rhinolophus martini* Fraser): see Meester *et al.* (1986: 33)). Publication date: 13 May 1843.
1843. *Rhinolophus Martini* Fraser, Proc. Zool. Soc. Lond., 1843, V (cxxi): 25. Type locality: Equatorial Guinea: Fernando Po. Type specimen: BMNH 1855.12.26.252. Publication date: July 1843.
1852. *Nycteris villosa* Peters, Naturw. Reise Mossamb., Säugethiere, p. 48, pl II. Type locality: Mozambique: Inhambane. - Publication date: 1852. Considered a valid subspecies by Taylor (1998: 33).
1866. *Nycterops pilosa* Gray, Proc. Zool. Soc. Lond., 1866, I: 83. Type locality: "Africa": no specific locality. Publication date: May 1866.
1871. *Nycteris pilosa*: Peters, Monatsb. K. presuss. Akad. Wiss., Berlin: xxx. Name combination.
1878. *Nycteris hispida villosa*: Dobson, Cat. Chiropt. Brit. Mus.: xxx. Name combination.
1883. *Nycteris hispidus*: Rochebrune, Soc. Linn. Bordeaux, 37: xxx. Name combination.
1910. *Petalia hispida*: Thomas and Wroughton, Trans. Zool. soc. Lond., 19 (5) (63): xxx. Name combination.
1917. *Nycteris pallida* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 425. Type locality: Democratic Republic of the Congo: Faradje. Type specimen: AMNH 49144 (ad M, collector Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date 1 March 1912, original number 1858). Publication date: 29 September 1917.
1935. *Nycteris hispida hispida*: Braestrup, Vidensk. Medd. dansk. naturhist. Foren. Kbh., 99: xxx. Name combination.
1935. *Nycteris hispida martini*: Braestrup, Vidensk. Medd. dansk. naturhist. Foren. Kbh., 99: xxx. Name combination.
1935. *Nycteris hispida pallida*: Braestrup, Vidensk. Medd. dansk. naturhist. Foren. Kbh., 99: xxx. Name combination.

Taxonomy:

Koopman (1975: 377, 378) includes *aurita* and *pallida*. Van Cakenberghe and De Vree (1993) consider *aurita* as a separate species.

Common names:

Afrikaans: Harige spleetneusvlermuis, Harige Langoorvlermuis. English: Hairy Slit-faced Bat, Hairy Long-eared Bat. French: Nyctère hérissé, Nyctère hirsute. German: Rauhaarschlitznase. Portuguese: Morcego orelhudo piloso.

Etymology of name:

Although this species is no more hairy than any of the other slit-faced bats, the name is applied to it as a translation of the specific name *hispida*, which is from the Latin *hispidus*, meaning hairy or bristly, referring to the bristly hair around the facial slit (see Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ae).

Regional- South Africa- NT ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Senegal over Benin (Capo-Chichi *et al.*, 2004: 162), Central African Republic (Lunde *et al.*, 2001: 537), Republic of the Congo (Dowsett *et al.*, 1991: 259), Uganda (Kityo and Kerbis, 1996: 60) to Ethiopia (Lavrenchenko *et al.*, 2004: 132), Somalia and south to Angola, Malawi (Happold and Happold, 1997: 815), Zambia, Zimbabwe, Namibia (?), Botswana (Cotterill, 2004: 261) and South Africa; Zanzibar; Bioko. (The records from Cape of Good Hope are probably invalid (Cotterill, 1996)).

Echolocation:

See Taylor *et al.*, (2005).

Molecular biology:

DNA - Unknown.

Karyotype - Lee *et al.* (1989) reported $2n = 42$,

FN = 78, BA = 38, and a metacentric X and Y.

Protein / allozyme - Unknown.

Distribution based on voucher specimens:

"Africa", Angola, Benin, Botswana, Burkina Faso, Burundi, Cameroon, Central African Republic, Chad, Congo (Democratic Republic of the), Cote D'Ivoire, Côte d'Ivoire, Equatorial Guinea, Ethiopia, Gabon, Ghana, Guinea, Kenya, Liberia, Malawi, Mauritania, Mozambique, Namibia, Nigeria, Rwanda, Senegal, Sierra Leone, Somalia, South Africa, Sudan, Tanzania, Togo, Uganda, Unknown country, Zambia.

Figure 88. Distribution of *Nycteris hispida*

Nycteris intermedia Aellen, 1959

- *1959. *Nycteris intermedia* Aellen, Arch. Sci. Genève, 12 (2): 218. Type locality: Côte d'Ivoire: NW of Abidjan, Adiopodoumé [05 19 N 04 08 W]. Type specimen: MHNG 923.94 (ad F; alcoholic and skull; Collector: Villy Aellen; Original number: A1437; Collection date: 20 July 1953 + 3 paratypes).

Taxonomy:

Formerly included in *N. arge* but see Van Cakenberghe and De Vree (1985).

Common names:

English: Intermediate Slit-faced Bat. French: Nyctère moyen. German: Intermediäre Schlitznasenfledermaus.

Etymology of name:

Referring to its intermediary size between *Nycteris arge* and *Nycteris nana*.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004b).

General distribution:

Liberia over Central African Republic (Lunde *et al.*, 2001: 537) to W Tanzania and south to Angola.

Distribution based on voucher specimens:

Angola, Cameroon, Congo (Democratic Republic of the), Cote D'Ivoire, Côte d'Ivoire, Gabon, Ghana, Tanzania.

Figure 89. Distribution of *Nycteris intermedia*

Nycteris macrotis Dobson, 1876

- *1876. *Nycteris macrotis* Dobson, Monogr. Asiatic Chiroptera, p. 80. Type locality: Sierra Leone: no specific locality. Type specimen BMNH 1866.2.2.2 (sad M; alcoholic and skull).
1878. *Nycteris aethiopica* Dobson, Cat. Chiroptera Brit. Mus., p. 165. Type locality: Sudan: Kordofan, Sennaar. Type specimen BMNH 1847.5.27.32 (Holotype, ad ?; skin and skull; Collector: Th. Kotschy). Publication date: June 1878.
1901. *Nycteris aethiopica luteola* Thomas, Ann. Mag. nat. Hist., ser. 7, 8 (43): 30. Type locality: Kenya: Kitui [3 500 ft (= 1 067 m)]. Type specimen BMNH 1901.5.6.4 (ad F; skin and skull; Collector: dr. S.L. Hinde; Collection date: 14 February 1901). Publication date: 1 July 1901.
1901. *Nycteris aethiopica aethiopica*: Thomas, Ann. Mag. nat. Hist., ser. 7, 8 (43): 30. Name combination.
1912. *Petalia aethiopica aethiopica*: K. Andersen, Ann. Mag. nat. Hist., ser. 8, 10 (59): xxx. Name combination.
1912. *Petalia aethiopica luteola*: K. Andersen, Ann. Mag. nat. Hist., ser. 8, 10 (59): xxx. Name combination.
1912. *Petalia macrotis*: K. Andersen, Ann. Mag. nat. Hist., ser. 8, 10 (59): xxx. Name combination.
1917. *Nycteris major* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37: xxx. Not of Andersen (1912).
1922. *Nycteris oriana* Kershaw, Ann. Mag. Nat. Hist., ser. 9, 10 (56): 179. Type locality: Malawi: [Shiré valley] Chiromo [16 32 S 35 09 E, 60 m]. Type specimen BMNH 1922.4.25.3 (ad F; skin and skull; Collector: R.C. Wood; Original number: 312; Collection date: 7 May 1918). Publication date: 1 August 1922.
1923. *Nycteris luteola*: Loveridge, Proc. zool. Soc. Lond., II: xxx. Name combination.
1939. *Nycteris aethiopica guineensis* Monard, Arq. Mus. Bocage, Lisboa, 10: 66. Type locality: Guinea Bissau: Mansoa [12 04 N 15 19 W]. Type specimens: MHNG 1326.5; NMBE 5271 (Syntypes; respectively: ad M; alcoholic and skull; Collector: dr. A. Monard; Original number: 283; Collection date: 14 December 1937; original number 319; 1 M, alcoholic, Collection date: 17 December 1937); RMCA 15310 (F, alcoholic, collector Dr A. Monard, collection date 1937). Monard (1939: 66) mentions a larger series: 283 (F), 283 (M), 284 (M), 285 (F), 319 (M). Publication date: March 1939.
1939. *Nycteris aethiopica guineensis f. aurantiaca* Monard, Arq. Mus. Bocage, Lisboa, 10: 68. Type locality: Guinea Bissau: Pitche [12 20 N 13 57 W]. Type specimen: M, nr 717. Not *aurantiaca* De Beaux, 1923 = *Nycteris thebaica*: see Meester *et al.* (1986: 35). Publication date: March 1939.
1942. *Nycteris aethiopica oriana*: Allen and Loveridge, Bull. Mus. comp. Zool., 89 (4): xxx. Name combination.
1953. *Nycteris macrotis macrotis*: Ellerman, Morrison-Scott and Hayman, Southern African Mammals. xxx. Name combination.
1953. *Nycteris macrotis oriana*: Ellerman, Morrison-Scott and Hayman, Southern African Mammals. xxx. Name combination.
1960. *Nycteris macrotis luteola*: Harrison, J. E. Afr. nat. Hist. Soc. Natl. Mus., 23 (7) (104): xxx. Name combination.
1969. *Nycteris macrotis aethiopica*: Kock, Senckenbergiana biol., 46 (5): xxx. Name combination.
- ? *Nycteris aethiopica*: Modified spelling.

Taxonomy:

Meester *et al.* (1986) indicate that both Koopman (1965, 1975, and in Honacki *et al.* 1982) and Kock (1969) included the extralimital [to southern Africa] *aethiopica* Dobson, 1878, and *luteola* Thomas, 1901, as subspecies in this species. While Hayman and Hill (1971) treat *macrotis* and *aethiopica* as separate species, they confirm that the distinction is by no means certain.

N. macrotis macrotis Dobson, 1876 may include

also *Plecotus aethiopicus* Fitzinger, 1866, from the White Nile, a nomen nudum (Kock 1969).

Kock (1969) regards *oriana* as a synonym of the extralimital *luteola*, but Ansell (1978) and Smithers (1983) treat it as a separate subspecies.

Common names:

Afrikaans: Groter spleetneusvlermuis. English: Large-eared Slit-faced Bat, Greater Slit-faced Bat, Big-eared slit-faced bat. French: Nyctère à

grandes oreilles.

Etymology of name:

Although the specific name *macrotis* is derived from the Greek "*makros*" and "*otis*" meaning large eared, the species' ears are in fact smaller than in species such as the Egyptian slit-faced bat (*N. thebaica*) (see Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ba).

General distribution:

Senegal, Gambia (Emms and Barnett, 2005: 50), (over Mali (Meinig, 2000: 105), Benin (Capo-Chichi *et al.*, 2004: 162), Republic of the Congo (Dowsett *et al.*, 1991: 259), Uganda (Kityo and Kerbis, 1996: 60)) to Ethiopia, south to Zambia (Cotterill, 2002: 6), Zimbabwe, Namibia (?) (Cotterill, 2004 : 261), Malawi and Mozambique; Zanzibar.

Molecular biology:

DNA - Unknown.

Karyotype - Lee *et al.* (1989) described the karyotype as having a diploid number of $2n=40$, aFN= 74, BA= 36, X= M, Y= M.

Protein / allozyme - Unknown.

Distribution based on voucher specimens:

"Africa", "Congo", Angola, Benin, Botswana, British East Africa, Burkina Faso, Burundi, Cameroon, Chad, Congo, Congo (Democratic Republic of the), Cote D'Ivoire, Côte d'Ivoire, Ethiopia, Ghana, Guinea, Guinea-Bissau, Kenya, Liberia, Malawi, Namibia, Niger, Nigeria, Rwanda, Senegal, Sierra Leone, Somalia, Sudan, Tanzania, Tanzania [=former Tanganyika], The Gambia, Togo, Uganda, Unknown Country, Zambia.

Figure 90. Distribution of *Nycteris macrotis*

Nycteris madagascariensis G. Grandidier, 1937

- *1937. *Nycteris madagascariensis* G. Grandidier, Bull. Mus. natn. Hist. nat., Paris, ser. 2, 9: 353. Type locality: Madagascar: N of Diego-Suarez [=Antsiranana], Rodo valley, N of Pirkana, near the Ankarana [12 05 S 49 05 E]. Type specimen: MCZ 45433 (F; body in alcohol and skull; formerly Grandidier collection; collection date: June 1910; see Helgen and McFadden, 2001: 142). Helgen and McFadden (2001: 142) also mention a paratype (MCZ 45434; F; body in alcohol and skull). Publication date: November 1937.

Taxonomy:

Earlier included in *thebaica*, but considered a synonym of *macrotis* by Van Cakenberghe and De Vree (1985), Koopman (1993a: 162), but a valid species by Peterson *et al.* (1995: 63), Russ *et al.* (2001), Simmons (2005).

Common names:

English: Madagascar slit-faced bat. French: Chauve-souris malgache balafrée, Nyctère de Madagascar.

Etymology of name:

Referring to the island of Madagascar, where the species occurs.

Conservation status:

Global- DD ver 2.3 (1994).

General distribution:

N Madagascar.

Distribution based on voucher specimens:

Madagascar.

Figure 91. Distribution of *Nycteris madagascariensis*

Nycteris major (K. Andersen, 1912)

- *1912. *Petalia major* K. Andersen, Ann. Mag. nat. Hist., ser. 8, 10 (59): 547. Type locality: Cameroon: Ja River. Type specimen: BMNH 1909.10.2.49 (ad F; alcoholic and skull; collector: G.L. Bates, collection date: 23 January 1906). Publication date: 1 November 1912.
1917. *Nycteris avakubia* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 426, fig. 3. Type locality: Democratic Republic of the Congo: NE Congo, Oriental Province, Avakubi. Type specimen: AMNH 49403 (ad M, alcoholic, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: September 1913, original number 2623). Publication date: 29 September 1917.
1917. *Nycteris major*: J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 427. Publication date: 29 September 1917. Name combination. The specimens assigned to this species by Allen (1917), however, belong to *Nycteris macrotis* (see Koopman, 1965).

Taxonomy:

See Simmons (2005).

Common names:

English: Ja Slit-faced Bat, Large Slit-faced Bat.
 French: Nyctère de Ja. German: Dja-Schlitznasenfledermaus.

Etymology of name:

From the Latin "*maior*" (see Kozhurina, 2002: 16).

Conservation status:

Global- VU (Baillie and Groombridge 1996); VU A4c ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ci).

General distribution:

Liberia over Benin (Capo-Chichi *et al.*, 2004: 162) to Zambia.

Distribution based on voucher specimens:

Cameroon, Congo (Democratic Republic of the), Cote D'Ivoire, Zambia.

Figure 92. Distribution of *Nycteris major*

Nycteris nana (K. Andersen, 1912)

- *1912. *Petalia nana* K. Andersen, Ann. Mag. nat. Hist., ser. 8, 10 (59): 547. Type locality: Republic of the Congo: [Rio Muni,] Benito River. Type specimen: BMNH 1900.2.5.46 (ad M; alcoholic and skull; Collector: G.L. Bates). Publication date: 1 November 1912.
1926. *Nycteris nana*: Cabrera and Ruxton, Ann. Mag. nat. Hist., ser. 9, 17: xxx. Name combination.
1936. *Nycteris nana tristis* G.M. Allen and Lawrence, Bull. Mus. comp. Zool., 79: 47. Type locality: Kenya: (W Nyanza) Kakamega District, Kaimosi. Type specimen: MCZ 31156 (holotype, ad F, skin and skull, collector: Arthur Loveridge, collection date: 13 February 1934; see Helgen and McFadden, 2001: 142). Publication date: 30 January 1936.
1939. *Nycteris nana nana*: G.M. Allen, Bull. Mus. comp. Zool., 83: xx. Name combination.

Taxonomy:

See Simmons (2005).

Common names:

English: Dwarf Slit-faced Bat. German: Zwerg-Schlitznasenfledermaus. French: Nyctère nain.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ce).

General distribution:

Ivory Coast to NE Angola, W Tanzania, W Kenya, and SW Sudan.

Distribution based on voucher specimens:

Cameroon, Congo (Democratic Republic of the), Cote D'Ivoire, Equatorial Guinea, Ghana, Kenya, Sudan, Uganda.

Figure 93. Distribution of *Nycteris nana*

Nycteris parisii (de Beaux, 1923)

- *1924. *Petalia parisii* de Beaux, Atti Soc. ital. Sci. nat., 62: 254 (for 1923). Type locality: Somalia: Balli. Type specimen (N 1449, F, alcoholic and skull, collection date: 6 April 1922). Publication date: February 1924. (see Allen 1939a: 70).
1930. *Nycteris parisii*: Zammarano, Le Colonie Italiana de Diretto Dominio. xxx. Name combination.
1952. *Nycteris benuensis* Aellen, Mém. Soc. neuchât. Sci. nat., 8: 53. Type locality: Cameroon: Rei Boubia.
1971. *Nycteris parisii benuensis*: Hayman and Hill, Order Chiroptera: xxx. Name combination.
1971. *Nycteris parisii parisii*: Hayman and Hill, Order Chiroptera: xxx. Name combination.

Taxonomy:

Included in *woodi* by Van Cakenberghe and De Vree (1985), Koopman (1993: 162); but see Simmons (2005).

Conservation status:

Global- DD ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bk).

Common names:

English: Parisi's Slit-faced Bat, Balli Slit-faced Bat, Paris's Slit-faced Bat, Parissi's Slit-faced Bat.

General distribution:

Cameroon, S Somalia, Ethiopia.

Nycteris thebaica E. Geoffroy St.-Hilaire, 1818

- *1818. *Nycteris Thebaicus* E. Geoffroy Saint-Hilaire, Descrip. de l'Egypte, 2: 119, pl. 1, No 2. Type locality: Egypt: Thebes (near Luxor). Type specimen: MNHN 889 (ad F(?), Skin, skull not removed). Publication date: 1818.
1820. *Nycteris Geoffroyi* Desmarest, Encycl. Méthod., (Zoologie, Mammalogie) 1: 127. Type locality: Senegal: 40 leagues east of Podor. Publication date: 1820. Included in *macrotis* by Kock (1969: 93) [although with a question mark] and Meester *et al.* (1986: 35).
1829. *Nycteris affinis* A. Smith, Zool. Journ., 4: 434. Type locality: Republic of South Africa: E Cape Province, Grahamstown (originally: "South Africa", restricted to "Grahamstown, eastern Cape Province, South Africa" by Roberts (1951: 69): see Kock (1969: 98), Meester *et al.* (1986: 35), Gray *et al.* (1999: 2)). Publication date: January-May 1829.
1829. *Nycteris capensis* A. Smith, Zool. Journ., 4: 434. Type locality: Republic of South Africa: SW Cape Province, Swellidam (Originally "Interior of South Africa", restricted to "Swellidam, SW Cape Province, South Africa" by Roberts (1951: 69): see Kock (1969: 98), Meester *et al.* (1986: 35), Gray *et al.* (1999: 2). Ansell and Dowsett (1988: 31) mention the locality as "Swellendam"). Publication date: January-May 1829. Considered a valid subspecies by Taylor (1998: 33). Type specimen: BMNH 1863.2.21.6 (Lectotype?, ad M; skin; Collector: A. Smith); RMNH Jentink 1888 171B (Paralectotype; ad ?; skin and skull; Collector: W.C.H. Peters).
1834. *Nycteris thebaica*: A. Smith, S. Afr. J., 2: 59. Current spelling.
1840. *Nycteris albiventer* Wagner, Schreber's Säugeth., Suppl. 1: 439. Type locality: Sudan: Northern Province, Dongola (Originally "Nubia" (see Kock, 1969: 98), restricted to Dongola, Northern Province, Sudan by Koopman 1975: see Gray *et al.* (1999: 2)).
1840. *Nycteris discolor* Wagner, Schreber's Säugeth., Suppl. 1: 440. Type locality: Republic of South Africa: Ecklon (Allen (1939a: 68) mentions it as "Südspitze von Afrika". Kock (1969: 98), Meester *et al.* (1986: 35) mention "Southern tip of Africa; Knysna, fide Roberts (1951).").
1852. *Nycteris fuliginosa* Peters, Naturw. Reise Mossamb., Säugethiere, p. 46, pl. 10. Type locality: Mozambique: 12 mi (19 km) NW Quelimane, Boror. Type specimens: BMNH 1907.1.1.337 (Syntype; ad F; alcoholic and skull); BMNH 1858.6.18.15 (Syntype). Publication date: 1852.
1861. *Nycteris labiata* Heuglin, Nova Acta Acad. Cæs. Leop.-Carol., Halle, 28 (8): 5. Type locality: Eritrea: Bogos, Cheren Cheren (=Keren) [c 15 45 N 38 20 E]. Type specimen: RMNH 27231 (paralectotype; ad ?, skin and skull, collector: Theodor von Heuglin, collection date: November 1861). Publication date: 1861.
1866. *Plecotus æthiopicus* Heuglin and Fitzinger, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 54 (1): 546. Type locality: Sudan: Bahr el Abiat (White Nile). Meester *et al.* (1986: 35) mention Fitzinger only as author. Nomen nudum (see Allena, 1939: 68). Included in *macrotis* by Kock (1969: 93), but rejected as nomen nudum.
1868. *Nycteris geoffroyi* Var. *senegalensis* Hartmann, Zeitschr. Gesellsch. Erdkde, Berlin, 3 (28/29): 44. Type locality: Sudan: Sennaar.
1871. *Nycteris angolensis* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 903 (for 1870). Type locality: Angola: Biballe and Rio Coroca, Caconda (Restricted by Hill and Carter (1941): see Gray *et al.* (1999: 2)). Type specimens: BMNH 1879.1.21.2 (Syntype) - -.
1871. *Nycteris damarensis* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 905 (for 1870). Type locality: Namibia: Damaraland, Otjimbingue. Type specimens: BMNH 1838.2.8.4 (Syntype; ad ?; skin and skull; collector: Captain Alexander; original number: 1079) - -.
1881. *Nycteris Revoilii* Robin, Bull. Soc. Pholim. Paris, (7) 5: 90. Type locality: Somalia: north of 10 ° N (Originally "Somalia", restricted to "Somalia, north of 10 °N" by Moreau *et al.* (1946: 399): see Gray *et al.* (1999: 2)).
1900. *Nycteris thebaica angolensis*: Seabra, Jorn. Sci. math. phys. nat., Lisboa, (2) 6 (22): xxx. Name combination.
1900. *Nycteris thebaica damarensis*: Seabra, Jorn. Sci. math. phys. nat., Lisboa, (2) 6 (22): xxx. Name combination.
1900. *Nycteris thebaica fuliginosa* Seabra, Jorn. Sci. math. phys. nat., Lisboa, (2) 6 (22): xxx. Name combination.
1904. *Nycteris thebaica capensis*: Trouessart, Cat. Mamm. tam viv.: xxx. Name combination.
1908. *Petalia capensis*: Thomas and Wroughton, Proc. zool. Soc. Lond., xxx. Name combination.

1909. *Nycteris capensis* var. *fuliginosa*: Seabra, Ann. Scient. Acad. Polytech. Porto, 4: xxx. Name combination.
1910. *Petalia thebaica*: Thomas, Ann. Mag. nat. Hist., ser. 8, 6: xxx. Name combination.
1911. *Petalia revoilii*: G.M. Allen, Bull. Mus. comp. Zool., 54: xxx. Name combination.
1912. *Petalia damarensis brockmani* K. Andersen, Ann. Mag. Nat. Hist., ser. 8, 10 (59): 548. Type locality: Somalia: Upper Sheikh [4 300 ft (=1 311 m)]. Type specimen: BMNH 1910.3.27.4 (ad F; skin and skull; collector: dr. R.E. Drake-Brockman; collection date: 11 January 1910). Publication date: 1 November 1912.
1912. *Petalia damarensis media* K. Andersen, Ann. Mag. Nat. Hist., ser. 8, 10 (59): 548. Type locality: Ethiopia: Harer. Type specimen: BMNH 1912.2.28.1 (ad ?; skin and skull; collector: G. Kristensen, presented by Nathaniel Charles Rothschild; collection date: 19 January 1912). Publication date: 1 November 1912.
1912. *Petalia damarensis damarensis*: K. Andersen, Ann. Mag. nat. Hist., ser. 8, 10 (59): xxx. Name combination.
1912. *Petalia thebaica thebaica*: K. Andersen, Ann. Mag. nat. Hist., ser. 8, 10 (59): xxx. Name combination.
1918. *Nycteris thebaica thebaica* Wettstein, Denkschrift k. Akad. Wiss. Wien math. naturw. Kl., 94: xxx. Name combination.
1923. *Petalia (Nycteris) thebaica aurantiaca* de Beaux, Atti Soc. ital. Sci. nat., 62: 91. Type locality: Kenya: Northern Guaso Nyiro, Archer's Post. Type specimen (N 1432, F, alcoholic, skull collectors L. Franchetti and L. Tonker, collection date January 1920). Publication date: July 1923.
1933. *Nycteris damarensis damarensis*: G.M. Allen and Loveridge, Bull. Mus. comp. Zool., 75: xxx. Name combination.
1934. *Nycteris capensis capensis*: Shortridge, The mammals of South West Africa: xxx. Name combination.
1934. *Nycteris capensis damarensis*: Shortridge, The mammals of South West Africa: xxx. Name combination.
1934. *Nycteris thebaica adana*: de Beaux, Atti Soc. ital. Sci. nat., 73: xxx. Name combination.
1936. *Nycteris damarensis brockmani*: G.M. Allen and Lawrence, Bull. Mus. comp. Zool., 89: xxx. Name combination.
1936. *Nycteris thebaica revoilii*: G.M. Allen and Lawrence, Bull. Mus. comp. Zool., 89: xxx. Name combination.
1938. *Nycteris thebaica aurantiaca*: Frechkop, Exploration du parc national Albert. Fasc. 10: xxx. Name combination.
1939. *Nycteris damarensis media*: G.M. Allen, Bull. Mus. comp. Zool., 83: xxx. Name combination.
1944. *Nycteris thebaica albiventer*: Aharoni, Bull. Zool. Soc. Egypt, 6: 26. Name combination.
1956. *Nycteris thebaica brockmani*: Toschi, Atti Soc. ital. Sci. nat., 95: xxx. Name combination.
1971. *Nycteris thebaica labiata*: Hill and Morris, Bull. Br. Mus. nat. Hist. (Zool.): 21: xxx. Name combination.
1975. *Nycteris thebiaca* Koopman, Bull. Am. Mus. Nat. Hist., 154 (4): 379. Lapsus (actually Koopman uses this name consequently in this publication).
1999. *Nycteris thebaica labiata* Van Cakenberghe and De Vree, Bonn. zool. Beitr., 48 (2): 147. Lapsus.

Taxonomy:

Meester *et al.* (1986) state that the subspecies classification of *thebaica* is uncertain. Hayman and Hill (1971), while acknowledging that the species may include valid subspecies, do not attempt to recognize any. Kock (1969), however, lists seven subspecies, and Koopman (1975), while not providing a complete synonymy of the species, appears to come to broadly similar conclusions to Kock concerning those names that he does consider.

Common names:

Afrikaans: Gewone-spleetneusvlermuis, Egiptiese spleetneusvlermuis. Arabian: Khafash Teiba. English: Egyptian Slit-faced bat, Common Slit-faced Bat. French: Nyctère de la Thébaïde, Nyctère Egyptienne. German: Großrohrhohnase, Ägyptische Schlitznasen-Fledermaus. Italian: Nitteride di Tebe. Portuguese: Morcego orelhudo do Egípto. Spanish: Rinolofo egipcio.

Etymology of name:

So named because they were first described from tombs in Thebes, Egypt (see Taylor 2005).

Figure 94. *Nycteris thebaica*

Palaeontological / archaeological records:
N. thebaica was found in upper Pleistocene samples at Border Cave, South Africa (Avery 1991: 6).

Conservation status:
Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cg).
Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:
Central Arabia; Israel; Egypt to Morocco, Senegal, Guinea (Konstantinov *et al.*, 2000: 144), Benin, Ethiopia (Lavrenchenko *et al.*, 2004: 133), Somalia, Djibouti (Pearch *et al.*, 2001: 397), and Kenya, Uganda (Kityo and Kerbis, 1996: 60), thence over Malawi (Ansell and Dowsett, 1988: 31), Zambia, Zimbabwe, Botswana, Namibia, Angola (Cotterill, 2004: 261) south to South Africa, and Swaziland (Mondajem 2001, 2005 in open country; Zanzibar and Pemba. Corbet (1984: 8) states that the inclusion of Corfu (Greece) in the range could be the result of a vagrant specimen from N Africa (for details see Van Cakenbergh and De Vree 1999a).

Sexual dimorphism:
In Swaziland Mondajem (2001) found that females were heavier and had longer forearms than males.

Echolocation:
See Taylor (1999).

Molecular biology:
DNA - Unknown.
Karyotype - Both Peterson and Nagorsen (1975) and Rautenbach *et al.* (1993) reported $2n = 42$, $FN = 78$, $BA = 38$, with a submetacentric X chromosome, and a metacentric Y chromosome. = small M.
Protein / allozyme - Unknown.

Habitat:
This species has a wide distribution and is found in most habitats throughout its range.

Habits:
In Swaziland male *N. thebaica* exhibit less roost site fidelity than females, there is greater roost movement in males than females (Mondajem 2005).

Roost:
Roosting in caves, mine audits and various other hollow sites (Churchill *et al.*, 1997). Road culverts (Mondajem 1998; 2001; 2005). Under houses (LaVal and LaVal 1980; Seamark and Bogdanowic 2002).

Migration:
The species is not known to undergo migration (Mondajem 2006), and Laycock (1976) and Wingate (1983) suggest that *N. thebaica* does not have any homing ability. Mondajem (2005) states that bat numbers vary greatly with season, suggesting that some movement is taking place. Mondajem (2005) also reported that a banded female in Swaziland was discovered 107 km from where it was originally banded.

Food / diet:
Casual observations in Israel (Makin 1979), Sudan (McLellan 1986) and Namibia (Felten 1956) reported that scorpions formed a stable part of *N. thebaica* diet. Yerbury and Thomas (1895) examined cull-parts in Arabia, identifying various species of Orthoptera. While Chapman (1958) in Tanzania and Roer (1975) in Namibia found, as did LaVal and LaVal (1980) in South Africa, that Orthoptera, Lepidoptera, and Coleoptera were the primary prey orders consumed by *N. thebaica*. LaVal and LaVal (1980) presented results for early autumn (April), mid-winter (July), spring (November), and summer (January to March), listing a monthly breakdown of all prey orders consumed and finding that Orthoptera predominated in the study. While in Zimbabwe, Fenton (1975) combined the results of his wet season collection (November 1969 to March 1970), finding only Orthoptera and Lepidoptera wings. Fenton *et al.* (1977) and Fenton and Thomas (1980) examined the faeces of *N. thebaica* in Zimbabwe, and found that in the wet season (January and February 1976) Lepidoptera, Diptera and Coleoptera formed the bats' diet, while in the dry season (June 1977) he found only Lepidoptera (100 percent volume). In Zambia, Whitaker and Black (1976) examined the stomach contents, of 33 *N. thebaica* which they separated into summer (November to March) and winter (May to September) categories. They found similar prey orders in *N. thebaica* diet, but

also found many wingless insects.

Bowie *et al.* (1999) at Mkuzi Game Reserve, KwaZulu Natal, South Africa found that the diet consisted mainly of non-volant prey, primarily orthopterans and arachnids.

Feldman *et al.* (2000), in Israel, found they fed on Lepidoptera and Diptera.

Seamark and Bogdanowic (2002), showed that prey eaten by *N. thebaica* vary significantly by order but not by season, but there was a significant interaction between the prey category and season, suggesting that these two factors are not independent from each other. Coleoptera (49.6%) in the culled parts, (calculated as percent composition) dominated in spring (September-November), Orthoptera (38.8%) in summer (December-February), Hemiptera (42.8%) in autumn (March-May) and Lepidoptera (36.3%) in winter (June-August). The diet also included a frog and small fish.

Predators:

Unknown.

Population:

Structure - Monadjem (2001) mentions that sex ratio was highly skewed with adult females outnumbering adult males by 2.8:1, even though the sex ratio of juveniles was 1:1. Sex ratios of adults varied seasonally, being highly skewed in July/August, October and December.

Density - Unknown.

Lifespan:

Monadjem (2005) in Swaziland, found that for both males and females, survivorship was low in the first year, but increased thereafter. While 15% of females and 10% of males banded as juveniles in 1998 and 1999 survived to three years of age (Monadjem 2005). Monadjem (2006) reported the age of *N. thebaica* in Swaziland to reach at least 7 to 8 years of age.

Activity and behaviour:

Female *N. thebaica* in Swaziland appear to be resident year round in the culverts, which suggests that males join females in late summer for the purpose of mating (Monadjem 2001).

Lindeque (1987) describes the inflight behaviour of mating, where the active pursuit of the female by the male bat can be equated to courtship phase, with the butting phase inducing the female bat to hover and allowing the male to copulate, the brief frontal approach and head-neck biting by the male could be relict of some incomplete behaviour sequence.

Reproduction and ontogeny:

See Bernard (1982).

Mating:

Mating system is not known (Monadjem 2001).

Post-natal development:

Unknown.

Parasites:

Unknown.

Viruses:

In 1986 Foggin (1988) recovered the Duvenhage (DUVV) virus from a *Nycteris thebaica* in Zimbabwe (see Paweska *et al.* 2006).

Utilization:

None known.

Anthropophilous:

Unknown.

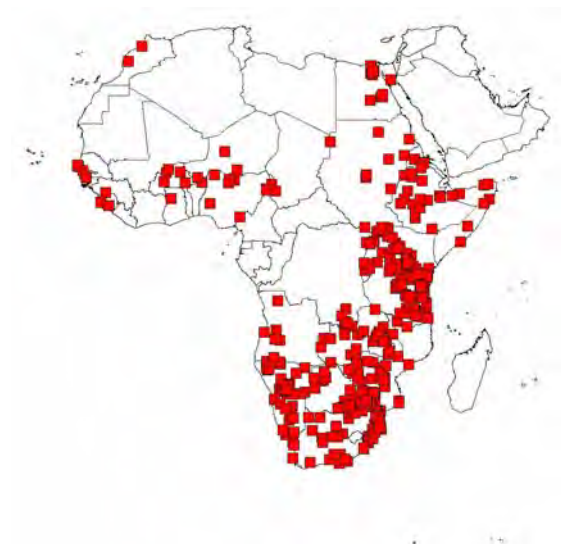

Figure 95. Distribution of *Nycteris thebaica*

Distribution based on voucher specimens:

"Africa", Angola, Benin, Botswana, Burkina Faso, Cameroon, Congo (Democratic Republic of the), Egypt, Ethiopia, Ghana, Guinea, Kenya, Malawi, Morocco, Mozambique, Namibia, Niger, Nigeria, Rwanda, Senegal, Sierra Leone, Somalia, South Africa, Sudan, Swaziland, Tanzania, Tanzania [=former Tanganyika], Uganda, Unknown Country, Unknown country, Zambia, Zimbabwe.

Nycteris vinsoni Dalquest, 1965

- *1965. *Nycteris vinsoni* Dalquest, J. Mamm., 46 (2): 254. Type locality: Mozambique: 212 km SSW Beira, S bank Save river, Zinave.

Taxonomy:

Bronner *et al.* (2003) state that it was originally described from Mozambique (Dalquest 1965). Kock (1969) considered *Nycteris vinsoni* a synonym of *N. macrotis luteola*, based on the size and position of the second lower premolar. Hayman and Hill (1971) suggest that *N. vinsoni* is a variant of *N. aethiopica*, itself considered a member of the *N. macrotis* group (Koopman 1965; Kock 1969). Koopman (1975) argued that the size and position of the second lower premolar is extremely variable, and instead recognised *vinsoni* as a distinct species closely related to *N. thebaica*, based on the presence of a pyriform tragus (and see Koopman in Honacki *et al.* 1982). He later concluded that the tragus of the holotype is actually semilunate and therefore synonymised *vinsoni* under *N. macrotis oriana* (Koopman 1992, 1993a). Swanepoel *et al.* (1980), Meester *et al.* (1986) and Corbet and Hill (1992) retained *vinsoni* as a distinct species, a treatment endorsed by limited morphometric comparisons (Van Cakenberghe and de Vree 1999a).

Included in *macrotis* by Kock (1969: 93), Van Cakenberghe and De Vree (1985), Koopman (1993a: 162), but considered a valid species by Meester *et al.* (1986: 36), and Simmons (2005).

Common names:

Afrikaans: Vinson se spleetneusvlermuis. English: Vinson's Slit-faced Bat, Mozambian Slit-faced Bat. French: Nyctère du Mozambique, Nyctère de Vinson.

Etymology of name:

In honour of J. Vinson, who sponsored an expedition to Mozambique during which the first specimens were collected (see Dalquest 1965; Taylor 2005).

Conservation status:

Global- CR assessed as *Nycteris macrotis* (Baillie and Groombridge 1996); LR/lc (Hilton-Taylor 2000); CR (IUCN 2000); DD ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004b).

General distribution:

Mozambique; known only from the type locality.

Nycteris woodi K. Andersen, 1914

- *1914. *Nycteris woodi* K. Andersen, Ann. Mag. Nat. Hist., ser. 8, 13 (78): 563. Type locality: Zambia: Chilanga [15° 33' S 28° 11' E, 4 100 ft (=1 250 m)]. Type specimen: BMNH 1914.4.22.2 (ad ?; skin and skull; Collector: Rodney C. Wood; Collection date: November 1913). Publication date: 1 June 1914.
1946. *Nycteris woodi sabiensis* Roberts, Ann. Transv. Mus., 20 (4): 304. Type locality: Zimbabwe: Melsetter district, Sabi River, Birchenough Bridge. Type specimen: TM 8578 (ad. F, skin and skull, collector: A.G. White, collection date: 11 January 1938)
1946. *Nycteris woodi woodi*: Roberts, Ann. Transv. Mus., 20 (4): 304. Name combination.

Taxonomy:

Van Cakenberghe and De Vree (1985) included *parisii* and *benuensis*, but see Simmons (2005).

Common names:

Afrikaans: Wood se spleetneusvlermuis, Wood-spleetneusvlermuis, Woodse Langoorvlermuis.
English: Wood's Slit-faced Bat, Wood's Long-eared Bat. French: Nyctère de Wood.

Etymology of name:

In honour of Rodney C. Wood, a well-known naturalist, who collected the original specimens at Chilanga, near Lusaka, Zambia (see Smithers 1983: 118, Taylor 2005).

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004aw).

Regional- Indeterminate (Smithers 1986); NT ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Zambia, Malawi (Ansell and Dowsett, 1988: 30), Zimbabwe (Cotterill, 2004: 261) and South Africa to SW Tanzania.

Echolocation:

See Taylor (1999).

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach *et al.* (1993) reported $2n = 42$, FN = 78, BA = 38, a metacentric X chromosome, and an acrocentric Y chromosome, for a specimen from South Africa.

Protein/ allozyme - Unknown.

Figure 96. Distribution of *Nycteris woodi*

Distribution based on voucher specimens:
Cameroon, Ethiopia, Malawi, Mozambique, South Africa, Tanzania, Zambia, Zimbabwe.

INFRAORDER VESPERTILIONIFORMACEI

- *? **VESPERTILIONIFORMACEI** The name of the Infraorder is based on *Vespertilio* Linnaeus, 1758 (type of VESPERTILIONIDAE Gray, 1821).
 ? *Yangochiroptera*

Superfamily MOLOSSOIDEA Simmons, 1998

- *1998. *Molossoidea* Simmons, Interfamilial relationships of bats.

Family MOLOSSIDAE Gervais, 1856

- *1856. *Molossidae* Gervais, Exped. Partes Cen. Am. Sud., Zool. (Sec. 7), Vol. 1, pt. 2 (Mammifères): 53 footnote. Type genus: *Molossus* E. Geoffroy St. Hillaire, 1805. Publication date: 23 July 1855.

Taxonomy:

Koopman (1993a: 232) mentioned Gervais, 1856, whereas Corbet and Hill (1992: 156) and Peterson *et al.* (1995: 142) mentioned Gill, 1872: 17 as author for this family.

Revised by Freeman (1981). For a very different arrangement see Legendre (1984).

Pavlinov *et al.* (1995: 90) recognise two subfamilies: Cheiromelinae and Tadaridinae.

Most recent authors (Hooper and Van Den Bussche, 2003: 2; Simmons, 2005) accept that the Molossidae consists of two subfamilies: Molossinae and Tomopeatinae. The latter subfamily used to be assigned to the Vespertilionidae, but Hooper and Van Den Bussche, 2003: 2) clearly indicate that this subfamily belongs to the Molossidae. Representatives of this subfamily only occur in South America, and are therefore not included here.

Common names:

Czech: tadaridovití. Dutch: Buldogvleermuis. English: Free-tailed Bats, Wrinkled-lipped Bats, Bulldog Bats, Mastiff Bats, Bonneted Bats, Wolf-dog Bats. Finnish: Doggilepakot. German: Bulldoggfledermäuse. Norwegian: Bulldoggflaggermus, foldeleppede flaggermus. Spanish: Murcielagos cola de raton o de cola libre.

Etymology of name:

The name of the family is derived from the Greek "*molossus*", a kind of dog used by Greek shepherds, in ancient times (see Taylor 2005).

Palaeontological / archaeological records:

Although the species have not been confirmed, remains of two different sized molossids have been found in the upper Pleistocene at Border Cave (Avery 1991: 6).

Subfamily Molossinae Gervais, 1856

- *1856. *Molossinae* Gervais, Exped. Partes Cen. Am. Sud., Zool. (Sec. 7), Vol. 1, pt. 2 (Mammifères): 53 footnote. Publication date: 23 July 1855.
 1984. *Cheiromelinae* Legendre, Rev. suisse Zool., 91 (2): 425. Pavlinov *et al.* (1995: 90) recognise this as a subfamily, but see Simmons (2005). Publication date: June 1984.
 1984. *Tadaridinae* Legendre, Rev. suisse Zool., 91 (2): 426. Publication date: June 1984.
 1995. *Tadaridinae* Pavlinov, Borissenko, Kruskop and Jahonton, Arch. Zool. Mus., Moscow State Univ., 133: 90. Pavlinov *et al.* (1995: 90) recognise this as a subfamily assigned to Legendre (1984). Probably a lapsus for Tadarinae.

Taxonomy:

Bronner *et al.* (2003) state that the genera *Mops* and *Chaerephon* have often been included as

subgenera of *Tadarida* (Ellerman *et al.* 1953; Hayman and Hill 1971; Swanepoel *et al.* 1980; Meester *et al.* 1986; Corbet and Hill 1992).

Roberts (1951) elevated these taxa to generic rank, an approach followed by Freeman (1981), Honacki *et al.* (1982), Koopman (1993) and Simmons (2005). In southern Africa, *Mops* is therefore represented by two species (*M. midas* and *M. condylurus*); *Chaerephon* by five (*C. bivittata*, *C. ansorgei*, *C. nigeriae*, *C. chapini* and *C. pumilus*); and *Tadarida* by four (*T. aegyptiaca*, *T. lobata*, *T. ventralis* and *T. fulminans*).

Common names:

English: Free-tailed Bats, Wrinkled-lipped Bats, Bulldog Bats, Mastiff Bats, Bonneted Bats, Wolf-dog Bats.

Genus *Chaerephon* Dobson, 1874

1818. *Nyctinomus* E. Geoffroy Saint-Hilaire, *Descrip. de l'Egypte*, 2: 114, pl. 2. Type species: *Nyctinomus aegyptiacus* E. Geoffroy St. Hillaire, 1818. Publication date: 1818.
- *1874. *Nyctinomus (Chaerephon)* Dobson, *J. Asiatic Soc. Bengal*, 43 (2): 144. Type species: *Molossus (Nyctinomus) johorensis* Dobson, 1873. Publication date: 17 October 1874.
1907. *Chaerephon*: Andersen, Name combination.
1917. *Chærephon (Lophomops)* J.A. Allen, *Bull. Am. Mus. Nat. Hist.*, 37: 460, text-fig. 9-11. Type species: *Chærephon (Lophomops) chapini* J.A. Allen, 1917. Publication date: 29 September 1917.
1951. *Tadarida (Chaerephon)*: Ellerman and Morrison-Scott, Name combination.
- ? *Chaerophon*: Lapsus.

Taxonomy:

Formerly included in *Tadarida*; see Freeman (1981: 60, 133, 150); see also Legendre (1984). Harrison and Bates (1991: 62) and Ansell and Dowsett (1988: 45), Corbet and Hill (1992: 157), Grubb *et al.* (1998: 93) and Horáček *et al.* (2000: 137) include *Chaerephon* in *Tadarida*. A key is provided by Bouchard (1998: 1, *Mammalian Species*, 574).

Nyctinomus is considered a valid genus by McFarland (1998: 34), but included in *Tadarida* by Koopman (1993a: 240), Grubb *et al.* (1998: 93), or included in *Chaerephon* by Simmons (2005), or in *Mormopterus* by Jacobs & Fenton (2002, *Mammalian Species*, 703: 1). Grubb *et al.* (1998: 93) also indicate that Mahoney and Walton (1980: 148-149) considered that *Nyctinomus* was dated from 1813 and was therefore the prior name for the genus *Tadarida* Rafinesque, 1814. Their case is unconvincing, and Grubb *et al.* (1998) do not think it desirable to change the long established usage of *Tadarida*. However, since *Chaerephon* Dobson, 1874 is clearly more recent it might be that *Nyctinomus* should be used instead of *Chaerephon*.

Common names:

English: Wrinkle-lipped Bats, Lesser Free-tailed Bats, Lesser Mastiff Bats.

Etymology of name:

From the Greek "*chaerephon*" meaning joyful-sounding. Flannery (1990: 370; 1995: 404) refers to it as "a proper name, significance unknown". Dobson (1874) in Bouchard (1998: 4) indicates that it refers to the friend of Socrates who is depicted as "Chaerephon the bat" in Arestophanes' comedy, *Aves*.

Remarks:

IUCN (2004)- assessed *C. shortridgei* as NT ver 3.1 (2001).

Chaerephon aloysiisabaudiae (Festa, 1907)

- *1907. *Nyctinomus aloysii-sabaudiae* Festa, Bol. Mus. Zool. Anat. Comp. Univ. Torino, 22 (546): 1. Type locality: Uganda: East of Ruwenzori, Toro district (Allen (1939a: 107) mentioned it a "Ruwenzoni". Grubb *et al.* (1998: 84) mention "East of Ruwenzori, Toro district"). Publication date: 21 January 1907.
1922. *Chaerephon angolensis sabaudiae* de Beaux, Ann. Mus. civ. Stor. nat. Genova, ser. 3, (O.S. 49) 9: 371. Publication date: 28 August 1922. Lapsus.
1966. *Tadarida (Chaerephon) cyclotis* Brosset, Biol. gabon., 2 (1): 80. Type locality: Gabon: Bélinga [01 13 N 13 10 E].
- ? *Chaerephon aloysiisabaudiae*: Current spelling.

Taxonomy:

See Simmons (2005).

Common names:

English: Duke of Abruzzi's Wrinkle-lipped Bat, Abruzzi's Wrinkle-lipped Bat, Duke of Abruzzi's free-tailed bat. French: Molosse du Duc des Abruzzes.

Conservation status:

Global- LR/lc (Billie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004y).

General distribution:

Ghana, Côte d'Ivoire (1st record: Beaucournu and Fahr, 2003: 175), Gabon, Democratic Republic of the Congo, Uganda, perhaps Ethiopia.

Distribution based on voucher specimens:
Uganda.

Figure 97. Distribution of *Chaerephon aloysiisabaudiae*

Chaerephon ansorgei (Thomas, 1913)

- *1913. *Nyctinomus ansorgei* Thomas, Ann. Mag. Nat. Hist., ser. 8, 11 (63): 318. Type locality: Angola: Malange [=Malanje] [1 150 m]. Type specimen: BMNH 1910.4.8.4 (Holotype, ad M, collector: Dr. W.J. Ansorge, collection date: 17 February 1909, original number 5). Publication date: 1 March 1913.
1946. *Nyctinomus rhodesiae* Roberts, Ann. Transv. Mus., 20: 307. Type locality: Zimbabwe: NE Zimbabwe, Bindura District, Masembura Native Reserve, Chikupo caves. Type specimen: TM 9977 (ad M, skin and skull, collector: H.B. Mastson collection date: 10 July 1945).
- ? *Chaerephon ansorgei*: Name combination.

Taxonomy:

Distinct from *bivittata*; see Eger and Peterson (1979: 1889), who revised it.

submetacentric X chromosome.

Protein / allozyme - Unknown.

Common names:

Afrikaans: Ansorge se losstertvlermuis, Ansorge-losstertvlermuis. English: Ansorge's Wrinkle-lipped Bat, Ansorge's Free-tailed Bat. French: Molosse d'Afrique du Sud, Molosse d'Ansorge. Portuguese: Morcego de cauda livre de Ansorge.

Distribution based on voucher specimens:

Angola, Cameroon, Congo (Democratic Republic of the), Nigeria, Rwanda, South Africa, Zimbabwe.

Etymology of name:

In honour of Dr. W.J. Ansorge, a collector of zoological specimens, who collected the type specimen of this species in Malange, northern Angola (Taylor 2005).

Conservation status:

Global- LR/lc (Billie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004t).

Regional assessment- South Africa- Indeterminate (Smithers 1986); LC ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Cameroon to Uganda (Kityo and Kerbis, 1996: 63), Ethiopia, south to Angola, Namibia (?), Zambia, Zimbabwe (Cotterill, 2004: 261) and KwaZulu-Natal (South Africa).

Figure 98. Distribution of *Chaerephon ansorgei*

Echolocation:

See Taylor (1999).

Long duration (15 ms), multi-harmonic (up to two), narrow bandwidth (16-28 kHz) shallow-FM calls, with low dominant frequency of 18 kHz (Taylor 2000: 67).

Molecular biology:

DNA - Unknown.

Karyotype - Smith *et al.* (1986) and Rautenbach *et al.* (1993) agreed on $2n = 48$, and the Y chromosome being acrocentric. However, Smith *et al.* (1986) reported FN = 66, BA = 20, and a subtelocentric X chromosome, whereas Rautenbach *et al.*, (1993) reported for specimens from South African, FN = 68, BA = 22, and a

Chaerephon bemmeleni (Jentink, 1879)

- *1879. *Nyctinomus bemmeleni* Jentink, Notes Leyden Mus., 1: 125. Type locality: "Liberia": but see Kuhn (1965: 327), who doubts this, since the type specimen had come from a zoo. Publication date: April 1879.
1897. *Nyctinomus vemmeleni* Trouessart, Cat. Mamm. Viv. Foss., ed. 1, pt. 1: 146. Publication date: 1897. Lapsus.
1903. *Nyctinomus cisturus* Thomas, Ann. Mag. Nat. Hist., ser. 7, 12 (71): 502. Type locality: Sudan: Kordofan, 25 mi (37.5 km) N Gondokoro, Mangala (=Mongalla, Equatoria province). Type specimen: BMNH 1902.7.4.4 (Holotype, ad M, collected and presented by W.L.S. Load, Esq., original number 2805). Publication date: 1 November 1903.
- ? *Chaerephon bemmeleni*: Name combination.

Taxonomy:
Includes *cisturus*; see Koopman (1975: 425).

Global- LR/lc (Billie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004v).

Common names:

English: Gland-tailed Wrinkle-lipped Bat, Van Bemmelen's Wrinkle-lipped Bat, Gland-tailed free-tailed bat. French: Molosse à glandes caudales.

General distribution:

Liberia, Cameroon, Sudan, Democratic Republic of the Congo, Uganda, Kenya, Tanzania.

Conservation status:

Distribution based on voucher specimens:
Sudan.

Chaerephon bivittatus (Heuglin, 1861)

- *1861. *Nyctinomus bivittatus* Heuglin, Nova Acta Acad. Cæs. Leop.-Carol., Halle, 29 (8): 4, 13. Type locality: Eritrea: Kérén [c 15 45 N 38 20 E]. Publication date: 1861.
- ? *Chaerephon bivittatus*: Name combination.

Taxonomy:
Revised by Eger and Peterson (1979).

reported $2n = 48$, FN = 54, BA = 8, a metacentric X chromosome, and an acrocentric Y chromosome for specimens from Kenya and Zimbabwe.

Common names:

Afrikaans: Gevlekte losstertvlermuis. English: Spotted Wrinkle-lipped Bat, Spotted Free-tailed Bat, Spotted gland-tailed bat. French: Molosse tacheté. Portuguese: Morcego de cauda livre malhado.

Protein / allozyme - Unknown.

Etymology of name:

So named because of the tiny white, and sometimes barely discernible, flecks on the upper parts of the body (see Taylor 2005).

Conservation status:

Global- LR/lc (Billie and Groombridge 1996); LC ver 3.1 (2001) assessed as *C. bivittata* (IUCN 2004; Mickleburgh *et al.* 2004ad).

General distribution:

Sudan, Ethiopia (?), Eritrea, Uganda, Kenya, Tanzania, Zambia, Zimbabwe, Mozambique (Simmons, 2005).

Molecular biology:

DNA - Unknown.
Karyotype - Peterson and Nagorsen (1975)

Distribution based on voucher specimens:
Ethiopia, Tanzania.

Figure 99. Distribution of *Chaerephon bivittatus*

Chaerephon chapini J.A. Allen, 1917

- *1917. *Chærephon (Lophomops) chapini* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 460, 461, text-fig. 9. Type locality: Democratic Republic of the Congo: Oriental, Faradje. Type specimen: AMNH 48841 (ad M, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 11 November 1912, original number 1971). Publication date: 29 September 1917.
1926. *Chaerephon (Lophomops) shortridgei* Thomas, Proc. zool. Soc. Lond., 1926, I: 289. Type locality: Namibia: NW Ovamboland, Ukualukasi, 32 miles NW of Rehobooth Mission Station [3 400 ft (=1 036 m)]. Type specimen: BMNH 1925.12.4.24 (skin and skull, collector: Captain G.C. Shortridge, original number: 1389) Publication date: 29 April 1926. Considered a valid species by Peterson *et al.* (1995: 159), Goodman and Cardiff (2004: 236).
1938. *Chaerephon lancasteri* Hayman, Ann. Mag. nat. Hist., ser. 11, 1 (4): 383. Type locality: Zimbabwe: NE Rhodesia, Loangwa Valley, Lundazi district, Lunzi River (Kock (1969: 140) situates this locality in Zambia). Type specimen: BMNH 1937.12.8.25 (ad M, skin and skull, collector D. Gordon Lancaster, collection date: August 1936, original number: 724, notes: caught in hole in tree). Publication date: 1 April 1938.
- ? *Chaerephon chapini*: Current spelling.

Taxonomy:

Included in *pumilus* by Kock (1969: 139). See Fenton and Eger (2002).

Common names:

Afrikaans: Bleek losstertvlermuis. English: Long-crested Free-tailed Bat, Chapin's Wrinkle-lipped Bat, Long-crested Wrinkle-lipped Bat, Crested Wrinkle-lipped bat, Chapin's free-tailed bat, Pale Free-tailed Bat, Long-crested gland-tailed bat, crested free-tail bat. French: Molosse à crinière, Molosse pâle.

Etymology of name:

Named after Mr. James P. Chapin, co-organiser of the American Museum expedition to the former Belgian Congo that resulted in the discovery of the species (Taylor 2005).

Palaeontological / archaeological records:

No fossils are known (Fenton and Eger 2002).

Conservation status:

Global- LR/nt (Billie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004o). *Chaerephon shortridgei* recognised and assessed as NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004s)

General distribution:

Ethiopia, Sudan (Fenton and Eger, 2002: 2), Democratic Republic of the Congo (Fenton and Eger, 2002: 2), Uganda, Kenya (Fenton and Eger, 2002: 2), Republic of the Congo, Angola, Namibia, Botswana, Zimbabwe, Zambia.

Geographic variation:

Unknown.

General description of external morphology:

See Fenton and Eger (2002).

General description of cranial and dental morphology:

See Fenton and Eger (2002).

Detailed morphology:

For a description of the crania, teeth, ears and tragus see Fenton and Eger (2002).

Functional morphology:

Unknown.

Sexual dimorphism:

Sexual dimorphism in the structure of interaural crest, with females having a small crest (3-5 mm) and males a long, bicolored one (12-15 mm) (Fenton and Eger 2002).

Echolocation:

See Taylor (1999).

Molecular biology:

DNA - Unknown.

Karyotypic - Rautenbach *et al.* (1993) reported $2n = 48$, FN = 64, BA = 18, a subtelocentric X chromosome, and an acrocentric Y chromosome, for specimens from Namibia and Zimbabwe.

Protein / allozyme - Unknown.

Habitat:

See Fenton and Eger (2002).

Habits:

See Fenton and Eger (2002).

Roost:

See Fenton and Eger (2002).

Migration:
Unknown.

Diet:
Unknown.

Predators:
Unknown.

Population:
Structure and density - Unknown.

Life-span:
Unknown.

Activity and behaviour:
See Fenton and Eger (2002).

Reproduction and ontogeny:
See Fenton and Eger (2002).

Mating:
Unknown.

Post-natal development:
Unknown.

Parasites:
Unknown.

Viruses:
Unknown.

Utilization:
Unknown.

Anthropophilous:
Unknown.

Figure 100. Distribution of *Chaerephon chapini*

Distribution based on voucher specimens:
Congo (Democratic Republic of the), Namibia,
Zimbabwe.

Chaerephon gallagheri (Harrison, 1975)

- *1975. *Tadarida (Chaerephon) gallagheri* Harrison, Mammalia, 39 (2): 313. Type locality: Democratic Republic of the Congo: Kivu, 30 km SW Kindu, Scierie Forest [03 10 S 25 46 E]. Type specimen: BMNH (ex HZM 1.7797, ad M, collector Major M.D. Gallagher, 14 November 1974).

? *Chaerephon gallagheri*: Name combination.

Taxonomy:

See Simmons (2005).

Common names:

English: Gallagher's Wrinkle-lipped Bat,
Gallagher's free-tailed bat, Zaïre gland-tailed bat.

French: Molosse du Zaïre.

Etymology of name:

In honour of Major M.D. Gallagher, the collector of the type specimen.

Conservation status:

Global- CE (Billie and Groombridge 1996); CR: B1+2c (Mickleburgh *et al.*, 2002: 22); CR D ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004q).

General distribution:

Democratic Republic of the Congo.

Distribution based on voucher specimens:

[Congo \(Democratic Republic of the\)](#).

Figure 101. Distribution of *Chaerephon gallagheri*

Chaerephon jobimena Goodman and Cardiff, 2004

- *2004. *Chaerephon jobimena* Goodman and Cardiff, Acta Chiropt., 6(2): 230, fig 2, 3, 4. Type locality: Madagascar: Antsiranana province, Ankarana special reserve, 2.6 km E Andrafiabe, in forest near Andrafiaba cave [12 55.9 S 49 03.4 E, c 50 m]. Type specimen: FMNH 169716 (ad M, skin and skull, collector Steven M. Goodman, collection date 23 January 2001, original number SMG 11932; see Goodman and Cardiff (2004: 230)

Etymology of name:

From the northern dialects of Malagasy, with "joby" meaning dark or black and "mena" red. The combination refers to the two color morphs of this species (see Goodman and Cardiff, 2004: 230).

General distribution:

Madagascar.

Chaerephon leucogaster (A. Grandidier, 1869)

- *1869. *Nyctinomus leucogaster* A. Grandidier, Rev. Mag. Zool., ser. 2, 21: 337. Type locality: Madagascar: Mahab (?Mahabo) and Ménabé (E of Morondava). Publication date: September 1869.
1908. *Chaerephon pumila websteri* Dollman, Ann. Mag. nat. Hist., ser. 8, 2 (10): 546. Type locality: Nigeria: N Nigeria, Yola. Type specimen: BMNH 1908.10.6.8 (F, skin and skull, collector: G.W. Webster collection date: 27 July 1908 original number: 11) Publication date: 1 December 1908.
1908. *Chaerephon websteri*: Dollman, Name combination.
1917. *Chærephon (Lophomops) cristatus* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 463, text-fig. 10 A, B. Type locality: Democratic Republic of the Congo: Bas Zaire, near mouth of Zaire River, Boma. Type specimen: AMNH 48844 (ad M, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 26 January 1915, original number 2628). Publication date: 29 September 1917.
1917. *Chærephon frater* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 456. Type locality: Democratic Republic of the Congo: Bas Zaire, near Boma, Malela. Type specimen: AMNH 49275 (ad F, alcoholic, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 8 July 1915, original number 2613). Publication date: 29 September 1917.
1928. *Chaerophon (Lophomops) nigri* Hatt, Bull. Soc. Zool. Fr., 53: 374, text-fig. B. Type locality: Mali: Timbuctu district, on Niger River, Bourem. Type specimen: MNHN 736a (ad M, alcoholic, collector: Th. Monod, collection date :6 January 1928). Publication date: 10 December 1928.
- ? *Chaerephon leucogaster*: Name combination.

Taxonomy:

Included in *pumilus* by Koopman (1993a: 233), Bouchard (1998: 1).

Considered a valid species in the genus *Tadarida* (C.) by Peterson *et al.* (1995: 152) and Russ *et al.* (2001). Considered a valid species in the genus *Chaerephon* by Hutson *et al.* (2001: 33), Goodman and Cardiff (2004: 227), Lavrenchenko *et al.* (2004: 141), and Simmons (2005).

Russ *et al.* (2001) distinguish it from *C. pumilus* on smaller size and different echolocation calls.

Common names:

English: Grandidier's Free-tailed Bat,
Madagascan white-bellied Free-tailed Bat.
French: Tadaride de Madagascar à ventre blanc.

Etymology of name:

From the Greek "*leugos*" and "*gaster*" meaning white-bellied (see Kozhurina, 2002: 16).

Conservation status:

Global- DD ver 2.3 (1994).

General distribution:

Ethiopia to Ghana, Nigeria, Congo (Democratic Republic of the Congo?), Mali, Madagascar (Russ *et al.*, 2001).

Figure 102. Distribution of *Chaerephon leucogaster*

Distribution based on voucher specimens:

Congo (Democratic Republic of the), Nigeria.

Chaerephon major (Trouessart, 1897)

- *1897. *Nyctinomus pumilus var. major* Trouessart, Cat. Mamm. Viv. Foss., ed. 1, pt. 1: 146. Type locality: Sudan: N Sudan, 5th Cataract of the Nile (Kock (1969: 148) mentions "Nilus super = 5. Nil-Katarakt, nördlich Berber, Sudan". He also states that De Winton (1901: 40) changed the type locality in "erster Kakarakt der Nil"). Type specimen: BMNH 1849.2.8.36 (collected by F. Galton Esq.) Publication date: 1897.
1901. *Nyctinomus emini* de Winton, Ann. Mag. Nat. Hist., ser. 7, 7 (37): 40. Type locality: Tanzania: "Mosambiro", but actually Usambiro. Type specimen: BMNH 1890.6.8.15 (M, skin and skull, collection date 9 September 1889 notes: Triden tur sea frequent amongst the roc. local name- Katunke'.) Publication date: 1 January 1901.
1917. *Chærephon (Lophomops) abæ* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 464, text-fig., 11. Type locality: Democratic Republic of the Congo: NE Congo, Aba. Type specimen: AMNH 48887 (ad F, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 17 December 1911, original number 1823). Publication date: 29 September 1917.
1967. *Tadarida (Chaerephon) pumila*: Happold, Sudan Notes & Records, 48: 122. Pre-occupied by *pumilus* Cretzschmar, 1830 (see Simmons, 2005). Attribution to *major* seems strange.
- ? *Chaerephon major*: Name combination.

Taxonomy:

See Simmons (2005).

Common names:

English: Large Wrinkle-lipped Bat, Lappet-eared Wrinkle-lipped Bat, Lappet-eared free-tailed bat, Giant gland-tailed bat. French: Grand Molosse à glandes caudales.

Etymology of name:

From the Latin "*maior*" (see Kozhurina, 2002: 16).

Conservation status:

Global- LR/lc (Billie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004u).

General distribution:

Liberia, Mali, Burkina Faso, Ghana, Togo, Nigeria, Niger, Benin (Capo-Chichi *et al.*, 2004: 163), Sudan, NE Democratic Republic of the Congo, Uganda (Kityo and Kerbis, 1996: 63), Tanzania.

Figure 103. Distribution of *Chaerephon major*

Distribution based on voucher specimens:
Congo (Democratic Republic of the), Nigeria,
Tanzania.

Chaerephon nigeriae Thomas, 1913

- *1913. *Chærephon nigeriae* Thomas, Ann. Mag. nat. Hist., ser. 8, 11 (63): 319. Type locality: Nigeria: Northern Region, Zaria Province. Type specimen: BMNH 1911.3.22.1 (ad F, collected and presented by A.C. Francis, Esq.). Publication date: 1 March 1913.

Taxonomy:

See Willis *et al.* (2002, Mammalian Species, 710).

Common names:

Afrikaans: Nigeriese Iosstertvlermuis. English: Nigerian Free-tailed bat, Nigerian Wrinkle-lipped Bat. French: Molosse du Nigéria.

Etymology of name:

The species was originally described from a specimen from Nigeria (see Taylor 2005).

Conservation status:

Global- LR/lc (Billie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004n).

Regional assessment- South Africa- considered a vagrant not assessed, not recorded in SA (Friedmann and Daly 2004).

General distribution:

Guinea, Sierra Leone, Ghana, Côte d'Ivoire (1st record: Beaucournu and Fahr, 2003: 157), but see Al-Jumaily, 2003), and Niger to Saudi Arabia (record by Nader and Kock, 1979), Yemen and Ethiopia, south to Malawi (1st record: Happold and Happold, 1997: 823), Namibia, Botswana, Zambia (Cotterill, 2004: 261) and Zimbabwe.

1st Yemen record: see Al-Jumaily (2003: 55), who also maps specimens from: Guinea, Sierra Leone, Mali, Côte d'Ivoire, Ghana, Togo, Niger, Nigeria, Chad, Central African Republic, Congo (Zaire), Uganda, Ethiopia, Tanzania, Malawi, Zambia, Zimbabwe, Angola, Namibia, Botswana.

Echolocation:

See Taylor (1999).

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach *et al.* (1993) reported $2n = 48$, FN = 62, BA = 16, a submetacentric X chromosome, and an acrocentric Y chromosome, for specimens from Namibia and Zimbabwe

Figure 104. Distribution of *Chaerephon nigeriae*

Distribution based on voucher specimens: Cameroon, Namibia, Nigeria, South Africa, Zambia, Zimbabwe.

Chaerephon nigeriae nigeriae Thomas, 1913

- *1913. *Chærephon nigeriae* Thomas, Ann. Mag. Nat. Hist., ser. 8, 11 (63): 319. Type locality: Nigeria: Northern Region, Zaria Province. Type specimen: BMNH 1911.3.22.1 (Holotype, ad F, collected and presented by A.C. Francis, Esq.). Publication date: 1 March 1913.
- ? *Chaerephon nigeriae nigeriae*: Name combination.

General distribution: Sub-Saharan Africa to NE Zaire: see Horáček *et al.* (2000: 137). E Côte d'Ivoire, Ghana, Benin, Cameroon, Central African Republic to NE Togo, Nigeria, Cameroon, Central African Democratic Republic of the Congo; Niger; Chad; Ethiopia; Saudi Arabia (Harrison and Bates, 1991: 64). Willis *et al.* (2002: 2).

Chaerephon nigeriae spillmanni (Monard, 1933)

- *1933. *Nyctinomus spillmanni* Monard, Bull. Soc. Neuchâteloise Sci. Nat., Neuchâtel, 57: 51. Type locality: Angola: South-Central Angola, Vila da Ponte. Publication date: 1933.
1993. *spillmanni* Koopman, Chiroptera, in Mammal Species of the World: 223. Lapsus.
- ? *Chaerephon nigeriae spillmanni*: Name combination.

General distribution: 2002: 2), Zambia (Willis *et al.*, 2002: 2), S Southern Africa (Angola (Horáček *et al.*, 2000: 137), Namibia (Willis *et al.*, 2002: 2), Botswana (Willis *et al.*, (2002: 2), Zimbabwe (Willis *et al.*, 2002: 2), Tanzania (Horáček *et al.*, 2000: 137).

Chaerephon pumilus (Cretzschmar, 1826)

- *1826. *Dysopes pumilus* Cretzschmar, in Rüppell, Atlas Reise Nördl. Afr., Zool. Säugeth., 1: 69, pl. 27a. Type locality: Eritrea: Massawa. Type specimen: SMF 4311 (Lectotype; ad M, mounted skin, skull not removed; coll. E. Rüppell, 1825; old catalog II.K.3.a: see Mertens, 1925: 20).
1838. *Nyctinomus pusilus* Lesson, Compléments de Buffon, ed. 2, Paris, 1: 328. Publication date: 1838.
1852. *Dysopes dubius* Peters, Naturw. Reise Mossamb., Säugethiere, p. 60, pl. 15, fig. 2. Type locality: Mozambique: South bank of Zambezi River, Sena. - Publication date: 1852. Pre-occupied by *dubius* A. Smith, 1833 (see Simmons, 2005). Allen (1939a: 111) also mentioned *Nyctinomus dubius* A. Smith, 1833 as a separate species.
1852. *Dysopes limbatus* Peters, Naturw. Reise Mossamb., Säugethiere, p. 56, pl. 14. Type locality: Mozambique: Mozambique Island [15 S 40 42 E] (Roberts (1951: 98) mentioned "Mozambique Island and Sena"). Type specimen: BMNH 1907.1.1.704 (Syntype). Publication date: 1852. Possibly valid as a subspecies. Considered a valid species by Peterson *et al.* (1995: 159).
1901. *Nyctinomus gambianus* de Winton, Ann. Mag. Nat. Hist., ser. 7, 7 (37): 39. Type locality: Gambia: no specific locality. Type specimen: BMNH 1889.10.7.3. Publication date: 1 January 1901.
1902. *Nyctinomus pusillus*: Miller, Lapsus?
1904. *Nyctinomus hindei* Thomas, Ann. Mag. Nat. Hist., ser. 7, 13 (75): 210. Type locality: Kenya: Fort Hall [4 000 ft (=1 219 m)]. Type specimen: BMNH 1903.3.2.4 (Holotype, ad M, collected and presented by Mrs. Hildegard Hinde, collection date: 1 January 1903, original number 134). Publication date: 1 March 1904. Possibly valid as a subspecies. Considered a valid species by Peterson *et al.* (1995: 159).
1916. *Chaerephon pumilus naivashæ* Hollister, Smithson. Misc. Coll., 66 (1) (2406): 4. Type locality: Kenya: Naivasha Station. Type specimen: USNM 166658 (ad M, alcoholic and skull, collector J. Alden Loring, collection date: 7 August 1909, original number 6955). Publication date: 10 February 1916. Considered a valid species by Peterson *et al.*

- (1995: 157).
1926. *Chaerophon pumilus elphicki* Roberts, Ann. Transv. Mus., 11: 245. Type locality: Republic of South Africa: SE Transvaal, Barberton District, Malelane Estate [2529S 3131E]. Type specimen: TM 2488 (ad M, skin and skull, collected by Austin Roberts, collection date: 30 March 1920) Publication date: 14 September 1926.
1932. *Chaerephon (Lophomops) langi* Roberts, Ann. Transv. Mus., 15 (1): 17. Type locality: Botswana: N Botswana, Ngamiland, Tsotsoroga Pan [18 44 S 24 21 E]. Type specimen: TM 6554 (ad M, skin and skull, collected during the Vernay-Lang Kalahari Expedition 1930, collection date: 29 June 1930, original number: 870). Publication date: 1 October 1932. Possibly valid as a subspecies.
1951. *Tadarida (Chaerephon) faini* Hayman, Rev. Zool. Bot. afr., 45 (1-2): 82. Type locality: Democratic Republic of the Congo: Haut Zaire, Oriental Province, between Blukwa and Lake Albert, Wago Forest. Type specimen: RMCA 20509 (M, skin and skull, collector Fain, collection date 1 June 1951). Possibly valid as a subspecies.
- ? *Chaerephon pumilus elphicki*: Name combination.
- ? *Chaerephon pumilus*: Name combination.
- ? *Tadarida (Chaerephon) pumila*: Name combination.
- ? *Tadarida pumila*: Name combination.

Taxonomy:

See Bouchard (1998, Mammalian Species, 574). Includes *pusillus*; see Hayman and Hill (1971: 64). The description date is sometimes mentioned as "1830 or 1831" (see Happold and Happold, 1997: 823). Peterson *et al.* (1995: 162) consider *pumilus* not to include most of the forms occurring on Madagascar. Horáček *et al.* (2000: 136) include *pumilus* in the genus *Tadarida*, subgenus *Chaerephon*. Taylor (1999), Aspetsberger *et al.* (2003: 250; 252) indicate that cryptic species might exist within the genus *Chaerephon* (more specifically in *pumilus*), but find it premature identify them already. Jacobs *et al.* (2004: 17) identified five haplotypes, but indicate they represent only one species.

Figure 105. *Chaerephon pumilus*

Common names:

Afrikaans: Klein losstertvlermuis. English: Little Free-tailed Bat, Lesser Free-tailed Bat, Little Wrinkle-lipped Bat. French: Petit molosse à glandes caudales. Portuguese: Morcego pequeno de cauda livre.

Etymology of name:

From the Latin "*pumilus*" meaning dwarf, because it is the smallest of the molossids occurring in the (southern African sub)region (see Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) assessed as *Chaerephon pumila* (IUCN 2004; Mickleburgh *et al.* 2004p). Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Senegal, Gambia (Emms and Barnett, 2005: 50), over Mali (Meinig, 2000: 105), Benin (Capo-Chichi *et al.*, 2004: 164), Republic of the Congo (Dowsett *et al.*, 1991: 259), Uganda (Kityo and Kerbis, 1996: 62) to Ethiopia (Lavrenchenko *et al.*, 2004: 132), Yemen, south to South Africa (incl. Malawi (Ansell and Dowsett, 1988: 46), Botswana, Namibia, Zambia, Zimbabwe (Cotterill, 2004: 261)); Bioko; São Tomé (Juste and Ibáñez, 1993: 906); Pemba and Zanzibar; Comoro Isls Aldabra and Amirante Isls (Seychelles); E Madagascar Russ *et al.*, 2001).

Records from Western Cape Province are rejected by Jacobs and Fenton (2001: 134), since these represent *Sauromys petrophilus*.

Echolocation:

See Aspetsberger *et al.*, (2003), Fenton *et al.*, (2004), Taylor (1999) and Taylor *et al.*, (2005).

Molecular biology:

DNA - Unknown.

Karyotype - Dulic and Mutere (1973a), Smith *et al.* (1986) and Rautenbach *et al.* (1993) all reported $2n = 48$, and an acrocentric Y chromosome. However, while Dulic and Mutere

(1973a) and Smith *et al.* (1986) reported FN = 58, BA = 12, Rautenbach *et al.* (1993) reported FN = 66, BA = 20. And, while Dulic and Mutere (1973a) and Rautenbach *et al.* (1993) reported a metacentric X chromosome, Smith *et al.* (1986) reported a submetacentric X chromosome. The work of Rautenbach *et al.* (1993) included specimens from the Western Cape that have subsequently been reidentified as *Sauromys petrophilus* (Jacobs and Fenton, 2001: 134), hence these karyotypic variations should be viewed with caution.

Protein / allozyme - Unknown.

Distribution based on voucher specimens: "Africa", Botswana, Cameroon, Comoro Islands, Congo (Democratic Republic of the), Equatorial Guinea, Eritrea, Ethiopia, Kenya, Madagascar, Malawi, Mozambique, Senegal, South Africa, Swaziland, Tanzania, The Gambia, Zimbabwe.

Figure 106. Distribution of *Chaerephon pumilus*

Chaerephon russatus J.A. Allen, 1917

*1917. *Chærephon russatus* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 458, text fig. 25. Type locality: Democratic Republic of the Congo: Oriental, Medje. Type specimen: AMNH 48925 (ad M, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date 8 September 1910). Publication date: 29 September 1917.

? *Chaerephon russatus*: Current spelling.
 ? *Tadarida russata*: Name combination.

Taxonomy:

See Simmons (2005).

Common names:

English: Russet Wrinkle-lipped bat, Russet free-tailed bat. French: Tadaride de Russet.

Conservation status:

Global- LR/lc (Billie and Groombridge 1996); NT ver 3.1 (2001) assessed as *C. russata* (IUCN 2004; Mickleburgh *et al.* 2004r).

General distribution:

Ghana, Côte d'Ivoire (1st record: Beaucournu see Fahr, 2003: 157), Cameroon, Democratic Republic of the Congo, Kenya.

Distribution based on voucher specimens:

Congo (Democratic Republic of the).

Figure 107. Distribution of *Chaerephon russatus*

Chaerephon tomensis (Juste and Ibáñez, 1993)

- *1993. *Tadarida (Chaerephon) tomensis* Juste and Ibáñez, J. Mamm., 74 (4): 901. Type locality: São Tomé and Príncipe: São Tomé Island, 3 km NW Guadalupe, Praia das Conchas. Type specimen: EBD 18256 (F).

Taxonomy:

See Simmons (2005).

Common names:

English: São Tomé Free-tailed Bat. French: Tadaride de Sao Tome.

Etymology of name:

Referring to the island of São Tomé, where the species occurs.

Conservation status:

Global- VU (Billie and Groombridge 1996); CR B1ab(i,iii) ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.* 2004ab).

General distribution:

São Tomé Island.

Distribution based on voucher specimens:

São Tomé and Príncipe.

Figure 108. Distribution of *Chaerephon tomensis*

Genus *Mops* Lesson, 1842

- *1842. *Mops* Lesson, Nouv. Tabl. Regn. Anim. Mammifères, p. 18. Type species: *Mops indicus* Lesson, 1842 (= *Molossus mops* de Blainville, 1840; Genotype *Mops indicus* Lesson = *Dysopes mops* F. Cuvier; listed in synonymy of *Nyctinomus* by Miller, 1907, Bull. U.S. Nat. Mus., 57, p. 251; but listed as a genus with distinct characters by Thomas, 1913, J. Bombay Nat. Hist. Soc., 22, p. 91). Publication date: 1842.

Taxonomy:

Formerly included in *Tadarida*; for synonyms see Freeman (1981: 158). See also Legendre (1984). Harrison and Bates (1991: 64), Ansell and Dowsett (1988: 45), Corbet and Hill (1992: 157), Grubb *et al.* (1998: 93) and Horáček *et al.* (2000: 137), who include *Mops* as subgenus in *Tadarida*. A key is provided by Dunlop (1999: 1, Mammalian Species, 615).

Common names:

English: Mops Bats, Greater Free-tailed Bats, Mops Free-tailed Bats

Subgenus *Mops (Mops)* Lesson, 1842

- *1842. *Mops* Lesson, Nouv. Tabl. Regn. Anim. Mammifères, p. 18. Type species: *Mops indicus* Lesson, 1842 (= *Molossus mops* de Blainville, 1840; Genotype *Mops indicus* Lesson = *Dysopes mops* F. Cuvier; listed in synonymy of *Nyctinomus* by Miller, 1907, Bull. U.S. Nat. Mus., 57, p. 251; but listed as a genus with distinct characters by Thomas, 1913, J. Bombay Nat. Hist. Soc., 22, p. 91). Publication date: 1842.
1917. *Allomops* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37: 470, text-fig. 12-15. Type species: *Chærephon (Allomops) osborni* Allen, 1917 (= *Nyctinomus condylurus* A. Smith, 1833). Publication date: 29 September 1917.
1951. *Tadarida (Mops)*: Ellerman and Morrison-Scott, Name combination.
- ? *Mops (Mops)*: Name combination.

Mops (Mops) condylurus (A. Smith, 1833)

- *1833. *Nyctinomus condylurus* A. Smith, S. Afr. Quart. J., ser. 2, 1 (2): 54. Type locality: Republic of South Africa: Port Natal [=Natal, Durban]. Publication date: November 1833.
1864. *Dysopes hepaticus* Heuglin, Nova Acta Acad. Cæs. Leop.-Carol., Halle, 31 (7): 14. Type locality: Sudan: Baher-el-Ghazal, Country of the Req natives to the Djur River. Meester *et al.* (1986: 74): "Allen (1939a), who regards it as a synonym of *bivittata*. Hayman and Hill (1971) regard it as unidentifiable, but point out that Kock (in litt) believes that it probably represents *condylurus*. The latter view is expressed also by Kock (1969) and Koopman (1975)".
1870. *Nyctinomus angolensis* Peters, J. Sci. mat. Phys. Nat., Lisboa, ser. 1, 3 (10): 124. Type locality: Angola: Quenza river. - Publication date: December 1870. Considered a synonym of *leucostigma* by Peterson *et al.* (1995: 168). Roberts (1951: 97), Ansell and Dowsett (1988: 47), assigned it to Gunther, 1870, 1871. According to Meester *et al.* (1986: 74) "Günther 1871, Zoological Record (1870): 8. Quenza River [= "Cuanza River], Angola. Usually wrongly attributed to Peters, 1870, but see Cabrera and Ruxton, Ann. Mag. Nat. Hist., (9) 17: 595, 1926." According to Peterson *et al.* (1995): "Kaudern, 1915: Ark. Zool., 9 (18): 77", but Peters, 1870 according to Simmons (2005).
1911. *Chaerephon emini* Wroughton, Ann. Mag. nat. Hist., ser. 8, 8 (46): 458. Type locality: Sudan: Rosieres. Publication date: 1 October 1911. Not of de Winton, 1901: see Meester *et al.* (1986: 74)
1917. *Mops (Allomops) osborni*: J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 470, 473, text-fig. 12-14, 26. Type locality: Democratic Republic of the Congo: Kinshasa, near Leopoldville. Type specimen: AMNH 49230 (ad M, alcoholic and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 22 December 1914, original number 2570). Publication date: 29 September 1917.

1936. *Mops angolensis wonderi* Sanborn, Field Mus. Nat. Hist., Zool. ser., 20: 114. Type locality: Mali: 7 km E Bamako, Sotuba. Publication date: 15 August 1936. Considered a valid subspecies by Grubb *et al.* (1998: 93).
1939. *Mops osborni occidentalis* Monard, Arq. Mus. Bocage, Lisboa, 10: 78. Type locality: Guinea Bissau: Mansoa [12 04 N 15 19 W], Contubo-el [12 22 N 14 34 W] or Pitche [12 20 N 13 57 W] (Monard (1939: 78) does not mention a holotype, but a series of specimens from Mansoa (14), Cotubo-el (5) and Pitche (9)). Type specimens: NMBE 5268, 5269 (syntypes, 2 M, original numbers 226, 275, collection date: 11-12 December 1937; see Oakeley (1998: 2)); RMCA 15307 (M, alcoholic, collector Monard, original number 223, collection date 1937; RMCA 15308 (F, alcoholic, collector Monard, original number 498); RMCA 15309 (M, alcoholic, collector Monard, original number 229). Monard (1939: 78) mentions a larger series: nrs 215 to 227, 275 (13 MM + 1 F from Mansoa); 494 to 498 (1 M + 4 FF from Contubo-el; 77. Publication date: March 1939.
1939. *Mops osborni occidentalis f. fulva* Monard, Arq. Mus. Bocage, Lisboa, 10: 80. Type locality: Guinea Bissau: Mansoa [12 04 N 15 19 W] or Pitche [12 20 N 13 57 W]. Type specimen: NMB 5270 (syntype, 1 F, alcoholic, original number 232, collection date: 11-12 December 1937). Grubb *et al.* (1998: 93) indicate that Monard's quadrinomial name was validated, in accordance with International Code of Zoological Nomenclature Article 45 (g)(ii)(1), by its use as a trinomial (Freeman, 1981: 159). Monard (1939: 80) mentions a series of 10 specimens (nrs 228 to 237, 5 MM + 5 FF) from Mansoa and 1 M (nr 781) from Pitche. Publication date: March 1939.
1942. *Mops angolensis orientis* G.M. Allen and Loveridge, Bull. Mus. comp. Zool., 89 (4): 166. Type locality: Tanzania, SE Tanzania, Mtwara, Rovuma river, Kitaya. Type specimen: MCZ 38829 (holotype, ad M, skin and skull, collector: Arthur Loveridge, collection date: 3 April 1939 (see Allen and Loveridge 1942: 166). Helgen and McFadden (2001: 146) also mention 9 paratypes. Possibly valid as a subspecies.
1942. *orientis* G.M. Allen and Loveridge, Bull. Mus. comp. Zool., 89 (4): xxx. Possibly valid as a subspecies
1981. *Mops osborni fulva*: Freeman, Field. Zool., n.s. 7: 159. Name combination.
- ? *Chaerephon (Allomops) osborni*: Name combination.
- ? *Mops (Mops) condylurus*: Name combination.
- ? *Mops condylurus orientis*: Name combination.

Taxonomy:

Includes *angolensis* and *leucostigma*, but see Peterson *et al.*, (1995: 168).

Common names:

Afrikaans: Angola-losstertvlermuis, Angolase Losstertvlermuis. English: Angolan Mops Bat, Knob-tailed Mops Bat, Angolan Free-tailed Bat. French: Tadaride d'Angola, Molosse d'Angola. Portuguese: Morcego de cauda livre.

Etymology of name:

From "*condylurus*" meaning knob tailed. Originally described from the former Natal province, it might more appropriately have been called the Natal free-tailed bat, but this name is taken by *Mormopterus acetabulosus*.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ax).
Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Senegal over Benin (Capo-Chichi *et al.*, 2004: 163), Republic of the Congo (Dowsett *et al.*, 1991: 259), Uganda (Kityo and Kerbis, 1996: 62) to Ethiopia (Lavrenchenko *et al.*, 2004: 141), Somalia, south to Malawi (Happold and Happold, 1997: 823), Angola, Botswana, Namibia, Zambia, Zimbabwe (Cotterill, 2004: 260) and KwaZulu-Natal (South Africa); Madagascar.

Echolocation:

See Taylor (1999).

Molecular biology:

DNA - Unknown.
Karyotype - Dulic and Mutere (1973a) described the karyotype as having a diploid number of $2n=48$, $aFN=56$, $BA=10$, $X=SM$, $Y=A$. While Smith *et al.*, (1986) found that the fundamental number was $aFN=66$, $BA=20$, this is supported by Rautenbach *et al.*, (1993).
Protein / allozyme - Unknown.

Distribution based on voucher specimens:
 Angola, Cameroon, Congo (Democratic Republic of the), Ethiopia, Gabon, Guinea-Bissau, Malawi, Mozambique, South Africa, Swaziland, Tanzania, Uganda, Zambia, Zimbabwe.

Figure 109. Distribution of *Mops (Mops) condylurus*

***Mops (Mops) congicus* J.A. Allen, 1917**

*1917. *Mops congicus* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 467, pl. 55. Type locality: Democratic Republic of the Congo: Oriental, Medje. Type specimen: AMNH 48893 (ad F, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 8 September 1910, original number 966). Publication date: 29 September 1917.

? *Mops (Mops) congicus*: Name combination.

Taxonomy:

Does not include *trevori*; see Peterson (1972).

Common names:

English: Medje Mops Bat, Medje free-tailed bat, Medje Greater Free-tailed Bat. French: Tadaride de Medje.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bz).

General distribution:

Ghana, Nigeria, Cameroon, Democratic Republic of the Congo, Uganda, perhaps Gambia.

Distribution based on voucher specimens:

Congo (Democratic Republic of the).

Figure 110. Distribution of *Mops (Mops) congicus*

Mops (Mops) demonstrator (Thomas, 1903)

- *1903. *Nyctinomus demonstrator* Thomas, Ann. Mag. nat. Hist., ser. 7, 12 (71): 504. Type locality: Sudan: Equatoria province, 25 mi (37 km) N of Gondokoro, Mongalla. Type specimen: BMNH 1902.7.4.3 (ad M, collected and presented by W.L. Loat, Esq.). Publication date: 1 November 1903.
1917. *Mops (Allomops) faradjius* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 476. Type locality: Democratic Republic of the Congo: NE Congo, Faradje. Type specimen: AMNH 49222 (ad M, alcoholic, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 1 November 1913, original number: 3015). Publication date: 29 September 1917.
- ? *Mops (Mops) demonstrator*: Name combination.
- ? *Mops demonstrator*: Name combination.

Taxonomy:

See Simmons (2005).

Common names:

English: Mongalla Mops Bat, Mongallan Mops Bat, Mongalla free-tailed bat. French: Tadaride de Mongalla.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cz).

General distribution:

Sudan, Democratic Republic of the Congo, Uganda, Burkina Faso.

Distribution based on voucher specimens:

Congo (Democratic Republic of the), Sudan.

Figure 111. Distribution of *Mops (Mops) demonstrator*

Mops (Mops) leucostigma (G.M. Allen, 1918)

- *1918. *Chaerephon leucostigma* G.M. Allen, Bull. Mus. comp. Zool., 61 (4): 513. Type locality: Madagascar: Tananarive. Type specimen: MCZ 16344 (holotype, M, skin and skull; collector: F.R. Wulsin; collection date: December 1915; see Peterson *et al.*, 1995: 168; Helgen and McFadden, 2001: 145). Helgen and McFadden (2001: 145) also mention a paratype (MCZ 16345; M; skin and skull). Publication date: 27 February 1918.

? *Mops (Mops) leucostigma*: Name combination.

? *Mops leucostigma*: Name combination.

Taxonomy:

Included in *condylurus* by Koopman (1993a: 236), but considered a valid species in *Tadarida (M.)* by Peterson *et al.* (1995: 152) and Russ *et al.* (2001). Considered a valid species in the genus *Mops* by Hutson *et al.* (2001: 34), Goodman and Cardiff (2004: 227), Simmons (2005).

Conservation status:

Global- DD ver 2.3 (1994).

General distribution:

Madagascar.

Distribution based on voucher specimens:

Madagascar.

Common names:

English: Madagascar White-bellied Free-tailed Bat.

Mops (Mops) midas (Sundevall, 1843)

- *1843. *Dysopes midas* Sundevall, Kongl. Svenska Vet.-Akad. Handl. Stockholm, ser. 3, 30: 207, pl. 2, fig. 7 [for 1842]. Type locality: Sudan: Blue Nile, White Nile River, West bank, Jebel el Funj [c 11 45 N 33 30 E] (Horáček *et al.* (2000: 137) mention "Bahr-el-Abiad, White Nile". Meester *et al.* (1986: 73): "Bahr-el-Abiad (White Nile), Sudan. Kock (1969: 154) suggests that the type locality is at Jebel el Funj, between the White and Blue Nile, and Koopman (1975 and in litt.) restricts it to the east (not west, as shown in 1975: 429) bank of the White Nile at 11 45 N 33 30 E, Blue Nile Province, Sudan."). Type specimens: BMNH 1846.6.2.20 (Syntype, ex Stockholm Museum (ZSM no. 523), skin and skull, locality: Bahr el Abiad). Publication date: 1843.

? *Mops (Mops) midas*: Name combination.

? *Mops midas*: Name combination.

Taxonomy:

Dunlop (1999) following Koopman (1994) recognizes two subspecies: *M. m. midas* (Sundevall 1843: 207) occurring over most of the range and *M. m. miarensis* (Grandidier, 1869: 337) occurring in Madagascar (Peterson *et al.*, 1995).

Common names:

Afrikaans: Midas se losstertvlermuis, Midas-losstertvlermuis. English: Midas Mops Bat, Midas Bat, Midas Free-tailed Bat, Sundevall's Free-tailed Bat. French: Tadaride de Midas, Molosse de Midas.

Palaeontological / archaeological records:

No known fossils (Dunlop 1999).

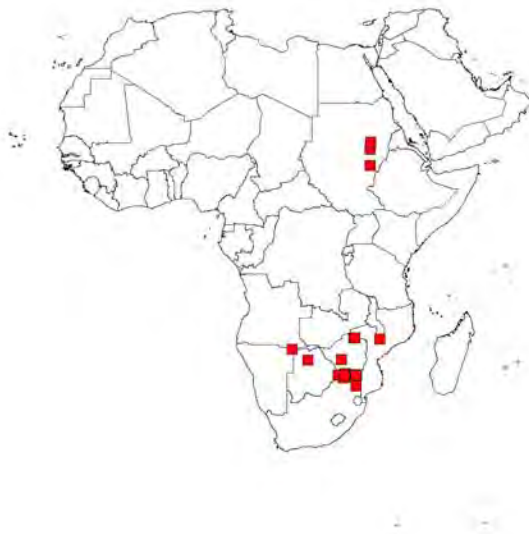

Figure 112. *Mops (Mops) midas*

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004be).

Regional- South Africa- Indeterminate (Smithers

- 1986); LC ver 3.1 (2001) (Friedmann and Daly 2004).
- General distribution:
Senegal over Eritrea (Lavrenchenko *et al.*, 2004: 133) to Saudi Arabia, south to Botswana, Namibia (?) (Cotterill, 2004: 260), Zambia (Cotterill, 2004: 260), Malawi (Ansell and Dowsett, 1988: 47), and Transvaal (South Africa); Madagascar.
- Geographic variation:
Unknown.
- General description of external morphology:
See Dunlop (1999).
- General description of cranial and dental morphology:
See Dunlop (1999).
- Detailed morphology:
For a description of the crania, teeth, ears and tragus, and wingshape and aspect ratio see Dunlop (1999).
- Functional morphology:
Unknown.
- Sexual dimorphism:
Sexual dimorphism in *M. midas* occurs primarily in the stronger development of the sagittal and lambdoidal crests (Kingdon 1974; Smithers 1983; Dunlop 1999), as well as the greater length and width of the skull (Peterson *et al.*, 1995) in males.
- Echolocation:
See Dunlop (1999) and Taylor (1999).
- Molecular biology:
DNA - Unknown.
Karyotype - Smith *et al.*, (1986) described the karyotype as having a diploid number of $2n=48$, $aFN=66$, $BA=20$, $X=SM$, $Y=A$, this is supported by Rautenbach *et al.* (1993).
Protein / allozyme - Unknown.
- Habitat:
See Dunlop (1999).
- Habits:
See Dunlop (1999).
- Roost:
See Dunlop (1999).
- Migration:
May make local migrations, as they only appear in parts of their range (northeastern Congo) at the end of the dry season (Allen *et al.*, 1917; Dunlop 1999).
- Diet:
See Dunlop (1999).
- Predators:
Unknown
- Population:
Structure - Verschuren (1957) found females outnumbered males in the roost at a ratio of four to one.
Density - Smithers (1983) reported *M. midas* roosting in groups of up to several hundred; however, Verschuren (1957) only recorded groups of 10-20 individuals leaving roosts.
- Life-span:
Unknown.
- Activity and behaviour:
See Dunlop (1999).
- Reproduction and ontogeny:
See Dunlop (1999).
- Mating:
See Dunlop (1999).
- Post-natal development:
Unknown.
- Parasites:
A number of mites have been recorded for this species, including *Chelanyssus aethiopicus* (Family Macronyssidae) and *Nycteriglyhus tadaridae* (Family Rosensteiniidae) (Anciaux de Faveaux 1971; 1976). Bat fleas (Siphonaptera) have also been recorded (Dunlop 1999). *Lagaropsylla hoogstraali* (Ischnopsyllidae: Ischnopsyllinae) was found amongst a batch of fleas taken from *M. midas* in the Kruger National Park, South Africa in the Pafuri area (Segermann and Braack 1988).
- Viruses:
Unknown.
- Utilization:
Unknown.
- Anthropophilous:
Unknown.

Distribution based on voucher specimens:
 "Africa", Botswana, Madagascar, Malawi,
 Namibia, South Africa, Sudan, Zimbabwe.

Figure 113. Distribution of *Mops (Mops) midas*

Mops (Mops) midas miarensis (A. Grandidier, 1869)

- *1869. *Nyctinomus miarensis* A. Grandidier, Rev. Mag. Zool., ser. 2, 21: 337. Type locality: Madagascar: Between Soua-haze and Soua-hané [sic], Miari [probably Miary, near Tuléar]. Type specimen: MNHN 29 (ad F, alcoholic, skull not removed: see Peterson *et al.*, 1995: 174). Publication date: September 1869.
- 1870. *Nyctinomus unicolor* A. Grandidier, Rev. Mag. Zool., ser. 2, 22: 49. Type locality: Madagascar: no specific locality. Publication date: February 1870.
- ? *Mops (Mops) midas miarensis*: Name combination.
- ? *Mops midas miarensis*: Name combination.

General distribution:
 E, SW, S Madagascar.

Mops (Mops) midas midas (Sundevall, 1843)

- *1843. *Dysopes midas* Sundevall, Kongl. Svenska Vet.-Akad. Handl. Stockholm, ser. 3, 30: 207, pl. 2, fig. 7 [for 1842]. Type locality: Sudan: Blue Nile, White Nile River, West bank, Jebel el Funj [c 11 45 N 33 30 E] (Horáček *et al.* (2000: 137) mention "Bahr-el-Abiad, White Nile". Meester *et al.* (1986: 73): "Bahr-el-Abiad (White Nile), Sudan. Kock (1969: 154) suggests that the type locality is at Jebel el Funj, between the White and Blue Nile, and Koopman (1975 and in litt.) restricts it to the east (not west, as shown in 1975: 429) bank of the White Nile at 11 45 N 33 30 E, Blue Nile Province, Sudan."). Type specimen: BMNH 1846.6.2.20 (Syntype, ex Stockholm Museum (no. 523), skin and skull, locality: Bahr el Abiad). Publication date: 1843.
- ? *Mops (Mops) midas midas*: Name combination.
- ? *Mops midas midas*: Name combination.
- ? *Mops midas*: Name combination.

General distribution:
 Continental Africa; Arabia.

Mops (Mops) niangarae J.A. Allen, 1917

- *1917. *Mops niangarae* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 468. Type locality: Democratic Republic of the Congo: Oriental, Niangara. Type specimen: AMNH 48901 (ad M, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 12 December 1910, original number: 1313). Publication date: 29 September 1917.

? *Mops (Mops) niangarae*: Name combination.

Taxonomy:

Peterson (1972) included this species in *trevori*; Hayman and Hill (1971) listed it as a subspecies of *Tadarida congica* (= *Mops congicus*). Freeman (1981: 111, 159) considered it a distinct species pending collection of additional specimens.

Common names:

English: Niangara Mops Bat, Niangaran Mops Bat, Niangara free-tailed bat. French: Tadaride du Niangara.

Etymology of name:

Referring to the locality where the type specimen was found.

Conservation status:

Global- DD (Baillie and Groombridge 1996); CR: B1+2c (Mickleburgh *et al.*, 2002: 22); DD ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bl).

General distribution:

Known only from the holotype.

Figure 114. Distribution of *Mops (Mops) niangarae*

Distribution based on voucher specimens:

Congo (Democratic Republic of the).

Mops (Mops) niveiventer Cabrera and Ruxton, 1926

- *1926. *Mops angolensis niveiventer* Cabrera and Ruxton, Ann. Mag. nat. Hist., ser. 9, 17 (103): 594. Type locality: Democratic Republic of the Congo: Kasai Occidental, St. Joseph de Luluabourg [=Kananga] 610 m asl. Type specimen: BMNH 1926.7.6.109 (F, skin and skull, collection date 16 April 1924, original number: 409). Publication date: 1 May 1926.
1937. *Mops chitauensis* J.Eric Hill, Am. Mus. Novit., 916: 2, 3, text-fig. 1. Type locality: Angola: Chitau. Type specimen: AMNH 88116 (ad M, SS, collector Lee S. Bradley, collection date: 10 February 1933, original number 676). Publication date: 17 April 1937.
1975. *niveiventer* Fenton, Life Sci. Occ. Pap., R. Ont. Mus., 104: 23. Lapsus.
- ? *Mops (Mops) niveiventer*: Name combination.
- ? *Mops niveiventer*: Name combination.

Taxonomy:

Possibly a subspecies of *demonstrator*. Records from Botswana and Madagascar are definitely *condylurus*, see Meester *et al.* (1986: 74) and Hayman and Hill (1971: 61).

Common names:

English: White-bellied Mops Bat, White-bellied free-tailed bat. French: Tadaride à ventre blanc. Portuguese: Morcego de cauda livre de ventre branco.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Cotterill 2004f).

General distribution:

Democratic Republic of the Congo, Rwanda, Burundi, Tanzania, Angola, Zambia, Mozambique.

Figure 115. Distribution of *Mops (Mops) niveiventer*

Distribution based on voucher specimens:
Congo (Democratic Republic of the), Rwanda, Zambia.

Mops (Mops) trevori J.A. Allen, 1917

- *1917. *Mops trevori* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 469, pl. 48, fig. 2. Type locality: Democratic Republic of the Congo: Oriental, Faradje. Type specimen: AMNH 49250 (ad F, alcoholic, collector Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 29 September 1912, original number 1954). Publication date: 29 September 1917.
1996. *Mops trevoli* Kityo and Kerbis, J. East Afr. Nat. Hist., 85: 63. Lapsus.
- ? *Mops (Mops) trevori*: Name combination.

Taxonomy:

Formerly included in *niangarae*; see Freeman (1981: 111, 159).

Common names:

English: Trevor's Mops Bat, Trevor's free-tailed bat, Trevor's bat. French: Tadaride de Trevor.

Etymology of name:

In honour of John B. Trevor, a Trustee of the American Museum of Natural History and Chairman of the Committee on African Exploration, whose enthusiasm and generosity in support of the Congo Expedition contributed to its success (see J.A. Allen, 1917: 469).

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); VU A4c ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bd).

General distribution:

NW Democratic Republic of the Congo, Uganda (Kityo and Kerbis, 1996: 63).

Figure 116. Distribution of *Mops (Mops) trevori*

Distribution based on voucher specimens:
Congo (Democratic Republic of the).

Subgenus *Mops* (*Xiphonycteris*) Dollman, 1911

1911. *Xiphonycteris* Dollman, Ann. Mag. nat. Hist., ser. 8, 7 (38): 210. Type species: *Xiphonycteris spurrelli* Dollman, 1911. Publication date: 1 February 1911.
 ? *Mops* (*Xiphonycteris*): Name combination.
 ? *Tadarida* (*Xiphonycteris*): Name combination.

Mops* (*Xiphonycteris*) *brachypterus (Peters, 1852)

- *1852. *Dysopes brachypterus* Peters, Naturw. Reise Mossamb., Säugethiere, p. 59, pl. 15, fig. 1. Type locality: Mozambique: Mozambique Island [15 S 40 42 E]. Publication date: 1852.
 1908. *Nyctinomus leonis* Thomas, Ann. Mag. Nat. Hist., ser. 8, 2 (10): 373. Type locality: Sierra Leone: no specific locality. Type specimen: BMNH 1862.12.23.3 (Holotype, skin and skull, presented by J. Brown Esq.). Publication date: 1 October 1908.
 1917. *Nyctinomus ochraceus* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 455. Type locality: Democratic Republic of the Congo: NE Congo, Medje. Type specimen: AMNH 48821 (ad F, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 16 March 1910, original number 745). Publication date: 29 September 1917.
 ? *Mops* (*Xyphonycteris*) *brachypterus*: Name combination.
 ? *Mops brachypterus*: Name combination.

Taxonomy:

Includes *leonis*; see El-Rayah (1981: 6).

Common names:

English: Sierra Leone Mops Bat, Short-winged Mops Bat, Sierra Leone free-tailed bat, White-fingered free-tailed bat. French: Tadaride à doigts blancs.

Etymology of name:

From the Greek "*brachypterus*" meaning short winged.

Conservation status:

Global- LC ver 3.1 (2001) (IUCN 2004).

General distribution:

Gambia to Kenya; Tanzania (including Zanzibar); Mozambique.

Distribution based on voucher specimens:

Cameroon, Congo (Democratic Republic of the), Mozambique, Sierra Leone, Tanzania.

Figure 117. Distribution of *Mops* (*Xiphonycteris*) *brachypterus*

Mops (Xiphonycteris) nanulus J.A. Allen, 1917

- *1917. *Mops (Allomops) nanulus* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 477. Type locality: Democratic Republic of the Congo: Oriental, Niangara. Type specimen: AMNH 48864 (ad M, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 12 December 1910, original number: 1318). Publication date: 29 September 1917.
1940. *Mops calabarensis* Hayman, Trans. Zool. Soc. Lond., 24: 677. Type locality: Nigeria: Calabar, Ikotmbo [05 03 N 18 19 E] 50 ft asl. Type specimen: BMNH 1939.318 (M, skin and skull, collected by Ivan T. Sanderson, collection date 18 September 1932, original number: 3).
1940. *Mops nannulus* Sanderson, Trans. zool. Soc. Lond., 24: 677. Lapsus (see Grubb *et al.*, 1998: 96).
- ? *Mop nanulus*: Name combination.
- ? *Mops (Xiphonycteris) nanulus*: Name combination.

Taxonomy:

Distinction from *spurrelli* not certain; see Koopman (1989b).

Common names:

English: Dwarf Mops Bat, Dwarf free-tailed bat.
French: Tadaride naine.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ag).

General distribution:

Gambia (Simmons, 2005) over Sierra Leone, Benin (Capo-Chichi *et al.*, 2004: 163) to Ethiopia and Kenya.

Distribution based on voucher specimens:

Cameroon, Congo (Democratic Republic of the), Ghana, Kenya, Nigeria.

Figure 118. Distribution of *Mops (Xiphonycteris) nanulus*

Mops (Xiphonycteris) petersoni (El Rayah, 1981)

*1981. *Tadarida (Xiphonycteris) petersoni* El Rayah, R. Ontario Mus. Life Sci. Occas. Pap, 36: 3. Type locality: Cameroon: 15 km S Kumba [04 39 N 09 26 E]. Type specimen: ROM 55813 (ad M, alcoholic and skull, collector Randolph L. Peterson, collection date: 27 January 1970, original number 0364, see El-Rayah, 1981: 3). Publication date: 11 December 1981.

? *Mops (Xiphonycteris) petersoni*: Name combination.

? *Mops petersoni*: Name combination.

Taxonomy:

Described in *Tadarida (Xiphonycteris)*, but see comments under *Tadarida* and *Mops*.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); VU A4c ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bc).

Common names:

English: Peterson's Mops Bat, Peterson's free-tailed bat. French: Tadaride de Peterson.

Distribution:

Cameroon and Ghana, perhaps Sierra Leone.

Etymology of name:

In honour of Randolph L. Peterson, collector of the type specimen.

Mops (Xiphonycteris) spurrelli (Dollman, 1911)

*1911. *Xiphonycteris spurrelli* Dollman, Ann. Mag. Nat. Hist., ser. 8, 7 (38): 211. Type locality: Ghana: 60 mi (90 km) W Kumasi, Bibianaha [=Bibiani]. Type specimen: BMNH 1911.1.11.1 (ad M). Publication date: 1 February 1911.

? *Mops (Xiphonycteris) spurrelli*: Name combination.

Taxonomy:

See Simmons (2005).

Common names:

English: Spurrell's Mops Bat, Spurrell's free-tailed bat. French: Tadaride de Spurell.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cm).

General distribution:

Guinea (Fahr and Ebigbo, 2003: 128), Liberia, Ivory Coast, Ghana, Togo, Benin, Rio Muni and Bioko (Equatorial Guinae), Democratic Republic of the Congo.

Distribution based on voucher specimens:

Congo (Democratic Republic of the), Ghana, Togo.

Figure 119. Distribution of *Mops (Xiphonycteris) spurrelli*

Mops (Xiphonycteris) thersites (Thomas, 1903)

- *1903. *Nyctinomus thersites* Thomas, Ann. Mag. Nat. Hist., ser. 7, 12 (72): 634. Type locality: Cameroon: Efulen. Type specimen: BMNH 1904.2.8.4 (Holotype, old M, collector Mr. G.L.; Bates, 3 specimens: see Thomas (1903c: 635). Publication date: 1 December 1903.
1917. *Mops (Allomops) occipitalis* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 474, text-fig. 15. Type locality: Democratic Republic of the Congo: Avakubi. Type specimen: AMNH 48851 (ad M, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 13 February 1914, original number 2487). Publication date: 29 September 1917.
- ? *Mops (Xyphonycteris) thersites*: Name combination.
- ? *Mops thersites*: Name combination.

Taxonomy:

See Simmons (2005).

Common names:

English: Railer Mops Bat, Railer Bat. French: Tadaride de Railer. Portuguese: Morcego de railer.

Etymology of name:

Thersites was one of the members of the Greek army against Troy. He tried to stir up the army against its leaders, for which he got beaten by Odysseus. His name is a scorn: naughty boy. He was an excessive thwaddler, with deformed legs, feet, and bent over shoulders, a pointed head and thin flaky hair.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cl).

General distribution:

Sierra Leone to Rwanda; Bioko; perhaps Mozambique and Zanzibar.

Figure 120. Distribution of *Mops (Xiphonycteris) thersites*

Distribution based on voucher specimens: Cameroon, Congo (Democratic Republic of the).

Genus *Mormopterus* Peters, 1865

- *1865. *Mormopterus* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 258. Type species: *Nyctinomus (Mormopterus) jugularis* Peters, 1865.

Taxonomy:

Meester *et al.* (1986) state that this treatment of *Mormopterus* is provisional; it has been regarded as a subgenus of *Tadarida* (Hayman and Hill 1971) or as a valid genus that includes *Platymops* and *Sauromys* as subgenera (Freeman 1981; Legendre 1984), and the extralimital *Micronomus* as either a subgenus (Legendre loc. cit.) or a synonym (Freeman 1981; Peterson 1985).

Bronner *et al.* (2003) mention that the status of *Sauromys*, described as a monotypic subgenus of the extralimital (to southern Africa) *Platymops* for the South African flat-headed free-tailed bat, remains unclear. Peterson (1965) raised it to generic rank, a treatment endorsed by many subsequent authors, and corroborated by a limited multivariate analysis of wing bone and cranial characteristics (Peterson 1985). However, morphometric studies by Freeman (1981) and Legendre (1984) concluded that it is a subgenus of *Mormopterus*, a position followed by Koopman (1993, 1994). Simmons (2005) retains *Sauromys* as a valid genus in the new Mammal Species of the World (3rd Edition), a treatment we favour because of the unique ecology and morphology of *S. petrophilus*.

Meester *et al.* (1986) furthermore state that it was

Mormopterus acetabulosus (Hermann, 1804)

- *1804. *Vespertilio acetabulosus* Hermann, Observationes zoologicae, p. 19. Type locality: Mauritius: Port Louis. Publication date: 1804.
? *Mormopterus acetabulosus*: Name combination.

Taxonomy:

See Simmons (2005).

Common names:

Afrikaans: Natalse losstertvlermuis. English: Natal Flat-headed Bat, Natal Wrinkle-lipped Bat, Natal free-tailed bat. French: *Sauromys* du Natal.

Conservation status:

Global- VU (Baillie and Groombridge 1996); VU D2 ver 3.1 (2001) (IUCN 2004; Hutson and Bergmans 2004).

Regional- South Africa- Indeterminate (Smithers 1986 considered a vagrant not assessed, known

originally described as a subgenus, but this genus was regarded as a synonym of *Platymops* by Shortridge (1942), Roberts (1951) and Ellerman *et al.* (1953). Harrison (1962) retains it as a subgenus, while Peterson (1965) raises it to generic rank, in which he is followed by Hayman and Hill (1971), Smithers (1971), Corbet and Hill (1980) and Rautenbach (1982). However, Freeman (1981), followed by Honacki *et al.* (1982) and Legendre (1984), conclude that both *Sauromys* and *Platymops* are subgenera of *Mormopterus*. We take the view that both *Platymops* and *Sauromys* are valid genera.

Key in Jacobs and Fenton (2002, Mammalian Species, 703).

Common names:

English: Phantom-winged Bats, Little Bulldog Bats, Little Mastiff Bats, Little Goblin Bats, Flat-headed Bats, Flat-headed Bulldog Bats, Goblin bats

Etymology of name:

From the Greek "*mormopterus*" meaning phantom- or ghost-winged or winged goblin (Flannery, 1990: 367; 1995: 408).

from single locality (Friedmann and Daly 2004).

General distribution:

Reunion and Mauritius (Mascarine Isls), Madagascar; isolated citations from South Africa, Ethiopia, of which some might be in error according to Peterson *et al.* (1995: 150). Taylor (1998: 60) mentioned a specimen from Durban collected by Andrew Smith in 1833, but also states that no further specimens have been collected since.

Distribution based on voucher specimens: Mauritius, Réunion.

Mormopterus acetabulosus acetabulosus (Hermann, 1804)

- *1804. *Vespertilio acetabulosus* Hermann, Observaciones zoologicae, p. 19. Type locality: Mauritius: Port Louis. Publication date: 1804.
 1824. *Nyctinomus mauritianus* Horsfield, Zool. Res. Java, Part 5, 9th page of text in account of *N. tenuis*. Type locality: Mauritius: Port Louis. Publication date: 1823-1824.
 ? *Mormopterus acetabulosus acetabulosus*: Name combination.

Mormopterus acetabulosus natalensis (A. Smith, 1847)

1833. *Nyctinomus dubius* A. Smith, S. Afr. Quart. J., ser. 2, 1 (2): 54. Type locality: Republic of South Africa: Between Cape Province and Natal. Publication date: November 1833.
 *1847. *Dysopes natalensis* A. Smith, Illustr. Zool. S. Afr. Mamm., pl. 49 and text. Type locality: Republic of South Africa: Near Port Natal [=Durban]. Publication date: December 1847.
 ? *Mormopterus acetabulosus natalensis*: Name combination.

Taxonomy:

Allen (1939a) tentatively treats *dubius* as a species of *Nyctinomus* (= *Tadarida*), remarking that its status is uncertain; Roberts (1951), without giving reasons, regards it as a prior name for *natalensis*. Ellerman *et al.* (1953) are doubtful whether or not the two names are synonymous, and although they list *dubius* in the synonymy of *natalensis* they suggest that it may be necessary

to discard the name as not being certainly identifiable. Hayman and Hill (1971: 65) list *dubius* as *incertae sedis*.

Etymology of name:

The name reflects the two specimens collected in KwaZulu-Natal.

Mormopterus jugularis (Peters, 1865)

- *1865. *Nyctinomus (Mormopterus) jugularis* Peters, Proc. Zool. Soc. Lond., 1865, II: 468. Type locality: Madagascar: Antananarivo (=Tananarive). - Publication date: October 1865.
 1877. *Nyctinomus albiventer* Dobson, Proc. Zool. Soc. Lond., 1876, IV: 733. Type locality: Madagascar: no specific locality. Publication date: April 1877.
 ? *Mormopterus jugularis*: Name combination.

Taxonomy:

See Simmons (2005).

Common names:

English: Peters's Goblin bat, Peters's wrinkle-lipped bat. French: *Sauromys à jugulaire*, *Sauromys de Peters*.

Conservation status:

Global population- VU A2c ver 2.3 (1994).

Distribution:

Madagascar.

Distribution based on voucher specimens:

Madagascar.

Figure 121. Distribution of *Mormopterus jugularis*

Genus *Myopterus* E. Geoffroy St.-Hilaire, 1818

- *1818. *Myopterus* E. Geoffroy Saint-Hilaire, Descrip. de l'Egypte, 2: 113. Type species: *Myopterus senegalensis* Oken, 1816 (not available) (= *Myopteris daubentonii* Desmarest, 1820). Publication date: 1818.
1820. *Myopteris* Desmarest, Encycl. Méthod., (Zoologie, Mammalogie) 1: 131. Type: *Myopteris daubentonii* Desmarest, 1820. Publication date: 1820.
1837. *Myoptera* de Blainville, C. R. Acad. Sci., Paris, 5: 815. Publication date: 1837.
1905. *Eomops* Thomas, Ann. Mag. nat. Hist., ser. 7, 16 (95): 572. Type species: *Mormopterus whitleyi* Scharff, 1900. Publication date: 1 November 1905.

Taxonomy:

Includes *Eomops*; see Hayman and Hill (1971: 56). Grubb *et al.* (1998: 97) indicate that *Myopterus* Oken, 1816, Lehrbuch d. Naturgesch. Pt 3, Zool. Sect. 2: 952. Type species *Myopterus senegalensis* Oken (= *Myopteris daubentonii* Desmarest, 1820) is not available according to Opinion 417 of the ICZN.

Common names:

English: Winged-mouse Bats, African Free-tailed Bats, Winged-rat Free-tailed Bats.

Grubb *et al.* (1998: 97) indicate that Mahoney and Walton (1980: 116) considered the date of Geoffroy's publication to be 1813. Gardner and Hayssen (2004: 12) mention that the correct date should be 1818, not 1813 as mentioned on the publication itself.

Myopterus daubentonii Desmarest, 1820

1816. *Myopterus senegalensis* Oken, Lehrb. Naturg. Jena, pt 3, Zool. Sect 2: 952. Not available (Opinion 417 of the ICZN) see Grubb *et al.* (1998: 97).
- *1820. *Myopterus daubentonii* Desmarest, Encycl. Méthod., (Zoologie, Mammalogie) 1: 132. Type locality: Senegal: no specific locality. Type specimen lost (see Koopman 1993a: 238). Publication date: 1820.
1915. *Myopterus albatu*s Thomas, Ann. Mag. Nat. Hist., ser. 8, 16 (96): 469. Type locality: Democratic republic of the Congo: Uele River. Type specimen: BMNH 1919.5.9.1 (Holotype, collector: M. Hutereau, original number 17; Congo Museum o. 2911). Publication date: 1 December 1915.

Taxonomy:

Includes *albatu*s (see Koopman, 1989b). Allen (1939a: 110) used *Myopterus senegalensis* Oken, 1816 for this species.

Conservation status:

Global- DD (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cc).

Common names:

English: Daubenton's Winged-mouse Bat, Daubenton's free-tailed bat, Senegal mastiff bat.
French: Myoptère de Daubenton, Myoptère du Sénégal.

General distribution:

Senegal, Ivory Coast, NE Democratic Republic of the Congo.

Distribution based on voucher specimens: Congo (Democratic Republic of the).

Etymology of name:

In honour of the French naturalist Louis-Jean-Marie d'Aubenton [=Daubenton] (1716 - 1799/1800) (see Bogdanowicz 1994: 5; Kozhurina, 2002: 15).

Myopterus whitleyi (Scharff, 1900)

- *1900. *Mormopterus Whitleyi* Scharff, Ann. Mag. nat. Hist., ser. 7, 6 (36): 569. Type locality: Nigeria: Mid-Western Region, Benin City. Type specimen: BMNH. Publication date: 1 December 1900.

Taxonomy:

See Simmons (2005).

Common names:

English: Bini Winged-mouse Bat, Whitley's Winged-mouse Bat, Bini Free-tailed Bat. French: Myoptère de Whitley, Myoptère de Bini.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004ch).

General distribution:

Ghana, Nigeria, Cameroon, Central African Republic (Barrière *et al.*, 2002: 234), Democratic Republic of the Congo, Uganda.

Distribution based on voucher specimens:

Central African Republic, Congo (Democratic Republic of the).

Figure 122. Distribution of *Myopterus whitleyi*

Genus **Otomops** Thomas, 1913

1913. *Otomops* Thomas, J. Bomb. nat. Hist. Soc., 22: 91. Type species: *Nyctinomus wroughtoni* Thomas, 1913. Publication date: April 1913.

Taxonomy:

See Simmons (2005).

From the Greek "oto" (=large or long ear) and the Malaysian "mops" (=bat) (see Long 1995: 4).

So named because they have outstanding large round-pointed ears that are attached along the nose and lie in the plane of the face (see Taylor 2005).

Common names:

English: Big-eared Bulldog Bats, Big-eared Free-tailed Bats, Mastiff Bats.

Etymology of name:

Otomops madagascariensis Dorst, 1953

- *1953. *Otomops madagascariensis* Dorst, Mém. Inst. Scient. Madagascar, (A) 8: 236. Type locality: Madagascar: S of Soalala, Namoroka, Réserve Naturelle (Cave P. Saboureau, No. 8) [16 23 S 45 28 E]. Type specimen: MNHN CG 1953-1 (ad F, skull and alcoholic, collector: R. Paulian, collection date: September 1952: see Peterson *et al.* (1995: 181).).
2000. *Otomops martiensseni madagascarensis* Horáček, Hanák and Gaisler, Bats of the Palearctic region. Lapsus.
- ? *Otomops martiensseni madagascariensis*: Name combination.

Taxonomy:

Valdivieso *et al.* (1979) listed it as a distinct species, as did Peterson *et al.* (1995: 183) and Russ *et al.* (2001). We are (yet) unable to confirm whether the original spelling is *madagascariensis* (see Koopman 1993a: 239, Peterson *et al.* 1995, Russ *et al.* 2001, Simmons 2005) or *madagascarensis* (see Horáček *et al.* 2000: 137, Fenton *et al.* 2002: 1584).

General distribution:

W Madagascar (Russ *et al.*, 2001).

Distribution based on voucher specimens: Madagascar.

Common names:

English: Madagascar free-tailed bat, Madagascar Mastiff Bat.

Etymology of name:

Referring to the island where this taxon occurs.

Otomops martiensseni (Matschie, 1897)

- *1897. *Nyctinomus martiensseni* Matschie, Arch. Naturgesch. Berlin, 63 (1): 84. Type locality: Tanzania: 25 mi (37 km) W of Tanga, SE Usambara Mountains, Magrotto Plantation [05 07 S 08 03 E] (Horáček *et al.* (2000: 137) mention "Usambara Mts., W of Tanga, NE Tanzania" Grubb *et al.* (1998: 98) indicate that the locality has been defined by Swynnerton, 1945, Proc. Zool. Soc. Lond., 115: 63). Publication date: October 1897.
- ? *Otomops martiensseni*: Name combination.

Taxonomy:

Koopman (1993a: 239) included *madagascariensis*, but see Peterson *et al.* (1995: 183). See Long (1995, Mammalian Species, 493).

Molecular biology:

DNA - Unknown.
Karyotypic - Dulic and Mutere (1973a) reported $2n = 48$, FN = 56, BA = 10, a submetacentric X chromosome, and an acrocentric Y chromosome.
Protein / allozyme - Unknown.

Common names:

Afrikaans: Bakoor-losstertvlermuis. English: Martienssen's Big-eared Bulldog Bat, Large-eared Free-tailed Bat, Giant Mastiff Bat, Martienssen's Free-tailed Bat, Martienssen bat. French: Chauve-souris bouledogue géante.

Etymology of name:

In honour of "Herr Martienssen of the Königlich Museum für Naturkunde" who found the type specimen (see Long, 1995: 4).

Conservation status:

Global- VU (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004cp).

Regional- South Africa- Indeterminate (Smithers 1986); VU D2 ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Yemen; Djibouti, Ethiopia, Eritrea (Kock and Zinner, 2004: 3), Kenya, Tanzania, Uganda and Central African Republic, over Congo to Angola, Zimbabwe, Malawi, and Natal (South Africa); [Madagascar? if *madagascariensis* is not considered a separate species].

Figure 123. Distribution of *Otomops martiensseni*

Distribution based on voucher specimens: Congo (Democratic Republic of the), Rwanda, [South Africa](#), Tanzania.

Echolocation:

See Taylor (1999) and Taylor *et al.* (2005).

Otomops martiensseni icarus Chubb, 1917

- *1917. *Otomops icarus* Chubb, Ann. Durban Mus., 1: 433, pl. 21. Type locality: Republic of South Africa: Natal, Durban. Publication date: 21 May 1917.
- ? *Otomops martiensseni icarus*: Name combination.

Etymology of name:

Named after Icarus, son of Daidalos, who fled from their prison with wings made of wax and feathers.

General distribution:

From Angola to KwaZulu-Natal, Malawi (Horáček *et al.*, 2000: 137)

Otomops martiensseni martiensseni (Matschie, 1897)

- *1897. *Nyctinomus martiensseni* Matschie, Arch. Naturgesch. Berlin, 63 (1): 84. Type locality: Tanzania: 25 mi (37 km) W of Tanga, SE portion of Western Usambara Mountains, Magrotto Plantation [05 07 S 08 03 E] (Horáček *et al.* (2000: 137) mention "Usambara Mts., W of Tanga, NE Tanzania")
- Grubb *et al.* (1998: 98) indicate that the locality has been defined by Swynnerton, 1945, Proc. Zool. Soc. Lond., 115: 63). Publication date: October 1897.
- ? *Otomops martiensseni martiensseni*: Name combination.

General distribution:

Central African Republic to Yemen and south to Zimbabwe (Horáček *et al.*, 2000: 137).

Genus *Platymops* Thomas, 1906

1906. *Platymops* Thomas, Ann. Mag. nat. Hist., ser. 7, 17 (101): 499. Type species: *Platymops Macmillani* Thomas, 1906 (= *Mormopterus setiger* Peters, 1878). Publication date: 1 May 1906.

Taxonomy:

Considered a subgenus of *Mormopterus* by Koopman (1993a: 238), Czaplewski *et al.* (2003b: 68), but a valid genus by Kock (1969: 155),

Simmons (2005).

Included in *Mormopterus* by Jacobs and Fenton (2002: 1).

Platymops setiger (Peters, 1878)

- *1878. *Mormopterus setiger* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 196. Type locality: Kenya: Taita, Ndi. - Allen (1939a: 109) mentioned 1881; Monatsb. K. Preuss. Akad. Wiss., Berlin, p. 483, pl., fig. 3
1960. *Platymops setiger*: Harrison and Fleetwood, Durban Mus. Novit., 5 (20): 269. Name combination.

Taxonomy:

See Freeman (1981: 133, 161). Formerly included in *Platyops* by Harrison and Fleetwood (1960: 277 - 278).

Common names:

English: East African Flat-headed Bat, Peters's Flat-headed Bat, Flat-headed free-tailed bat.
French: Sauromys à tête plate.

Conservation status:

Global- LR/lc assessed as *Mormopterus setiger* (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bf).

General distribution:

S Sudan, Ethiopia, Kenya.

Molecular biology:

DNA - Unknown.

Karyotype - Warner *et al.* (1974) reported $2n = 48$, FN = 54, and submetacentric X and Y chromosomes.

Protein / allozyme - Unknown.

Figure 124. Distribution of *Platymops setiger*

Distribution based on voucher specimens:
Ethiopia, Kenya, Sudan.

Platymops setiger macmillani Thomas, 1906

- *1906. *Platymops Macmillani* Thomas, Ann. Mag. Nat. Hist., ser. 7, 17 (101): 500. Type locality: Ethiopia: Between Addis Ababa and Lake Rudolf. Type specimen: BMNH 1906.11.1.10 (ad M, skull and alcoholic, collected by Ph.C. Zaphiro, presented by W.N. McMillan, Esq.; 7 specimens). Publication date: 1 May 1906.
1956. *Platymops barbatogularis* Harrison, Ann. Mag. nat. Hist., ser. 12, 9 (104): 549. Type locality: Sudan: SE Sudan, Ilemi triangle, Lokomarinyang Marsh [05 02 N 35 33 E]. Type specimen: BMNH 1967.1232 (ad. M, skin and skull, collected by John G. Williams collection date 10 June 1953, formerly HZM 2.1897). BMNH 1957.258 (skin label indicates it as a Paratype, not in the type drawer). Publication date: 18 December 1956. (Evenhuis (2003: 54) indicates that ser. 12, 9 (104) is the "August 1956" issue which was published on "18 December 1956").
1960. *Platymops barbatogularis parkeri* Harrison and Fleetwood, Durban Mus. Novit., 5 (20): 269. Type locality: Kenya: Lualeni borehole, Maktau. Type specimen: BMNH 1959.524 (ad. F, skin and skull, collector: Ian Parker, collection date: 12 February 1958).
- ? *Platymops setiger macmillani*: Name combination.

Taxonomy:

Kock (1969: 155) considers *barbatobularis* to be a synonym of *macmillani*.

Etymology of name:

In honour of Mr. W.N. McMillan, to whose liberality science is indebted for the exploration of which it is part of the outcome (see Thomas, 1906c: 501).

Platymops setiger setiger (Peters, 1878)

- *1878. *Mormopterus setiger* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 196. Type locality: Kenya: Taita. Allen (1939a: 109) mentioned 1881; Monatsb. K. Preuss. Akad. Wiss., Berlin, p. 483, pl., fig. 3
- ? *Platymops setiger setiger*: Name combination.

Genus **Sauromys** Roberts, 1917

1917. *Platymops* Roberts, Ann. Transv. Mus., 6: 5. Type species: *Platymops (Sauromys) petrophylus* Roberts, 1917. Publication date: 28 June 1917. Not of Thomas, 1906.
1917. *Sauromys* Roberts, Ann. Transv. Mus., 6: 5. Type species: *Platymops (Sauromys) haagneri* Roberts, 1917 (= *Platymops petrophilus* Roberts, 1917). Publication date: 28 June 1917. As a subgenus of *Platymops* Thomas, 1906.

Taxonomy:

Bronner *et al.* (2003) state that the status of *Sauromys*, described as a monotypic subgenus of the extralimital *Platymops* for the South African flat-headed free-tailed bat, remains unclear. Peterson (1965) raised it to generic rank, a treatment endorsed by many subsequent authors, and corroborated by a limited multivariate analysis of wing bone and cranial characteristics (Peterson 1985). However, morphometric studies by Freeman (1981) and Legendre (1984) concluded that it is a subgenus of *Mormopterus*, a position followed by Koopman (1993, 1994), and Jacobs and Fenton (2002: 1). Simmons (2005) retains *Sauromys* as a valid genus in the new Mammal Species of the World (3rd Edition), a treatment we favour because of the unique ecology and morphology of *S. petrophilus*.

Meester *et al.* (1986) also state that originally described as a subgenus, this genus was regarded as a synonym of *Platymops* by Shortridge (1942), Roberts (1951) and Ellerman *et al.* (1953). Harrison (1962) retains it as a subgenus, while Peterson (1965) raises it to generic rank, in which he is followed by Hayman and Hill (1971), Smithers (1971), Corbet and Hill (1980) and Rautenbach (1982). However, Freeman (1981), followed by Honacki *et al.* (1982) and Legendre (1984), conclude that both *Sauromys* and *Platymops* are subgenera of *Mormopterus*. We take the view that both *Platymops* and *Sauromys* are valid genera.

Generic and species classification of African flat-headed molossid is unclear. Roberts (1917) originally described *Sauromys* as a subgenus of *Platymops*. Later Roberts (1951, 1954) dropped *Sauromys* as a subgenus, as Shortridge (1942),

reported that a minute upper premolar was found on the type *Platymops macmillani* Thomas 1906. Peterson (1965) indicates that the minute premolar on the type *P. macmillani* is probably a milk premolar and that normal adult dental formula should be considered as having only one upper premolar. For this reason and others (e.g. glands not on wings) Peterson (1965) raises *Sauromys* to generic status. Koopman (1975) indicates that *Sauromys* is a subgenus within *Tadarida*, however Freeman (1981) found that all the so-called flat-headed bats; *Sauromys*, *Platymops*, and *Neoplatymops*, are phenetically related to *Mormopterus*. While the phenogram in Freeman (1981) also indicates that *Tadarida aegyptiaca* (E. Geoffroy 1818) and *T. brasiliensis* (L. Geoffroy St.-Hilaire 1824) are phonetically similar to *Mormopterus*, this grouping is explained due to convergence of shape due to similar life styles (Freeman 1981). Meester *et al.* (1986) did not follow Freeman (1981) and rather followed Peterson (1965) recognizing *Sauromys*, *Mormopterus* and *Platymops* as valid genera. While Koopman (1993a) followed Freeman (1981) in classifying *Sauromys* and *Platymops* as subgenera in the genus *Mormopterus*. Simmons (2005) recognizes *Sauromys* as a distinct genus.

Peterson (1965) suggests that a detailed comparison between *Sauromys* and *Tadarida* needs to be examined, including specific status and geographic variation.

Etymology of name:

From Greek "*sauros*" meaning lizard and "*mys*" meaning mouse (see Jacobs and Fenton, 2002: 1).

Sauromys petrophilus (Roberts, 1917)

- *1917. *Platymops (Sauromys) petrophilus* Roberts, Ann. Transv. Mus., 6: 4. Type locality: Republic of South Africa: Western Transvaal, near Rustenburg, Bleskop. Publication date: 28 June 1917.
- ? *Sauromys petrophilus*: Name combination.

Taxonomy:

Roberts (1951, 1954) recognised two species and five subspecies of flat-headed bats in southern Africa *Platymops haagneri* Roberts 1917 (*haagneri*, *umbratus* Shortridge and Carter 1938) and *Platymops petrophilus* Roberts 1917 (*petrophilus*, *erongensis* Roberts 1946, *fitsimonsi* Roberts 1946). Ellerman *et al.* (1953) suggested that the two species are conspecific, and rather recognized five subspecies of *Platymops petrophilus* (*petrophilus*, *haagneri*, *umbratus*, *erongensis* and *fitsimonsi*). Meester *et al.* (1986) also recognized the five subspecies suggested by Ellerman *et al.* (1953) for *petrophilus* but within the genus *Sauromys*, following Peterson (1965: 12). Freeman (1981) indicates that *erongensis* (Roberts 1946) may be a synonymy of *haagneri* (Roberts 1917) and *fitsimonsi* (Roberts 1946) is possibly a synonym of *umbratus* (Shortridge and Carter 1938). Included in *Mormopterus* by Jacobs and Fenton (2002: 1). Jacobs and Fenton (2002: 1) considered *M. petrophilus* to be monotypic.

Common names: Afrikaans: Platkop-losstertvlermuis. English: Rock-loving Flat-headed Bat, Rock-dwelling Flat-headed Bat, Roberts' Flat-headed Bat, Flat-headed Free-tailed Bat. French: Sauromys de Roberts. Portuguese: Morcego de cabeça curta.

Etymology of name:

From the Greek "*petros*" meaning rock and "*philos*" meaning loving.

Palaeontological / archaeological records:

No fossils are known (Jacobs and Fenton 2002: 1).

Conservation status:

Global- LR/lc assessed as *Mormopterus petrophilus* (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bh).
Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly 2004).

Distribution:

South Africa, Namibia, Botswana, Zimbabwe, Mozambique, perhaps Ghana. The Ghanaian specimen should be in the USNM (see Meester *et al.*, 1986), but Jacobs and Fenton (2002: 2)

indicate that this animal could not be located in the collection.

Geographic variation:
Unknown.

General description of external morphology:
See Jacobs and Fenton (2002).

General description of cranial and dental morphology:
See Jacobs and Fenton (2002).

Detailed morphology:
For a description of the crania, ears and tragus, and wingshape and aspect ratio see Jacobs and Fenton (2002).

Functional morphology:
Unknown.

Sexual dimorphism:
Unknown.

Echolocation:
See Jacobs and Fenton (2002).

Molecular biology:
DNA - Unknown.
Karyotype - Rautenbach *et al.* (1993) reported $2n = 48$, FN = 62, BA = 16, a submetacentric X chromosome, and an acrocentric Y chromosome for specimens from Namibia and South Africa. However, this did not include specimens from the Western Cape that Rautenbach *et al.* (1993) included with *Chaerephon pumilus*, but have subsequently been reidentified as *S. petrophilus* (Jacobs and Fenton, 2001).
Protein / allozyme - Unknown.

Habitat:
See Jacobs and Fenton (2002).

Habits:
See Jacobs and Fenton (2002).

Roost:
See Jacobs and Fenton (2002).

Migration:
Unknown.

Diet:
See Jacobs and Fenton (2002).

Unknown.

Predators:
Unknown.

Anthropophilous:
Unknown.

Population:
Structure and density - See Jacobs and Fenton (2002).

Life-span:
Unknown.

Activity and behaviour:
See Jacobs and Fenton (2002).

Reproduction and ontogeny:
See Jacobs and Fenton (2002).

Mating:
Unknown.

Post-natal development:
Unknown.

Parasites:
Unknown.

Viruses:
Unknown.

Utilization:

Figure 125. Distribution of *Sauromys petrophilus*

Distribution based on voucher specimens:
Botswana, Mozambique, Namibia, South Africa,
Zimbabwe.

Sauromys petrophilus erongensis (Roberts, 1946)

- *1946. *Platymops petrophilus erongensis* Roberts, Ann. Transv. Mus., 20: 308. Type locality: Namibia: Damaraland, Omaruru District, Eronga Mountain, Ombu Farm (Roberts (1951: 103): "Ombu Farm, Eronga Mountain, Omaruru district, S.W. Africa").
- ? *Sauromys petrophilus erongensis*: Name combination.

Etymology of name: type specimen was collected.
Referring to the Eronga mountains, where the

Sauromys petrophilus haagneri (Roberts, 1917)

- *1917. *Platymops (Sauromys) haagneri* Roberts, Ann. Transv. Mus., 6: 5. Type locality: Namibia: Great Namaqualand, Keetmanshoop. Publication date: 28 June 1917.
- ? *Sauromys haagneri*: Name combination.
- ? *Sauromys petrophilus haagneri*: Name combination.

Common names: Haagner's Flat-headed Bat.
Afrikaans: Haagnerse Platkopvlermuis. English:

Sauromys petrophilus petrophilus (Roberts, 1917)

- *1917. *Platymops (Sauromys) petrophilus* Roberts, Ann. Transv. Mus., 6: 4. Type locality: Republic of South Africa: Western Transvaal, near Rustenburg, Bleskop. Publication date: 28 June 1917.
- ? *Sauromys petrophilus petrophilus*: Name combination.

Sauromys petrophilus umbratus (Shortridge & Carter, 1938)

- *1938. *Platymops haagneri umbratus* Shortridge and Carter, Ann. S. Afr. Mus., 32: 282. Type locality: Republic of South Africa: Western Cape Province, 11 mi [=18 km] NE Clanwilliam, Pakhuis Pass, Kliphuis.
- 1946. *Platymops petrophilus fitzsimonsi* Roberts, Ann. Transv. Mus., 20: 308. Type locality: Republic of South Africa: SW Cape Province, near Ceres, Mitchell's Pass.
- ? *Sauromys petrophilus umbratus*: Name combination.

Genus *Tadarida* Rafinesque, 1814

- *1814. *Tadarida* Rafinesque, Précis des découvertes et travaux somnologiques, p. 55. Type species: *Cephalotes teniotis* Rafinesque, 1814.
1821. *Nyctinomes* Gray, London Med. Repos., 15: 299. Publication date: 1 April 1821.
1821. *Nyctinoma* Bowdich, Analysis of the Natural Classification of Mammalia: xx.
1822. *Nyctinomia* Fleming, The Philosophy of Zoology, 2: 178.
1825. *Dinops* Savi, Nuov. Giorn. Letter. Pisa, Sci., 10: 229. Type species: *Dinops cestoni* Savi, 1824 (= *Cephalotes teniotis* Rafinesque, 1814).
1830. *Dysopes* Cretzschmar, in Rüppell, Atlas Reise Nördl. Afr., Zool. Säugeth., 69. Not of Illiger, 1811. Publication date 1830-1831.
1995. *Dynops* Pavlinov, Borissenko, Kruskop and Jahontov, Arch. Zool. Mus., Moscow State Univ., 133: xx.

Taxonomy:

Formerly included *Chaerephon*, *Mops*, *Mormopterus*, and *Nyctinomops*; see Freeman (1981: 133). Includes *Rhizomops*, but see Legendre (1984); see also Owen *et al.* (1990). Mahoney and Walton (1988) regarded *Nyctinopus* as the prior name for this genus.

Etymology of name:

Meaning unknown (Flannery, 1990: 366). Possibly from the Greek "*data*" or Latin "*taeda*" and "*nukterida*" (see Kozhurina, 2002: 18). Braun and Mares (1995: 182) refer to Gotch (1979), who states this is a word created by C.S. Rafinesque.

Common names:

English: Guano Bats, Free-tailed Bats, Tadarine Bats.

Tadarida aegyptiaca (E. Geoffroy St.-Hilaire, 1818)

- *1818. *Nyctinomus aegyptiacus* E. Geoffroy Saint-Hilaire, Descrip. de l'Egypte, 2: 128, pl. 2, No 2. Type locality: Egypt: Giza (Restricted from "Egypt" to Giza by Koopman (1975: 422); see Qumsiyeh (1985: 73), Meester *et al.* (1986: 70)). Type specimen: MNHN A.467 (ad M, alcoholic and skull). Publication date: 1818.
- ? *Tadarida aegyptiaca*: Name combination.

Taxonomy:

Includes *tragata*; see Corbet (1978c: 63) and Freeman (1981: 165).

General distribution:

South Africa (over Namibia, Botswana, Zimbabwe, Zambia (Cotterill, 2004: 260)) to Nigeria, Morocco (Benda *et al.*, 2004), Algeria, and Egypt; Eritrea (Lavrenchenko *et al.* (2004: 132), Ethiopia to Saudi Arabia, Yemen and Oman, east over S Iran, Afghanistan and Pakistan to India and Sri Lanka.

Common names:

Afrikaans: Egiptiese losstertvlermuis. English: Egyptian Free-tailed Bat, Egyptian Guano Bat. French: Tadaride d'Egypte, Molosse d'Egypte. Portuguese: Morcego de cauda livre do egipto.

Echolocation:

See Taylor (1999).

Etymology of name:

The original specimens were collected in Egypt during the Napoleonic wars by E. Geoffroy Saint-Hilaire, who at that time served under Napoleon (see Taylor 2005).

Molecular biology:

DNA - Unknown.
Karyotype - Both Nagorsen *et al.* (1976) and Rautenbach *et al.* (1993) reported $2n = 48$ and an acrocentric Y chromosome. However, while Nagorsen *et al.* (1976) reported FN = 54, BA = 8, and a submetacentric X chromosome, Rautenbach *et al.* (1993) reported FN = 68, BA = 22, and a metacentric X chromosome, for specimens from Namibia and South Africa.
Protein / allozyme - Unknown.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004bg).
Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly 2004).

Distribution based on voucher specimens:
 "Africa", Botswana, Cameroon, Egypt,
 Mozambique, Namibia, South Africa, Swaziland,
 Zimbabwe.

Figure 126. Distribution of *Tadarida aegyptiaca*

Tadarida aegyptiaca aegyptiaca (E. Geoffroy St.-Hilaire, 1818)

- *1818. *Nyctinomus aegyptiacus* E. Geoffroy Saint-Hilaire, Descrip. de l'Egypte, 2: 128, pl. 2, No 2. Type locality: Egypt: Giza (Restricted from "Egypt" to Giza by Koopman (1975: 422): see Qumsiyeh (1985: 73), Meester *et al.* (1986: 70)). Type specimen: MNHN A.467 (ad M, alcoholic and skull). Publication date: 1818.
- 1827. *Dysopes geoffroyi* Temminck, Monogr. Mamm., 1: 226, pls 19, 23. Publication date: 1827. Allen (1939a: 110), Qumsiyeh (1985: 73) mentioned 1827. Kock (1969: 137), Meester *et al.* (1986: 70) mention 1826. Substitute for *aegyptiacus* E. Geoffroy St. Hilaire (see Kock, 1969: 137; Qumsiyeh 1985: 73; Meester *et al.*, 1986: 70).
- 1877. *Dysopes talpinus* Heuglin, Reise in Nordost Afrika, 2: 28. Type locality: Sudan: Bahr-el-Ghazal Province, west bank of Bahr el Jebel, Kidj District. Publication date: 1877.
- 1916. *Nyctinomus (Nyctinomus) tongaënsis* Wettstein, Anz. K. Akad. Wiss., Wien, math.-nat. Kl., 53: 192. Type locality: Sudan: Upper White Nile, Tonga. Publication date: 1916.
- ? *Tadarida aegyptiaca aegyptiaca*: Name combination.
- ? *tongaensis*: Current spelling.

General distribution:

Arabia, N Africa (Horáček *et al.*, 2000: 136).

Tadarida aegyptiaca bocagei (Seabra, 1900)

- 1900. *Nyctinomus anchietae* Seabra, J. Sci. mat. phys. nat., Lisboa, ser. 2, 6: 82. Type locality: Angola: W Angola, Quibula. Publication date: August 1900.
- *1900. *Nyctinomus bocagei* Seabra, J. Sci. mat. phys. nat., Lisboa, ser. 2, 6: 84. Type locality: Angola: W Angola, East of Hanha, Galanga. Publication date: August 1900.
- 1900. *Nyctinomus brunneus* Seabra, J. Sci. mat. phys. nat., Lisboa, ser. 2, 6: 83. Type locality: Angola: NE of Benguela, Quissange. Publication date: August 1900.
- ? *Tadarida aegyptiaca bocagei*: Name combination.

Taxonomy:

If page precedence is to be taken into account, *anchietae* might be the senior synonym for this form.

Common names:

Afrikaans: Bocagese Losstertvlermuis. English: Bocage's Free-tailed Bat.

General distribution: *al.*, 2000: 136).
Angola and Zambia to South Africa (Horáček *et*

Tadarida fulminans (Thomas, 1903)

- *1903. *Nyctinomus fulminans* Thomas, Ann. Mag. nat. Hist., ser. 7, 12 (71): 501. Type locality: Madagascar: Eastern Betsileo; Fianarantsoa. Type specimen: BMNH 1882.3.1.34 (M, alcoholic and skull; collector Reverend W. Deans Cowan original number: 4). Publication date: 1 November 1903.
- 1946. *Nyctinomus mastersoni* Roberts, Ann. Transv. Mus., 20: 306. Type locality: Zimbabwe: Bindura district, Masemura Nature Reserve, Chikupu caves. Type specimen: TM 9976 (ad M, skin and skull, collector: H.B. Masterson collection date: 10 July 1945)
- 2004. *Tadarida fulmilans*: Goodman and Cardiff, Acta Chiropt., 6 (2): 227. Lapsus.
- ? *Tadarida fulminans*: Name combination.

Taxonomy:

See Simmons (2005).

Common names:

Afrikaans: Madagaskarse grootlosstertvlermuis.
English: Large free-tailed Bat, Lightning Guano Bat, Large Guano Bat, Madagascar Large Guano Bat, Madagascar Large Free-tailed Bat, Madagascar Free-tailed Bat, Madagascar Large Free-tailed Bat. French: Grande Tadaride de Madagascar, Molosse de Madagascar.

Etymology of name:

From the Latin "*fulminate*" meaning strike with lightning.

The colloquial name refers to the island where the species occurs.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Cotterill 2004b).

Regional- South Africa- Indeterminate (Smithers 1986); considered a vagrant not assessed, due to known form single locality (Friedmann and Daly 2004).

General distribution:

E Democratic Republic of the Congo, Rwanda, Kenya, Tanzania, Zambia, Malawi, Zimbabwe, Transvaal (South Africa), Madagascar.

Echolocation:

See Taylor (1999).

Molecular biology:

DNA - Unknown.

Karyotypic - Peterson and Nagorsen (1975) reported $2n = 48$, FN = 54, BA = 8, a submetacentric X chromosome, and an acrocentric Y chromosome, for specimens from Zimbabwe.

Protein / allozyme - Unknown.

Figure 127. Distribution of *Tadarida fulminans*

Distribution based on voucher specimens: Kenya, Madagascar, Namibia, Rwanda, [South Africa](#), [Zimbabwe](#).

Tadarida lobata (Thomas, 1891)

- *1891. *Nyctinomus lobatus* Thomas, Ann. Mag. Nat. Hist., ser. 6, 7 (39): 303. Type locality: Kenya: West Pokot, Turkwell Gorge. Type specimen: BMNH 1893.2.3.7 (Holotype). Publication date: 1 March 1891.
- ? *Tadarida lobata*: Name combination.

Taxonomy:

See Simmons (2005).

Common names:

Afrikaans: Grootoor-losstervlermuis. English: Big-eared Guano Bat, Big-eared Kenyan Guano Bat, Kenyan Big-eared Free-tailed Bat, Big-eared Free-tailed Bat, Big-eared Kenya Free-tailed Bat, Eastern Africa free-tailed bat. French: Tadaride de l'Afrique orientale, Molosse à grandes oreilles.

Etymology of name:

From "*lobata*" meaning lobed.

The colloquial name perhaps refers to the country from which the species was originally described (see Taylor 2005).

Conservation status:

Global- VU (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Cotterill 2004e).

General distribution:

Kenya, Zimbabwe.

Figure 128. Distribution of *Tadarida lobata*

Distribution based on voucher specimens:
Kenya, Tanzania, Zimbabwe.

Tadarida teniotis (Rafinesque, 1814)

- *1814. *Cephalotes teniotis* Rafinesque, Précis des découvertes et travaux somnologiques, p. 12, 55. Type locality: Italy: Sicily.
1825. *Dinops Cestonii* Savi, Nuov. Giorn. Letter. Pisa, Sci., 10: 230. Type locality: Italy: Pisa. Type specimen: ZFMK 83.173 (syntype, M, alcoholic, on label: "Nyctinomus cestonii (Savi) Dobson (In der Sammlg. Von Berthold als Dysops Savii angegeben) Prof. Savi ded. 1846 Toscana"; ex Göttingen Museun 1978: see Hutterer (1984: 32)
1827. *Dysopes rüPELLII* Temminck, Monogr. Mamm., 1: 224, pl. 18. Type locality: Egypt: Cairo (Restricted from "Egypt" to Cairo by Qumsiyeh (1985: 71)). Publication date: 1827. Incorrect original spelling (*rüPELLII*) corrected by Qumsiyeh (1985: 71) as *ruePELLII*.
1840. *Dysopes Savii* Schinz, Syst. Verz. Säugeth., 1: 138.
1891. *Nyctinomus taeniotis* Thomas, Proc. zool. Soc. Lond., 1891, II: 182. Lapsus.
1897. *midas* Schulze, Helios, Berlin, 14: 95. Preoccupied by *midas* Sundevall, 1843 (See Pavlinov *et al.*, 1995: 91).
1914. *Cephalotes taeniotis*: Cabrera, Fauna Ibérica: 145. Lapsus.
1985. *ruePELLII* Qumsiyeh, Spec. Publ. Mus. Texas Tech. Univ., 23: 71. Emendation of *rüPELLII* Temminck, 1827.
- ? *Tadarida teniotis ruePELLII*: Name combination.
- ? *Tadarida teniotis*: Name combination.

Taxonomy:

Revised by Aellen (1966) and Kock and Nader (1984).

Conservation status:

Global- LR: lc.

Common names:

Basque: Saguzar buztanluzea. Catalanian: Rat penat cuallarg. Dutch: Zuideuropese bulvleermuis, Bulveermuis. English: European Free-tailed Bat, European Guano Bat, Striped or Banded Guano Bat, Wrinkle-lipped Bat, Eurasian Free-tailed Bat. French: Molosse de Cestoni, Tadaride d'Europe, Molosse d'Europe, Tadaride de Cestoni. Gallician: Morcego rabudo. German: Bulldoggfledermaus. Italian: Molosso di Cestoni. Roman: Moloss Buldoc. Spanish (Castilian): Murciélago rabudo. Portuguese: Morcego-rabudo.

General distribution:

France, Portugal, S Switzerland, SW Germany, Italy, S Dalmatia (Croatia), S Serbia, Albania, Macedonia, Greece, Mediterranean isls., Caucasus, S Asia-Transcaucasia, Turkey, Syria, Lebanon, Israel, Jordan, W Saudi Arabia, Iraq, Iran, S Turkmenistan, S Kazakhstan, Uzbekistan, Kirghizia, Tadjikistan, and Morocco, N Algeria (Horáček *et al.*, 2000: 136), Tunisia (Horáček *et al.*, 2000: 136), N Libya (Horáček *et al.*, 2000: 136), N Egypt; to Japan, S China, and Taiwan; Madeira (Portugal) and Canary Isls (Spain); Afghanistan, Pakistan (?), NE India, NE Thailand; Flores.

Etymology of name:

From the Greek "*teniotis*" meaning striped, banded.

Tadarida ventralis (Heuglin, 1861)

- *1861. *Nyctinomus (Dysopes) ventralis* Heuglin, Nova Acta Acad. Cæs. Leop.-Carol., Halle, 29 (8): 4, 11. Type locality: Eritrea: Kérén [c 15 45 N 38 20 E]. Publication date: 1861.
1862. *Nyctinomus ventralis*: Heuglin, Peterm. geogr. Mitth., 8: 26. Name combination.
1876. *Nyctinomus africanus* Dobson, Ann. Mag. Nat. Hist., ser. 4, 17 (101): 348. Type locality: Republic of South Africa: Transvaal. Type specimen: BMNH 1875.11.19.1 (M, presented by R.B. Sharp). Publication date: 1 May 1876.
1877. *Nyctinomus cestoni* Dobson, Proc. zool. Soc. Lond., 1876, IV: 719. Publication date: April 1877. Not of Savi, 1825. In part (see Kock, 1975: 6).
1877. *Dysopes ventralis*: Heuglin, Reise in Nordost-Afrika, II: 26. Name combination.
1891. *N(yctinomus) taeniotis* Thomas, Proc. zool. Soc. Lond, 1891, II: 183. Publication date: August 1891. Not of Rafinesque, 1814. See Kock (1975: 7).
1901. *N(yctinomus) midas* de Winton, Ann. Mag. nat. Hist., ser. 7, 7 (37): 42. Publication date: 1 January 1901. Not of Sundeval. In part. See Kock (1975: 7).
1928. *Mops ventralis*: Thomas, Ann. Mag. nat. Hist., ser. 10, 1 (2): 302. Publication date: 2 February 1928. Name combination.
1939. *Mops rüppellii* Allen, Bull. Mus. comp. Zool., 83: 108. Not of Temminck, 1827. In part. See Kock (1975: 7).
1951. *Tadarida africana*: Roberts, Mammals of Southern Africa: 101. Name combination.
1953. *Tadarida (Tadarida) africana*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 66. Name combination.
1974. *Tadarida (Tadarida) ventralis*: Largen, Kock and Yalden, Mon. Zool. ital., (N.S.) 16 (Suppl. 5): 253. Name combination.
- ? *Tadarida ventralis*: Name combination.

Taxonomy:

For use of this name in place of *africana*, see Kock (1975).

Common names:

Afrikaans: Transvaalse losstertvlermuis, Reuse losstertvlermuis. English: Giant Guano Bat, Giant African Guano Bat, African Giant Free-tailed Bat, Transvaal Free-tailed Bat. French: Tadaride géante d'Afrique, Molosse géant. Portuguese: Morcego gigante de cauda livre.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Mickleburgh *et al.*, 2004av).

Regional- South Africa- Indeterminate (Smithers 1986); considered a vagrant not assessed, known from single locality (Friedmann and Daly 2004).

General distribution:

Eritrea (Ethiopia?) to South Africa (incl. Malawi (Ansell and Dowsett, 1988: 46), Zimbabwe (Cotterill, 2004: 260)).

Echolocation:

See Taylor *et al.*, (2005).

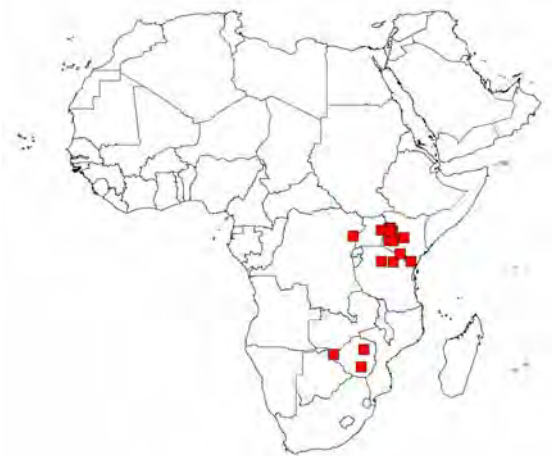

Figure 129. Distribution of *Tadarida ventralis*

Distribution based on voucher specimens: Congo (Democratic Republic of the), Kenya, South Africa, Tanzania, Zimbabwe.

Superfamily VESPERTILIONOIDEA Gray, 1821

- *1821. *Vespertilionoidea* Gray, London Med. Repos., 15: 299. Publication date: 1 April 1821.

Family MINIOPTERIDAE Dobson, 1875

- *1875. *Miniopteridae* Dobson, Ann. Mag. nat. Hist., ser. 4, 16 (95): 348. Type genus: *Miniopterus* Bonaparte, 1837. Publication date: 1 November 1875.

Taxonomy:

Bannikova *et al.* (2002: 722) indicate that the Miniopterinae do not deserve the rank of independent family (as did Koopman, 1984, 1993a, 1994; Yoshiyuki, 1989; Corbet and Hill, 1992; McKenna and Bell, 1997), but see Hooper and Van Den Bussche (2003: 13) who make a strong case for attributing family rank. They

follow Mein and Tupinier (1977), Gopalakrishna and Karim (1980), Gopalakrishna and Chari (1983), Tiunov (1989), Pierson (1986).

Common names:

English: Long-fingered Bats

Genus *Miniopterus* Bonaparte, 1837

- *1837. *Miniopterus* Bonaparte, Iconogr. Fauna ital., 1, fasc. 20. Type species: *Vespertilio ursinii* Bonaparte, 1837 (= *Vespertilio schreibersii* Kuhl, 1817).
 1866. *Miniopterus* Gray, Ann. Mag. nat. Hist., ser. 3, 17 (98): 91. Publication date: 1 February 1866. Variant spelling (Meester *et al.*, 1986: 45).
 1892. *Minyopterus* Winge, Jordfundne og nulevende Flagermus (Chiroptera) fra Lagoa Santa, Minas Gerais, Brasilien: 36. Variant spelling (Meester *et al.*, 1986: 45).
 1900. *Minneopterus* Lampe, Jahrb. Nassau Ver. Naturkunde, 53: Cat. Säugeth.-Sammlung, p. 12. Publication date: 1900. Lapsus (see Allen, 1939a: 102; Meester *et al.*, 1986: 45).

Taxonomy:

Reviewed (in part) by Peterson (1981). See Goodwin (1979: 119), Maeda (1982), and Hill (1983). All have come to very different conclusions. Molecular systematics and biogeography is discussed by Appleton *et al.* (2004); their DNA data (p. 437) suggest that the number of species currently recognized (11 or 13) is a gross underestimate.

Common names:

English: Long-fingered Bats, Bent-winged Bats.

Distribution based on voucher specimens:

"Africa", Algeria, Comoro Islands, Madagascar, Mozambique, Namibia, South Africa, Tanzania, Tunisia.

Etymology of name:

From Greek "*minos*" or "*minuos*" and "*pteros*" for small wing (Flannery, 1995: 374, Kozhurina, 2002: 16).

Miniopterus africanus Sanborn, 1936

- *1936. *Miniopterus africanus* Sanborn, Field Mus. Nat. Hist., Zool. ser., 20: 111. Type locality: Ethiopia: Shoa. Type specimen: FMNH 28769. Publication date: 15 August 1936.

Taxonomy:

Included in *inflatus* by Koopman (1993a: 230), but considered a valid species by Peterson *et al.* (1995: 120), Lavrenchenko *et al.* (2004: 132), Simmons (2005).

Common names:

English: African Long-fingered Bat.

Karyotype:

Unknown.

Conservation status:

Global- LC ver 3.1 (2001) (IUCN 2004; Schlitter 2004h).

General distribution:

Kenya, Ethiopia, Eritrea, Tanzania, Botswana, Namibia.

Distribution based on voucher specimens:

Ethiopia.

Miniopterus fraterculus Thomas and Schwann, 1906

- *1906. *Miniopterus fraterculus* Thomas and Schwann, Proc. zool. Soc. Lond., 1906, I: 162. Type locality: Republic of South Africa: Southern Cape Province, Knysna. Type specimen: BMNH 1905.5.7.18 (ad M, skin and skull, collector: Mr. C.H.B. Grant, collection date 3 October 1905, original number 1073: see Thomas and Schwann 1906: 162). Publication date: 7 June 1906.

Taxonomy:

Meester *et al.* (1986) state that Harrison and Clancey (1952) and Harrison (1953) have demonstrated that Ellerman *et al.* (1953) are mistaken in regarding *fraterculus* as a synonym of *M. schreibersii natalensis*. Koopman (1966) regards *fraterculus* instead as a subspecies of the extralimital (to southern Africa) *M. minor* Peters, 1867, but Hayman and Hill (1971) disagree. Corbet and Hill (1980) retain *fraterculus* as species, as do Swanepoel *et al.* (1980) and Honacki *et al.* (1982).

© ECJ Seamark & TC Kearney, 2007
Figure 130. *Miniopterus fraterculus*

Common names:

Afrikaans: Klein grotvlermuis. English: Lesser Long-fingered Bat, Black Clinging Bat, Lesser bent-winged bat. French: Petit minioptère. Portuguese: Morcego pequeno de dedos compridos. SiSwati- Lilulwane.

Karyotypic:

Rautenbach *et al.*, (1993) described the karyotype as having a diploid number $2n=46$, $aFN=50$, $BA=6$, $X=SM$, $Y=A$.

Conservation status:

Global- EN (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Schlitter 2004g). Regional- South Africa- NT ver 3.1 (2001) (Friedmann and Daly 2004). Swaziland- NT B2ab(iv); D2 ver 3.1 (2001) (Monadjem *et al.*, 2003).

General distribution:

Cape Province, KwaZulu-Natal, and Transvaal (South Africa), Malawi, Zambia, Angola, Mozambique, Madagascar (see Russ *et al.*, 2001).

Figure 131. Distribution of *Miniopterus fraterculus*

Distribution based on voucher specimens:
 South Africa, Swaziland.

Miniopterus gleni Peterson, Eger and Mitchell, 1995

- *1995. *Miniopterus gleni* Peterson, Eger and Mitchell, Faune de Madagascar, Chiroptères, 84: 128. Type locality: Madagascar: 20 km S Tuléar, in a marine cave between Sarodrano and Saint-Augustin. Type specimen: ROM 42567 (ad M, skin and skull, collection date: 9 May 1967).

Taxonomy:
See Simmons (2005).

Conservation status:
Global- LR/nt ver 2.3 (1994).

Common names:
English: Glen's Long-fingered Bat.

Distribution:
Madagascar.

Karyotypic:
Unknown.

Distribution based on voucher specimens:
[Madagascar](#).

Miniopterus inflatus Thomas, 1903

- *1903. *Miniopterus inflatus* Thomas, Ann. Mag. nat. Hist., ser. 7, 12 (72): 634. Type locality: Cameroon: Efulen. Type specimen: BMNH 1903.2.4.8 (ad M, skin, collector: Mr. G.L. Bates, collection date: 24 July 1901). Publication date: 1 December 1903.

Taxonomy:

Koopman (1993a: 230) included *africanus*, but see Peterson *et al.* (1995: 120), Simmons (2005).

Common names:

Afrikaans: Groot grotvlermuis. English: Greater Long-fingered Bat, High-crowned bat. French: Minioptère, Minioptère à couronne, Grand minioptère. Portuguese: Morcego grande de dedos compridos.

Karyotypic:

Ruedas *et al.* (1990) described the karyotype as having a diploid number of $2n=46$, $aFN=50$, $BA=6$, $X=M$, $Y=A$.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Schlitter 2004j).

General distribution:

Kenya, Uganda (see Kityo and Kerbis, 1996: 62), E and S Democratic Republic of the Congo, Cameroon, Gabon, Mozambique, Burundi, Liberia, Ethiopia, perhaps Nigeria. W African distribution uncertain because of confusion with *schreibersii*.

Figure 132. Distribution of *Miniopterus inflatus*

Distribution based on voucher specimens: Cameroon, Congo (Democratic Republic of the), Malawi, Zimbabwe.

Miniopterus inflatus inflatus Thomas, 1903

- *1903. *Miniopterus inflatus* Thomas, Ann. Mag. Nat. Hist., ser. 7, 12 (72): 634. Type locality: Cameroon: Efulen. Type specimen: BMNH 1903.2.4.8 (Holotype, ad M, collector: Mr. G.L. Bates, collection date: 24 July 1901). Publication date: 1 December 1903.
- ? *Miniopterus inflatus inflatus*: Name combination.

Miniopterus inflatus rufus Sanborn, 1936

- *1936. *Miniopterus rufus* Sanborn, Field Mus. Nat. Hist., Zool. ser., 20 (14): 112. Type locality: Democratic Republic of the Congo: Lualaba River, 40 mi (64 km) below Bukama, Katobwe [08 51 S 26 05 E]. Type specimen: FMNH 29416. Publication date: 15 August 1936.
- ? *Miniopterus inflatus rufus*: Name combination.

Miniopterus majori Thomas, 1906

- *1906. *Miniopterus Majori* Thomas, Ann. Mag. Nat. Hist., ser. 7, 17 (98): 175. Type locality: Madagascar: SE Betsileo, Imasindry [Sahamananina]. Type specimen: BMNH 1897.9.1.38 (Holotype, ad F, skin and skull, collector Dr. C.I. Forsyth Major, collection date 3 July 1895, original number 457). Publication date: 1 February 1906.
- ? *Miniopterus majori*: Current spelling.

Taxonomy:

Included in *schreibersii* by Koopman (1993a: 231), but considered a valid species by Peterson *et al.* (1995: 131), Hutson *et al.* (2001: 32), Russ *et al.* (2001), Simmons (2005).

Karyotypic:

Unknown.

Conservation status:

Global- DD ver 2.3 (1994).

Etymology of name:

In honour of Dr. C.I. Forsyth Major, collector of the type specimen (see Thomas 1906: 176)

General distribution:

Madagascar; Comoro Islands.

Common names:

English: Major Long-fingered Bat.

Distribution based on voucher specimens:

Madagascar.

Miniopterus manavi Thomas, 1906

- *1906. *Miniopterus manavi* Thomas, Ann. Mag. Nat. Hist., ser. 7, 17 (98): 176. Type locality: Madagascar: E/NE Betsileo, Fandriana region [20 17 S 47 31 E]. Type specimen: BMNH 1897.9.1.37 (Holotype, ad M, skin and skull, collector: Dr. C.I. Forsyth Major, collection date: 3 July 1895, original number 453: see Peterson *et al.*, 1995: 135). Publication date: 1 February 1906.
1959. *Miniopterus minor griveaudi* Harrison, Durban Mus. Novit., 5 (15): 192. Type locality: Comoro Islands: Grand Comoro. Type specimen: BMNH 1967.1231 (ad F, collector: Mr. Paul Griveaud, collection date: 10 August 1958, formerly HZM 3.2803, see Harrison 1959: 192). Peterson *et al.* (1995: 119) and Simmons (2005) state *griveaudi* might represent a valid species. Publication date: 30 April 1959.
1993. *Miniopterus minor grivaudi* Koopman, Mammal Species of the World: 231. Lapsus.

Taxonomy:

Included in *minor* by Koopman (1993a: 231), but considered a valid species by Peterson *et al.* (1995: 135), Hutson *et al.* (2001: 32), Russ *et al.* (2001), Simmons (2005).

Common names:

English: Manavi Long-fingered Bat.

Karyotypic:

Unknown.

Conservation status:

Global- DD ver 2.3 (1994).

Distribution:

Madagascar; Grand Comoro.

Distribution based on voucher specimens:

Comoro Islands, **Madagascar**.

Figure 133. Distribution of *Miniopterus manavi*

Miniopterus minor Peters, 1867

- *1867. *Miniopterus minor* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 885 (for 1866).
Type locality: Tanzania: Coast opposite Zanzibar Island. - Publication date: 1867.
1889. *Miniopterus newtoni* Bocage, J. Sci. mat. Phys. Nat., Lisboa, ser. 2, 1 (3): 198. Type
locality: São Tomé and Príncipe: São Tomé island. Publication date: December 1889.
1992. *occidentalis* Juste and Ibáñez, ? (see Simmons 2005)

Taxonomy:

Koopman (1993a: 231) included *griveaudi* and *manavi*, but see Peterson *et al.* (1995: 119, 135) and Simmons (2005).

Etymology:

From the Latin "*minor*" meaning small.

Common names:

English: Least long-fingered bat. French: Minioptère minuscule.

Karyotypic:

Unknown.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004o).

Distribution:

Kenya, Tanzania, Democratic Republic of the Congo, Republic of the Congo, São Tomé Island.

Distribution based on voucher specimens:

Congo (Democratic Republic of the), Tanzania.

Figure 134. Distribution of *Miniopterus minor*

Miniopterus natalensis (A. Smith, 1833)

- *1833. *Vespertilio natalensis* A. Smith, S. Afr. Quart. J., ser. 2, 1 (2): 59. Type locality: Republic of South Africa: Natal, Durban (Meester *et al.* (1986: 46) state: "Durban nominated by Roberts (1951: 73)"). Type specimen: BMNH 1848.6.12.19 (cotype). Publication date: November 1833.
1840. *Vespertilio dasythrix* Temminck, Monogr. Mamm., 2: 268. Type locality: Republic of South Africa: Interior of Caffraria. Type specimen: RMNH 25093; BMNH 1849.8.16.25 (Holotype); BMNH 1848.6.12.19 (Holotype). The two holotype numbers still need clarification, but probably represent different accession numbers for the skin and the skull. Publication date: 1840.
1846. *Vespertilio scotinus* Sundevall, Öfvers. K. Svenska Vet.-Akad. Forh. Stockholm, 3 (4): 119. Type locality: Republic of South Africa: Caffraria, Durban (Originally "varius Caffrariæ locis allata"; Meester *et al.* (1986: 46) state: "Durban nominated by Roberts (1951: 74)"). Type specimen: BMNH 1846.6.2.19 (cotype). Publication date: 1846. Allen (1939a: 104), Meester *et al.* (1986: 46) mentioned the original name as "*Vesperugo scotinus*".
1909. *Miniopterus breyeri* Jameson, Ann. Mag. Nat. Hist., ser. 8, 4 (23): 471. Type locality: Republic of South Africa: N Transvaal, Waterberg district, Gat(s)koppies. Type specimen: BMNH 1909.7.2.6. Publication date: 1 November 1909.
1912. *Miniopterus natalensis arenarius* Heller, Smithson. Misc. Coll., 60 (12): 2. Type locality: Kenya: Central province, Nanyuki district, Northern Guaso Nyiro, Nyuki (=Nanyuki) river. Type specimen: USNM 181811. Publication date: 4 November 1912.
1917. *Miniopterus breyeri vicinior* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 450. Type locality: Democratic Republic of the Congo: NE Congo, Aba. Type specimen: AMNH 49019 (ad M, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 16 December 1911, original number 1770: see Allen, 1917: 450). Publication date: 29 September 1917.
1927. *Miniopterus smitianus* Thomas, Proc. zool. Soc. Lond., p. 373. Type locality: Namibia: E Damaraland, 40 mi (64 km) W of Gobabis, Witvlei. Type specimen: BMNH 1926.12.7.15. Publication date: 12 July 1927.
- ? *Miniopterus natalensis*: Name combination.
- ? *Vesperugo scotinus*: Name combination.

Taxonomy:

Considered a synonym of *schreibersii* by Koopman (1993a: 231). Might be a valid species according to Koopman (1994) in Horáček *et al.* (2000: 105). Considered a valid species by Simmons (2005).

Figure 135. *Miniopterus natalensis*

Common names:

English: Natal Long-fingered Bat, Natal Clinging

Bat. SiSwati- Lilulwane.

Palaeontological / archaeological records:

This species is present in the later half of the upper Pleistocene sequence and in the late Holocene at Border Cave, and probably at Nkupe during the middle and late Holocene (Avery 1991: 6).

Karyotypic:

M. schreibersii from Namibia and South Africa now assigned to *M. natalensis*, were karyotyped by Rautenbach *et al.*, (1993) who described the karyotype as having a diploid number of $2n=46$, $aFN=50$, $BA=6$, $X=SM$, $Y=A$.

Conservation status:

Global- NT ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004ai).

Regional- Swaziland- NT B2ab(iv); D2 ver 3.1 (2001) assessed as *M. schreibersii* (Monadjem *et al.*, 2003).

General distribution:

Sudan, Ethiopia (Lavrenchenko *et al.*, 2004: 132),

and SW Arabia southwards over Malawi (Ansell and Dowsett, 1988: 35) to South Africa.

Echolocation:
See Taylor (1999).

Distribution based on voucher specimens:
Botswana, Cameroon, Congo (Democratic Republic of the), Ethiopia, Guinea, Kenya, Lesotho, Malawi, Mozambique, Namibia, South Africa, Swaziland, Tanzania, Zambia, Zimbabwe.

Figure 136. Distribution of *Miniopterus natalensis*

Miniopterus schreibersii (Kuhl, 1817)

- *1817. *Vespertilio schreibersii* Kuhl, Die Deutschen Fledermäuse, Hanau, p. 14. Type locality: Romania: Mountains of S Ban(n)at, near Coronini, left bank of the Danube River, Kolumbács Cave [=Kulmbazer cave] [c 44 37 N 21 40 E].
1827. *Vespertilio Schreibersii* Lesson, Manuel de Mammalogie, p. 89. Lapsus.
1956. *Miniopterus inflatus villiersi* Aellen, Bull. IFAN, (A) 18: 890. Type locality: Guinea: Dalaba [Grotte du Marché] [10 42 N 12 15 W]. Type specimen: MHNG ? (ad M, collector: A. Villiers, collection date: 16 April 1954, original number 2839; former number IFAN: 54-1-1). Considered a valid subspecies by Fahr and Ebigbo (2003: 128; 2004: 73).
1995. *[Miniopterus] schreibersi* Pavlinov, Borissenko, Kruskop and Jahonton, Arch. Zool. Mus., Moscow State Univ., 133: 119. Lapsus.
- ? *Miniopterus schreibersii*: Name combination.

Taxonomy:

Reviewed by Crucitti (1976), Hill (1983). Includes *majori*, but see Peterson *et al.* (1995: 131). Molecular systematics and biogeography are discussed by Appleton *et al.* (2004), who indicate (p. 436 - 437) that based on their data *M. schreibersii* would be restricted to Europe and North Africa; the Ethiopian representatives would belong to a second species and the Oriental-Australian a third (see also Stadelmann *et al.*, 2004b: 188). Tian *et al.* (2004: 303) confirm the views presented by Appleton *et al.* (2004), and suggest *M. schreibersii* for the European specimens, *M. fuliginosus* for the Asian representatives and *M. oceanensis* for the Australian ones (which was already suggested by Maeda (1984), although he separated the specimens from Hainan from the other Asian representatives, which is no longer supported by Appleton *et al.*, 2004).

If *Miniopterus schreibersii* is restricted to northern Africa, then *Miniopterus inflatus villiersi* Aellen, 1956 must possibly be assigned to *Miniopterus natalensis*.

Etymology of name:

In honour of Karl Franz Anton von Schreibers (1775 - 1852), then director of the Vienna Museum (Flannery, 1995: 378; 1995b: 452; Kozhurina, 2002: 17).

Common names:

Afrikaans: Schreibers se grotvlermuis, Schreiber-grotvlermuis. Basque: Schreiber saguzarra. Catalanian: Rat penat de cova. Czech: létavec stehovavý. Dutch: (Grote) Langvleugelvlermuis, Schreiber's vleermuis. English: Schreiber's Bat, Long-wing Bat, Schreibers's Long-fingered Bat, Common Bent-winged Bat, Greater Bent-winged Bat, Large Bentwing Bat, Bent-winged bat, Common Long-fingered Bat. French: Minioptère de Schreibers, Minioptère à longues ailes, Chauve-souris de Schreiber, Minioptère. Gallician: Morcego das covas. German:

Langflügelfledermaus. Hungarian: törpe denevér. Indonesian: Kelelawar mini schreiber, Tomosu Biasa, Kelelawar mini biasa. Italian: Miniottero. Maltees: Farfet il-Lejl ta' Xrajber. Roman: Minopter ad ala lunga. Russian: Obyknovennyj dlinnokryl. Portuguese: Morcego-de-peluca, Morcego de schreiber. Slovenian: dolgokriili netopir. Spanish (Castilian): Murciélago de cueva.

Karyotypic:

Matthey and Bovey (1948) described the karyotype as having a diploid number of $2n=48$, $aFN=50$. While Capanna and Civitelli (1964b) described the karyotype from Italy as having a diploid number of $2n=46$, $aFN=50$, $X=$ metacentric, $Y=$ acrocentric. While Capanna and Civitelli (1965) found the $X=$ submetacentric, this is supported by Baker *et al.*, (1974), and Manfredi Romanini *et al.*, (1975). But Bickham and Hafner (1978) found the fundamental number to be $aFN=52$.

Conservation status:

Global- LR/nt included *M. natalensis* (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Schlitter 2004i).

Regional- South Africa- NT ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

S Europe (incl. Portugal, Austria, Albania, Greece, Turkey) and Morocco and Algeria through the Caucasus (incl. Abkhazia) and Israel (Jordan Valley), SW Saudi Arabia, Iran to Pakistan (?), India, Sri Lanka, Nepal, N Myanmar, most of China (incl. Hong Kong) and Japan; most of Indo-Malayan region; Thailand, Laos, Vietnam; Sumatra, Java, Sulawesi, Molucca Isls., Lesser Sundas (including Ambon), Borneo (Indonesia); New Guinea; Philippines (incl. Palawan); Solomon Isls (including Bougainville Isl); Australia; Bismarck Arch; Cape Verde Isls (Azzaroli Puccetti and Zava, 1988).

The distribution area given above is probably to extensive in view of the results of the various studies, which suggest that several forms, which were generally assigned to this species, could possibly represent separate species. In its most restrictive form, the distribution area could be limited to Europe, northern Africa and possibly western Asia.

Distribution based on voucher specimens:
Cape Verde.

Family VESPERTILIONIDAE Gray, 1821

1815. *Vespertilia* Rafinesque, *Analyse de la Nature*, p. 54. Type genus: *Vespertilio* Linnaeus, 1758. Conserved by Direction 98 (1858).
- *1821. *Vespertilionidae* Gray, *London Med. Repos.*, 15: 299. Type genus: *Vespertilio* Linnaeus, 1758. Publication date: 1 April 1821.

1893. *Nycteridae* Schulze, *Not of Dobson*, 1875 (see Pavlinov *et al.*, 1995: 93).
1941. *Myotini* Tate, ?

Taxonomy:

Systematicians have long recognized that Vespertilionidae as so defined, is diagnosed by few if any apomorphies, and some data have been cited as evidence that the family is not monophyletic. For example, *Tomopeas ravis* (the only member of the subfamily Tomopeatinae) shares immunological affinities and several derived morphological and molecular traits with molossidids (Miller 1907; Davis 1970; Barkley 1984; Pierson 1986; Sudman *et al.* 1994). Miniopterines, which differ from other vespertilionids in several aspects of fetal development and adult morphology, show immunological affinity with molossids (Mein and Tupinier 1977; Gopalakrishna and Chari 1983; Pierson 1986). Kerivoulines share derived morphological traits with Natalidae, Thyropteridae, Furipteridae, and Myzopodidae (Sigé 1974; Van Valen 1979). These patterns have lead various workers to suggest removal of one or more subfamilies from Vespertilionidae (Davis 1970; Sigé 1974; Mein and Tupinier 1977; Van Valen 1979; Gopalakrishna and Chari 1983; Barkley 1984; Sudman *et al.* 1994). Each of the eight vespertilionid subfamilies just listed appears to be monophyletic, with the exception of Vespertilioninae, which may be paraphyletic. In morphology, Vespertilioninae is "perhaps best characterized by absence of the special modifications that distinguish the other groups" (Miller 1907: 197). Volleth and Heller (1994) describe several derived karyotype features that diagnose Vespertilioninae (including Nyctophilinae but exclude Myotinae), but their study did not include any members of Antrozoinae or Lasiurini.

Molecular phylogenetics reviewed by Hooper and Van Den Bussche (2003).

Common names:

Czech: netopýřovití. Dutch: Gladneusvleermuizen. English: Evening bats, Vespertilionid bats, Vesper Bats, Plain-faced Bats, Simple-nosed Bats. Finnish: Siipat. German: Glattnasen. Spanish: Murcielagos chicos. Norwegian: Glattneser, Glattneseflaggermus.

Etymology of name:

Rosevear (1965) uses the colloquial name vesper bats, borrowing it from the name for the family, which is derived from the Latin for a bat, *vespertilio*. They are sometimes called 'evening bats' because of their time of activity (Taylor 2005).

Subfamily Kerivoulinae Miller, 1907

*1907. *Kerivoulinae* Miller, Bull. U.S. natl. Mus., 57: 232. Type genus: *Kerivoula* Gray, 1842.

Common names:

English: Forest Bats, Woolly bats.

Genus *Kerivoula* Gray, 1842

- *1842. *Kerivoula* Gray, Ann. Mag. nat. Hist., [ser. 1], 10 (65): 258. Type species: *Vespertilio pictus* Pallas, 1767 (Gray (1842: 258) mentions *Vesp. Hardwickii* Horsfield, *V. picta* Pallas, *V. tenuis*, G. Gärtneri [and *Kerivoula griseus*, *Kerivoula Poensis*]). Type species by subsequent designation (Peters, 1866d) (see Corbet and Hill, 1992: 153). Allen (1939a: 100) mentioned *Vespertilio hardwickii* Horsfield as genotype). Publication date: 1 December 1842.
1849. *Kirivoula* Gervais, Dict. Univ. Hist. nat., 13: 213. Publication date: 1849. Emendation (see Meester *et al.*, 1986: 63).
1861. *Nyctophylax* Fitzinger, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 42: 390 (for 1860). Publication date: 1861. "Apparently based on *Vespertilio tralatitius*, Temminck, 1840 = *V. tralatitius* Horsfield, 1824, and indeterminable name according to Laurie and Hill (1954). According to Palmer (1904) *Nyctophylax* was 'a new name for the barbaric *Kerivoula* Gray, 1842'" (see Corbet and Hill 1992: 153). Mentioned as a possible synonym (question mark) by Pavlinov *et al.* (1995: 93).
1870. *Nyctophilax* Fitzinger, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 62 (1): 544. Publication date: November 1870. "Apparently based on *Vespertilio tralatitius*, Temminck, 1840 = *V. tralatitius* Horsfield, 1824, and indeterminable name according to Laurie and Hill (1954). According to Palmer (1904) *Nyctophilax* was 'a new name for the barbaric *Kerivoula* Gray, 1842'" (see Corbet and Hill 1992: 153). Mentioned as a possible synonym (question mark) by Pavlinov *et al.* (1995: 93).
1891. *Cerivoula* Blandford, Fauna British India, Mamm., 338. Publication date: 1891. Emendation (see Meester *et al.*, 1986: 63).
2005. *Keivoula* Struebig, Rossiter, Bates, Kingston, Sai Sein Lin Oo, Aye Aye Nwe, Moe Moe Aung, Sein Sein Win and Khin Mya Mya, Acta Chiropt., 7 (1): 147. A lapsus.

Taxonomy:

Phoniscus Miller, 1906, has been included in *Kerivoula* as either a subgenus (Ellerman and Morrison-Scott 1951, Ellerman *et al.* 1953) or a synonym (Ryan 1965). Hill (1965) argues for the generic separation of *Phoniscus* from *Kerivoula*, and this view appears to be widely accepted (Rosevear 1965, Hayman and Hill 1971, Corbet and Hill 1980, Honacki *et al.* 1982), but see Koopman (1982).

The species *aerosa* Tomes, 1858, was described from the east coast of South Africa, but Roberts (1951) questions whether the description is not that of an immature *argentata*, although the colour is reminiscent of *lanosa*; Ellerman *et al.* (1953) point out that the type specimen resembles the Oriental species of *Kerivoula* (in which they include *Phoniscus*) rather than *argentata* or *lanosa*; Hill (1965) has shown that *aerosa* should be transferred to the Asiatic *Phoniscus*. Hayman and Hill (1971) question the

African origin of *aerosa*, and Corbet and Hill (1980) dubiously place it in Southeast Asia, while Honacki *et al.* (1982) cite the provenance as 'possibly Africa'. In view of the considerable doubt about the status and origin of this species it is not treated as a member of the southern African fauna.

Common names:

English: Woolly Bats, Trumpet-eared Bats.
French: Kérivoule, Chauve-souris laineuse.

Etymology of name:

Rosevear suggested that *Kerivoula* was derived from the Cingalese name for the Painted Bat, kehel vuhla. Flannery (1995: 369) indicates that it was derived from the Ceylonese for plantain (banana) bat.

Distribution based on voucher specimens:

South Africa, Tanzania.

Kerivoula africana Dobson, 1878

*1878. *Kerivoula africana* Dobson, Cat. Chiroptera Brit. Mus., p. 335. Type locality: Tanzania: coast opposite Zanzibar Island. Publication date: June 1878.

Taxonomy:

See Simmons (2005).

Common names:

English: African Woolly Bat, Tanzanian Woolly Bat. French: Kerivoule de Tanzanie.

Conservation status:

Global- Ex (IUCN Conservation Monitoring Centre 1988); Ex (IUCN 1990); Ex (Groombridge 1994); DD (Baillie and Groombridge 1996); EN B2ab(iii) ver 3.1 (2001) (IUCN 2004; Fahr and Jacobs 2004).

MacPhee and Flemming (1999) considered this species to be extinct, but it was recently rediscovered, see (Burgess *et al.*, 2000).

General distribution:

Tanzania.

Figure 137. Distribution of *Kerivoula africana*

Distribution based on voucher specimens:
Tanzania.

Kerivoula argentata Tomes, 1861

- *1861. *Kerivoula argentata* Tomes, Proc. zool. Soc. Lond., 1861, I: 31, 32. Type locality: Namibia: Ovamboland, Otjoro (Ansell and Dowsett (1988: 44) indicate it is probably Otjihoro, according to Shortridge, 1934: 70). Type specimen (F, collection date 1 December 1859). Publication date: May 1861.
1865. *Nycticejus nidicola* Kirk, Proc. Zool. Soc. Lond., 1864, III: 650. Type locality: Mozambique: Zambezi River, Shupanga (=Chupanga) [18 02 S 35 37 E]. Type specimen: BMNH 1864.1.9.37 (Syntype); BMNH 1864.1.9.38 (Syntype); BMNH 1864.1.9.39 (Syntype). Publication date: May 1865. Considered a valid subspecies by Ansell and Dowsett (1988: 44).
1924. *Kerivoula nidicola zuluensis* Roberts, Ann. Transv. Mus., 10: 61. Type locality: Republic of South Africa: Natal, Zululand, White Umfolosi River [28 19 S 31 50 E]. Type specimen: TM 3025 (ad M, skin and skull, collector: Austin Roberts collection date: 17 July 1922 note: In weaver nest with two others) Publication date: 31 January 1924. Considered a valid subspecies by Taylor (1998: 57).

Taxonomy:

See Simmons (2005).

Common names:

Afrikaans: Damara-wolhaarvlermuis, Damaralandse Wolhaarvlermuis. English: Silvery Woolly Bat, Silvered Woolly Bat, Silver Woolly Bat, Damara Woolly Bat. French: Chauve-souris laineuse du Damara. Portuguese: Morcego lanoso da Damaralandia.

Etymology of name:

This species was originally described from a specimen from Damaraland, Namibia (Taylor 2005).

Palaeontological / archaeological records:

K. argentata may be represented in the late Holocene at Nkupe, South Africa (Avery 1991: 6).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004h). Regional- South Africa- Indeterminate (Smithers 1986); EN B1ab(iii)+2ab(iii) ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Uganda and S Kenya to Malawi (Happold and Happold, 1997: 822), Angola, Namibia, Zambia, Zimbabwe, Botswana, and Natal (South Africa).

Echolocation:

See Taylor (1999).

Figure 138. Distribution of *Kerivoula argentata*

Distribution based on voucher specimens: "Africa", Congo (Democratic Republic of the), Kenya, Malawi, Mozambique, Senegal, South Africa, Tanzania.

Kerivoula cuprosa Thomas, 1912

- *1912. *Kerivoula cuprosa* Thomas, Ann. Mag. Nat. Hist., ser. 8, 10 (55): 41. Type locality: Cameroon: Ja River, Bitye [2 000 ft (=610 m)]. Type specimen: BMNH 1912.10.25.1 (Holotype, ad M, collector: Mr. G.L; Bates, collection date: 17 October 1911, original number 564). Publication date: 1 July 1912.

Taxonomy:

See Simmons (2005).

Common names:

English: Copper Woolly Bat. French: Chauve-souris laineuse cuivrée.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Fahr 2004m).

Distribution:

Kenya, N Democratic Republic of the Congo, S Cameroon, Guinea (1st record see Fahr and Ebigbo, 2004: 69). Grubb *et al.* (1998: 92) indicate that records west of Cameroon are erroneous and probably refer to a specimen from Oda, Ghana in the FMNH that was re-identified as *K. lanosa muscilla*.

Distribution based on voucher specimens:

Cameroon, Cote D'Ivoire.

Figure 139. Distribution of *Kerivoula cuprosa*

Kerivoula eriophora (Heuglin, 1877)

- *1877. *Nycticejus eriophora* Heuglin, Reise in Nordost Afrika, 2: 34. Type locality: Ethiopia: Belegaz Valley, between Semian and Wogara. Publication date: 1877.
? *Kerivoula eriophora*: Name combination.

Taxonomy:

Very poorly known; may be conspecific with *africana* which it antedates; see Hayman and Hill (1971: 53).

Common names:

English: Ethiopian Woolly Bat. French: Chauve-souris laineuse d'Ethiopie.

Conservation status:

Global- VU (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Fahr 2004p).

General distribution:

Ethiopia.

Etymology of name:

From the Greek "*eriphora*" meaning wool-bearing

Kerivoula lanosa (A. Smith, 1847)

- *1847. *Vespertilio lanosus* A. Smith, Illustr. Zool. S. Afr. Mamm., pl. 50 and text. Type locality: Republic of South Africa: Cape Province, 200 mi (322 km) E Cape Town. Type specimens: BMNH 1907.1.1.539; BMNH 1907.1.1.538 (Syntypes). Publication date: December 1847.
1878. *Kerivoula brunnea* Dobson, Cat. Chiroptera Brit. Mus., p. 334. Type locality: Republic of South Africa: South Africa (Roberts (1951: 75): "Madras or South Africa. Sir A. Smith (Obviously the type of Smith's *V. Lanosus*, cf. Roberts, 1913: Knysna)"). Meester *et al.* (1986: 64) mention "South Africa or Madras". Type specimen: BMNH 1852.8.12.9 (Holotype). Publication date: June 1878.
1901. *Kerivoula harrisoni* Thomas, Proc. Zool. Soc. Lond., 1900, IV: 802, footnote. Type locality: NE Africa: between Lakes Zwai and Margherita, Walamo [6 700 ft (=2 042 m)]. Type specimen: BMNH 1900.11.4.1 (Holotype, ? Collected and presented by Mr. J.J. Harrison, collection date: 21 February 1900). Publication date: April 1901.
1906. *Kerivoula muscilla* Thomas, Ann. Mag. nat. Hist., ser. 7, 18 (106): 294. Type locality: Cameroon: Ja River. Publication date: 1 October 1906. Considered a valid subspecies by Fahr and Ebigo (2003: 128; 2004: 73).
1920. *Kerivoula lucia* Hinton, Ann. Mag. Nat. Hist., ser. 9, 6 (32): 240. Type locality: Zimbabwe: N'dola. Type specimen: BMNH 1920.11.3.27. Publication date: 1 August 1920.
1922. *Kerivoula lueia* Kershaw, Ann. Mag. nat. Hist., ser. 9, 10 (55): 99. Publication date: 1 July 1922. Erratum (see Meester *et al.*, 1986: 64).
1959. *Kerivoula harrisoni bellula* Aellen, Arch. Sci. Genève, 12: 221. Type locality: Côte d'Ivoire: near Abidjan, Adiopodumé [05 19 N 04 08 W]. Type specimen: MHNG 965.38 (ad M, alcoholic, collector: V. Aellen, collection date: 20 July 1953, original number 622).
- ? *Kerivoula lanosa*: Name combination.

Taxonomy:

Includes *harrisoni* and *muscilla*; see Hill (1977b), but see Fahr and Ebigo (2003: 128; 2004: 73).

Common names:

Afrikaans: Klein wolhaarvlermuis. English: Lesser Woolly Bat. French: Petite Chauve-souris laineuse. Portuguese: Morcego lamoso Harrison.

Etymology of name:

From the Greek "*lanosa*" meaning woolly.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004a). Regional- South Africa- Indeterminate (Smithers 1986); NT ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Liberia, Guinea (Fahr and Ebigo, 2003: 128) to Ethiopia, south to Botswana, Namibia (?) (Cotterill, 2004: 262), South Africa.

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach *et al.* (1993) reported $2n = 28$, FN = 50, BA = 18, a metacentric X chromosome, and an acrocentric Y chromosome, for specimens from South Africa.

Protein / allozyme - Unknown.

Figure 140. Distribution of *Kerivoula lanosa*

Distribution based on voucher specimens: Botswana, Cote D'Ivoire, Côte d'Ivoire, Ethiopia, Kenya, Mozambique, South Africa, Zambia.

Kerivoula phalaena Thomas, 1912

*1912. *Kerivoula phalæna* Thomas, Ann. Mag. Nat. Hist., ser. 8, 10 (57): 281. Type locality: Ghana: Inland from Denkwa, Bibianaha [=Bibiani] [720 ft (=219 m)]. Type specimen: BMNH 1912.6.20.3 (Holotype, ad F, collected and presented by Dr. H.G.F. Spurrell, collection date: 24 April 1912, original number 224). Publication date: 1 September 1912.

? *Kerivoula phalaena*: Current spelling.

Taxonomy:

See Simmons (2005).

Common names:

English: Spurrell's Woolly Bat, Spurrell trumpet-eared bat. French: Chauve-souris à oreilles en trompette de Spurrell.

Etymology of name:

From the Greek "*phalaena*" meaning whale.

Conservation status:

Global-LR/lc (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Fahr 2004).

General Distribution:

Guinea (1st record see Fahr and Ebigbo, 2004: 69), Liberia, Ghana, Cameroon, Republic of the Congo, Democratic Republic of the Congo.

Distribution based on voucher specimens:

Cameroon, Congo (Democratic Republic of the), Cote D'Ivoire, Ghana, Uganda.

Figure 141. Distribution of *Kerivoula phalaena*

Kerivoula smithii Thomas, 1880

- *1880. *Kerivoula Smithii* Thomas, Ann. Mag. Nat. Hist., ser. 5, 6 (32): 166, text-fig. Type locality: Nigeria: Old Calabar. Type specimen: BMNH 1880.7.21.9 (Holotype, collector Dr. A. Robb, Presbyterian Mission, presented by Dr. J.A. Smith). Publication date: 1 August 1880.

Taxonomy:

See Simmons (2005).

Common names:

English: Smith's woolly bat. French: Kérivoule de Smith.

Etymology of name:

In honour of Dr. J.A. Smith, who presented to the type specimen to the British Museum of Natural History.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Fahr 2004a).

Distribution:

Nigeria, Cameroon, N and E Democratic Republic of the Congo, Kenya, Ivory Coast, Liberia.

Distribution based on voucher specimens:

Congo (Democratic Republic of the), Nigeria, Tanzania, Uganda.

Figure 142. Distribution of *Kerivoula smithii*

Subfamily Myotinae Tate, 1942

- *1942. *Myotinae* Tate, Bull. Am. Mus. Nat. Hist., 80: 229.
 1998. *Myotiinae* Simmons, Interfamilial Relationships in bats.

Taxonomy: Originally named as a tribe within Vespertilioninae; raised to subfamily level by Simmons (1998), Bannikova *et al.* (2002: 722), Hooper and Van Den Bussche (2003: 21) following the suggestion of Volleth and Heller (1994). May not be monophyletic; see Hooper and Van Den Bussche (2001), and Simmons (2005). Hooper and Van Den Bussche (2003: 21) only include the members of the genus *Myotis* (not *Lasionycteris* nor *Cistugo*).

Genus *Cistugo* Thomas, 1912

- *1912. *Cistugo* Thomas, Ann. Mag. nat. Hist., ser. 8, 10 (56): 205. Type species: *Cistugo seabrae* Thomas, 1912. Publication date: 1 August 1912.

Taxonomy: Meester *et al.* (1986) included *Cistugo* as a subgenus of *Myotis*. Baker *et al.* (1975) recorded the karyotype of *Myotis* as $2n = 44$, $AA = 50$, but Dippenaar *et al.* (1983) give it as $2n = 50$, $AA = 48$ in both *seabrai* and *lesueuri*. Included as subgenus in *Myotis* by Koopman (1993a: 207), but considered a valid genus by Thomas (1915), Roberts (1919), Rautenbach *et al.* (1993), Bickham *et al.* (2004: 333), Stadelmann *et al.* (2004b: 185), and Simmons (2005). Stadelmann *et al.* (2004b: 185) state that it might be possible that the two species share closer phylogenetic relationships with other families of bats than with the Vespertilionidae.

Hayman and Hill (1971) doubt the validity of *lesueuri* and Corbet and Hill (1980) include it in *seabrai*, while Honacki *et al.* (1982) retain it as a separate species. It is possible, particularly in view of their allopatric distribution, that *lesueuri* may best be treated as a subspecies of *seabrai*. Common names:
 English: Wing-gland Bats

Cistugo lesueuri Roberts, 1919

- *1919. *Cistugo lesueuri* Roberts, Ann. Transv. Mus., 6: 112. Type locality: Republic of South Africa: SW Cape Province, Paarl District, near Paarl, Franschoek Valley [=Frenchhoek valley], L'Ormarins [=Lormarins] [3344S 1858E] (details see Meester *et al.*, 1986: 49). Type specimen: TM 2286 (ad M, skin and skull collector: Austin Roberts & Adendorff, collection date: ?? original number: 154, note: Rescued from cat by Mr Le Seur) Publication date: April 1919.

- ? *Myotis (Cistugo) lesueuri*: Name combination.
 ? *Myotis lesueuri*: Name combination.

Taxonomy: Hayman and Hill (1971) doubt the validity of *lesueuri* and Corbet and Hill (1980) include it in *seabrae*, while Honacki *et al.* (1982) retain it as a separate species. It is possible, particularly in view of their allopatric distribution, that *lesueuri* may best be treated as a subspecies of *seabrae*. Etymology of name:
 Named after J.S. le Sueur of L'Ormarins in the Paarl district, Western Cape, who recovered the original specimen from his cat (see Smithers, 1983; 92; Taylor, 2005).

Common names: Conservation status:
 Afrikaans: Lesueur se langhaarvlermuis, Lesueur-langhaarvlermuis, Lesueurse Vlerkkliervlermuis. Global- VU (Baillie and Groombridge 1996); VU D2 ver 3.1 (2001) (IUCN 2004; Jacobs 2004b).
 English: Lesueur's Wing-gland Bat, Lesueur's Hairy Bat, Lesueur's Myotis, Wing-gland bat. Regional- South Africa- Indeterminate, assessed as *Myotis lesueuri* (Smithers 1986); NT ver 3.1 (2001) (Friedmann and Daly 2004).
 French: Murin de Lesueur.

General distribution:

S South Africa (Herselman and Norton, 1985; Lynch, 1994; Watson, 1998).

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach *et al.* (1993) reported $2n = 50$, FN = 48, BA = 0, a submetacentric X chromosome, and an acrocentric Y chromosome, these results were the same as those obtained for *C. seabrae* from Namibia (Rautenbach *et al.*, 1993).

Protein / allozyme - Unknown.

Habitat:

In the Free State Province of South Africa collected from "broken country e.g. koppies and cliffs", invariably "away from human habitation and constructions, but close to open water (dams and streams)" (Watson, 1998: 128).

Habits:

In the Free State Province of South Africa specimens were netted in the "early evening, between 18:30 and 20:00, with only two specimens being caught after 21:15" (Watson, 1998: 128). When disturbed in their day roost they flew to another roost 50 meters away (Watson, 1998: 128).

Roost:

Found in a "crevice roughly four meters from the ground, on a west-facing dolomite rock face next to a river" in the Free State Province of South Africa (Watson, 1998: 127).

Migration:

Unknown.

Diet:

Unknown.

Predators:

Unknown.

Population:

Structure - Unknown.

Density - Common, but not abundant, in the Free State Province of South Africa a "group of approximately 40 individuals was located" in a day roost (Watson, 1998: 127).

Lifespan:

Unknown.

Activity and behaviour:

Unknown.

Reproduction and ontogeny:

Unknown.

Mating:

Unknown.

Post-natal development:

Lesotho, South Africa.

Cistugo seabrae Thomas, 1912

- *1912. *Cistugo seabrae* Thomas, Ann. Mag. Nat. Hist., ser. 8, 10 (56): 205. Type locality: Angola: Mossamedes. Type specimen: BMNH 1906.1.3.3 (Holotype, ad F, skull and alcoholic, presented by the Lisbon Museum). Publication date: 1 August 1912.
1912. *Myotis seabrai*: Name combination.
2004. *Myotis (Cistugo) seabrai* Bickham, Patton, Schlitter, Rautenbach and Honeycutt, Mol. Phylogenet. Evol., 33 (2): 333. Lapsus.
- ? *Cistugo seabrae*: Name combination.

Taxonomy:

See Simmons (2005)

Common names:

Afrikaans: Angola-langhaarvlermuis, Angolase Vlerkliervlermuis. English: Seabra's Wing-gland Bat, Angolan Wing-gland Bat, Angolan hairy bat. French: Vespertilion d'Angola, Murin d'Angola.

Etymology of name:

The colloquial name is derived from the fact that the original specimen originated from Moçâmedes on the south-western coast of Angola (Taylor 2005).

Conservation status:

Global- VU (Baillie and Groombridge 1996); NT ver 3.1 (2001), assessed as *Cistugo seabrai* (IUCN 2004; Jacobs 2004a).

Regional- South Africa- Indeterminate, assessed as *Myotis seabrai* (Smithers 1986); VU D2 ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

NW Cape Prov. (South Africa), Namibia, SW Angola.

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach *et al.* (1993) reported $2n = 50$, FN = 48, BA = 0, a submetacentric X chromosome, and an acrocentric Y chromosome, these results were the same as those obtained for *C. lesueuri* from South Africa (Rautenbach *et al.*, 1993).

Protein / allozyme - Unknown.

Figure 144. Distribution of *Cistugo seabrae*

Genus *Myotis* Kaup, 1829

- *1829. *Myotis* Kaup, Skizz. Entw.-Gesch. Natürl. Syst. Europ. Thierwelt, 1: 106. Type species: *Vespertilio myotis* Borkhausen, 1797. Publication date: 1829.
1829. *Nystactes* Kaup, Skizz. Entw.-Gesch. Natürl. Syst. Europ. Thierwelt, 1: 108. Type species: *Vespertilio bechsteinii* Kuhl, 1817. Publication date: 1829.
1830. *Loeconoë* Boie, Isis oder Encyclopädische Zeitung von Oken, p. 256. Type species: *Vespertilio daubentonii* Kuhl, 1817. Publication date: 1830. Considered a valid genus based on tooth morphology: see Menu (1985, 1987) in Menu *et al.* (2002: 320).
1841. *Capaccinius* Bonaparte, Iconogr. Fauna ital., 1: Indice Distributivo: 1.
1841. *Selysius* Bonaparte, Iconogr. Fauna ital., 1: Mamm., Introd.: 3. Type species: *Vespertilio mystacinus* Kuhl, 1817. Publication date: 1841.
1842. *Trilatitus* Gray, Ann. Mag. nat. Hist., [ser. 1], 10 (65): 258. Publication date: 1 December 1842. Included *Vespertilio hasselti* Temminck, *M. macellus* Temminck, and *V. blepotis* Temminck (a *Miniopterus*) (see Hall and Kelson, 1959: 159; Hall, 1981: 183; Corbet and Hill, 1992: 119).
1849. *Tralatitus* Gervais, Dict. Univ. Hist. nat., 13: 213. A lapsus for *Trilatitus* (see Hall, 1981: 183). Modification of *Trilatitus* (see Meester *et al.*, 1986: 47).
1856. *Brachyotus* Kolenati, Allg. deutsch. naturh. Zeitung, ser. 2, 2: 131. Type species: *Vespertilio mystacinus* Kuhl, 1817. Publication date: 1856. Preoccupied by *Brachyotus* Gould, 1837 (see Allen, 1939a: 89; Hall, 1981: 183; Corbet and Hill, 1992: 119 and Pavlinov *et al.*, 1995: 95) and avian genus. Based on *V. mystacinus*, *daubentonii* and *dascyneme* (see Allen, 1939a: 89).
1856. *Isotus* Kolenati, Allg. deutsch. naturh. Zeitung, ser. 2, 2: 131. Type species: *Vespertilio nattereri* Kuhl, 1817. Publication date: 1856. Considered a valid subgenus by Pavlinov *et al.* (1995: 95).
1856. *Myotus* Kolenati, Allg. deutsch. naturh. Zeitung, ser. 2, 2: xxx. Publication date: 1856. Lapsus.
1866. *Tralatitus* Gray, Ann. Mag. nat. Hist., ser. 3, 17 (98): 90. Publication date: 1 February 1866. Lapsus for *Trilatitus* Gray (see Hall, 1981: 183). Modification of *Trilatitus* (see Meester *et al.*, 1986: 47).
1867. *Pternopterus* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 706. Type species: *Vespertilio (Pternopterus) lobipes* Peters, 1867 (= *Vespertilio muricola* Gray, 1846). Publication date: 1867.
1870. *Aëorestes* Fitzinger, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 62 (1): 427. Publication date: 1870. Based upon *Vespertilio villosissimus* E. Geoffroy, 1806, *albescens* E. Geoffroy, 1806, *laevis* I. Geoffroy, 1824 and *nigricans* Schinz, 1821 (see Allen, 1939a: 90; Hall, 1981: 183 [who excludes *laevis*]). Hill (in litt. In Meester *et al.*, 1986: 48) pointed out that *villosissimus* is a member of *Lasiurus* Gray, 1831, but all others are indeed *Myotis* representatives. If *villosissimus* can be regarded as the type species of *Aeorestes*, it should instead be included in *Lasiurus* (Meester *et al.*, 1986: 48). Hooper and Van Den Bussche (2003: 25) consider *Aeorestes* a valid subgenus, including all of the New World species.
1870. *Comastes* Fitzinger, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 62 (1): 565. Publication date: 1870. Based upon *Vespertilio capaccinii* Bonaparte, *megapodius*, *dascyneme* Boie, *limnophilus* (see Allen, 1939a: 90). Based upon *Vespertilio capaccinii* and *dascyneme* according to Hall and Kelson (1959: 159), Hall (1981: 183).
1870. *Exochurus* Fitzinger, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 62 (1): 75. Publication date: 1870. Based upon *Vespertilio macrodactylus* Temminck, *V. horsfieldii* Temminck, and *V. macrotarsus* Waterhouse (see Hall, 1981: 183; Corbet and Hill, 1992: 119). Not of Kolenati, 1858: see Cabrera (1914: 91).
1899. *Euvespertilio* Acloque, Faune de France, Mammifères, p. 38. Includes *Vespertilio emarginatus* Geoffroy, *murinus* Schreber = *myotis* Borkhausen, *mystacinus* Kuhl, *nattereri* Kuhl, and *bechsteinii* Kuhl. Hall and Kelson (1959: 159) and Hall (1981: 183) state that *Euvespertilio* includes *emarginatus* and *murinus* in a composite sense.
1906. *Pizonyx* Miller, Proc. Biol. Soc. Washington, 19: 85. Type species: *Myotis vives* Menegaux, 1901. Publication date: 4 June 1906. Considered a valid genus by Hall and Kelson (1959: 178), but only as a subgenus of *Myotis* by Hall (1981: 183).
1910. *Chrysopteron* Jentink, Notes Leyden Mus., 32: 74. Type species: *Kerivoula weberi* Jentink, 1890 (= *Vespertilio formosa* Hodgson, 1835). Considered a valid subgenus by

- Hall and Kelson (1959: 159), Hall (1981: 183), Corbet and Hill (1992: 121) and Pavlinov *et al.* (1995: 95).
1917. *Dichromyotis* Bianchi, Ann. Mus. zool. Acad. Impér. Sci. St. Petersburg, 21: lxxviii (for 1916?). Type species: *Vespertilio formosus* Hodgson, 1835.
1917. *Megapipistrellus* Bianchi, Ann. Mus. zool. Acad. Impér. Sci. St. Petersburg, 21: lxxvii. Type species: *Pipistrellus annectans* Dobson, 1871. Considered a valid subgenus by Pavlinov *et al.* (1995: 95).
1917. *Paramyotis* Bianchi, Ann. Mus. zool. Acad. Impér. Sci. St. Petersburg, 21: lxxix. Type species: *Vespertilio bechsteinii* Kuhl, 1817. New name for *Nystactes* Kaup, 1829, preoccupied (see Hall and Kelson, 1959: 159; Hall, 1981: 183). Considered a valid subgenus by Pavlinov *et al.* (1995: 95).
1917. *Rickettia* Bianchi, Ann. Mus. zool. Acad. Impér. Sci. St. Petersburg, 21: lxxvii. Type species: *Vespertilio (Leuconoe) ricketti* Thomas, 1894. Valid as a subgenus (see Hall and Kelson, 1959: 159), Hall (1981: 183).
1929. *Anamygdon* Troughton, ? Type species: *Anamygdon solomonis* Troughton, (= *Vespertilio adversus* Horsfield, 1824 or *Leuconoe moluccarum* Thomas, 1915 ?).
1958. *Hesperomyotis* Cabrera, Rev. Mus. Arg. Cienc. Nat., Zool., 4: 103. Type species: *Myotis simus* Thomas, 1901.
1981. *Brachyotis* Hall, Mammals of North America: 183. Lapsus.
1995. *Capaccinus* Pavlinov, Borissenko, Kruskop and Jahonton, Arch. Zool. Mus. Moscow State Univ., 133: xxx. Lapsus
1995. *Exochirus* Pavlinov, Borissenko, Kruskop and Jahonton, Arch. Zool. Mus. Moscow State Univ., 133: xxx. Lapsus
1995. *Selysius* Pavlinov, Borissenko, Kruskop and Jahonton, Arch. Zool. Mus. Moscow State Univ., 133: xxx. Lapsus.
1996. *Myotiz* Spiewak, Johansson and Wüthrich, Allergologie, 19 (11): 510-511. Lapsus.
- ? *Loeconoe*: Current spelling.

Taxonomy:

Bronner *et al.* (2003) state that the genus *Myotis* has been considered to include several subgenera, but the number thereof, and placement of species, varied considerably. Meester *et al.* (1986) listed three subgenera from the Southern African subregion, namely *Cistugo* Thomas, 1912 (for *seabrai* and *leseuri*), *Chrysopteron* Jentink, 1910 (for *welwitschii*) and *Selysius* Bonaparte, 1841 (for *tricolor* and *bocagei*). Menu (1987) proposed synonymising *Selysius* under the subgenus *Leuconoe* Boie, 1830 on the basis of dental characters. This was endorsed by Koopman (1993, 1994) who transferred *M. bocagei* to *Leuconoe* but included other *Selysius* and *Chrysopteron* in the subgenus *Myotis*, and also by Godawa-Stormark's (1998) phenetic analysis of dental variation in the genus. Phylogenetic analysis of mitochondrial DNA sequences, however, do not support the monophyly of the three subgenera (*Selysius*, *Leuconoe* and *Myotis*) analysed (Ruedi & Mayer 2001), but *Cistugo* warrants generic separation (N. Simmons in litt.) owing to the distinct wing glands and unique karyotypes (see Rautenbach *et al.* 1993) found in *seabrai* and *leseuri* from southern Africa.

Meester *et al.* (1986) state that their synonymy is slightly modified from Ellerman and Morrison-Scott (1951), who include also *Aeorestes* Fitzinger, 1870, a South American group, in the synonymy of *Myotis*, as does Hall (1981). However, J.E. Hill points out (in litt) that of the species included in this genus, the first, *Vespertilio villosissimus* E. Geoffroy, 1806, is a *Lasiurus* Gray, 1831, although the others, *albescens* E. Geoffroy, 1806, *nigricans* Schinz, 1821, and *levis* I. Geoffroy, 1824, belong in *Myotis*. If, as Hill suggests, *villosissimus* can be regarded as the type species of *Aeorestes*, it should instead be included in *Lasiurus*.

Baker *et al.* (1975) recorded the karyotype of *Myotis* as 2n= 44, AA= 50, but Dippenaar *et al.* (1983) give it as 2n= 50, AA= 48 in both *seabrai* and *leseuri*.

Common names:

English: Mouse-eared Bats, Little Brown Bats, Hairy Bats, Large-footed Bats. German: Mausohr.

Myotis anjouanensis (Dorst, 1960)

*1960. ? *anjouanensis* Dorst, Bull. Mus. Natn. Hist. nat., Paris, ser. 2, 31: 476 (for 1959). Type locality: Comoro Islands: Anjouan Island.

Taxonomy:

Considered a synonym of *goudoti* by Koopman (1993a: 211), and a subspecies of *goudoti* by Peterson *et al.* (1995: 89), but a valid species by Simmons (2005).

Conservation status:

Global- DD ver 3.1 (2001) (IUCN 2004; Jacobs 2004b).

General distribution:

Comoro Islands.

Common names:

English: Anjouan Myotis, Anjouan mouse-eared bat. French: Vespertilion de l'Île d'Anjouan.

Etymology of name:

The specific name refers to the island where the type specimen was collected.

Myotis blythii (Tomes, 1857)

- *1857. *Vespertilio blythii* Tomes, Proc. Zool. Soc. Lond., 1857, XXV (cccxxx): 53. Type locality: India: Rajasthan, Nasirabad. Type specimen: BMNH 1848.8.18.6 (Holotype); BMNH 1849.8.16.22 (Holotype; see Tate (1941e: 555, but he also mentions 1873.4.16.15, which possibly might be the type specimen for "*V. africanus* Dobson"). Publication date: 14 July 1857.
1875. *Vespertilio murinus africanus* Dobson, Ann. Mag. Nat. Hist., ser. 4, 16 (94): 260. Type locality: 'Gaboon': but more probably from Kashmir, see Blanford (1891) and Hayman and Hill (19971: 35) (in Corbet and Hill, 1992: 120). However, see Grubb (2004: 92); who indicates that Gabon might not be rejected. Type specimen: BMNH 1873.4.16.5. Publication date: 1 October 1875.
- ? *Myotis blythii*: Name combination.

Taxonomy:

For synonyms see Corbet (1978: 30), Strelkov (1972), Felten *et al.* (1977), Bogan *et al.* (1978). Koopman (1993a: 209) included *oxygnathus* and *omari*, but see Arlettaz *et al.* (1997) and Castella *et al.* (1999) [in Horáček *et al.* (2000: 114)]. Simmons (2005) removed *oxygnathus* and *punicus*.

Common names:

Basque: Arratoi-belarri txikia. Catalanian: Rat penat orellut mitjà. Czech: netopýr východní. Dutch: Kleine vale vleermuis. English: Lesser mouse-eared bat, Lesser Mouse-eared Myotis. French: Petit Murin. Gallician: Morcego de orellas de rato pequeno. German: Kleines Mausohr. Hungarian: hegyesorrú denevér. Italian: Vespertilio di Blyth, Vespertilio minore. Maltees: Farfett il-lejl widnet il-Gurdien. Portuguese: Morcego-rato-pequeno. Romanian: Vespertil uregliamieur pitschen. Russian: Ostroukhaya nochnitsa. Spanish (Castilian): Ratonero mediano, Murciélago ratonero mediano, Ratonero chico, Murciélago ratonero.

Etymology of name:

In honour of Edward Blyth (1810 - 1873) (see Kozhurina 2002: 14).

Conservation status:

Global- Not assessed (IUCN 2004).

General distribution:

NW Africa (Morocco?, N Algeria, Tunisia, W Lybia), Mediterranean zone of Europe (C and S France, Portugal, Spain, Italy, through Austria, Czech republic, Albania, Greece, Slovakia); Crimea and Caucasus Mtns (incl. Abkhasia), Asia Minor, Israel, Lebanon, Syria to Kazakhstan, Uzbekistan, Kirgizia, Tadjikistan, Afghanistan, Pakistan, N India (Rajputana, Punjab, Kashmir) and Himalayas, Nepal, NW Altai Mtns; Inner Mongolia and Shensi (China)

Note: Due to the separation of *oxygnathus* and *punicus* the records from S Europe and N Africa are probably erroneous, hence this species should be removed from the African fauna.

Figure 145. Distribution of *Myotis blythii*

Distribution based on voucher specimens: Algeria, 'Gaboon', Tunisia.

Myotis bocagii (Peters, 1870)

- *1870. *Vespertilio Bocagii* Peters, J. Sci. mat. Phys. Nat., Lisboa, ser. 1, 3 (10): 125. Type locality: Angola: Duque de Braganca. - Publication date: December 1870.
 ? *Myotis bocagei*: Lapsus.
 ? *Myotis bocagii*: Name combination.

Taxonomy:

Mentioned as *bocagei* by Corbet (1978: 49), Smithers (1983: 93), Meester *et al.* (1986: 49), Koopman (1993a: 209), Horáček *et al.* (2000: 121) Wilson and Cole (2000: 58), Hutson *et al.* (2001: 28), Fenton and Bogdanowicz (2002: 1008) but as *bocagii* by Ansell and Dowsett (1988: 37), Harrison and Bates (1991: 76), Grubb *et al.* (1998: 82), Stadelmann *et al.* (2004b: 178); and as *bocagi* by Kityo and Kerbis (1996: 63).

Figure 146. *Myotis bocagii*

Common names:

Afrikaans: Rooi langhaarvlermuis. English: Rufous Mouse-eared bat, Bocage's Mouse-eared Bat, Rufous Mouse-eared Myotis, Rufous Hairy Bat, Bocage banana bat, Bocage's hairy bat. French: Murin, Murin de Du Bocage. Portuguese: Morcego lanudo de Bocage.

Etymology of name:

In honour of J.V. Barbosa du Bocage, an eminent Portuguese zoologist, who worked during the nineteenth century, and who named material from the Congo and Angola collected by his Portuguese colleague Snr. M. Jose d'Anchieta (Smithers 1983: 93).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs 2004f). Regional- Indeterminate (Smithers 1986); DD ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Senegal over Central African Republic, Uganda to Ethiopia, S Yemen, south to Angola, Zambia, Malawi, and Transvaal (South Africa).

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach *et al.* (1993) reported $2n = 44$, FN = 50, BA = 8, a submetacentric X chromosome, and an acrocentric Y chromosome, for specimens from South Africa. These results are the same as those obtained for *M. tricolor* specimens from South Africa and Zimbabwe (Rautenbach *et al.*, 1993).

Protein / allozyme - Unknown.

Figure 147. Distribution of *Myotis bocagii*

Distribution based on voucher specimens:

Angola, **Burundi**, Cameroon, **Congo (Democratic Republic of the)**, **Ethiopia**, Gabon, **Ghana**, **Kenya**, Rwanda, **South Africa**, **Tanzania**.

Myotis bocagii bocagii (Peters, 1870)

- *1870. *Vespertilio Bocagii* Peters, J. Sci. mat. Phys. Nat., Lisboa, ser. 1, 3 (10): 125. Type locality: Angola: Duque de Braganca. - Publication date: December 1870.
1904. *Myotis Hildegardæ* Thomas, Ann. Mag. Nat. Hist., ser. 7, 13 (75): 209. Type locality: Kenya: Fort Hall [4 000 ft (=1 219 m)]. Type specimen: BMNH 1903.3.2.2 (Holotype, M, collector: Mrs. Hildegarde Hinde, collection date: 17 October 1902, original number 115). Publication date: 1 March 1904.
- ? *Myotis bocagei bocagei* Lapsus.
- ? *Myotis bocagii bocagii*: Name combination.

General distribution:

Uganda to Ethiopia, south to Angola, Zambia, Malawi, and Transvaal (South Africa).

Distribution based on voucher specimens:

Kenya.

Myotis bocagii cupreolus Thomas, 1904

- *1904. *Myotis Bocagei cupreolus* Thomas, Ann. Mag. nat. Hist., ser. 7, 13 (78): 407. Type locality: Cameroon: Efulen. Type specimen: BMNH 1903.2.4.6 (M, collector: G.L. Bates, collection date 14 August 1901). Publication date: 1 June 1904 (Evenhuis, 2003: 36 states that pages 329 to 424 were included in part 77, which appeared on 1 May 1904. However, the title page of the publication indicates that the part is 78, which was published on 1 June 1904).
- ? *Myotis bocagii cupreolus*: Name combination.

Distribution:

West Africa.

Distribution based on voucher specimens:

Cameroon.

Myotis capaccinii (Bonaparte, 1837)

- *1837. *Vespertilio Capaccinii* Bonaparte, Iconogr. Fauna ital., 1, fasc. 20 and pl., fig. 2. Type locality: Italy: Sicily. Type specimen: BMNH 1907.1.1.734. Publication date: 1837.
 ? *Myotis capaccinii*: Name combination.

Taxonomy:
 See Simmons (2005).

Uzbeqistan.

Common names:

Basque: Saguzar hankahandia. Catalanian: Rat penat de peus grans. Czech: netopýr dlouhonohý. Dutch: Capaccini's vleermuis. English: Capaccinii's Mouse-eared Bat, Long-fingered Bat, Long-fringed bat, Long-fingered Myotis. French: Murin de Capaccini, Vespertilion de Capaccini, Vespertilion des montagnes. German: Langfussfledermaus. Italian: Vespertilio di Capaccini. Roman: Vespertil da Capaccini. Slovenian: dolgonogi netopir. Spanish (Castilian): Murciélago patudo.

Etymology of name:

In honour of Francesco Capaccini (see Kozhurina 2002: 15).

Conservation status:

Global- VU A2c ver 2.3 (1994).

General distribution:

Mediterranean zone and islands of Europe (incl. Austria, Albania, Greece) and NW Africa (incl. Morocco (see Aulagnier and Thevenot, 1986: 44)); Turkey; Israel; Jordan; Iraq; Iran;

Figure 148. Distribution of *Myotis capaccinii*

Distribution based on voucher specimens:
 Tunisia.

Myotis dieteri M. Happold, 2005

- *2005. *Myotis dieteri* M. Happold, Acta Chiropt., 7 (1): 11. Type locality: Republic of the Congo: Grotte du Viaduc à Loudima [04 15 S 13 00 E]. Type specimen: MNHN CG 1985-1925 (ad F, alcoholic with skull extracted; mandible lost; collector: Jean-Paul Adam; collection date: between 1961 and 1968).

Taxonomy:

Known only from the type specimen (Happold, 2005: 11).

Etymology of name:

In honour of Dr. Dieter Kock of the Senckenberg Museum, Frankfurt, Germany, in recognition of the great contribution he made to the knowledge of African mammals, in recognition of the kindness and generosity with which he has helped so many others with their studies, and in gratitude for our long friendship (see Happold 2005: 11).

Conservation status:

Global- Not assessed (IUCN 2004).

General distribution:

Known only from the type locality; Grotte du Viaduc a Loudima, Republic of Congo (Happold, 2005: 11).

Figure 149. Distribution of *Myotis dieteri*

Distribution based on voucher specimens:
Congo.

Myotis emarginatus (E. Geoffroy St.-Hilaire, 1806)

- *1806. *Vespertilio emarginatus* E. Geoffroy Saint-Hilaire, Ann. Mus. Hist. Nat. Paris, 8: 198.
Type locality: France: Ardennes, Givet, Charlemont.
- ? *Myotis emarginatus*: Name combination.

Taxonomy:

Assigned to the subgenus *Isotus* by Pavlinov *et al.* (1995: 97).

Conservation status:

Global- VU A2c ver 2.3 (1994).

Common names:

Czech: Netopýr brvítý. Dutch: Ingekorven vleermuis. English: Geoffroy's Bat, Notch-eared Bat, Geoffroy's Myotis. French: Murin à oreilles échancrées, Vespertilion à oreilles échancrées. German: Wimperfledermaus. Hungarian: csonkafülű denevér. Italian: Vespertilio smarginato. Norwegian: Geoffroyflaggermus. Portuguese: Morcego-lanudo. Roman: Vespertil cun tscheglias. Russian: Tryokhtsvetnaya nochnitsa. Spanish: Murciélago orejirroto, Murciélago de Geoffroy.

General distribution:

S Europe (incl. Portugal), north to the Netherlands, S Germany, Czech Republic, Austria, Albania, Greece and S Poland, Crimea, Caucasus and Kopet Dag Mtns, east to Uzbekistan, Turkmenistan, Kirghizia, Tadjikistan (incl. Abkhasia), and E Iran; Syria, Lebanon, Israel; Jordan; Saudi Arabia, Oman, Morocco; Algeria; Tunisia; Afghanistan.

Myotis goudoti (A. Smith, 1834)

- *1834. *Vespertilio goudoti* A. Smith, S. Afr. Quart. J., ser. 2, 2: 244. Type locality: Madagascar: no specific locality. Publication date: June 1834.
1858. *Vespertilio madagascariensis* Tomes, Proc. Zool. Soc. Lond., 1858, XXVI (ccclii): 89. Type locality: Madagascar: no specific locality. Type specimen: BMNH 1907.1.1.503. Publication date: 27 April 1858.
1870. *Vespertilio sylvicola* A. Grandidier, Rev. Mag. Zool., ser. 2, 22: 49. Type locality: Madagascar: Ambaravantao forest (Mentioned as "Forests of Ambaravaranvatou" by Allen, 1939a: 91). Publication date: February 1870.
- ? *Myotis goudoti*: Name combination.

Taxonomy:

Simmons (2005) states that it does not appear to include *anjouanensis*; see Peterson *et al.* (1995).

Conservation status:

Global- LR/nt ver 2.3 (1994).

Common names:

English: Malagasy mouse-eared bat. French: Chauve-souris malgache à oreille de souris, Vespertilion de Madagascar.

General distribution:

Madagascar.

Distribution based on voucher specimens:

Madagascar.

Myotis morrisi Hill, 1971

- *1971. *Myotis morrisi* Hill, (in Hill and Morris), Bull. Br. Mus. Nat. Hist. (Zool.), 21 (2): 43, pl. 1, 2 (a, b). Type locality: Ethiopia: Walaga, Blue Nile Gorge, Didessa River mouth, "Forward Base Three" [10 05 N 35 38 E, c 1,000 m]. Type specimen: BMNH 1970.488 (Holotype; ad F, skin and skull, collector: Great Abbay Expedition, collection date: 28 August 1968, original number: A107, see Hill and Morris (1971: 43)). Publication date: 28 April 1971.

Taxonomy:

Known only from two specimens (see Stadelmann *et al.*, 2004b: 179).

Conservation status:

Global- VU (Baillie and Groombridge 1996); VU D2 ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004b).

Common names:

English: Morris's Mouse-eared Bat, Morris's bat, Morris's Myotis. French: Vespertilion de Morris.

General distribution:
W Ethiopia, NE Nigeria.

Etymology of name:

In honour of Dr. Pat Morris of Royal Holloway College, University of London, in recognition of his many services to the study of the Ethiopian fauna while with the Great Abbay Expedition (Hill in Hill and Morris 1971: 44).

Distribution based on voucher specimens:

Ethiopia.

Myotis myotis (Borkhausen, 1797)

1774. *murinus* Schreber, Die Säugethiere, xxx. Preoccupied by *murinus* Linnaeus, 1758 (see Pavlinov *et al.*, 1995: 96).
1797. *Vespertilio myosotis* Borkhausen, Der Zoologe (Compendiose Bibliothek gemeinnützigsten Kenntnisse für alle Stände.), 46. Extralimital?
- *1797. *Vespertilio myotis* Borkhausen, Deutsche Fauna, 1: 80. Type locality: Germany: Thuringia.
1996. *Myotiz myotiz* Spiewak, Johansson and Wüthrich, Allergologie, 19 (11): 510-511. Lapsus.
- ? *Myotis myotis*: Name combination.

Taxonomy:

See Corbet (1978: 50) for content of this species.

Common names:

Basque: Saguzar arratoi- belarri handia. Catalanian: Rat penat orellut gran. Czech: netopýr velký. Danish: Stor museøre. Dutch: Vale vleermuis. English: Greater Mouse-eared bat, Mouse-eared bat, Mouse-eared Myotis, Large Mouse-eared Bat. French: Grand Murin. Gallician: Morcego de orellas de rato grande. German: Mausohr, Große Mausohr, Großes Mausohr. Hungarian: közönséges denevér. Italian: Vespertilio maggiore. Maltees: Farfett il-lejl. Norwegian: Stor musøre. Portuguese: Morcego-rato-grande, Roman: Vespertil uregliamieur grond. Slovenian: navadni netopir. Spanish (Castilian): Ratonero grande, Murciélago ratonero grande. Swedish: Större musöra.

Etymology of name:

From the Greek "*mus*" (=mouse) and "*otis*" (=ear) (Jones and Manning (1989: 3).

Conservation status:

Global- LR/nt ver 2.3 (1994).

General distribution:

C and S Europe (incl. The Netherlands, Czech Republic, Austria, Albania, Greece, Italy, Portugal), east to Ukraine; S England; most Mediterranean islands; Azores (Portugal); Asia Minor; Lebanon; Israel; Syria.

Figure 150. Distribution of *Myotis myotis*

Distribution based on voucher specimens: Egypt, Tunisia, Algeria.

Myotis nattereri (Kuhl, 1817)

- *1817. *Vespertilio nattereri* Kuhl, Die Deutschen Fledermäuse, Hanau, p. 14, 33. Type locality: Germany: Hessen, Hanau.
1904. *Myotis Escalerae* Cabrera, Mem. Soc. Esp. Hist. Nat., 2: 279, pl. 5. Type locality: Spain: Valencia, Foyos. Type specimen: MNCN 863 (ad M). Possibly valid as subspecies, also for northern Africa.
2003. *Myotis nattereri* Yoshiyuki and Endo, Catalogue of chiropteran specimens in spirit: 48. Lapsus.
- ? *Myotis nattereri*: Name combination.

Taxonomy:

Assigned to the subgenus *Isotus* by Tate (1942), Corbet and Hill (1992), Pavlinov *et al.* (1995: 96). Included in the genus *Leuconoe* by Menu *et al.* (2002: 323).

Common names:

Basque: Natterer saguzarra. Catalanian: Rat penat de Natterer. Czech: Netopýr rasnatý. Danish: Frynseflagermus. Dutch: Franjestaart. English: Natterer's Mouse-eared Bat, Natterer's bat, Natterer's Myotis. Estonian: Nattereri lendlane. French: Murin de Natterer, Vespertilion de Natterer. Gallician: Morcego de Natterer. German: Fransenfledermaus. Hungarian: horgasszöru denevér. Italian: Vespertilio di Natterer. Norwegian: Børsteflaggermus. Portuguese: Morcego-de-franja. Roman: Vespertil da Natterer. Russian: Nochnitsa Natterera. Spanish (Castilian): Murciélago de Natterer, Murciélago de patagio aserrado. Swedish: Fransfladdermus.

Etymology of name:

In honour of Johann Natterer (1787 - 1843) (see Kozhurina 2002: 16).

Conservation status:

Global- LR: lc.

General distribution:

Ireland, Great Britain, continental Europe; Norway, Sweden, Finland, Estonia, Lithuania; the Netherlands, Portugal, NW Africa (Morocco, N Algeria); Czech Republic, Austria, Greece, Turkey; Israel; Jordan; Iraq, Iran; Crimea and Caucasus to Turkmenistan (incl. Abkhasia). Horáček *et al.* (2000: 115) include S Scandinavia.

Distribution based on voucher specimens:

Spain.

Myotis punicus Felten, 1977

- *1977. *Myotis blythii punicus* Felten, in: Felten, Spitzenberger and Storch, Senckenb. biol., 58 (1/2): 39. Type locality: Tunisia: Cap Bon, El Haouaria cave. Type specimen: SMF 44104 (ad M, alcoholic and skull, collector: Nagel, Schubert and Vesmanis, collection date: 25 March 1971; see Felten *et al.* (1977: 39).
2000. *Myotis cf. punicus* Castella, Ruedi, Excoffier, Ibanez, Arlettaz and Hausser, Mol. Ecol., 9: xxxx
- ? *Myotis punicus*: Name combination.

Taxonomy:

Considered a valid species by Castella *et al.* (2000), Dietz and von Helversen (2004: 71), and Benda *et al.* (2004b).

Conservation status:

Global- DD ver 3.1 (2001) (IUCN 2004; Aulagnier and Juste 2004).

Common names:

English: Maghrebian Mouse-eared Bat, Felten's Myotis. Italian: Vespertilio maghrebino

General distribution:

Tunisia, Algeria, Libya, Malta, Morocco (Benda *et al.*, 2004b).

Myotis scotti Thomas, 1927

- *1927. *Myotis scotti* Thomas, Ann. Mag. Nat. Hist., ser. 9, 19 (113): 554. Type locality: Ethiopia: Shoa, Djem-djem Forest (ca 40 mi (64 km) W Addis Ababa) [8 000 ft (=2 438 m)]. Type specimen: BMNH 1927.3.4.1 (Holotype). Publication date: 1 May 1927.

Taxonomy:

See Simmons (2005).

General distribution:

Ethiopia.

Common names:

English: Scott's Mouse-eared Bat, Scott's Mouse-eared Myotis. French: Vespertilion de Scott.

Distribution based on voucher specimens:

Ethiopia.

Conservation status:

Global- VU (Baillie and Groombridge 1996); VU B2ab(iii) ver 3.1 (2001) (IUCN 2004; Benda and Lavrenchenko 2004).

Myotis tricolor (Temminck, 1832)

- *1832. *Vespertilio tricolor* Temminck, in Smuts, Enumer. Mamm. Capensium, p. 106. Type locality: Republic of South Africa: Cape Province, Capetown. Publication date: 1832.
1924. *Eptesicus loveni* Granvik, Acta Univ. Lund, ser. 2, 21 (3): 12. Type locality: Kenya: E slopes of Mt. Elgon [8 000 ft (=2 438 m)]. Publication date: 1924.
- ? *Myotis tricolor*: Name combination.

Taxonomy:

Includes *Eptesicus loveni*, see Schlitter and Aggundey (1986).

Common names:

Afrikaans: Temminck se langhaarvlermuis, Temminck-langhaarvlermuis, Kaapse Langhaarvlermuis. English: Temminck's Mouse-eared Bat, Cape Myotis, Cape Hairy Bat, Tricoloured Mouse-eared Bat, Cape Hairy Myotis, Temminck's Hairy Bat. French: Petit murin brun, Murin velu du Cap, Vespertilion d'Angola, Murin d'Angola.

Etymology of name:

The colloquial name is after C.J. Temminck, who was the author of *Monographies de Mammalogie* (1827) (Taylor 2005).

Palaeontological / archaeological records:

This species was represented in the very late Holocene at Border Cave, South Africa (Avery 1991: 6).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs 2004e).
Regional- South Africa- NT ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Ethiopia and Democratic Republic of the Congo, south to Malawi and South Africa.

Echolocation:

See Taylor (1999).

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach *et al.* (1993) reported $2n = 44$, FN = 50, BA = 8, a submetacentric X chromosome, and an acrocentric Y chromosome, for specimens from South Africa and Zimbabwe. These results are the same as those obtained for *M. bocagii* specimens from South Africa (Rautenbach *et al.*, 1993).

Protein / allozyme - Unknown.

Figure 151. Distribution of *Myotis tricolor*

Distribution based on voucher specimens:
Lesotho, South Africa, Swaziland, Zimbabwe.

Myotis welwitschii (Gray, 1866)

- *1866. *Scotophilus welwitschii* Gray, Proc. Zool. Soc. Lond., 1866, II: 211, pl. 24. Type locality: Angola: NE Angola. Type specimen: BMNH 1866.4.12.2. Publication date: September 1866.
1878. *Vespertilio welwitschii*: Dobson, Cat. Chiroptera Brit Mus. Name combination.
1899. *Vespertilio venustus* Matschie, Sitzb. Ges. Naturf. Freunde Berlin: 74. Type locality: Tanzania: Morogoro district, Ukami Mts. [north slope of Uluguru Mountains], Kinole [06 50 S 37 42 E]. Type specimen: ZMB. Publication date: 1899.
1922. *Myotis welwitschii*: Kershaw, Ann. Mag. nat. Hist., ser. 9, 10 (56): xxx. Publication date: 1 August 1922. Name combination.
1951. *Scotophilus welwitschii* Roberts, The Mammals of South Africa: 80. Lapsus.
1967. *Myotis venustus*: Kock, Senckenb. biol., 48 (5/6): 319. Name combination.

Taxonomy:

Myotis welwitschii is monotypic (Kershaw 1922; Hayman and Hill 1971; Findley 1972; Kock 1967; Meester *et al.*, 1986; Simmons 2005).

Figure 152. *Myotis welwitschii*

Common names:

Afrikaans: Welwitsch se langhaarvlermuis, Welwitsch-langhaarvlermuis. English: Welwitsch's Mouse-eared Bat, Welwitsch's Hairy Bat, Welwitsch's bat, Welwitsch's Myotis. French: Myotis de Welwitsch, Vespertilion de Welwitsch, Murin du Welwitsch. Portuguese: Morcego lanudo de weltsch.

Etymology of name:

Named after Welwitsch, an Austrian botanist who made extensive collections in Angola (Taylor 2005).

Palaeontological / archaeological records

No fossils are known (Ratcliffe 2002).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004d). Regional- South Africa- Indeterminate (Smithers 1986); NT ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Angola, Burundi (Fahr and Ebigbo, 2003: 128), Congo (K.), Ethiopia, Kenya, Malawi (Happold and Happold, 1997: 819), Mozambique, Rwanda, South Africa, Sudan, Tanzania, Uganda (Kityo and Kerbis, 1996: 61), Zambia, Zimbabwe; Guinea (Fahr and Ebigbo, 2003: 128).

Geographic variation:

Unknown.

General description of external morphology:

See Ratcliffe (2002).

General description of cranial and dental morphology:

See Ratcliffe (2002).

Detailed morphology:

For a description of the skull, teeth, ears and tragus, and wingshape and aspect ratio see Ratcliffe (2002).

Functional morphology:

Unknown.

Sexual dimorphism:

Unknown.

Echolocation:

Unknown.

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach *et al.* (1993) reported $2n = 44$, $FN = 50$, $BA = 8$, and submetacentric X and Y chromosomes, for specimens from South Africa.

Protein / allozyme - Unknown.

Habitat:

See Ratcliffe (2002).

Habits:

See Ratcliffe (2002).

Roost:
See Ratcliffe (2002).

Migration:
Unknown.

Diet:
Unknown.

Predators:
Unknown.

Population:
Unknown.

Population:
Structure - Considered solitary in its roosting habits (Smithers and Wilson 1979, Ratcliffe 2002). However in a single instance two animals were found roosting in the same bush (Smithers and Wilson 1979).
Density - Unknown.

Lifespan:
Unknown.

Activity and behaviour:
Unknown.

Reproduction and ontogeny:
Unknown.

Mating:
Unknown.

Post-natal development:
Unknown.

Parasites:
Unknown.

Viruses:
Unknown.

Utilization:
Unknown.

Anthropophilous:
Unknown.

Figure 153. Distribution of *Myotis welwitschii*

Distribution based on voucher specimens:
Angola, Rwanda, South Africa, Tanzania, Zimbabwe.

Subfamily Vespertilioninae Gray, 1821

- *1821. *Vespertilioninae* Gray, London Med. Repos., 15: 299. Publication date: 1 April 1821.
 1865. *Nyctophilinae* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 524. Type genus: *Nyctophilus* Leach, 1821. Considered a valid subfamily by Hall and Kelson (1959: 201) [including *Antrozous*], Corbet and Hill (1992: 156), but see Hooper and Van Den Bussche (2003: 1), who reject this.

Taxonomy:

Bronner *et al.* (2003) state that the classification of the subfamily Vespertilioninae was historically based on facial shortening and dental reduction characters (Miller 1907), and augmented by bacula morphology (Hill and Harrison 1987). Interrelationships among *Eptesicus* and *Pipistrellus* species have long been contentious and have for the most part remained unresolved. The principal character used to diagnose these genera was the presence (*Pipistrellus*) or absence (*Eptesicus*) of the anterior upper premolar. However, this character is variable in both genera (Wallin 1969; Koopman 1975; Heller and Volleth 1984). Baculum morphology (Heller and Volleth 1984; Hill and Harrison 1987) and karyological properties (Heller and Volleth 1984; Zima & Horacek 1985) also vary markedly among species assigned to *Pipistrellus* using dental characters. Heller and Volleth (1984) concluded that the genus *Eptesicus* is characterised by a distinct karyotype of $2n=50$, and removed those taxa with $2n > 44$ (*E. capensis* and some Australian species) from *Eptesicus* to *Pipistrellus*, a treatment they considered consistent with patterns of variation in baculum morphology.

After extensively reviewing variation in baculum morphology, Hill and Harrison (1987) divided *Pipistrellus* into seven subgenera. They transferred *anchietae* (see Kock (2001c) for justification of spelling) to the subgenus *Hypsugo* and four African species of *Eptesicus* (*capensis*, *melckorum*, *zuluensis* and *rendalli*) to the subgenus *Neoromicia* within *Pipistrellus*. *Hypsugo* was subsequently raised to generic rank on the basis of detailed morphological and biochemical analyses (Horacek and Hanak 1986; Ruedi and Arlettaz 1991), a treatment supported also by cytogenetic evidence showing radical reorganization of the genome and karyotypic evolution in *H. anchietae* (Kearney *et al.* 2002). Most of the other (extralimital) subgenera were subsequently also afforded full genus status, with the exception of *Pipistrellus* and *Neoromicia*. McBee *et al.* (1987) and Morales *et al.* (1991) provided further cytogenetic and electrophoretic evidence supporting the findings of Heller and Volleth (1984), but argued that further studies were needed to justify the inclusion of these

species in *Pipistrellus*. Koopman (1993a), therefore, recognised *Neoromicia*, but retained it as a subgenus of *Eptesicus*.

Volleth and Heller (1994) subsequently published more karyotypic evidence supporting the inclusion of *Neoromicia* within *Pipistrellus*, a treatment formalised by Koopman (1994). Most recently, Volleth *et al.* (2001) showed that the four African species included in *Neoromicia* (*capensis*, *nanus*, *rendalli* and *zuluensis*) display karyotypic synapomorphies typical of the Vespertilionini, in contrast to the other African *Pipistrellus* that show cytogenetic traits characteristic of the Pipistrellini. *Neoromicia* should thus be elevated to full generic rank to avoid recognising a paraphyletic *Pipistrellus*. Cladistic analysis of chromosomal data (showing that the four *Neoromicia* species also share three Robertsonian fusions), and of baculum characters in southern African species, provide additional support for recognising *Neoromicia* as a distinct genus (Kearney *et al.* 2002). Consequently, the genus *Eptesicus* in southern Africa is represented by only one species, namely *E. hottentotus*.

Genus *Barbastella* Gray, 1821

- *1821. *Barbastella* Gray, London Med. Repos., 15: 300. Type species: *Vespertilio barbastellus* Schreber, 1774. Publication date: 1 April 1821.
1829. *Barbastellus* Kaup, Skizz. Entw.-Gesch. Natürl. Syst. Europ. Thierwelt. Publication date: 1829.
1839. *Synotus* Keyserling and Blasius, Arch. Naturgesch. Berlin, 5 (1): 305. Type species: *Vespertilio barbastellus* Schreber, 1774. Publication date: 1839.

Taxonomy:
See Simmons (2005).

Etymology of name:
From Latin "*barba*" meaning bearded and "*stella*" meaning star (see Rydell and Bogdanowicz, 1997: 5).

Common names:
English: Barbastelle Bats, Barbastelles.

Barbastella barbastellus (Schreber, 1774)

- *1774. *Vespertilio barbastellus* Schreber, Die Säugethiere, 1 (8): pl. 55 + 1 (9): 168. Type locality: France: Burgundy. Publication date: 1774.
1838. *Barbastellus communis* Gray, Mag. Zool. Bot., 2 (12): 495. Publication date: 1 February 1838. Renaming of *V. barbastellus* Schreber, 1774.
1985. *Vespertilio barbastellus* Qumsiyeh, Spec. Publ. Mus. Texas Tech Univ., 23: 63. Lapsus.
2002. *Barbastella barbastellus guanchae* Trujillo, Ibáñez and Juste, Rev. Suisse Zool., 109 (3): 544. Type locality: Spain: Tenerife island, La Guancha, "Barranco de La Cantera" [300 m]. Type specimen: MNH 109 (Museo de La Naturaleza e El Hombre, Santa Cruz de Tenerife, Spain; holotype; ad M; collector Domingo Trujillo, collection date 1 September 1987).
- ? *Barbastella barbastellus*: Name combination.

Taxonomy:
Does not include *leucomelas*, see Rydell and Bogdanowicz (1997: 1, Mammalian Species, 557); but see Qumsiyeh (1985) and Horáček *et al.* (2000: 133), although the latter authors still consider *leucomelas* to be a valid species. Western Mediterranean and Canary Island forms reviewed by Juste *et al.* (2003).

5).
Conservation status:
Global- VU A2c ver 2.3 (1994).

Common names:
Basque: Baso-saguzar arrunt. Catalanian: Rat penat de bosc. Czech: netopýr černý. Danish: Bredøret flagermus. Dutch: Mopsvleermuis. English: Barbastelle, Western Barbastelle Bat, Western Barbastelle, Common Barbastelle, Barbastelle bat. French: Barbastelle, Barbastelle d'Europe, Barbastelle commune, Barbastelle occidentale. Gallician: Morcego das fragas. German: Mopsfledermaus. Hungarian: pisze denevér, Piszedenevér. Italian: Barbastello. Portuguese: Morcego-negro. Romanian: Barbastel ureglia lada. Russian: Evropejskaya shirokoushka. Spanish (Castilian): Murciélago de bosque. Swedish: Barbastell.

General distribution:
England and W Europe (incl. the Netherlands) to Caucasus (incl. Abkhasia); Norway; Sweden; Lithuania; Czech Republic, Austria; Bulgaria; Macedonia; Greece; Turkey; Crimea (Ukraine); Portugal; Morocco; larger Mediterranean islands; Canary Isls; perhaps Senegal; Afghanistan; N Pakistan; N India, Nepal, SW China. Possibly Indochina.

Etymology of name:
From Latin "*barba*" meaning bearded and "*stella*" meaning star (see Rydell and Bogdanowicz 1997:

Figure 154. Distribution of *Barbastella barbastellus*

Distribution based on voucher specimens:

Canary Islands [Spain].

Genus *Eptesicus* Rafinesque, 1820

- *1820. *Eptesicus* Rafinesque, Ann. Nature and annual synopsis of new genera and species of animals, p. 2. Type species: *Eptesicus melanops* Rafinesque, 1820 (= *Vespertilio fuscus* Beauvois, 1796). Publication date: 1820.
1829. *Cnephæus* Kaup, Skizz. Entw.-Gesch. Natürl. Syst. Europ. Thierwelt, 1: 103. Type species: *Vespertilio serotinus* Schreber, 1774. Publication date: 1829. Considered a valid subgenus by Hooper and Van Den Bussche (2003: 38), including *serotinus* and *hottentotus*.
1837. *Noctula* Bonaparte, Iconogr. Fauna ital., 1, fasc. 21. Type species: *Noctula serotina*: Bonaparte (= *Vespertilio serotinus* Schreber, 1774). Allen (1939a: 92) mentioned it in the genus *Nyctalus*, but referred to a publication from 1841.
1839. *Vesperugo* Keyserling and Blasius, Arch. Naturgesch. Berlin, 5 (1): 312. Publication date: 1839. In part.
1839. *Vesperus* Keyserling and Blasius, Arch. Naturgesch. Berlin, 5 (1): 313. Publication date: 1839. In part (see Allen, 1939a: 84; Pavlinov *et al.*, 1995: 112). Allen (1939a: 84) assigned it to Dobson, Cat. Chiropt. Brit. Mus., p. 184, 1878. Not of Latreille: see Cabrera (1914: 129).
1856. *Cateorus* Kolenati, Allg. deutsch. naturh. Zeitung, ser. 2, 2: 131. Type species: *Vespertilio serotinus* Schreber, 1774. Publication date: 1856.
1856. *Meteorus* Kolenati, Allg. deutsch. naturh. Zeitung, ser. 2, 2: 131. Publication date: 1856. Mentioned by Allen (1939a: 83) as "in part". Included with a question mark in the synonymy of *Eptesicus* by Pavlinov *et al.* (1995: 112).
1858. *Amblyotus* Kolenati, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 29: 252. Type species: *Amblyotus atratus* Kolenati, 1858 (= *Vespertilio nilssonii* Keyserling and Blasius, 1839). Publication date: 1858. Considered a valid subgenus by Pavlinov *et al.* (1995: 112).
1863. *Aristippe* Kolenati, ?
1866. *Pachyomus* Gray, Ann. Mag. nat. Hist., ser. 3, 17 (98): 90. Type species: *Scotophilus pachyomus* Tomes, 1857 (= *Vespertilio serotinus* Schreber, 1774). Publication date: 1 February 1866.
1870. *Nyctiptenus* Fitzinger, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 62 (1): 424. Type species: *Vespertilio smithii* Wagner, 1855 (= *Vespertilio hottentota* A. Smith, 1833).
1892. *Adelonycteris* H. Allen, Proc. Acad. Nat. Sci. Philadelphia, 43: 466 (for 1891). Publication date: 19 January 1892. Allen (1939a: 84) mentioned it "in part; substitute for *Vesperus*, preoccupied". Hall and Kelson (1959: 184) and Hall (1981: 213) stated that it is a renaming of *Vesperus* Keyserling and Blasius, 1839, which included part of both *Vespertilio* and *Eptesicus* and which is an homonym of *Vesperus* Latreille, 1829, an insect.
1906. *Rhinopterus* Miller, Proc. Biol. Soc. Washington, 19: 85. Type species: *Glauconycteris floweri* de Winton, 1901. Publication date: 4 June 1906.
1917. *Pareptesicus* Bianchi, Ann. Mus. zool. Acad. Impér. Sci. St. Petersburg, 21: lxxvii. Type species: *Vesperugo pachyotis* Dobson, 1871.
1917. *Rhynptesicus* Bianchi, Ann. Mus. zool. Acad. Impér. Sci. St. Petersburg, 21: lxxvii. Type species: *Vesperugo nasutus* Dobson, 1877.
1931. *Tuitatus* Kishida and Mori, Zool. Mag., Tokyo, 43: 372-391. Nomen nudum (see Meester *et al.* 1986: 56; Pavlinov *et al.*, 1995: 112).
1959. *Amblyotis* Hall and Kelson, Mammals of North America, 1: 183. Lapsus.
1959. *Nyctiptennis* Hall and Kelson, Mammals of North America, 1: 183.
1985. *Rhynptesicus* Horáček and Hanák, Myotis, 23-24: xx. Lapsus.
- ? *Cnephæus*: Current spelling.

Taxonomy:

Does not include *Neoromicia* Roberts, 1926, see Volleth *et al.* (2001), Kearney *et al.* (2002), and Hooper and Van Den Busche (2003).

Common names:

English: Big-brown bats, Serotines, Greater

Serotine Bats, Serotine Bats.

Etymology of name:

From the Greek "*epten*" meaning flying and "*oikos*" meaning house (house flier) (Flannery, 1995: 367; Kozhurina, 2002: 15; Álvarez-Castañeda and Álvarez Solórzano, 1996: 43).

Braun and Mares (1995: 179) state: "*eptesicus* (NL), a name coined by Rafinesque that he said he derived from "*epien*" (Greek), to fly + "*oikos*" (Greek), house (Palmer, 1904; Gotsch, 1979). However, the correct Greek word would more likely be "*eptén*", which means "I flew".

Distribution based on voucher specimens: Angola, Congo (Democratic Republic of the), Gabon, Senegal, Tanzania, The Gambia.

Eptesicus bottae (Peters, 1869)

- *1869. *Vesperus bottae* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 406. Type locality: Yemen: no specific locality. Type specimen: MNHN 1987-297 (ad ?, skull and alcoholic, collector dr. Paolo Emilio Botta, collection date 1837).
- 1887. *Vesperugo (Vesperus) innesi* Lataste, Ann. Mus. Civ. Stor. Nat. Genova, ser. 2a, (O.S. 24) 4: 625, 2 text-figs. Type locality: Egypt: Cairo [30 03 N 31 15 E]. Type specimen: BMNH 1919.7.7.3528 (Lectotype: sad F; skull and alcoholic; collector Dr. Walter Innes, collection date 1885: see Qumsiyeh, 1985: 58). Publication date: 25 July 1887.
- 1891. *Vesperugo innesi*: Noack, Jb. Hamb. Wiss. Anst., 9: xx. Name combination.
- 1902. *Vespertilio innesi*: Anderson and de Winton, Zoology of Egypt: Mammalia: 121. Name combination.
- 1919. *E[ptesicus] innesi*: Thomas, J. Bomb. nat. Hist. Soc., 26: 746. Name combination.
- 1932. *Eptesicus innesi*: Flower, Proc. zool. Soc. Lond., 101: 382. Name combination.
- 1942. *Eptesicus (Eptesicus) bottae*: Tate, Bull. Am. Mus. Nat. Hist., 80: xx: Name combination.
- 1955. *Eptesicus isabellinus innesi*: Sanborn and Hoogstraal, J. Egypt. Publ. Health Ass., 30 (4): xxx. Name combination.
- 1956. *Eptesicus isabellinus bottae*: Harrison, Proc. zool. Soc. Lond., 127: xxx. Name combination.
- 1963. *E[ptesicus] bottae*: Harrison, Z. Säugetierk., 28 (1): 109. Name combination.
- 1964. *Eptesicus bottae bottae*: Harrison, Mammals of Arabia: 140. Name combination.
- 1964. *Eptesicus bottae innesi*: Harrison, Mammals of Arabia: 140. Name combination.
- 1964. *Eptesicus bottae*: Harrison, Mammals of Arabia: 140. Name combination.
- 1971. *Eptesicus [(Eptesicus)] bottae innesi*: Hayman and Hill, Mammals of Africa: Chiroptera: 44. Name combination.
- 1990. *Eptesicus (Eptesicus) bottae bottae*: Nader and Kock, Senckenb. biol., 79 (1/3): 2. (for 1989).
- 1994. *E[ptesicus (Eptesicus)] b[ottae] bottae*: Koopman, Chiroptera: 120. Name combination.
- 1994. *E[ptesicus (Eptesicus)] b[ottae] innesi*: Koopman, Chiroptera: 120. Name combination.

Taxonomy:

Revised by Nader and Kock (1990). Ellerman and Morrison-Scott (1966: 156) considers *isabellinus* to be a synonym of this species rather than of *E. serotinus*.

and Arabian peninsula (UAE, Saudi Arabia, Oman, Yemen), east over Iraq, Iran to Pakistan; Afghanistan; Kazakhstan, Turkmenistan, Uzbekistan, Kirghizia, Tadjikistan, NW China. Possibly in Syria, Transcaucasia, Mongolia.

Common names:

English: Botta's Serotine, Botta's Serotine Bat.
French: Sérotine de Botta. German: Bottas Breitflügelfledermaus.

Etymology of name:

In honour of Paul-Emile Botta (1802 - 1870), who collected the type specimen (see Kozhurina, 2002: 14).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Benda and Juste 2004).

General distribution:

Rhodos (Greece), Turkey, Egypt, Israel, Jordan,

Distribution based on voucher specimens:
Egypt, Yemen.

Figure 155. Distribution of *Eptesicus bottae*

Eptesicus floweri (de Winton, 1901)

- *1901. *Glauconycteris floweri* de Winton, Ann. Mag. Nat. Hist., ser. 7, 7 (37): 46. Type locality: Sudan: 12 mi (18 km) S from Khartoum, on White Nile, Wad Marium [c 15 25 N 32 25 E]. Type specimen: BMNH 1903.2.7.14 (Holotype, ad M, skin and skull, collector Mrs. Anderson and H.F. Witherby, collection number 35, collection date 12 May 1900). Publication date: 1 January 1901.
1908. *S[cabrifer] floweri*: G.M. Allen, Bull. Mus. comp. Zool., 52 (3): 46. Name combination.
1915. *Rhinopterus lowei* Thomas, Ann. Mag. Nat. Hist., ser. 8, 15 (90): 559. Type locality: Sudan: Blue Nile, 20 mi (30 km) above Sennaar [c 15 35 N 33 38 E, 450 m]. Type specimen: BMNH 1915.3.6.70 (Holotype, ad M, skull and alcoholic, collector Willoughby P. Lowe, collection date: 13 December 1913). Publication date: 1 June 1915.
1918. *Scabrifer floweri*: Wettstein, Denkschr. k. Akad. Wiss. Wien, Math.-Naturw. Kl., 94: 651. Name combination.
1939. *Rhinopterus floweri* G.M. Allen, Bull. Mus. comp. Zool., 83: 97. Name combination.
1969. *Eptesicus (Rhinopterus) floweri*: Kock, Abh. Senckenberg. naturforsch. Ges., 521: 166. Name combination.
1971. *Eptesicus (Rhinopterus) lowei*: Hayman and Hill, Order Chiroptera: 45. Name combination.
1974. *Eptesicus floweri*: Seal and Makey, ISIS Mammalian Taxonomic Directory: xxx. Name combination.
- ? *Eptesicus (Rhinopterus) floweri lowei*: Name combination.

Taxonomy:

Includes *lowei*; see Braestrup (1935: 92); but also see Hayman and Hill (1971).

Common names:

English: Horn-skinned Pipistrelle Bat, Flower's Pipistrelle Bat, Horn-skinned bat, Sudan Horn-skinned Bat, Lesser Sudan Horn-skinned Bat, Sudan serotine, Horn-skinned serotine. French: Sérotine du Soudan, Sérotine de Flower. German: Chagrin Fledermaus, Warzen-Breitflügelfledermaus.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); VU D2 ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004).

General distribution:

Sudan, Mali, Mauritania (Padial and Ibáñez, 2005: 240).

Figure 156. Clockwise from top lateral, ventral and dorsal skull images of BMNH 1903.2.7.14, holotype of *Glauconycteris floweri* de Winton, 1901.

- 1931. *Eptesicus megalurus*: Hewitt, A guide to the Vertebrate fauna of the Eastern Cape Province: 23. Name combination.
- 1938. *Scotophilus angusticeps* Shortridge and Carter, Ann. S. Afr. Mus., 32: 282. Type locality: Republic of South Africa: W Cape Province, 10 mi (16 km) N Citrusdal, Hex River Estate.
- 1939. *Eptesicus smithii*: G.M. Allen, Bull. Mus. comp. Zool., 83: 87. Name combination.
- 1942. *Eptesicus megalurus pallidior* Shortridge, Ann. S. Afr. Mus., 36: 37. Type locality: Republic of South Africa: NW Cape Province, Klein Namaqualand, Orange River, Goodhouse.
- 1946. *E[ptesicus] h[ottentotus] hottentotus*: Roberts, Ann. Transv. Mus., 20: 305. Name combination.

1946. *Eptesicus hottentotus bensoni* Roberts, Ann. Transv. Mus., 20: 305. Type locality: Malawi: Ncheu (=Ntcheu) [14 49 S 34 38 E, 1 100 m]. Type specimen: TM 9167 (ad. M, skin and skull, collector: C.W. Benson, collection date: 31 October 1939 original number 94).
1951. *Eptesicus hottentotus angusticeps*: Roberts, The mammals of South Africa: 551. Name combination.
1951. *Eptesicus hottentotus hottentotus*: Roberts, The mammals of South Africa: 86. Name combination.
1951. *Eptesicus hottentotus pallidior*: Roberts, The mammals of South Africa: 86. Name combination.
1953. *Eptesicus (Eptesicus) hottentotus bensoni*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 76. Name combination.
1953. *Eptesicus (Eptesicus) hottentotus hottentotus*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 76. Name combination.
1953. *Eptesicus (Eptesicus) hottentotus pallidior*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 76. Name combination.
1953. *Eptesicus (Eptesicus) hottentotus*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 76. Name combination.
1954. *Eptesicus hottentotus*: Ellerman, Ann. Univ. Stellenbosch, 30 A (1): 32. Name combination.
1969. *Eptesicus serotinus hottentotus*: Kock, Abh. Senckenberg. naturforsch. Ges., 521: 214. Name combination.
1986. *Eptesicus hottentotus portavernus* Schlitter and Aggundey, Cimbebasia, (A) 8 (20): 172. Type locality: Kenya: Rift Valley province, Naivasha district, 20 km S, 14 km W Naivasha, Hell's Gate Canyon (=Njorowa Gorge) [00 54 S 36 19 E]. Type specimen: CM 89000 (ad M, skin and skull, collector Duane A. Schlitter, collection date 30 September 1985, original number 6906: see Schlitter and Aggundey, 1986: 172 - S99).
1986. *Eptesicus hottentotus protavernus* Schlitter and Aggundey, Cimbebasia, (A) 8 (20): 174. Lapsus.
1994. *E[ptesicus (Eptesicus)] h[ottentotus] portavernus*: Koopman, Chiroptera: 120. Name combination.
2003. *Eptesicus (Cnephaeus) hottentotus*: Hooper and Van Den Bussche, Acta Chiropt., 5 (Suppl.): 38. Name combination.

Taxonomy:

Revised by Schlitter and Aggundey (1986), who described a new subspecies from Kenya - *Eptesicus hottentotus portavernus*. Besides the nominate form and the newly describe subspecies, their work recognised one other subspecies *E. h. bensoni* (Roberts, 1946), but not *E. h. pallidior* (Shortridge, 1942), which they synonymised with the nominate subspecies (Schlitter and Aggundey, 1986. Simmons (2005: 455) recognised the same subspecies. An analysis of specimens from southern Africa showed support for the synonymization of *E. h. pallidior*, but also indicated that either the subspecies delineation between *E. h. hottentotus* and *E. h. bensoni* is also not as distinct, or the distribution of *E. h. bensoni*, described from Malawi, requires revision (Kearney, 2006). Although the distribution of *E. h. bensoni* in Meester *et al.* (1986: 57) included parts of South Africa, as well as Mozambique, Zimbabwe and Malawi, Hayman and Hill (1971) listed only Malawi and Zambia, and the subspecies was not included in the list of mammals from South Africa by Roberts (1951; 1954). Included in the

subgenus *Cnephaeus* by Hooper and Van Den Bussche (2003: 38).

Common names:

Afrikaans: Langstert-dakvlermuis. English: Long-tailed Serotine Bat, Hottentot Serotine Bat, Long-tailed Greater Serotine Bat, Long-tailed House Bat. French: Sérotine des maisons à longue queue. Portuguese: Morcego caseiro Hottentot.

Etymology of name:

The colloquial name is derived from the fact that the tail of this species is much longer than in its sister taxa (see Smithers; 1983; Skinner and Smithers, 1990: 108; Taylor, 2005).

Similar species:

Has been confused with *Scotophilus* (Roberts, 1946; 1951: 86; 1954: 86; Kearney and Seemark, 2004), although *E. hottentotus* has bicoloured hair and two upper incisors, while *Scotophilus* has single coloured hair and one upper incisor.

Palaeontological / archaeological records:

E. hottentotus was found from the upper Pleistocene at Border Cave and possibly the late Holocene at Nkupe, South Africa (Avery 1991: 6).

Conservation status:

Global- LR/lc (Baillie and Groombridge, 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs and Cotterill, 2004a).

Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly, 2004).

General distribution:

Kenya (Schlitter and Aggundey, 1986), Zambia (Ansell, 1960: 20), Kenya (Schlitter and Aggundey, 1986), Malawi (Kershaw, 1922: 182); Roberts, 1946: 305; Happold *et al.* 1987; Ansell and Dowsett, 1988: 38), Angola (Crawford-Cabral, 1966: 137; 1989; Feiler, 1990, Namibia (Griffin, 1999: 30; Rautenbach *et al.* 1993: 93), Zimbabwe (Peterson and Nagorsen, 1975; Cotterill, 1996: 78), Mozambique (Smithers and Lobao Tello, 1976: 60), South Africa (Shortridge and Carter, 1938: 282; Shortridge, 1942: 38; Roberts, 1951: 86; 1954: 86; Rautenbach *et al.*, 1981; Rautenbach and Espie, 1982; Herselman and Norton, 1985: 100; Rautenbach *et al.* 1993: 93); Lynch, 1994; Taylor, 1998; Watson, 1998; Avery 1991: 6; Kearney and Seamark, 2004; Seamark and Brand, 2005: 8), and Lesotho (Lynch, 1994).

Geographic variation:

See also the section on "Taxonomy". *E. h. bensoni* is smaller than either *E. h. hottentotus* and *E. h. portavernus* (Schlitter and Aggundey, 1986). *E. h. bensoni* is darker in colour, "tawny olive" (Roberts, 1946), than *E. h. portavernus* (Schlitter and Aggundey, 1986), and *E. h. hottentotus* (Roberts, 1946: 305). Morphometric analysis of cranial size supported the synonymization of *E. h. pallidior* with the nominate species (Schlitter and Aggundey, 1986; Kearney, 2006), which had been described on the basis of the paler colour, "rufous-buff" (Shortridge, 1942:), that is found in specimens from the Northern Cape and Namibia. Although, colour is darker in specimens from Taung in the North West Province of South Africa (Herselman and Norton, 1985: 100), and in specimens from Angola - "gold brownish" (Crawford-Cabral, 1966; 1989: 19). Relative to *E. h. hottentotus*, *E. h. portavernus* has a deeper braincase and shorter palatal length (Schlitter and Aggundey, 1986).

General description of external morphology:

For a general description of overall size, and pelage and membrane colour see Temminck (1840), Sclater (1901: 126), Shortridge and Carter (1938: 282), Shortridge (1942:), Roberts

(1946), Smithers (1983), Skinner and Smithers (1990: 108), Taylor (2000), Taylor (2005: 318). For a general description of the ear and tragus see Temminck (1840), Sclater (1901: 126), Smithers (1983), Skinner and Smithers (1990: 108), Taylor (2000), Taylor (2005: 318).

General description of cranial and dental morphology:

For a general description of the skull see Shortridge and Carter (1938: 282), Roberts (1946). For a general description of the teeth see Sclater (1901: 126).

Detailed morphology:

Baculum - See Hill and Harrison (1987) and Kearney *et al.* (2002).

Dental - See Menu (1985; 1987).

Functional morphology:

Unknown.

Sexual dimorphism:

An analysis of specimens from southern Africa showed no significant difference between the sexes in 12 cranial and dental, and eight external measurements, but females were significantly larger than males by 5.21 and 6.78 percent respectively for forearm and third metatarsal lengths (Kearney, 2006).

Echolocation:

Based on a single room-flown individual the call was recorded as a short duration (2-4 ms), broadband (20-54 kHz) call with a dominant frequency of 28-32 kHz, and harmonic components (Taylor, 2000: 89). The call frequency, outside the sensitivity range of moths, is suggested to have evolved in response to moth hearing (Schoemann and Jacobs, 2003).

Molecular biology:

DNA - See Hoofer and Van Den Bussche (2003, Stadelmann *et al.* (2004), Eick *et al.* (2005) and Matthee *et al.* (2007).

Karyotype - Results of all analyses, based on specimens from Zimbabwe (Peterson and Nagorsen, 1975), Namibia and Limpopo Province in South Africa (Rautenbach *et al.*, 1993: 93), and the Western Cape Province in South Africa (Kearney *et al.*, 2002: 59), agreed the diploid number is $2n=50$, with 24 pairs of acrocentric autosomes, hence a fundamental number of FN = 48. The X chromosome is a medium-sized submetacentric, and the Y a small acrocentric (Peterson and Nagorsen, 1975; Rautenbach *et al.*, 1993: 93; Kearney *et al.*, 2002: 59).

Protein / allozyme - See Morales *et al.* (1991) for results from ten specimens from Namibia.

Habitat:

Often associated with mountainous country, in close proximity to water (see references under "Habits").

Habits:

In Angola specimens collected from Capolopopo were "performing sweeping flights over a water tank, apparently catching insects" (Crawford-Cabral, 1989: 19), as was also noted by Roberts (1951: 87) for individuals observed at Eronga Mountain in Namibia. In Mozambique a single specimen was mistnetted in the Zambezi Valley northwest of Tete (Smithers and Lobao Tello, 1976: 60). Specimens collected at Goodhouse in the Northern Cape Province of South Africa were shot "whilst "planing" very slowly in wide circles around a cattle kraal, to which they were attracted by a swarm of flies" (Shortridge, 1942: 38). Shortridge (1942: 38) also observed them to be weak fliers, coming out at late dusk after *Cistugo* and *Sauromys*. In 1985, near Buxton in the North West Province of South Africa, some 11 years after this species had been taken from a roost at the entrance to an old mine tunnel (see below under "Roost"), three females were netted flying out of the tunnel, two at 20h45, and another at 21h40, while a male was caught returning at 23h30 (James, 1986: 219). The first specimen of this bat caught in the northern part of the Kruger National Park in South Africa was mistnetted after sunset in a figtree forest on the banks of the Luvuvhu River (Rautenbach and Espie, 1982: 112). In the Free State Province of South Africa a specimen was netted at Sterkfontein Dam in "well-wooded, broken country with patches of marshy open grassland" (Watson, 1998). A specimen from Ithala Game Reserve in northern KwaZulu-Natal Province of South Africa was netted over a river with well-wooded banks (Rautenbach *et al.* 1981: 24). At Rocherpan in the Western Cape Province of South Africa specimens were netted flying low over a marsh (Herselman and Norton, 1985: 100). In the Cederberg region of the Western Cape Province of South Africa specimens were netted, in January and February between 20h45-21h52, at the edges of water bodies (Seamark and Brand, 2005: 8). In Lesotho specimens were netted over grassy banks adjacent to rivers in mountainous terrain, at Malealea the species was caught in October at 20h30 (Lynch, 1994: 197).

Roost:

In Zimbabwe a specimen was found "clinging to a wall in an open building with a corrugated iron roof" (Smithers and Lobao Tello, 1976: 60), and at Marandellas "hanging on the wall of a squash court" (Smithers and Wilson, 1979: 45). Specimens from Taung in the North West

Province of South Africa were taken (between 1976-1979) from a hollow in rocks at the entrance to an old mine tunnel inhabited by *Miniopterus schreibersii* (Herselman and Norton, 1985: 100).

Migration:

Unknown.

Diet:

Insectivorous (Smithers, 1983; Skinner and Smithers, 1990: 108; Taylor, 2005: 318). Schoeman and Jacobs (2003) identified tympanate moths in the diet of individuals from the Western Cape Province of South Africa.

Predators:

Unknown.

Population:

Structure - Unknown.

Density - Shortridge (1942: 38) indicated this bat was not plentiful around Goodhouse in the Northern Cape of South Africa and only observed half a dozen individuals. In other instances specimens have either been found singly or in groups of two to five (Smithers and Wilson, 1979; Herselman and Norton, 1985: 100; Smithers, 1983; Watson, 1998).

Lifespan:

Unknown.

Activity and behaviour:

Unknown.

Reproduction and ontogeny:

Unknown.

Mating:

Unknown.

Post-natal development:

Unknown.

Parasites:

Ectoparasite - *Pteracarus pusillus* (Fain, 1978: 78).

Viruses:

Unknown.

Utilization:

Unknown.

Anthropophilous:

Unknown.

Distribution based on voucher specimens:
Angola, Kenya, Lesotho, Malawi, Mozambique,
Namibia, South Africa, Zambia, Zimbabwe.

Figure 158. Distribution of *Eptesicus hottentotus*

Eptesicus platyops (Thomas, 1901)

- *1901. *Vespertilio platyops* Thomas, Ann. Mag. Nat. Hist., ser. 7, 8 (43): 31. Type locality: Nigeria: Western Region, Lagos [06 27 N 03 23 E]. Type specimen: BMNH 1888.5.17.3 (Holotype, ad F, skull and alcoholic, gift George Edward Dobson). Publication date: 1 July 1901.
- 1939. *Eptesicus platyops*: G.M. Allen, Bull. Mus. comp. Zool., 83: 86. Name combination.
- 1969. *Eptesicus serotinus platyops*: Kock, Abh. Senckenberg. naturforsch. Ges., 521: 214. Name combination.
- 1980. *Eptesicus (Eptesicus) platyops*: Corbet and Hill, A world list of mammalian species: xxx. Name combination.
- 1994. *E[ptesicus (Eptesicus)] s[erotinus] platyops*: Koopman, Chiroptera: 120. Name combination.

Taxonomy:

Considered a subspecies of *E. serotinus* by Ibáñez and Valverde (1985) and Koopman (1994: 120), but no comparison with *E. bottae* was made.

Common names:

English: Lagos Serotine Bat, Flat-faced Serotine Bat, Lagos serotine. French: Sérotine de Lagos. German: Lagos-Breitflügelfledermaus.

Etymology of name:

From the Greek "*platyops*" for broad-faced or flat-faced.

Conservation status:

Global- VU (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Schlitter 2004e).

General distribution:

Nigeria, Senegal, Bioko.

Figure 159. Distribution of *Eptesicus platyops*

Distribution based on voucher specimens:
Nigeria, Senegal.

Eptesicus serotinus (Schreber, 1774)

- *1774. *Vespertilio serotinus* Schreber, Die Säugethiere, 1 (7): pl. 53 + 1 (9): 167. Type locality: France: no specific locality. Publication date: 1774.
1838. *Scotophilus serotinus*: Gray, Mag. Zool. Bot., Edinburgh, 2 (12): 497. Name combination.
1839. *Vesperugo (Vesperus) serotinus*: Keyserling and Blasius, Arch. Naturg., 5 (1): 313. Name combination.
1840. *Vespertilio isabellinus* Temminck, Monogr. Mamm., 2: 205, pl. 52, fig. 1, 2. Type locality: Libya: near Tripoli. Publication date: 1835-1841. Considered a valid subspecies by Horáček *et al.* (2000: 124). Considered a valid species by Benda *et al.* (2004b: xx).
1855. *Vespertilio (Vesperugo) serotinus*: Wagner, Schreber's Säugethiere, Suppl. 5: 732. Name combination.
1855. *Vespertilio (Vesperus) isabellinus*: Wagner, Schreber's Säugethiere, Suppl. 5: 746. Name combination.
1856. *Vesperus (Cateorus) Sorotinus* Kolenati, Allg. deutsche naturh. Zeitung, N.F., 2 (5): 162. Lapsus.
1856. *Vesperus serotinus*: Kolenati, Allg. deutsche naturh. Zeitung, N.F., 2 (4): 122. Name combination.
1860. *Cateorus serotinus*: Kolenati, Monographie der Europäischen Chiroptern: 6. Name combination.
1860. *Meteorus isabellinus*: Kolenati, Monographie der Europäischen Chiroptern: 20. Name combination.
1862. *Vespertilio (Cateorus) serotinus*: Koch, Nass. naturw. Jahrb., 18: 393. Name combination.
1862. *Vesperugo serotinus*: Jeitteles, Verh. Zool. Bot. Ges. Wien, 12: xxx. Name combination.
1880. *Vesperugo (Vesperus) serotinus isabellinus* Dobson, Bull. Soc. zool. France, 5: xxx. Name combination.
1885. *Vesperugo serotinus isabellinus*: Lataste, Act. Soc. Linn. Bordeaux, 39: 189. Name combination.
1897. *Vesperugo (Vesperus) serotinus var. gabonensis* Trouessart, Cat. Mamm. Viv. Foss., 2nd ed, pt. 1: 108. Type locality: 'Gabon': allegedly from Gabon, Africa, but almost certainly from Kashmir or N India (see Hayman and Hill, 1971: 44; Ibáñez and Valverde, 1985; Corbet and Hill, 1992: 131). However, see Grubb (2004: 92); who indicates that Gabon might not be rejected. Type specimen: BMNH 1873.4.16-19. Publication date: 1897. Based on *V. s. var. a* of Dobson, 1878: 192 (see Corbet and Hill, 1992: 131). Considered a subspecies by Corbet and Hill (1992), but not attributable to any subspecies according to Simmons (2005). Grubb (2004: 92) indicates it might be a junior synonym of *pachyomus* or a senior synonym of *platyops*.
1900. *Eptesicus serotinus*: Méhely, Monographia Chiropteroorum Hungariae: 209. Name combination.
1905. *Vespertilio (Eptesicus) serotinus isabellinus*: Trouessart, Caus. sci. Soc. zool. France, 1 (10): xxx. Name combination.
1905. *Vespertilio (Eptesicus) serotinus*: Trouessart, Caus. sci. Soc. zool. France, 1 (10): xxx. Name combination.
1909. *Eptesicus serotinus isabellinus*: Satunin, Mitt. Kauk. Mus., 4: 297. Name combination. However, this is not *isabellinus* Temminck, 1835-1841, but *isabellinus* Blyth, 1851.
1937. *Eptesicus isabellinus*: Laurent, Mammalia, 1: 153. Name combination.
1939. *Eptesicus serotinus gabonensis*: Allen, Bull. Mus. comp. Zool., 83: 87. Name combination.
1939. *Eptesicus serotinus isabellinus*: G.M. Allen, Bull. Mus. comp. Zool., 83: 87. Name combination. First use for *isabellinus* Temminck, 1835-1841.
1942. *Eptesicus (Eptesicus) isabellinus*: Tate, Bull. Am. Mus. Nat. Hist., 80: xxx. Name combination.
1942. *Eptesicus (Eptesicus) serotinus*: Tate, Bull. Am. Mus. Nat. Hist., 80: xxx. Name combination.
1954. *Eptesicus isabellinus isabellinus*: Toschi, Ric. Zool. appl. Caccia, Bologna, 2 (7): xxx. Name combination.
1962. *Eptesicus gabonensis*: Basilio, La vida animal en la Guinea Española: xxx. Name combination.

1971. *Eptesicus (Eptesicus) serotinus isabellinus*: Hayman and Hill, Order Chiroptera: 44. Name combination.
 2003. *Eptesicus (Cnephaeus) serotinus*: Hooper and Van Den Bussche, Acta Chiropt., 5 (Suppl.): 35. Name combination.
 ? *Eptesicus (Amblyotus) isabellinus*:

Taxonomy:

See comments under *platyops*. Horáček *et al.* (2000: 124): "Considered conspecific with the Nearctic *E. fuscus* by Koopman (1994) what, however, would be the only case of a bat with a Holarctic distribution". Included in the subgenus *Cnephaeus* by Hooper and Van Den Bussche (2003: 38).

Le Berre (1990: 102) considers *Eptesicus isabellinus* to be a synonym of *Eptesicus bottae* (see also comments under that species).

The status of *gabonensis* still remains unclear. Although originally described by Trouessart (1897: 108) from Gabon, Hayman and Hill (1971: 44) and Ibáñez and Valverde (1985: 242) suggest it almost certainly originated from Kashmir or Northern India. Kock (1969: 162) considered it to be senior synonym of *Eptesicus platyops*, which is supported by Grubb (2004: 92), who discussed this in detail.

Pending further analyses, we retain *gabonensis* in the synonymy of *Eptesicus serotinus*.

Common names:

Basque: Baratz-saguzarra. Catalanian: Rat penat dels graners. Czech: netopýr večerní. Danish: Sydflagermus. Dutch: Laativlieger. English: Serotine Bat, Serotine, Common Serotine Bat, Big Brown Bat. French: la sérotine commune, Grande sérotine, Sérotine. Gallician: Morcego das hortas. German: Breitflügelfledermaus. Hungarian: kései denevér, Közönséges késeidenevér. Italian: Serotino comune, Serotino. Maltese: Serotin. Polish: Mroczek późny. Portuguese: Morcego-hortelão. Roman: Serotin da l'ala lada. Russian: Pozdnij kozhan. Slovenian: pozni netopir. Spanish (Castilian): Murciélago hortelano, Murciélago de huerta.

Swedish: Sydfladdermus.

Conservation status:
 Global- LR: lc.

General distribution:

W Europe (incl. the Netherlands), Portugal, through Sweden, Lithuania, Czech Republic, Austria, Albania, Greece, S Asiatic Russia (incl. Abkhazia) over Afghanistan, N Pakistan, N India to Himalayas, Nepal, Tibet, Thailand, Laos, and China (Yunnan, Hunan, Fujian, Zhejiang), north to Korea; Taiwan, S England; N Africa (incl. Morocco); most islands in Mediterranean; Israel; perhaps Subsaharan Africa.

Figure 160. Distribution of *Eptesicus serotinus*

Distribution based on voucher specimens:
 Algeria, 'Gabon', Morocco, Tunisia.

Genus *Glauconycteris* Dobson, 1875

- *1875. *Glauconycteris* Dobson, Proc. zool. Soc. Lond., 1875, III: 383. Type species: *Kerivoula poensis* Gray, 1842. Publication date: October 1875.

Taxonomy:

Bronner *et al.* (2003) state that although occasionally treated as a subgenus of *Chalinolobus* (Koopman 1971; Swanepoel *et al.*, 1980; Honácki *et al.*, 1982; Meester *et al.*, 1986; Koopman 1993a; Taylor (1998: 49); Wilson and Cole 2000), *Glauconycteris* has often been considered as a distinct genus (Allen 1939a; Roberts 1951; Ellerman *et al.*, 1953; Hayman and Hill 1971; Corbet and Hill 1980, 1992). Despite some superficial cranial resemblance, the marked difference in baculum morphology (Hill and Harrison 1987) and karyotypic properties (Rautenbach *et al.*, 1993. Ansell and Dowsett

(1988: 38), Volleth and Heller 1994) and Eger and Schlitter (2001: 1) support the recognition of these taxa as discrete genera (N. Simmons in litt.). *Glauconycteris* is thus represented in the southern African subregion by a single species, *G. variegata* (butterfly bat), while *Chalinolobus* is extralimital (Australia).

Common names:

English: Butterfly Bats, Lobe-lipped Bats, Silvered Bats, Blue-grey Bats, Dobson's Bats, Glauconycterids.

Glauconycteris alboguttata J.A. Allen, 1917

- *1917. *Glauconycteris alboguttatus* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 449, text-fig. 7, B. Type locality: Democratic Republic of the Congo: Oriental province, Medje. Type specimen: AMNH 49317 (ad F, alcoholic and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 14 March 1914, original number 2351). Publication date: 29 September 1917.

? *Chalinolobus alboguttatus*: Name combination.

? *Glauconycteris alboguttata*: Current spelling.

Taxonomy:

See Simmons (2005).

Common names:

English: Allen's Butterfly Bat, Striped Butterfly Bat, White-spotted Butterfly Bat, Allen's striped bat. French: Barbastelle d'Allen.

Etymology of name:

From the Latin "*alboguttata*" meaning white spotted.

Conservation status:

Global- VU assessed as *Chalinolobus alboguttatus* (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004e).

General distribution:

Democratic Republic of the Congo, Cameroon.

Distribution based on voucher specimens:

Congo (Democratic Republic of the).

Figure 161. Distribution of *Glauconycteris alboguttata*

Glauconycteris argentata (Dobson, 1875)

- *1875. *Chalinolobus argentatus* Dobson, Proc. Zool. Soc. Lond., 1875, III: 385. Type locality: Cameroon: Western Province, Mount Cameroon. Type specimen: BMNH 1871.7.10.5 (Holotype). Publication date: October 1875.
1889. *Chalinolobus congicus* Noack, Zool. Jahrb., Syst., 4: 223, pl. 2, fig 1; pl. 5, fig 66 - 68. Type locality: Democratic Republic of the Congo: near mouth of Congo River, Netonna. Type specimen: SMF 2516 (Holotype, M, skull only, collector P. Hesse). Publication date: 28 February 1889.
- ? *Glauconycteris argentata*: Name combination.

Taxonomy:
See Simmons (2005).

Common names:
English: Common Butterfly Bat, Silvery Butterfly Bat, Silvered Butterfly Bat, Silvered bat. French: Barbastelle argentée.

Conservation status:
Global- LR/lc assessed as *Chalinolobus argentatus* (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004g).

General distribution:
Cameroon to Kenya, south to Angola and Tanzania; Malawi (Ansell and Dowsett, 1988: 39).

Distribution based on voucher specimens:
Cameroon, Congo (Democratic Republic of the), Rwanda.

Figure 162. Distribution of *Glauconycteris argentata*

Glauconycteris beatrix Thomas, 1901

- *1901. *Glauconycteris beatrix* Thomas, Ann. Mag. Nat. Hist., ser. 7, 8 (45): 256. Type locality: Equatoria Guinea: Rio Muni, Benito River, 15 mi. (24 km) from mouth (Grubb *et al.*, 1998: 89 mention "Benito River, French Congo, fifteen miles from mouth [Mbini River, in Equatorial Guinea]"). Type specimen: BMNH 1898.5.4.19 (Holotype, F, collector: G.L. Bates, collection date: January 1898). Publication date: 1 September 1901.
- ? *Chalinolobus beatrix*: Name combination.

Taxonomy:
Koopman (1993a: 199) included *humeralis*; see Koopman (1971: 7, 8), but see Simmons (2005).

Common names:
English: Beatrix Butterfly Bat, Beatrix's bat. French: Barbastelle de Béatrix.

Conservation status:
Global- LR/nt assessed as *Chalinolobus beatrix*

(Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004f).

General distribution:
Ivory Coast, Cameroon, Equatorial Guinea, Gabon, Central African Republic (Lunde *et al.*, 2001: 537).

Distribution based on voucher specimens:
Equatorial Guinea.

Glauconycteris curryae Eger and Smith, 2001

2001. *Glauconycteris curryae*: Eger, Acta Chiropt., 3 (2): 248. Emendation and current spelling.
- *2001. *Glauconycteris curryi* Eger and Schlitter, Acta Chiropt., 3 (1): 2. Type locality: Cameroon: Bipindi, 10 km W [03 05 N 10 25 E, c 300 m]. Type specimen: ROM 56243 (ad F, skin and skull, collector: R.L. Peterson, R. Glen, and P. Imbanyi, collection date 19 February 1970; note: netted over a pool in a vast stand of bamboo, by a river see Eger and Schlitter, 2001: 2).

Taxonomy:
See Simmons (2005).

Common names:
English: Curry's Butterfly Bat, Curry's Bat.

Etymology of name:
Named in honour of Noreen Curry, in recognition of her interest in bats and her support of Royal Ontario Museum field research in Africa and bat education at the ROM (see Eger and Smith, 2001).

Conservation status:
Global- DD ver 3.1 (2001) (IUCN 2004; Schlitter 2004f).

General distribution:
Cameroon, NW Democratic Republic of the Congo.

Distribution based on voucher specimens:
[Cameroon](#).

Figure 163. Distribution of *Glauconycteris curryae*

Glauconycteris egeria Thomas, 1913

- *1913. *Glauconycteris egeria* Thomas, Ann. Mag. Nat. Hist., ser. 8, 11 (61): 144. Type locality: Cameroon: Western Province, Bibundi. Type specimen: BMNH 1912.12.13.3 (Holotype, M, presented by Prof. E. Lampe, Wiesbaden Museum, origina number 22). Publication date: 1 January 1913.
- ? *Chalinolobus egerius*: Name combination.

Taxonomy:
See Simmons (2005).

Common names:
English: Bibundi Butterfly Bat, Bibundi bat.
French: Barbastelle du Bibundi.

Conservation status:
Global- LR/lc assessed as *Chalinolobus egeria* (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004n).

General distribution:
Cameroon, Central African Republic; a record from Uganda was listed by Koopman (1993a: 199) but this is apparently unconfirmed (Simmons, 2005).

Distribution based on voucher specimens:
Cameroon.

Glauconycteris gleni Peterson and Smith, 1973

- *1973. *Glauconycteris gleni* Peterson and Smith, Life Sci. Occ. Pap., R. Ont. Mus., 22: 3. Type locality: Cameroon: near Lomie.
 ? *Chalinolobus gleni*: Name combination.

Taxonomy:

See Simmons (2005).

Global- LR/nt assessed as *Chalinolobus gleni* (Baillie and Groombridge 1996); VU D1 ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004m).

Common names:

English: Glen's Butterfly Bat, Glen's wattled bat.
French: Barbastelle de Glen.General distribution:
Cameroon, Uganda.

Conservation status:

Glauconycteris humeralis J.A. Allen, 1917

- *1917. *Glauconycteris humeralis* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 448, text-fig. 7, A. Type locality: Democratic Republic of the Congo: Oriental province, Medje. Type specimen: AMNH 49013 (ad F, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 7 September 1910, original number 956). Publication date: 29 September 1917.
 ? *Chalinolobus humeralis*: Name combination.
 ? *Glauconycteris beatrix humeralis*: Name combination.

Taxonomy:

Included in *beatrix* by Koopman (1993a: 199), considered a subspecies of *beatrix* by Eger and Schlitter (2001), but considered a valid species by Simmons (2005).

Common names:

English: Allen's Spotted Bat.

Conservation status:

Global- DD ver 3.1 (2001) (IUCN 2004; Schlitter 2004k).

General distribution:

Kenya, Uganda, Democratic Republic of the Congo (Eger and Schlitter, 2001: 7).

Distribution based on voucher specimens:

Congo (Democratic Republic of the).

Figure 164. Distribution of *Glauconycteris humeralis*

Glauconycteris kenyacola Peterson, 1982

- *1982. *Glauconycteris kenyacola* Peterson, Can. J. Zool., 60: 2521. Type locality: Kenya: Coast Prov., 8.5 km N Garsen.
 ? *Chalinolobus kenyacola* (?): Name combination.

Taxonomy:

See Simmons (2005).

Conservation status:

Global- DD assessed as *Chalinolobus kenyacola* (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004).

Common names:

English: Kenyan Butterfly Bat, Kenyan wattled bat, Kenya barbastelle. French: Barbastelle du Kenya.

General distribution:

Kenya (Only known from the holotype).

Glauconycteris machadoi Hayman, 1963

- *1963. *Glauconycteris machadoi* Hayman, Comp. Diamants de Angola, Ser. Cult. 1963: 107. Type locality: Angola: Lac Calundo. Type specimen: BMNH 1962.2074.
 ? *Chalinolobus machadoi*: Name combination.

Taxonomy:

Included in *variegata* by Koopman (1993a: 200), but considered a valid species by Simmons (2005).

Global- DD ver 3.1 (2001) (IUCN 2004; Schmitter 2004d).

General distribution:

Angola; known only from the type locality.

Common names:

English: Machado's Butterfly Bat.

Distribution based on voucher specimens:

Angola.

Conservation status:

Glauconycteris poensis (Gray, 1842)

- *1842. *Kerivoula poensis* Gray, Ann. Mag. Nat. Hist., [ser. 1], 10 (65): 258. Type locality: Nigeria: Abo (lower Niger River) (Originally "Fernando Po", but in reality Abo, Lower Niger: see Allen and Thomson, Exp. Niger, 2: 479, 1848 in Allen, 1939a: 88, Grubb *et al.*, 1998: 89). Type specimen: BMNH 1842.11.4.33. Publication date: 1 December 1842.
 1868. *Vesperus (Hesperoptenus) kraussii* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 638. Type locality: Nigeria: S Nigeria, Yoruba. Publication date: 1868.
 ? *Chalinolobus poensis*: Name combination.

Taxonomy:

See Simmons (2005).

(Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004k).

Common names:

English: Abo Butterfly Bat, Abo bat. French: Barbastelle d'Abo.

General distribution:

Senegal over Benin (Capo-Chichi *et al.*, 2004: 162) to Uganda; Bioko; Cameroon.

Conservation status:

Global- LR/nt assessed as *Chalinolobus poensis*

Distribution based on voucher specimens:

Nigeria.

Glauconycteris superba Hayman, 1939

- *1939. *Glauconycteris superba* Hayman, Ann. Mag. Nat. Hist., ser. 11, 3 (14): 219. Type locality: Democratic Republic of the Congo: Oriental province, Ituri District, about 30 mi (45 km) ENE of Medje, Pawa [02 32 N 27 40 E]. Type specimen: RMCA 14765 (? , skull and alcoholic, collector Dubois). Publication date: 1 February 1939.
1947. *Glauconycteris superba sheila* Hayman, Ann. Mag. Nat. Hist., ser. 11, 13 (104): 547 (for 1946). Type locality: Ghana: Oda province, Oda [05 55 N 00 56 W]. Type specimen: BMNH 1947.10. Publication date: 7 August 1947. (see Evenhuis 2003: 50).
- ? *Chalinolobus superbus*: Name combination.

Taxonomy:

See Simmons (2005).

Common names:

English: Superb Butterfly Bat, Pied Butterfly Bat, Pied bat. French: Barbastelle bariolée.

Conservation status:

Global- VU assessed as *Chalinolobus superbus* (Baillie and Groombridge 1996); VU B2ab(iii) ver 3.1 (2001) (IUCN 2004; Fahr *et al.*, 2004).

General distribution:

Ivory Coast, Ghana, NE Democratic Republic of the Congo.

Distribution based on voucher specimens:

Congo (Democratic Republic of the), Ghana.

Figure 165. Distribution of *Glauconycteris superba*

Glauconycteris variegata (Tomes, 1861)

- *1861. *Scotophilus variegatus* Tomes, Proc. Zool. Soc. Lond., 1861, I: 31, 36. Type locality: Namibia: Otjoro [=Otjihoro, about 32 km west of Ondongwa, Ovamboland, fide Shortridge 1934: see Meester *et al.* 1986: 54]. Type specimens: BMNH 1907.1.1.437; BMNH 1907.1.1.438 (Syntypes, skin and skull; collection date: 1 December 1859; see Tomes, 1861b: 39). Publication date: May 1861.
1905. *Glauconycteris papilio* Thomas, Ann. Mag. Nat. Hist., ser. 7, 15 (85): 77. Type locality: Uganda: Entebbe. Type specimen: BMNH 1899.8.4.14 (Holotype). Publication date: 1 January 1905.
1915. *Glauconycteris phalæna* Thomas, Ann. Mag. Nat. Hist., ser. 8, 15 (90): 560. Type locality: Sudan: White Nile, Malakal district, near Fashoda. Type specimen: BMNH 1915.3.6.67 (Holotype, ad F, collector: Willoughby P. Lowe, collection date: 27 January 1914, original number 71). Publication date: 1 June 1915.
- ? *Chalinolobus variegatus*: Name combination.
- ? *Glauconycteris variegata*: Name combination.

Taxonomy:

Koopman (1993a: 200) included *machadoi*; see Kooman (1971: 6), but see Simmons (2005).

Common names:

Afrikaans: Vlindervlermuis. English: Variegated Butterfly bat, Butterfly bat. French: Chauve-souris des réticulée, Chauve-souris papillon. Portuguese: Morcego borboleta.

Etymology of name:

The colloquial name may be derived from the dark reticulated pattern on the wings, which has led to their being called leaf-winged bats (Taylor 2005). Although it is said that they resemble a large butterfly in flight, they are by no means butterfly-like in this respect (Taylor 2005).

Conservation status:

Global- LR/lc assessed as *Chalinolobus variegatus* (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004j). Regional- South Africa- Indeterminate (Smithers 1986); NT ver 3.1 (2001) assessed as *G. variegatus* (Friedmann and Daly 2004).

General distribution:

Senegal over Benin (Capo-Chichi *et al.*, 2004: 162), Uganda (Kityo and Kerbis, 1996: 62) to Ethiopia (Lavrenchenko *et al.*, 2004: 137), Somalia, south over Malawi (Happold and Happold, 1997: 821), Zambia, Zimbabwe, Botswana, Namibia (Cotterill, 2004: 262) to South Africa.

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach *et al.* (1993) reported $2n = 18$, FN = 32, BA = 16, a subtelocentric X chromosome, and a metacentric Y chromosome, for specimens from South Africa.

Protein / allozyme - Unknown.

Figure 166. Distribution of *Glauconycteris variegata*

Distribution based on voucher specimens: "Africa", Congo (Democratic Republic of the), Namibia, Somalia, South Africa, Sudan, Tanzania, Uganda, Zambia, Zimbabwe.

Genus *Hypsugo* Kolenati, 1856

- *1856. *Hypsugo* Kolenati, Allg. deutsch. naturh. Zeitung, ser. 2, 2: 131. Type species: *Vespertilio savii* Bonaparte, 1837. Publication date: 1856.
 1993. *Ypsugo*: Ariagno, Le Bièvre, 13: 118. Lapsus.

Taxonomy: (1992: 133).
 Meester *et al.* (1986: 50) mention *Vespertilio maurus* Blasius (= *Vespertilio savii* Bonaparte) and *Vesperugo krascheninikovii* Eversmann as type species, but this was fixed to *Vespertilio savii* Bonaparte by Wallin (1969), see Corbet and Hill

Etymology of name:
 From the Greek "upsos" and "ugo".

Hypsugo anchietae (de Seabra, 1900)

- *1900. *Vesperugo anchieta* de Seabra, J. Sci. mat. Phys. Nat., Lisboa, ser. 2, 6 (21): 26. Type locality: Angola: Cahata [12 20 S 14 50 E]. Type specimen: BMNH 1906.1.3.1 (Syntype, ad F, skull and alcoholic), MNHN 1900-538 (paratype, ad F, coll. José de Anchieta). Publication date: August 1900.
 1900. *[Vesperugo] Anchietae*: Bocage, Bull. Mus. natn. Hist. nat., Paris, 6: 164. Alternate spelling and name combination.
 1935. *Pipistrellus anchietae*: Monard, Arq. Mus. Bocage, 6: 31. Name combination.
 1953. *Pipistrellus (Pipistrellus) anchietai*: Ellerman, Morrison-Scott and Hayman, Southern African mammals 1758 to 1951: 78. Name combination.
 1965. *Pipistrellus anchietai*: Koopman, Am. Mus. Novit., 2219: 30. Name combination.
 1987. *[Attalepharca] anchietae*: Menu, Paleovertebrata, 17 (3): 126. Name combination.
 1987. *Pipistrellus (Hypsugo) anchietae*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 273. Name combination.
 1993. *Pipistrellus (Hypsugo) anchietai*: Koopman, Mammal Species of the World: Chiroptera: 219. Name combination.
 1994. *H[ypsugo] anchietae*: Heller, Volleth and Kock, Senckenb. biol., 74 (1/2): 2. Name combination.
 2001. *P[ipistrellus] (Hypsugo) anchieta*: Kock, Senckenb. biol., 81 (1/2): 279. Name combination.
 2002. *Hypsugo anchietae*: Kearney, Volleth, Contrafatto and Taylor, Name combination.

Taxonomy: The oldest name for this species may be *bicolor*; see Koopman (1975: 404). Koopman (1994: 114) mentions this species as *P. bicolor* in the subgenus *Pipistrellus*. Incorrect original spelling as *anchieta*, corrected to *anchietae* by Seabra (1900: 120).

Conservation status:
 Global- VU assessed as *Pipistrellus anchietai* (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.* 2004aq).
 Regional- South Africa- NT ver 3.1 (2001), assessed as *Pipistrellus anchietae* (Friedmann and Daly 2004).

Common names:
 Afrikaans: Anchieta-vlermuis. English: Anchieta's Pipistrelle, Anchieta's Bat, Miombo pipistrelle. French: Pipistrelle du Miombo, Pipistrelle d'Anchieta.

General distribution:
 Angola, S Democratic Republic of the Congo, Zambia, Zimbabwe, Botswana, Namibia (?) (Cotterill, 2004: 261), W Transvaal (Koopman, 1994: 114), KwaZulu-Natal (South Africa; Kearney and Taylor, 1997: 54), Madagascar (Bates *et al.* 2006: 319).

Etymology of name:
 This species is named after Mr Anchieta, a Portuguese national, who was a prolific collector of zoology material in Angola in the 1860's and who has numerous reptiles, birds and mammals named after him (Taylor 2005).

Molecular biology:
 DNA - Unknown.
 Karyotypic - Rautenbach *et al.* (1993) and Kearney *et al.* (2002) both reported $2n = 26$, FN = 32, BA = 8, a submetacentric X chromosome, and an acrocentric Y chromosome, for specimens

from South Africa.
Protein / allozyme - Unknown.

Distribution based on voucher specimens:
Angola, Congo, Congo (Democratic Republic of the), Ethiopia, South Africa, Swaziland, Zambia, Zimbabwe.

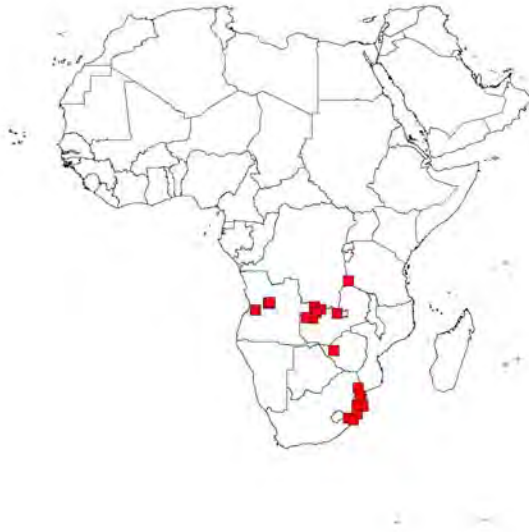

Figure 167. Distribution of *Hypsugo anchietae*

Hypsugo ariel (Thomas, 1904)

- *1904. *Pipistrellus ariel* Thomas, Ann. Mag. Nat. Hist., ser. 7, 14 (80): 157. Type locality: Sudan: Kassala Province, Wadi Alagi [22 N 35 E, 2 000 ft (=610 m)]. Type specimen: BMNH 1904.11.4.7 (ad F, skin and skull, collector Arthur M. MacKilligan, collection date 12 August 1903; original nr 28: see Qumsiyeh, 1985: 54). Publication date: 1 August 1904.
1966. *Pipistrellus (Pipistrellus) ariel*: Ellerman and Morrison-Scott, Checklist of Palaearctic and Indian Mammals: 171. Name combination.
1987. *Pipistrellus (Hypsugo) ariel*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): xxx. Name combination.
1991. *Pipistrellus ariel ariel*: Harrison and Bates, Mammals of Arabia: 92. Name combination.
2000. *Hypsugo ariel*: Horáček, Hanák and Gaisler, Bats of the Palearctic Region: 126. Name combination.

Taxonomy:

Mentioned in the subgenus *Pipistrellus* by Koopman (1994: 115). Harrison and Bates (1991: 93) assign the Arabian specimens to *P. a. ariel*, although they do not mention any other subspecies. Horáček *et al.* (2000: 126) mention it in the genus *Hypsugo*.

Common names:

English: Pygmy Pipistrellus, Ariel Pipistrelle, Egyptian Desert Pipistrelle, Desert pipistrelle, Fairy Pipistrelle. French: Pipistrelle ariel. German: Elfen-Zwergfledermaus.

Figure 168. Clockwise from top lateral, ventral and dorsal skull images of BMNH 1904.11.4.7, holotype of *Pipistrellus ariel* Thomas, 1904.

Conservation status:

Global- LR/nt assessed as *Pipistrellus ariel* (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Benda 2004c).

General distribution:

Egypt, N Sudan; Israel; Jordan.

Figure 169. Distribution of *Hypsugo ariel*

Distribution based on voucher specimens:

Sudan.

Hypsugo crassulus (Thomas, 1904)

- *1904. *Pipistrellus crassulus* Thomas, Ann. Mag. Nat. Hist., ser. 7, 13 (75): 206. Type locality: Cameroon: Efulen [02 07 N 10 32 E]. Type specimen: BMNH 1904.2.8.1 (Holotype, ad M, skull and alcoholic, collector G.L. Bates). Publication date: 1 March 1904.
1966. *Pipistrellus (Pipistrellus) crassulus*: Hayman, Misonne and Verheyen, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., (8) 154: xxx. Name combination.
1972. *Pipistrellus eisentrauti bellieri* De Vree, Rev. Zool. Bot. afr., 85 (3 - 4): 412. Type locality: Côte d'Ivoire: Adiopodoumé [05 20 N 04 07 W, 0 - 30 m]. Type specimen: RMCA 35686 (ad F, skin and skull, collector Frits De Vree, collection date 19 November 1969, prepared and labelled in the Laboratoire d'Ecologie (L. Bellier) of the ORSTROM, original number AX0104; see De Vree, (1972: 412). Publication date: 30 June 1972.
1987. [*Attalepharca*] *crassulus*: Menu, Palaeovertebrata, 17 (3): xxx. Name combination.
1994. *Hypsugo crassulus bellieri*: Heller, Volleth and Kock, Senckenb. biol., 74 (1/2): 1. Name combination.
1994. *Hypsugo crassulus*: Heller, Volleth and Kock, Senckenb. biol., 74 (1/2): 1. Name combination.
1994. *P[ipistrellus (Pipistrellus)] e[isentrauti] bellieri*: Koopman, Chiroptera: 114. Name combination.
1994. *P[ipistrellus (Vansonia)] crassulus*: Koopman, Chiroptera: 115. Name combination.
1998. *P[ipistrellus (Hypsugo)] e[isentrauti] bellieri*: Grubb, Jones, Davies, Edberg, Starin and Hill, Mammals of Ghana, Sierra Leone and The Gambia: 84. Name combination.

Taxonomy:

Mentioned in the genus *Pipistrellus* and the subgenus *Vansonia* by Koopman (1994: 116). Volleth *et al.* (2001: 27) assigned this species to the genus *Hypsugo*. Includes *bellieri*; see Heller *et al.* (1994), Simmons (2005). Hooper and Van Den Bussche (2003: 38) mentioned "*eisentrauti*" to belong to the genus *Nycticeinops*, but they used a specimen from Côte d'Ivoire which should be assigned to *crassulus bellieri*.

Common names:

English: Broad-headed Pipistrelle Bat, Broad-headed pipistrelle. French: Pipistrelle à grosse tête.

Conservation status:

Global- LR/lc assessed as *Pipistrellus crassulus* (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Fahr 2004o).

General distribution:

Ivory Coast, Cameroon, Democratic Republic of the Congo, S Sudan, N Angola; possibly Nigeria.

Figure 170. Clockwise from top lateral, ventral and dorsal skull images of BMNH 1904.2.9.1, holotype of *Pipistrellus crassulus* Thomas, 1904.

Distribution based on voucher specimens:
Angola, Cameroon, Congo, Congo (Democratic Republic of the), Côte d'Ivoire, Kenya, Sudan, Uganda.

Figure 171. Distribution of *Hypsugo crassulus*

Hypsugo eisentrauti (Hill, 1968)

- *1968. *Pipistrellus eisentrauti* Hill, Bonn. Zool. Beitr., 19 (1/2): 45. Type locality: Cameroon: Western Province, Rumpi Highlands, Dikume-Balue, Camp V. Type specimen: ZFMK 68.5 (ad M, skin and skull, collector Martin Eisentraut, collection date 18 February 1957, original number 498: see Hill, 1968: 45). Publication date: 10 April 1968.
- 1971. *Pipistrellus* [*Pipistrellus*] *eisentrauti*: Hayman and Hill, Order Chiroptera: 39. Name combination.
- 1972. *Pipistrellus eisentrauti eisentrauti*: De Vree, Rev. Zool. Bot. afr., 85 (3-4): xxx. Name combination.
- 1987. *Pipistrellus (Hypsugo) eisentrauti*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 274. Name combination.
- 1994. *Hypsugo eisentrauti*: Heller, Volleth and Kock, Senckenb. biol., 74 (1/2): 1. Name combination.
- 1994. *Pipistrellus (Pipistrellus) eisentrauti*: Koopman, Chiroptera: 114. Name combination.
- 2003. *Nycticeinops eisentrauti*: Hooper and Van Den Bussche, Acta Chiropt., 5 (Suppl. 1): 38. Name combination.

Taxonomy:

Koopman (1994: 114) mentions this species as belonging to the subgenus *Pipistrellus*. Volleth *et al.* (2001: 27) assigned this species to the genus *Hypsugo*. Koopman (1993: 221) included *bellieri*, but see Heller *et al.* (1994), Simmons (2005). Hooper and Van Den Bussche (2003: 38) include *eisentrauti* in *Nycticeinops*, but they used a specimen from Côte d'Ivoire, which should be assigned to *crassulus bellieri*.

Common names:

English: Eisentraut's Pipistrelle Bat, Eisentraut's pipistrelle. French: Pipistrelle d'Eisentraut. German: Eisentrauts Zwergfledermaus.

Etymology of name:

In honour of Prof. Martin Eisentraut, collector of the type specimen.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Fahr 2004n).

General distribution:

Cameroon to Kenya and Somalia.

Figure 172. Distribution of *Hypsugo eisentrauti*

Distribution based on voucher specimens: Cameroon, Congo (Democratic Republic of the), Côte D'Ivoire, Guinea, Kenya, Liberia, Rwanda.

Hypsugo musciculus (Thomas, 1913)

- *1913. *Pipistrellus musciculus* Thomas, Ann. Mag. Nat. Hist., ser. 8, 11 (63): 316. Type locality: Cameroon: Ja River, Bitey [03 13 N 12 22 E, 2 000 ft (=610 m)]. Type specimen: BMNH 1913.2.8.1 (Holotype, old M, skin and skull, collector G.L. Bates, collection date 3 September 1912, original number 622). Publication date: 1 March 1913.
1966. *Pipistrellus (Pipistrellus) musciculus*: Hayman, Misonne and Verheyen, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., (8) 154: 16. Name combination.
1987. *Attalepharca musciculus*: Menu, Palaeovertebrata, 17 (3): 128. Name combination. Menu used *Attalepharca* as "groupe collectif" not as genus name.
1987. *Pipistrellus (Hypsugo) musciculus*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 281. Name combination.
- ? *Hypsugo musciculus*: Name combination.

Taxonomy:

Mentioned in the genus *Pipistrellus* and the subgenus *Pipistrellus* by Koopman (1994: 113).

Common names:

English: Mouse-like Pipistrelle Bat, Least Pipistrelle Bat, Mouselike pipistrelle, Western Africa pipistrelle. French: Pipistrelle d'Afrique occidentale, Pipistrelle murine. German: Mäuschen-Zwergfledermaus.

Conservation status:

Global- LR/nt assessed as *Pipistrellus musciculus* (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004i).

General distribution:

Cameroon, Democratic Republic of the Congo, Gabon.

Figure 173. Clockwise from top lateral, ventral and dorsal skull images of BMNH 1913.2.8.1, holotype of *Pipistrellus musciculus* Thomas, 1913.

Figure 174. Distribution of *Hypsugo musciculus*

Distribution based on voucher specimens:

Cameroon, Congo (Democratic Republic of the), Gabon, Ghana, Sierra Leone.

Hypsugo savii (Bonaparte, 1837)

- *1837. *Vespertilio Savii* Bonaparte, Iconogr. Fauna ital., 1, fasc. 20, pl. Type locality: Italy: Pisa. Type specimen: BMNH 1907.1.1.732 (sad ?, partial skeleton, collector Prince Charles Lucien Bonaparte). Publication date: 1837. Plate; 1841: Introduction; p. 2: see Cabrera (1914: 120).
1839. *[Vesperugo (Vesperus)] Savii*: Keyserling and Blasius, Arch. Naturg., 5 (1): 316. Name combination.
1853. *[Vesperugo] Savii*: Blasius, Arch. Naturg., 19 (1): 46. Name combination.
1855. *Vespertilio (Vesperugo) Savii*: Wagner, Schreber's Säuget., Suppl. 5: 734. Name combination.
1856. *Vesperus (Meteorus) Savii*: Kolenati, Allg. deutsche naturh. Zeitung, N.F., 2 (5): 166. Name combination.
1856. *Vesperus Savii*: Kolenati, Allg. deutsche naturh. Zeitung, N.F., 2 (4): 132. Name combination.
1859. *Scotophilus darwini* Tomes, Proc. Zool. Soc. Lond., 1859, I (OS 27): 70. Type locality: Spain: Canary Islands, La Palma [28 40 N 17 50 W]. Type specimen: BMNH 1907.1.1.423 (F, skull and alcoholic, formerly in Tomes Collection; presented to Tomes by Mr. Darwin). Publication date: February - June 1859.
1862. *Vespertilio (Meteorus) Savii*: Koch, Das Wesentliche der Chiroptern: 393. Name combination.
1871. *Vesperugo Savi*: Doderlein, Alcune generalita Intorno la Fauna Sicula de Vertebrati: xxx. Name combination and Lapsus.
1885. *Vesperugo Savii*: Lataste, Act. Soc. Linn. Bordeaux, 39: 190?. Name combination.
1887. *Scotophilus darwini* Doria, Ann. Mus. civ. Stor. nat. Genova, 4 (2): 71. Lapsus.
1912. *Pipistrellus savii*: Miller, Catalogue of the mammals of western Europe: 219. Name combination.
1956. *Pipistrellus savii savii*: Kahmann and Goerner, Mammalia, 20: 358. Name combination.
1964. *Pipistrellus savii sevii* Hanák, Acta Soc. Zool. Bohem., 28 (1): 83. Lapsus.
1966. *Pipistrellus (Pipistrellus) savii darwini*: Ellerman and Morrison-Scott, Checklist of Palaearctic and Indian Mammals: 170. Name combination.
1966. *Pipistrellus (Pipistrellus) savii savii*: Ellerman and Morrison-Scott, Checklist of Palaearctic and Indian Mammals: 169. Name combination.
1966. *Pipistrellus (Pipistrellus) savii*: Ellerman and Morrison-Scott, Checklist of Palaearctic and Indian Mammals: 169. Name combination.
1971. *Pipistrellus (Hypsugo) savii savii*: Lanza and Azzaroli, Lav. Soc. ital. Biogeog., nov. ser. 1: xxx. Name combination.
1986. *[Hypsugo] savii*: Horáček and Hanák, Myotis, 23-24: Name combination.
1986. *Pipistrellus savi*: McBee, Bickham, Yehbutra, Nabhitabhata and Schlitter, Ann. Carnegie Mus., 55 (5): xxx. Lapsus.
1987. *Hypsugo savii*: Menu, Palaeovertebrata, 17 (3): 127. Name combination.
1987. *Pipistrellus (Hypsugo) savii*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 281. Name combination.
2000. *Hypsugo savii savii*: Horáček, Hanák, and Gaisler, Bats of the Palearctic region: 125. Name combination.
2002. *H[y]psugo [s]avii [d]arwini*: Trujillo, Ibáñez and Juste, Rev. suisse Zool., 109 (3): 549. Name combination.
2003. *H[y]psugo [s]avii [d]arwini* Pestano, Brown, Suárez, and Fajardo, Mol. Phylogenet. Evol., 26 (1): 57. Lapsus.

Taxonomy:

Koopman (1994: 114) considers this species to belong to the subgenus *Pipistrellus*. Horáček *et al.* (2000: 125) and Volleth *et al.* (2001: 27) assigned this species to the genus *Hypsugo*.

Common names:

Basque: Savi saguzarra. Catalanian: Rat penat muntanyero. Czech: netopýr Saviuv. Dutch:

Alpendwergvleermuis, Alpenvleermuis. English: Savi's Pipistrelle, Savi's Pipistrelle Bat. French: Vespère de Savi, Pipistrelle de Savi. Gallician: Morcego do monte. German: Alpenfledermaus. Italian: Pipistrello di Savi. Portuguese: Morcego de Savii. Roman: Pipistrel da las alps. Slovenian: Savijev netopir. Spanish (Castilian): Murciélago montañero, Murciélago de montaña.

Etymology of name:

In honour of Gaetano Savi (1769 - 1844) (see Kozhurina 2002: 17).

Conservation status:

Global- Not assessed (IUCN 2004).

General distribution:

Iberia (incl. Portugal), Morocco, and the Canary (Spain) and Cape Verde Isls (Azzaroli Puccetti and Zava, 1988) through the Caucasus and Mongolia to Korea, NE China and Japan, southeastward through Iran and Afghanistan to N India and Burma (=Myanmar) (Kazakhstan, Turkmenistan, Uzbekistan, Kirghizia, Tadjikistan, France, S Switzerland, Italy, Austria, Czech Republic, E Hungary, Balkan (incl. Albania, Greece), Lebanon, Israel, Syria, N Algeria).

Distribution based on voucher specimens:

[Algeria](#), [Benin](#), Canary Islands [Spain], Cape Verde, [Morocco](#).

Figure 175. Distribution of *Hypsugo savii*

Genus *Laephotis* Thomas, 1901

- *1901. *Laephotis* Thomas, Ann. Mag. nat. Hist., ser. 7, 7 (41): 460. Type species: *Laephotis wintoni* Thomas, 1901. Publication date: 1 May 1901.
 ? *Laephotis*: Current spelling.

Taxonomy:

In a cladistic analysis of bacular morphology *Laephotis* nested within *Neoromicia* (Kearney *et al.*, 2002). The molecular results of Stadelmann *et al.* (2004b) support this, and those of Hooper and Van Den Bussche (2003) would be similar, if the suggestion that *nanus* is moved to the genus *Neoromicia*, as indicated by chromosomal analysis and bacular morphology (Kearney *et al.*, 2002), had been followed.

Although considered monotypic by Hayman and Hill (1971), four species are currently recognised (Simmons, 2005); *L. angolensis* Monard, 1935, *L. botswanae* Setzer, 1971, *L. namibensis* Setzer, 1971, and *L. wintoni* Thomas, 1901, see review by Hill (1974a). Specimens of this rarely caught bat, from the Western Cape Province in South Africa, were initially identified as *Laephotis wintoni* (Rautenbach and Nel, 1978), and then later as *Laephotis namibensis* (Skinner and Smithers, 1990). This change in species identification has led to considerable confusion in the literature (Honacki *et al.*, 1982; Corbet and Hill, 1991; Koopman, 1994; Bronner *et al.*, 2003; Jacobs *et al.*, 2005; Simmons, 2005)). Separation of *L. namibensis* and *L. wintoni* using morphometric analyses of cranial and dental characters, which include Hill's (1974a) palatal and post-palatal measurements that Stanley and Kock (2004) found useful in the separation of *L. botswanae* and *L. wintoni*, remains problematic (Kearney and Seaman, 2005).

Common names:

English: Long-eared Bats, African Long-eared Bats, Tropical Long-eared Bats. French: Noctophile, Chauve-souris à longues oreilles.

Etymology of name:

From the Greek "*laephotis*" meaning cloaked, veiled. Although, a note in the description of the genus suggested the name meant "sail" in Greek (Thomas, 1901d: 460). Gardner (2005: 184) considers this name to be masculine ("*Leaph*" = sail + "*ot*" = ear(ed) + "*is*" (Latin third declension ending)).

Laephotis angolensis Monard, 1935

- *1935. *Laephotis angolensis* Monard, Arq. Mus. Bocage, Lisboa, 6: 45. Type locality: Angola: Tyihumbwe, 15 km W Dala. Type specimen: MHNC ? (Holotype, F, collection date September 1932).

Taxonomy:

Stanley and Kock (2004), being concerned about the correct assignment of the species that is known from very few specimens, referred to specimens in the Natural History Museum, London collection, as cf. *angolensis*. In a morphometric analysis with specimens of the other *Laephotis* taxa, these specimens were distinct from *L. botswanae*, and *L. wintoni*/*L. namibensis*, however, it was suggested this small difference, based on two specimens of *angolensis*, may disappear with the addition of more specimens of both *angolensis* and *botswanae* (Kearney and Seamark, 2005: 85). Peterson (1973: 602) had suggested that "*L. botswanae* may prove to be a larger, southern race of *L. angolensis*".

Common names:

English: Angolan Long-eared Bat. French: Chauve-souris à longues oreilles d'Angola, Oreillard d'Angola, Noctophile d'Angola.

Etymology of name:

Referring to the country where the type specimen was collected.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004c).

General distribution:

Angola, Democratic Republic of the Congo (Stanley and Kock, 2004; Kearney and Seamark, 2005: 85; Simmons, 2005). Namibia (Griffin, 1999: 30), although no specimens are known to confirm this occurrence.

Habitat:

All records have come from the savanna biome (Kearney and Seamark, 2005: 85).

Figure 176. Distribution of *Laephotis angolensis*

Distribution based on voucher specimens:
Angola, Congo (Democratic Republic of the).

Laephotis botswanae Setzer, 1971

- *1971. *Laephotis botswanae* Setzer, Proc. Biol. Soc. Washington, 84 (32): 260, 263. Type locality: Botswana: 50 mi (80 km) W and 12 mi (19 km) S Shakawe. Type specimen: USNM 425349 (Holotype, ad F, skin and skull, collector S.W. Goussard, collection date: 24 May 1967, original number: 691).

Taxonomy:

In a morphometric analysis with specimens of the other *Laephotis* taxa, *L. botswanae* was distinct from *L. angolensis* and *L. wintoni* / *L. namibensis*, however, it was suggested the small difference, based on two specimens of *angolensis*, may disappear with the addition of more specimens of both *angolensis* and *botswanae* (Kearney and Seamark, 2005: 85). Peterson (1973: 602) had suggested that "*L. botswanae* may prove to be a larger, southern race of *L. angolensis*".

Common names:

Afrikaans: Botswana-langoorvlermuis. English: Botswana Long-eared Bat, Botswanan Long-eared Bat. French: Chauve-souris à longues oreilles du Botswana, Oreillard du Botswana, Noctophile du Botswana.

Etymology of name:

The specimen from which the species was described originated near Shakawe in north-western Botswana (Taylor 2005).

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Schlitter 2004c). Regional- South Africa- Indeterminate (Smithers 1986); VU D2 ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Tanzania, Democratic Republic of the Congo, Zambia, Malawi, Angola, Botswana, Zimbabwe, South Africa (Bauer, 1992; Stanley and Kock, 2004: 176; Kearney and Seamark, 2005: 85; Simmons, 2005). Namibia (Cotterill, 2004: 261), although no specimens are known to confirm this occurrence.

Geographic variation:

Unknown.

General description of external morphology:

General description of cranial and dental morphology:

Detailed morphology:

See Kearney *et al.* (2002) for bacular morphology, which showed no difference to *L. namibensis*.

Echolocation:

See Taylor (1999).

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach *et al.* (1993) reported $2n = 34, FN = 50, BA = 18$, a submetacentric X chromosome, and an acrocentric Y chromosome, for specimens from South Africa.

Protein / allozyme - Unknown.

Habitat:

Found in both savanna (75 % of specimen records) and grassland biomes (25 % of specimen records) (Kearney and Seamark, 2005: 85). However, since all the grassland biome records are from high altitude localities in Malawi (Happold and Happold, 1997), it was suggested the identification of the specimens from Malawi should be confirmed using palatal and post-palatal measurements (Kearney and Seamark, 2005: 85).

Figure 177. Distribution of *Laephotis botswanae*

Distribution based on voucher specimens:

Angola, Botswana, Congo (Democratic Republic of the), Malawi, South Africa, Tanzania, Zambia, Zimbabwe.

Laephotis namibensis Setzer, 1971

- *1971. *Laephotis namibensis* Setzer, Proc. Biol. Soc. Washington, 84 (32): 259. Type locality: Namibia: Namib Desert, Kuiseb River, Gobabeb (Namib Desert Research Station: Smithers, 1983: 100). Type specimen: USNM 342152 (Holotype, ad F, skin and skull, collector: Ronald E. Cole, collection date: 22 November 1963, original number: 270).

Taxonomy:

In a morphometric analysis with specimens of the other *Laephotis* taxa, specimens of *L. wintoni* and *L. namibensis* were not clearly separated (Kearney and Seamark, 2005: 85). Additional characters, or other systematic techniques will be required to clarify the species distinction. Unfortunately, specimens from the Western Cape province in South Africa have been identified as both *L. wintoni* (Rautenbach and Nel, 1978a) and *L. namibensis* (Skinner and Smithers, 1990). Hence, see also the account for *L. wintoni* for the results of a study based in the Western Cape province of South Africa that identified the specimens as *L. wintoni* (Jacobs *et al.*, 2005).

Common names:

Afrikaans: Namib-langoorvlermuis. English: Namibian Long-eared Bat, Namib Long-eared Bat. French: Chauve-souris à longues oreilles de Namibie, Oreillard du Namib, Noctophile du Namib.

Etymology of name:

Referring to the country where the type specimen was collected.

Conservation status:

Global- EN (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Schlitter 2004b). Regional- South Africa- Indeterminate, assessed as *L. wintoni* (Smithers 1986); considered a vagrant not assessed, not recorded in SA, Cederberg specimens considered to be *L. wintoni* (Friedmann and Daly 2004).

General distribution:

Namibia, South Africa (Stanley and Kock, 2004: 176; Kearney and Seamark, 2005: 85; Simmons, 2005). Although, specimens from South Africa have also been identified as *L. wintoni*, see the discussion in the generic account.

Geographic variation:

Unknown.

General description of external morphology:

General description of cranial and dental morphology:

Detailed morphology:

See Kearney *et al.* (2002) for bacular morphology, which showed no difference to *L. botswanae*.

Molecular biology:

DNA - See Hoofer and Van Den Bussche (2003) for the results of a specimen from Namibia. See Stadelmann *et al.* (2004b) for the results of a specimen from the Western Cape in South Africa identified as *L. wintoni*, but from a locality where the species identification has also been assigned to *L. namibensis* (Skinner and Smithers, 1990).

Karyotype - Rautenbach *et al.* (1993) reported $2n = 34$, FN = 50, BA = 18, a submetacentric X chromosome, and an acrocentric Y chromosome, for specimens from Namibia. Rautenbach *et al.* (1993) also obtained the same results for specimens from the Western Cape, which were identified as *L. wintoni*, but reassigned to *L. namibensis* (Skinner and Smithers, 1990).

Protein / allozyme - Unknown.

Habitat:

Found in desert (60 % of specimen records), fynbos (20 % of specimen records), and savanna (20 % of specimen records) biomes (Kearney and Seamark, 2005: 85).

Figure 178. Distribution of *Laephotis namibensis*

Distribution based on voucher specimens:
Namibia, South Africa.

Laephotis wintoni Thomas, 1901

- *1901. *Laephotis Wintoni* Thomas, Ann. Mag. Nat. Hist., ser. 7, 7 (41): 460. Type locality: Kenya: Kitui [3 500 ft (=1 067 m)]. Type specimen: BMNH 1901.5.6.5 (Holotype, M, skull and skin, collector: Dr. S.L. Hinde, collection date: 7 January 1901, original number S.L.H.64). Publication date: 1 May 1901.
- ? *Laephotis wintoni*: Current spelling.

Taxonomy:

In a morphometric analysis with specimens of the other *Laephotis* taxa, specimens of *L. wintoni* and *L. namibensis* were not clearly separated (Kearney and Seaman, 2005: 85). Unfortunately, specimens from the Western Cape province in South Africa have been identified as both *L. wintoni* (Rautenbach and Nel, 1978a) and *L. namibensis* (Skinner and Smithers, 1990). Specimens from Lesotho and the Free State province in South Africa were assigned to cf. *wintoni* pending clarification of the species distinctions (Kearney and Taylor, 1997). Additional characters, or other systematic techniques will be required to clarify the species distinction. Specimens from KwaZulu-Natal Province in South Africa previously identified as cf. *wintoni* (Kearney and Taylor, 1997), were reassigned to *L. botswanae* (Kearney and Seaman, 2005: 85).

Common names:

Afrikaans: Winton se langoorvlermuis, Winton-langoorvlermuis. English: De Winton's Long-eared Bat, Winton's Long-eared Bat. French: Chauve-souris à longues oreilles de De Winton, Oreillard de De Winton, Noctophile de De Winton.

Etymology of name:

In honour of Mr W.E. de Winton, "whose labours on the small mammals of Africa all naturalists...have been so constantly indebted for assistance" (Thomas, 1901d: 462).

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Schlitter 2004a). Regional- South Africa- VU D2 ver 3.1 (2001), included *L. botswanae* from Hella-Hella and *L. namibensis* from Cederberg (Friedmann and Daly 2004).

General distribution:

Ethiopia, Kenya, Tanzania, South Africa, Lesotho (Kock and Howell, 1988; Stanley and Kock, 2004: 176; Kearney and Seaman, 2005: 85; Simmons, 2005). Specimens recorded from the Western Cape Province in South Africa have also been identified as *L. namibensis*, see the discussion in the generic account.

Figure 179. Clockwise from top lateral, ventral and dorsal skull images of BMNH 1901.5.6.5, holotype of *Laephotis Wintoni* Thomas, 1901.

Echolocation:

See Jacobs *et al.* (2005).

Molecular biology:

DNA - See Stadelmann *et al.* (2004b) for the results of a specimen from the Western Cape in South Africa, for a locality that has had the taxa reassigned to *L. namibensis* (Skinner and Smithers, 1990).

Karyotype - Rautenbach *et al.* (1993) reported $2n = 34$, FN = 50, BA = 18, a submetacentric X chromosome, and an acrocentric Y chromosome, for specimens from the Western Cape Province in South Africa, which were identified as *L. wintoni*, but reassigned to *L. namibensis* (Skinner and Smithers, 1990). Rautenbach *et al.* (1993) also obtained the same results for specimens from Namibia identified as *L. namibensis*.

Protein / allozyme - Unknown.

Habitat:

Excluding records from the Western Cape

province locality in South Africa that have also been assigned to *L. namibensis* (Skinner and Smithers, 1990), it is a montane species found at high altitudes above 1000 m (Kock and Howell, 1988; Stanley and Kock, 2004: 176; Kearney and Seamark, 2005). *L. wintoni* has been found in East Africa in both forest (62.5 % of specimen records) and savanna (37.5 % of specimen records) biomes (Kock and Howell, 1988; Kearney and Seamark, 2005: 85). Specimens assigned to *L. cf. wintoni* from the Free State Province of South Africa and Lesotho are from the grassland biome (Kearney and Seamark, 2005: 85).

Habits:

See Jacobs *et al.* (2005).

Roost:

Three radio tagged females in the Western Cape province of South Africa roosted in different crevices or narrow fissures in a cliff face above the valley where they foraged (Jacobs *et al.*, 2005). They also moved roost from one day to the next (Jacobs *et al.*, 2005).

Diet:

A study in the Western Cape province of South Africa found the diet was dominated by tympanate moths in three of four individuals studies, the fourth individuals diet was dominated by beetles (Jacobs *et al.*, 2005). Hemiptera and Tricoptera were also eaten but in much smaller proportions (Jacobs *et al.*, 2005).

Distribution based on voucher specimens: Ethiopia, German East Africa, **Kenya**, Lesotho, South Africa, **Tanzania**.

Figure 180. Distribution of *Laephotis wintoni*

Genus *Mimetillus* Thomas, 1904

- *1904. *Mimetillus* Thomas, Abstr. Proc. Zool. Soc. Lond., 10: 12. Type species: *Vesperugo* (*Vesperus*) *moloneyi* Thomas, 1891. Publication date: 22 November 1904.

Taxonomy:
See Simmons (2005).

Etymology of name:
From "*mimetillus*" meaning mimic.

Common names:
English: Flat-headed Vesper Bats, Mimic Bats,
Narrow-winged Bats, Flat-headed Bats.

Mimetillus moloneyi (Thomas, 1891)

- *1891. *Vesperugo* (*Vesperus*) *moloneyi* Thomas, Ann. Mag. Nat. Hist., ser. 6, 7 (42): 528, text-fig.. Type locality: Nigeria: Western Region, Lagos. Publication date: 1 June 1891.
? *Mimetillus moloneyi*: Name combination.

Taxonomy:
Koopman (1993a: 207) included *thomasi* and *berneri*; but see Cotterill (2001c), Simmons (2005).

Common names:
English: Moloney's Flat-headed Vesper Bat,
Moloney's Mimic Bat, Moloney's Flat-headed Bat.
French: Chauve-souris à tête plate de Moloney.

Conservation status:
Global- LR/lc (Baillie and Groombridge 1996); LC
ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*,
2004ah).

General distribution:
Sierra Leone over Central African Republic
(Lunde *et al.*, 2001: 537) to Ethiopia, and Kenya.

Distribution based on voucher specimens:
Angola, Cameroon, Congo (Democratic Republic
of the), Equatorial Guinea, Kenya, Mozambique,
Nigeria, Sierra Leone, Sudan, Tanzania, Uganda,
Zambia.

Figure 181. Distribution of *Mimetillus moloneyi*

Mimetillus thomasi Hinton, 1920

- *1920. *Mimetillus thomasi* Hinton, Ann. Mag. Nat. Hist., ser. 9, 6 (32): 240. Type locality: Zambia: Ndola. Type specimen: BMNH 1920.11.3.28. Publication date: 1 August 1920.
1933. *Mimetillus bernerii* Monard, Bull. Soc. Neuchâteloise Sci. Nat., Neuchâtel, 57: 49. Type locality: Angola: Vila da Ponte. Allen (1939a:89) mentions 1932 as publication date.

Taxonomy:

Koopman (1993a: 207) included *thomasi* and *bernerii* in *moloneyi*; but see Cotterill (2001c), Simmons (2005) who consider *thomasi* to be a separate species.

Common names:

English: Thomas's Flat-headed Bat.

Etymology of name:

In honour of Oldfield Thomas.

Conservation status:

Global- Not assessed (IUCN 2004).

General distribution:

Bioko, Zambia and southern Congo south to Tanzania, Angola and Mozambique.

Distribution based on voucher specimens:

Zambia.

Figure 182. Distribution of *Mimetillus thomasi*

Genus *Neoromicia* Roberts, 1926

1908. *Scabrifer* G.M. Allen, Bull. Mus. comp. Zool., 52 (3): 46. Type species: *Scabrifer notius* G.M. Allen, 1908. Publication date: July 1908. Originally described as substitute for *Rhinopterus* Miller, preoccupied by *Rhinoptera* Kuhl, 1841 (see Allen, 1908: 46; 1939: 97).
- *1926. *Neoromicia* Roberts, Ann. Transv. Mus., 11: 245. Type species: *Eptesicus zuluensis* Roberts, 1924. Publication date: 14 September 1926.
1956. *Eptesicus* Theodor, Parasitology, 46: xxx. Lapsus; used in combination with the species *tenuipinnis*, and therefore synonym of *Neoromicia*, not of *Eptesicus*.
1987. *Nycterikaupius* Menu, Palaeovertebrata, 17 (3): 108. In part. Publication date: 15 November 1987.
1995. *Scabrifer* Peterson, Eger and Mitchell, Faune de Madagascar, Chiroptères, 84: 95. Lapsus.

Taxonomy:

Considered a subgenus of *Eptesicus* by Koopman (1993a: 201); considered a subgenus of *Pipistrellus* by Grubb *et al.* (1998: 85), but considered a valid genus by Simmons (2005).

Neoromicia "incertae-sedis"

1857. *Vespertilio pusillus* Leconte, Proc. Acad. Nat. Sci., Philadelphia: 10. Type locality: Western Africa: no specific locality. Publication date: Kock (1969: 228) indicates that this paper was published in 1858.
1897. *Vesperugo (Vesperus) pusillus*: Trouessart, Catalogus Mammalium tam viventium quam fossilium: 110. Name combination.
1929. *Eptesicus pusillus*: Thomas, Proc. zool. Soc. Lond.: 101. Name combination. Thomas (1929: 101) assigned this name to Noack.
1953. *Eptesicus (Eptesicus) pusillus*: Ellerman, Morrison-Scott and Hayman, Southern African mammals 1758 to 1951: 77. Name combination.

Taxonomy:

Allen (1939a: 86) indicates that *Vespertilio pusillus* might possibly be the same form as *Vesperugo pusillus* Noack, 1887, but that the description is insufficient to identify the species. Ansell (1987: 25) - referring to Rosevear (1962) and Hayman and Hill (1971) - indicates that the status of *pusillus* Leconte is uncertain in relation to *Eptesicus minuta* Temminck, "*Eptesicus*" *somalicus* and "*Eptesicus*" *capensis*. Crawford-Cabral (1989) also points out that in southern Africa, "*Eptesicus*" *zuluensis* might be involved too.

Koopman (1965) and Kock (1969: 138) consider this name to be indeterminable, and they suggest to place the small northern African *Eptesicus* specimens in the species *guineensis* Bocage, 1889.

According to Kock it is even uncertain that *pusillus* Leconte represents *Eptesicus* [= *Neoromicia* in the current context].

Kock (1969: 159) also pointed out that the skull of the type of *Vesperugo pusillus* Noack, 1887 actually represents a non-adult *Pipistrellus nanus*.

The fact that *pusillus* Leconte and *pusillus* Noack have been considered synonymys throughout the literature, also render much of the literature data indeterminable, unless these are supported by voucher specimens.

Neoromicia brunneus (Thomas, 1880)

- *1880. *Vesperugo (Vesperus) brunneus* Thomas, Ann. Mag. Nat. Hist., ser. 5, 6 (32): 165, 1 text-fig. Type locality: Nigeria: Eastern region, Calabar [04 56 N 08 22 E] (Allen (1939a: 84), Grubb *et al.* (1998: 86) mentioned "Old Calabar, West Africa"). Type specimen: BMNH 1880.7.21.7 (Holotype, ad F, skull and alcoholic, collector Dr. A. Robb, United Presbyterian Mission, presented by Dr. J.A. Smith). Publication date: 1 August 1880.
1880. *Vesperugo brunneus*: Dobson, Rep. 50th Meeting Brit. Ass. Adv. Sci. 1880: 185 (redescription of type).
1939. *Eptesicus brunneus*: G.M. Allen, Bull. Mus. comp. Zool., 83: 84. Name combination.
1971. *Eptesicus [(Eptesicus)] brunneus*: Hayman and Hill, Mammals of Africa: Chiroptera: 43. Name combination.
1987. *Nycterikaupius brunneus*: Menu, Palaeovertebrata, 17 (3):109. Name combination.
1987. *Pipistrellus (Neoromicia) brunneus*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 282. Name combination.
1989. *P[ipistrellus] brunneus*: Koopman, Am. Mus. Novit., 2946: 10. Name combination (This might be a lapsus, since Koopman used *Eptesicus brunneus* on page 7).
1993. *Eptesicus (Neoromicia) brunneus*: Koopman, Mammal species of the World: Chiroptera: 201. Name combination.
1995. *Pipistrellus brunneus*: Koopman, Kofron and Chapman, Am. Mus. Novit., 3148: 11. Name combination.
2003. ? *brunneus*: Hooper and Van Den Bussche, Acta Chiropt., 5 (Suppl.): 38. Name combination.
- ? *Neoromicia brunneus*: Name combination.

Taxonomy:

Mentioned in the genus *Pipistrellus* by Koopman (1994: 117). Included (as (*Hypsugo*) *brunneus*) in a separate, unnamed genus by Hooper and Van Den Bussche (2003: 38).

Common names:

English: Brown Pipistrelle Bat, Dark-brown Pipistrelle Bat, Dark-brown serotine. French: Sérotine brun-noire. German: Dunkelbraune Zwergfledermaus, Dunkelbraune Pipistrelle.

Conservation status:

Global- LR/nt assessed as *Eptesicus brunneus* (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Fahr 2004k).

General distribution:

Liberia to Democratic Republic of the Congo.

Figure 183. Clockwise from top lateral, ventral and dorsal skull images of BMNH 1880.7.21.7 holotype of *Vesperugo (Vesperus) brunneus* Thomas, 1880.

Distribution based on voucher specimens:
Cameroon, Congo (Democratic Republic of the),
Cote D'Ivoire, Côte d'Ivoire, Gabon, Ghana,
Liberia, Nigeria, Sierra Leone.

Figure 184. Distribution of *Neoromicia brunneus*.

Neoromicia capensis (A. Smith, 1829)

- *1829. *Vespertilio capensis* A. Smith, Zool. Journ., 4: 435. Type locality: Republic of South Africa: Cape Province, Grahamstown [33 18 S 26 32 E]. Type specimen: BMNH 1848.6.12.18; BMNH 1849.8.16.21 (Lectotype, the first number is for the skin, the second for the skull; collector Dr. J.A. Smith). Publication date: January-May 1829.
1840. *Vespertilio minuta* Temminck, Monogr. Mamm., 2: 209. Type locality: Republic of South Africa: Cape of Good Hope. Pre-occupied by *Vespertilio minutus* Montagu, 1808.
1855. *Vespertilio (Vesperus) minutus*: Wagner, Schreber's Säugeth., Suppl. 5: 747. Name combination.
1860. *Hypsugo minutus*: Kolenati, Monographie der Europäischen Chiroptern: 20. Name combination.
1861. *Scotophilus capensis*: Tomes, Proc. zool. Soc. Lond., 1861, I: 36. Name combination.
1861. *Scotophilus minutus*: Tomes, Proc. zool. Soc. Lond., 1861, I: 32. Name combination.
1876. *Vesperugo (Vesperus) grandidieri* Dobson, Ann. Mag. nat. Hist., ser. 4, 18 (108): 500. Type locality: Tanzania: Zanzibar [06 10 S 39 12 E]. Type specimen: MNHN 1996-2129 (ad F, skull and alcoholic, collector A. Grandidier, collection date 1864). Publication date: 1 December 1876.
1878. *Vesperugo (Vesperus) capensis*: Dobson, Cat. Chiropt. Brit. Mus.: 198. Name combination.
1878. *Vesperugo (Vesperus) minutus*: Dobson, Cat. Chiropt. Brit. Mus.: 197. Name combination.
1886. *Vesperugo capensis?* Nehring, Katalog der Säugethiere. xxx. Name combination.
1887. *Vesperus minutus*: Jentink, Mus. Hist. nat. Pays-Bas, Leyden, 1: xx. Name combination.
1889. *Vesperus damarensis* Noack, Zool. Jahrb., Syst., 4: 213, pl. 5, fig. 59. Type locality: Namibia: Damaraland, Omburu and Golabie. - Publication date: 28 February 1889.
1895. *Vesperus grandidieri*: Matschie, Säugethiere Deutsch-Ost-Afrikas: xxx. Name combination.
1897. *Eptesicus grandidieri*: Matschie, Zur Faunistik Deutsch-Ost-Afrikas. 5. Säugethiere: xxx. Name combination.
1897. *Eptesicus minutus*: Matschie, Arch. Naturg., 1: xx. Name combination.
1897. *Vesperugo (Vesperus) damarensis*: Trouessart, Catalogus Mammalium tam viventium quam fossilium: 110. Name combination.
1901. *Vespertilio (Eptesicus) capensis*: Sclater, Mammals of South Africa: 123, 125. Name combination.
1901. *Vespertilio (Eptesicus) damarensis*: Sclater, Mammals of South Africa: 123, 128. Name combination.
1901. *Vespertilio (Eptesicus) minutus*: Sclater, Mammals of South Africa: 123, 124. Name combination.
1905. *Vespertilio capensis gracilior* Thomas and Schwann, Proc. zool. Soc. Lond., 1905, I, II: 257. Type locality: Republic of South Africa: Natal, Zululand, Eshowe [28 54 S 31 28 E]. Type specimen: BMNH 1904.8.31.3 (ad? M, skin and skull, collector Captain C.H.B. Grant and C.D. Rudd, collection date 15 February 1904, original number 678). Publication date: 10 August 1905.
1907. *Vespertilio (Vespertilio) minutus*: Elliot, Field Columbian Mus., Zool. Ser., 115 (8): 512. Name combination.
1908. *Scabriber notius* G.M. Allen, Bull. Mus. comp. Zool., 52 (3): 46. Type locality: Republic of South Africa: SW Cape Province [=Western Cape], Cape Town. Type specimen: MCZ 4555 (holotype; ad M, body in alcohol, skull removed, collector E.L. Layard (received from); collection date: August 1864, see G.M. Allen, 1908: 46; Helgen and McFadden, 2001: 147). Publication date: July 1908.
1917. *Eptesicus garambæ* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 445. Type locality: Democratic Republic of the Congo: Garamba [04 11 N 30 00 E]. Type specimen: AMNH 49340 (ad M, skull and alcoholic, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition, collection date: 14 March 1912, original number 1888). Publication date: 29 September 1917.
1917. *Eptesicus minutus minutus*: J.A. Allen, Bull. Am. Mus. Nat. Hist., 37: 410, 445. Name combination.
1923. *Eptesicus capensis*: Kershaw, Rev. Zool. afr., 11 (4): xxx. Name combination.
1924. *Eptesicus capensis gracilior*: Roberts, Ann. Transv. Mus., 10: 60. Name combination.

1926. *Eptesicus damarensis*: Thomas, Proc. zool. Soc. Lond., 1926, I: 286. Name combination.
1932. *Eptesicus capensis nkatiensis* Roberts, Ann. Transv. Mus., 15 (1): 16. Type locality: Botswana: N Bechuanaland [=N Botswana], Nkate Type specimen: TM 6549 (ad. F, SS collector: Vernay-Lang Kalahari Expedition 1930 collection date: 16 August 1930 original number 999. Publication date: 1 October 1932.
1934. *Eptesicus capensis capensis*: Shortridge, Mammals of South West Africa: xxx. Name combination.
1939. *Rhinopterus notius*: G.M. Allen, Bull. Mus. comp. Zool., 83: 97. Name combination.
1953. *Eptesicus (Eptesicus) capensis capensis*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 75. Name combination.
1953. *Eptesicus (Eptesicus) capensis damarensis*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 75. Name combination.
1953. *Eptesicus (Eptesicus) capensis gracilior*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 75. Name combination.
1953. *Eptesicus (Eptesicus) capensis*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 75. Name combination.
1953. *Eptesicus (Rhinopterus) notius* Ellerman, Morrison-Scott and Hayman, Southern African mammals: 78. Name combination.
1961. *Eptesicus notius*: Bateman, Koedoe, 4: 82. Name combination.
1965. *Eptesicus capensis garambae*: Koopman, Am. Mus. Novit., 2219: 15. Name combination.
1984. *[Pipistrellus] capensis*: Heller and Volleth, Z. zool. Syst. Evolut.-forsch., 22: 72. Name combination.
1984. *Eptesicus (Eptesicus) capensis garambae*: Anciaux de Faveaux, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., 244: 39. Name combination.
1984. *Eptesicus (Eptesicus) capensis grandidieri*: Anciaux de Faveaux, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., 244: 39. Name combination.
1987. *Nycterikaupius capensis*: Menu, Palaeovertebrata, 17 (3):109. Name combination.
1987. *Pipistrellus (Neoromicia) capensis*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 282. Name combination.
1988. *Pipistrellus (Neoromicia) capensis capensis*: Ansell and Dowsett, Mammals of Malawi: 41. Name combination.
1988. *Pipistrellus (Neoromicia) capensis gracilior*: Ansell and Dowsett, Mammals of Malawi: 41. Name combination.
1988. *Pipistrellus capensis capensis*: Thorn, Mammalia, 52 (2): 199. Name combination.
1988. *Pipistrellus capensis gracilior*: Thorn, Mammalia, 52 (2): xxx. Name combination.
1988. *Pipistrellus capensis notius*: Thorn, Mammalia, 52 (2): xxx. Name combination.
1988. *Pipistrellus capensis*: Thorn, Mammalia, 52 (2): xxx. Name combination.
1993. *Eptesicus (Neoromicia) capensis*: Koopman, Mammal species of the world: Chiroptera: 201. Name combination.
1994. *P[ipistrellus (Neoromicia)] c[apensis] damarensis*: Koopman, Chiroptera: 55. Name combination.
1994. *P[ipistrellus (Neoromicia)] c[apensis] garambae*: Koopman, Chiroptera: 55. Name combination.
1994. *P[ipistrellus (Neoromicia)] c[apensis] grandidieri*: Koopman, Chiroptera: 55. Name combination.
1994. *P[ipistrellus (Neoromicia)] c[apensis] matroka*: Koopman, Chiroptera: 55. Name combination.
1994. *P[ipistrellus (Neoromicia)] c[apensis] notius*: Koopman, Chiroptera: 55. Name combination.
2001. *Hypsugo capensis*: Volleth, Bronner, Göpfert, Heller, von Helversen and Yong, Chromosome Res., 9 (1): 25. Name combination (possibly a lapsus since this combination is only mentioned once in the abstract).
2001. *Neoromicia capensis*: Volleth, Bronner, Göpfert, Heller, von Helversen and Yong, Chromosome Res., 9 (1): 26. Name combination.

Taxonomy:

Includes *notius*; see Koopman (1975: 405). Mentioned in the genus *Pipistrellus* by Koopman (1994: 117). Most of the West African populations have not been allocated to subspecies. Volleth *et al.* (2001: 27) assigned this species to the genus *Neoromicia*. Koopman (1993a: 201) included *matroka*, but see Peterson *et al.* (1995: 104).

Figure 185. *Neoromicia capensis*

Common names:

Afrikaans: Kaapse dakvlermuis. English: Cape Serotine, Cape Pipistrelle Bat, Cape Serotine Bat, Cape House Bat. French: Sérotine du Cap. Portuguese: Morcego caseiro do cabo.

Etymology of name:

The name *capensis* refers to the Cape, where the type specimen was collected.

The colloquial name serotine is derived from the Latin *serotinus*, late in the evening (*serus*) (Taylor 2005).

Palaeontological / archaeological records:

This species has been recovered from the upper Pleistocene at Border Cave, South Africa (Avery 1991: 6).

Conservation status:

Global- LR/lc assessed as *Eptesicus capensis* (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004t).

Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Guinea over Benin (Capo-Chichi *et al.*, 2004: 163), Congo (Lavrenchenko *et al.*, 2004: 136), Uganda (Kityo and Kerbis, 1996: 62) to Ethiopia, south to Angola, Zambia, Zimbabwe, Namibia, Botswana (Cotterill, 2004: 261), South Africa.

Echolocation:

See Fenton and Bell (1981), Taylor (1999) and Taylor *et al.*, (2005).

Molecular biology:**DNA -**

Karyotype - Peterson and Nagorsen (1975), Rautenbach *et al.*, 1993), Volleth *et al.* (2001), and Kearney *et al.* (2002) all reported $2n=32$, FN = 50, BA = 20. While Rautenbach *et al.*, 1993) and Kearney *et al.* (2002) reported a metacentric X chromosome, Peterson and Nagorsen (1975) reported a submetacentric X chromosome. Peterson and Nagorsen (1975) and Rautenbach *et al.*, 1993) both reported an acrocentric Y chromosome. GTG-bands identified three Robertsonian fusion chromosomes (7/11, 8/9, 10,12), considered as distinguishing characters for the genus *Neoromicia* Kearney *et al.* (2002). Protein / allozyme - See Morales *et al.* (1991) for results from seven specimens from South Africa.

Parasites:

External: *Casodmus villosus* (Stål, 1855), a representative of the bed bug family (Reinhardt and Jacobs 2006).

Figure 186. Distribution of *Neoromicia capensis*

Distribution based on voucher specimens:

"Africa", Angola, Benin, Botswana, Burundi, Congo, Congo (Democratic Republic of the), Eritrea, Ethiopia, Kenya, Lesotho, Liberia, Madagascar, Malawi, Namibia, Nigeria, South Africa, Sudan, Swaziland, Tanzania, Togo, Unknown Country, WP, Zambia, Zimbabwe, Zimbabwe.

Neoromicia cf. melckorum Roberts, 1919

1995. *Eptesicus cf. melckorum*: Rautenbach, Fenton and Braack, Koedoe, 28: xxx.
 2002. *Neoromicia cf. melckorum*: Kearney, Volleth, Contrafatto and Taylor, Acta Chiropt., 4 (1): 58. Name combination.

Taxonomy:

Bronner *et al.* (2003) state that most previous authors recognised *Eptesicus* (= *Neoromicia*) *melckorum* as distinct from *N. capensis* (Roberts 1951); Ellerman *et al.* 1953; Hayman and Hill 1971; Corbet and Hill 1980; Meester *et al.* 1986). Koopman (1982), however, questioned the status of *N. melckorum*, since it cannot be clearly distinguished from *N. capensis*. Specimens from the type locality (Kersefontein Farm in the Western Cape Province) are morphologically and karyotypically indistinguishable from *N. capensis*, but specimens from the Kruger National Park with a unique karyotype ($2n=40$, aFN=50) agree with the original description of *melckorum* (Rautenbach *et al.* 1993; Kearney *et al.* 2002 for Kersefontein chromosomal data). The Kruger National Park specimens are also well differentiated from *N. capensis* by allozymes (Morales *et al.* 1991). *Neoromicia melckorum* should thus be synonymised under *N. capensis*, whereas specimens from the Kruger National Park probably represent a distinct species that remains unnamed (Koopman 1994), and which we refer to as *Neoromicia cf. melckorum*. It seems likely that the Zimbabwe specimens reported by Cotterill (1996) represent this latter species.

Common name:

English: Kruger serotine bat (Taylor 2005: 305, first use).

Conservation status:

Regional- South Africa- considered a vagrant (*Pipistrellus spp*- Kruger Serotine bat) not assessed, single locality (Friedmann and Daly 2004).

General distribution:

Kenya to Zamiba and N South Africa (Simmons, 2005).

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach *et al.* (1993) reported $2n = 40$; FN = 50, BA = 12, a metacentric X chromosome, and an acrocentric Y chromosome, for specimens from Zimbabwe and South Africa. Protein / allozyme - See Morales *et al.* (1991) for results from nine specimens from South Africa.

Figure 187. Distribution of *Neoromicia cf. melckorum*

Distribution based on voucher specimens: South Africa.

Neoromicia flavescens (de Seabra, 1900)

- *1900. *Vesperugo (Vesperus) flavescens* de Seabra, J. Sci. mat. phys. nat., Lisboa, ser. 2, 6: 23. Type locality: Angola: Galanga [12 04 S 15 09 E]. Type specimen: MNHN 1900-536 -> 537 (co- or topotypes: ad? M, skull and alcoholic, collector: José de Anchieta). Publication date: 1900.
1900. *Vesperugo flavescens*: Bocage, Bull. Mus. natn. Hist. nat., Paris, 6: 164. Name combination.
1935. *Pipistrellus flavescens*: Monard, Arq. Mus. Bocage, 6: 31. Name combination.
1937. *Eptesicus capensis angolensis* J.Eric Hill, Am. Mus. Novit., 916: 1. Type locality: Angola: Chitau [11 15 S 17 01 E, 4 900 ft (=1 494 m)]. Type specimen: AMNH 85535 (ad M, skin and skull, collector: Herbert Lang (Vernay Angola Expedition), collection date: 5 August 1925, original number 620). Publication date: 17 April 1937.
1939. *Eptesicus flavescens*: G.M. Allen, Bull. Mus. comp. Zool., 83: 83. Name combination.
1953. *Eptesicus (Eptesicus) flavescens*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 76. Name combination.
1987. *[Attalepharca] flavescens*: Menu, Palaeovertebrata, 17 (3): 126. Name combination.
1987. *Pipistrellus (Neoromicia) flavescens*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 282. Name combination.
1993. *Eptesicus (Neoromicia) flavescens*: Koopman, Mammal species of the world: Chiroptera: 201. Name combination.
2006. *Neoromicia flavescens*: African Chiroptera Report, African Chiroptera Project, Pretoria p.132-133. Name combination.

Taxonomy:

Mentioned in the genus *Pipistrellus* by Koopman (1994: 117).

Common names:

English: Yellow Pipistrelle Bat, Yellow serotine.
 French: Sérotine jaune, Pipistrelle jaune.
 German: Gelbe Zwergfledermaus.

Conservation status:

Global- DD assessed as *Eptesicus flavescens* (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004aa).

General distribution:

Angola, Burundi, Malawi (1st Malawi record: Happold and Happold (1997: 81). But see Kock (2001; pers. comm)).

Distribution based on voucher specimens:

Angola, Burundi, Cameroon, Malawi.

Figure 188. Distribution of *Neoromicia flavescens*

Neoromicia guineensis (Bocage, 1889)

- *1889. *Vesperus guineensis* Bocage, J. Sci. mat. Phys. Nat., Lisboa, ser. 2, 1 (1): 6. Type locality: Guinea Bissau: Bissau. Publication date: March 1889.
1897. *Vesperugo (Vesperus) guineensis*: Trouessart, Catalogus Mammalium tam viventium quam fossilium: 110. Name combination.
1916. *Eptesicus rectitragus* Wettstein, Anz. K. Akad. Wiss., Wien, math.-nat. Kl., 53: 191. Type locality: Sudan: S Kordofan, N edge of Nuba Mountains Dilling [12 02 N 29 39 E, 660 m]. Type specimen: NMW 8411 (juv M, collector: Otto von Wettstein, collection date: 20 March 1914, original number AM 96/2). Publication date: 1916.
1923. *Eptesicus guineensis*: de Beaux, Atti Soc. ital. Sci. nat., 62: xxx. Name combination.
1975. *Eptesicus (Eptesicus) guineensis*: Koopman, Bull. Am. Mus. Nat. Hist., 154 (4): 406. Name combination.
1987. *Pipistrellus (Neoromicia) guineensis*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 282. Name combination.
1993. *Eptesicus (Neoromicia) guineensis*: Koopman, Mammal species of the world: Chiroptera: 202. Name combination.
1994. *P[ipistrellus (Neoromicia)] g[guineensis] guineensis*: Koopman, Chiroptera: 117. Name combination.
1994. *P[ipistrellus (Neoromicia)] g[guineensis] rectitragus*: Koopman, Chiroptera: 117. Name combination.
1995. *Pipistrellus guineensis*: Koopman, Kofron and Chapman, Am. Mus. Novit., 3148: 11. Name combination.
2006. *Neoromicia guineensis*: African Chiroptera Report, African Chiroptera Project, Preoria, p. 133-134. Name combination.

Taxonomy:

This species is called *pusillus* by Hayman and Hill (1971); but see Koopman (1975: 406, 407). Mentioned in the genus *Pipistrellus* by Koopman (1994: 117).

Common names:

English: Guinean Pipistrelle Bat, Tiny serotine.
 French: Sérotine minuscule, Pipistrelle de Guinée. German: Guinea-Zwergfledermaus.

Etymology of name:

The name refers to the area where the type specimen was collected.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996);
 LC ver 3.1 (2001) (IUCN 2004; Fahr 2004g).

General distribution:

Gambia (Kock *et al.*, 2002: 89), Senegal, Guinea-Bissau (Kock *et al.*, 2002: 89) and Guinea over Burkina Faso (Kock *et al.*, 2002: 89), Benin (Capo-Chichi *et al.*, 2004: 163), Chad (Kock *et al.*, 2002: 89) to Ethiopia and NE Democratic Republic of the Congo; perhaps Tanzania (The latter specimens might pertain to *P. somalicus*, see Koopman (1994: 117)).

Figure 189. Distribution of *Neoromicia guineensis*

Distribution based on voucher specimens:
 Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Congo (Democratic Republic of the), Cote D'Ivoire, Egypt, Ethiopia, Ghana, Guinea, Senegal, Sudan.

Neoromicia helios (Heller, 1912)

- *1912. *Pipistrellus helios* Heller, Smithson. Misc. Coll., 60 (12): 3. Type locality: Kenya: 30 mi (48 km) S Mt. Marsabit, Merelle Water [01 23 S 37 44 E]. Type specimen: USNM 181813 (ad M, collector Edmund Heller, collection date 22 July 1911, original number 3065). Publication date: 4 November 1912.
1951. *Pipistrellus helios*: Watson, Uganda J., 15 (1): xx. Lapsus.
1968. *Pipistrellus nanus helios*: Funaioli and Lanza, Mon. Zool. ital., (n.s.) 2 (suppl.): 199. Name combination.
1987. *Pipistrellus (Hypsugo) helios*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 282. Name combination.
1994. *Pipistrellus (Pipistrellus) africanus helios*: Koopman, Handbook of Zoology: Chiroptera: 113. Name combination.
2002. *Hypsugo helios*: Kruskop, Plecotus *et al.*, pars. spec.: 21. Name combination.
2006. *Neoromicia helios*: African Chiroptera Report, African Chiroptera Project, Pretoria, p. 134. Name combination.

Taxonomy:

Hill and Harrison (1987) indicated that the shape of the baculum support the separation of *helios* from *Pipistrellus nanus*, which is confirmed by Kock (pers. comm.). See discussion in Simmons (2005).

Common names:

English: Samburu Pipistrelle Bat, Helios Pipistrelle Bat, Heller's Pipistrelle Bat. French: Pipistrelle soleil. German: Samburu-Zwergfledermaus.

Etymology of name:

From the Greek "*helios*" meaning sun.

Conservation status:

Global- DD ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004z).

General distribution:

Kenya, Somalia, Djibouti, NE Uganda, extreme S Sudan, N Tanzania, maybe more widespread (Simmons, 2005).

Figure 190. Distribution of *Neoromicia helios*

Distribution based on voucher specimens:
 Kenya, Somalia, Sudan, Tanzania, Uganda.

Neoromicia humbloti (A. Milne-Edwards, 1881)

- *1881. *Vesperus humbloti* A. Milne-Edwards, C. R. Acad. Sci., Paris, 91: 1035. Type locality: Madagascar: no specific locality. Type specimens: MNHN 1986-1074 - 1082 (syntypes?: 1 ad F, 2 ad M, 1 ad? M, 2 imm F, 3 imm M). Publication date: 1881.
- 1897. *Vesperugo (Vesperus) humbloti*: Trouessart, Catalogus Mammalium tam viventium quam fossilium: 110. Name combination.
- 1939. *Eptesicus humbloti*: G.M. Allen, Bull. Mus. comp. Zool., 83: 85. Name combination.
- 1994. *P[ipistrellus (Neoromicia) s[omalicus] humbloti*: Koopman, Chiroptera: 117. Name combination.
- 2006. *Neoromicia humbloti*: African Chiroptera Report, African Chiroptera Project, Pretoria, p. 135. Name combination.

Taxonomy:

The status of *humbloti* can not be validated (see Peterson *et al.*, 1995: 104). It is sometimes mentioned as synonym of *somalicus* Thomas, 1901. However, if this is correctly assigned to that form, then *humbloti* A. Milne-Edwards, 1881 should be the valid name for what is now known as *N. somalicus*.

We consider *humbloti* to be an island species, allied to *N. somalicus* Thomas, 1901, but differing from it on specific level. The relation with *N. malagasyensis* Peterson, Eger and Mitchell, 1975 still needs to be evaluated.

Conservation status:

Global- Not assessed (IUCN 2004).

General distribution:

Madagascar

Distribution based on voucher specimens:

Madagascar.

Neoromicia malagasyensis (Peterson, Eger and Mitchell, 1995)

- *1995. *Eptesicus somalicus malagasyensis* Peterson, Eger and Mitchell, Faune de Madagascar, Chiroptères, 84: 100. Type locality: Madagascar: Sakaraha sous-prefecture, 220 km NE Tuléar [=Toleara], east of Ilakaka [22 41 S 45 13 E] (Bates *et al.* (2006: 313 situated the type locality at Maninday [22 47 S 44 48 E]. Type specimen: ROM 42713 (F, skin and skull, collector: R.L. Peterson, J.G. Williams and R. Glen, collection date: 13 May 1967: see Peterson *et al.* (1995: 100), Goodman and Ranivo (2004: 434)).
- 2004. *N[eoromicia] malagasyensis*: Goodman and Ranivo, Mamm. biol., 69 (6): Name combination.
- 2004. *Neoromicia somalicus malagasyensis*: Goodman and Ranivo, Mamm. biol., 69 (6): 434. Name combination.

Taxonomy:

Only known from a very limited number of specimens. Originally considered a subspecies of *somalicus* Thomas, 1901, but see Goodman and Ranivo (2004: 438), who elevate it to species rank.

However, they did not discuss the relation of this form with *humbloti* A. Milne-Edwards, 1881.

Conservation status:

Global- Not assessed (IUCN 2004).

General distribution:

SW Madagascar.

Distribution based on voucher specimens:

[Madagascar](#).

Figure 191. Distribution of *Neoromicia malagasyensis*

Neoromicia matroka (Thomas and Schwann, 1905)

- *1905. *Vespertilio matroka* Thomas and Schwann, Proc. zool. Soc. Lond., 1905, I, II: 258. Type locality: Madagascar: Betsileo, Ambositra [20 31 S 47 15 E, 1 100 m]. Type specimen: BMNH 1897.9.1.32 (ad M, skull and alcoholic, collector: Dr. C.I. Forsyth-Major, collection date: 2 February 1875, original number 177: see Peterson *et al.*, 1995: 104). Publication date: 10 August 1905.
- 1939. *Eptesicus matroka*: G.M. Allen, Bull. Mus. comp. Zool., 83: 86. Name combination.
- 1987. *Nycterikaupius matroka*: Menu, Palaeovertebrata, 17 (3): 109. Name combination (and lapsus).
- 2006. *Neoromicia matroka*: African Chiroptera Report, African Chiroptera Project, Pretoria, p. 136. Name combination.

Taxonomy:

Considered a synonym of *capensis* by Koopman (1993a: 201), but see Peterson *et al.* (1995: 104), Russ *et al.* (2001), Simmons (2005) who consider it a valid species.

Common names:

English: Madagascar serotine, Matroka Bat.
French: Sérotine de Madagascar.

Conservation status:

Global- Not assessed (IUCN 2004).

General distribution:

E Madagascar (limitation to E Madagascar: see Peterson *et al.*, 1995: 105).

Distribution based on voucher specimens:

[Madagascar](#).

Figure 192. Distribution of *Neoromicia matroka*

Neoromicia melckorum (Roberts, 1919)

- *1919. *Eptesicus melckorum* Roberts, Ann. Transv. Mus., 6: 113. Type locality: Republic of South Africa: SW Cape Province, Berg River, Kersfontein. Type specimen: TM 2283 (ad. F, skin and skull, collector: Austin Roberts and Adendorff, collection date: 21 November 1917 original number: 533 note: In loft, under eaves of house) Publication date: April 1919.
1953. *Eptesicus (Eptesicus) melckorum*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 76. Name combination.
1987. *Nycterikaupius melckorum*: Menu, Palaeovertebrata, 17 (3): 109. Name combination.
1987. *Pipistrellus (Neoromicia) melckorum*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 274. Name combination.
1993. *Eptesicus (Neoromicia) melckorum*: Koopman, Mammal Species of the world. Chiroptera: 202. Name combination.
2002. *N[eoromicia] melckorum*: Kearney, Volleth, Contrafatto and Taylor, Acta Chiropt., 4 (1): 57. Name combination.

Taxonomy:

Bronner *et al.* (2003) state that most previous authors recognised *Eptesicus* (= *Neoromicia*) *melckorum* as distinct from *N. capensis* (Roberts 1951); Ellerman *et al.* 1953; Hayman and Hill 1971; Corbet and Hill 1980; Meester *et al.* 1986). Koopman (1982), however, questioned the status of *N. melckorum*, since it cannot be clearly distinguished from *N. capensis*. Specimens from the type locality (Kersefontein Farm in the Western Cape Province) are morphologically and karyotypically indistinguishable from *N. capensis*, but specimens from the Kruger National Park with a unique karyotype (2n= 40, aFN= 50) agree with the original description of *melckorum* (Rautenbach *et al.* 1993; Kearney *et al.* 2002 for Kersefontein chromosomal data). The Kruger National Park specimens are also well differentiated from *N. capensis* by allozymes (Morales *et al.* 1991). *Neoromicia melckorum* should thus be synonymised under *N. capensis*, whereas specimens from the Kruger National Park probably represent a distinct species that remains unnamed (Koopman 1994), and which we refer to as *Neoromicia cf. melckorum*. It seems likely that the Zimbabwe specimens reported by Cotterill (1996) represent this unnamed species.

This species has not been clearly distinguished from *capensis*. Mentioned in the genus *Pipistrellus* by Koopman (1994: 117). Koopman (1994: 117) states that the present (more northern) species is clearly distinct from *P. capensis* and should be renamed.

Common names: Afrikaans: Melck se dakvlermuis, Melck-dakvlermuis. English: Melck's Pipistrelle Bat, Melck's House Bat, Melck's serotine bat. French: Sérotine de Melck. Portuguese: Morcego caseiro de cauda comrido.

Etymology of name:

In honour of R. Melck of Kersfontein, Berg River, Cape Province, on whose property the original specimen was taken (Smithers 1983: 102).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Jacobs 2004a).

Regional assessment- South Africa- considered a vagrant not assessed, not in SA (Friedmann and Daly 2004).

General distribution:

Cape Prov. (South Africa), Zambia, Zimbabwe, Botswana, Namibia (?), Mozambique, Tanzania, Malawi (Happold and Happold, 1997: 821). Madagascar (Bates *et al.* 2006: 315).

Echolocation:

See Taylor (1999).

Figure 193. Distribution of *Neoromicia melckorum*

Distribution based on voucher specimens: Malawi, Mozambique, Namibia, South Africa, Tanzania, Zambia, Zimbabwe.

Neoromicia rendalli (Thomas, 1889)

- *1889. *Vesperugo (Vesperus) Rendalli* Thomas, Ann. Mag. nat. Hist., ser. 6, 3 (16): 362, fig. 1. Type locality: Gambia: Bathurst [Banjul] [13 28 N 16 39 W]. Type specimen: BMNH 1889.3.2.3 (ad M; skull and alcoholic; collector dr. Percy Rendall: see Thomas, 1889: 26-7). Publication date: 1 April 1889.
1897. *Vesperugo (Eptesicus) rendalli*: Thomas, Proc. zool. Soc. Lond., 1896, IV: 791. Name combination. Publication date: April 1897.
1899. *Vesperugo Rendalli*: Trouessart, Catalogus Mammalium tam viventium quam fossilium: 1280. Name combination.
1911. *Eptesicus phasma* G.M. Allen, Bull. Mus. comp. Zool., 54: 327. Type locality: Kenya: Northern Guaso Nyiro, Meru River (effluent of northern Guaso Nyiro [=Ewaso Nyiro]). Type specimen: MCZ 8279 (holotype; ad M, skin and skull, collector Glover M. Allen, collection date: 6 August 1909, original number: 94; see Allen, 1911: 327). The MCZ also has a small series of paratypes (see Helgen and McFadden, 2001: 14). Publication date: December 1911.
1917. *Eptesicus faradjius* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 444. Type locality: Democratic Republic of the Congo: NE Congo, Faradje [03 44 N 29 43 E]. Type specimen: AMNH 49045 (ad F, skin and skull, collector Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date 21 February 1911, original number 1914). Publication date: 29 September 1917.
1926. *Eptesicus rendalli*: Cabrera and Ruxton, Ann. Mag. nat. Hist., ser. 9, 17 (103): xxx. Name combination: Publication date: 1 May 1926.
1953. *Eptesicus (Eptesicus) rendalli*: Ellerman, Morrison-Scott and Hayman, Southern African mammals 1758 to 1951: 77. Name combination.
1965. *Eptesicus rendalli phasma*: Koopman, Am. Mus. Novit., 2219: 14. Name combination.
1965. *Eptesicus rendalli faradjius*: Koopman, Am. Mus. Novit., 2219: 14. Name combination.
1968. *Eptesicus rendalli phasma*: Funaioli and Lanza, Mon. Zool. ital., (n.s.) 2 (suppl.): 200. Name combination.
1975. *Eptesicus (Eptesicus) rendalli phasma*: Koopman, Bull. Am. Mus. Nat. Hist., 154 (4): 409. Name combination.
1984. *Eptesicus (Eptesicus) rendalli phasma*: Anciaux de Faveaux, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., 244: 48. Name combination.
1984. *Eptesicus (Eptesicus) rendalli rendalli*: Anciaux de Faveaux, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., 244: 47. Name combination.
1987. *Nycterikaupius rendalli*: Menu, Palaeovertebrata, 17 (3): 109. Name combination.
1987. *Pipistrellus (Neoromicia) rendalli*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 282. Name combination.
1992. *Eptesicus rendallii* Rautenbach and Fenton, Z. Säugetierk., 57: 113. Lapsus.
1993. *Eptesicus (Neoromicia) rendalli*: Koopman, Mammal species of the World: Chiroptera: 203. Name combination.
1994. *Eptesicus (Neoromicia) rendalli phasma*: Koopman, Chiroptera: 117. Name combination.
1994. *Eptesicus (Neoromicia) rendalli rendalli*: Koopman, Chiroptera: 117. Name combination.
1995. *Pipistrellus rendalli*: Koopman, Kofron and Chapman, Am. Mus. Novit., 3148: 11. Name combination.
2002. *Neoromicia rendalli*: Kearney, Volleth, Contrafatto and Taylor, Acta Chiropt., 4 (1): 58. Name combination.
2002. *Pipistrellus rendalli phasma*: Kock, Barnett, Fahr and Emms, Acta Chiropt., 4 (1): xx.
2003. ? (*Hypsugo*) *rendalli*: Hooper and Van Den Bussche, Acta Chiropt., 5 (Suppl.): 38. Name combination.

Taxonomy:

Mentioned in the genus *Pipistrellus* by Koopman (1994: 117). Volleth *et al.* (2001: 44) assigned this species to the genus *Neoromicia*. Reviewed by Kock *et al.* (2002: 89). Included (as (*Hypsugo*) *rendalli*) in a separate, unnamed genus by Hooper

and Van Den Bussche (2003: 38).

Common names:

Afrikaans: Rendall se dakvlermuis, Rendal-dakvlermuis. English: Rendall's Serotine, Rendall's Serotine Bat, Rendall's Pipistrelle Bat,

Rendall's Pipistrelle. French: Serotine de Rendall, Pipistrelle de Rendall
 German: Rendalls Zwergfledermaus. Portuguese: Morcego caseiro de Rendall.

Etymology of name:

In honour of Dr. Percy Rendall, the collector of the type specimen (Thomas 1889: 364; Smithers 1983: 102; Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004ad).

Regional- South Africa- CR B2ab(iii) ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Gambia over Mali (Meinig, 2000: 105), Benin (Capo-Chichi *et al.*, 2004: 163), to Somalia, south to Botswana, Namibia (?), Zambia (Cotterill, 2004: 261), Malawi, Mozambique, and South Africa (Kwazulu-Natal; Kearney & Taylor, 1997: 54).

GTG-bands identified three Robertsonian fusion chromosomes (7/11, 8/9, 10,12), considered as distinguishing characters for the genus *Neoromicia* Kearney *et al.* (2002).
 Protein / allozyme - Unknown.

Figure 195. Distribution of *Neoromicia rendalli*

Distribution based on voucher specimens:

Benin, Botswana, Cameroon, Central African Republic, Chad, Congo (Democratic Republic of the), Ghana, Kenya, Malawi, Mali, Niger, Nigeria, Sierra Leone, Somalia, South Africa, Sudan, Tanzania, The Gambia, Togo, Uganda, Zambia, Zimbabwe.

© The Natural History Museum, London

Figure 194. Clockwise from top lateral, ventral and dorsal skull images of BMNH 1889.3.2.3, holotype of *Vesperugo (Vesperus) rendalli* Thomas, 1889.

Molecular biology:

DNA - Unknown.

Karyotype - McBee *et al.* (1987), Rautenbach and Fenton (1992) and Kearney *et al.* (2002) all recorded $2n = 38$, FN = 50, BA = 14, and a submetacentric X chromosome. Rautenbach and Fenton (1992) and Kearney *et al.* (2002) also both recorded an acrocentric Y chromosome.

Neoromicia somalicus (Thomas, 1901)

- *1901. *Vespertilio minutus somalicus* Thomas, Ann. Mag. Nat. Hist., ser. 7, 8 (43): 32. Type locality: Somalia: Northwest Province, Hargeisa [09 33 N 44 04 E, 3 500 ft (= 1 067 m)]. Type specimen: BMNH 1898.6.9.1 (Holotype, ad ?, skin and skull, collector: R. McDonald Hawker, collection date: 14 November 1897, original number RH5). Publication date: 1 July 1901.
1907. *Vespertilio somalicus*: Matschie, Liste der von Herrn V.B. Schillings gesammelten Säugetier-Arten: 534. Name combination.
1911. *Eptesicus minutus somalicus*: G.M. Allen, Bull. Mus. comp. Zool., 54 (9): 326. Name combination.
1916. *Eptesicus ugandæ* Hollister, Smithson. Misc. Coll., 66 (1): 3. Type locality: Uganda: Between Nimule and Gondokoro, Ledgus. Type specimen: USNM 166520 (ad F, skull and alcoholic, collector: J. Alden Loring, collection date: 15 February 1910, original number 9022). Publication date: 10 February 1916.
1918. *Eptesicus capensis somalicus*: Hollister, Bull. U.S. natl. Mus., 99: 92. Name combination.
1930. *Pipistrellus minutus somalicus*: Zammarano, Le colonie Italiane di diretto dominio: xx. Name combination.
1962. *Eptesicus somalicus*: Rosevear, Cat. Chiroptera Brit. Mus.: 199. Name combination., 26 (4): xxx. Name combination.
1965. [*Eptesicus somalicus*] *ugandæ*: Koopman, Am. Mus. Novit., 2219: 14. Name combination.
1969. *Eptesicus somalicus ugandæ*: Kock, Abh. Senckenberg. naturforsch. Ges., 521: 175. Name combination.
1971. *Eptesicus (Eptesicus) somalicus somalicus*: Hayman and Hill, Order Chiroptera: 44. Name combination.
1971. *Eptesicus (Eptesicus) somalicus ugandæ*: Hayman and Hill, Order Chiroptera: 44. Name combination.
1971. *Eptesicus (Eptesicus) somalicus*: Hayman and Hill, Order Chiroptera: 44. Name combination.
1971. *Eptesicus somalicus somalicus*: Hill and Morris, Bull. Br. Mus. nat. Hist. (Zool.), 21 (2): 42. Name combination.
1987. *Nycterikaupius somalicus*: Menu, Palaeovertebrata, 17 (3): 109. Name combination.
1987. *Pipistrellus (Neoromicia) somalicus*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 282. Name combination.
1993. *Eptesicus (Neoromicia) somalicus*: Koopman, Chiroptera: 203. Name combination.
1994. *P[ipistrellus (Neoromicia)] s[omalicus] somalicus*: Koopman, Chiroptera: 117. Name combination.
1994. *P[ipistrellus (Neoromicia)] s[omalicus] ugandæ*: Koopman, Chiroptera: 117. Name combination.
1995. *P[ipistrellus] somalicus*: Barratt, Bruford, Burland, Jones, Racey, and Wayne, Symp. zool. Soc. Lond., 67: 380. Name combination.
1995. *P[ipistrellus] somalius* Burland, Jones, Racey, and Wayne, Symp. zool. Soc. Lond., 67: 379. Lapsus.
1995. *Pipistrellus somalicus*: Koopman, Kofron and Chapman, Am. Mus. Novit., 3148: 11. Name combination.
2003. *Neoromicia somalicus*: Hooper and Van Den Bussche, Acta Chiropt., 5 (Suppl.): 19. Name combination.
2004. *N[eoromicia] s[omalicus] somalicus*: Goodman and Ranivo, Mamm. biol., 69 (6): 434. Name combination.

Taxonomy:

Koopman (1993a: 203) included *zuluensis*; see Koopman (1975: 404, 405), but see Peterson *et al.* (1995), Simmons (2005). Mentioned in the genus *Pipistrellus* by Koopman (1994: 117). The subspecific allocations of West African and Tanzanian populations are uncertain (Koopman,

1994: 117).

Common names:

Afrikaans: Somali-dakvlermuis. English: Somali serotine, Somali Pipistrelle Bat, Somalian Pipistrelle Bat, Somali Serotine Bat. French: Sérotine de Somalie, Pipistrelle de

Somalia. German: Somalia-Zwergfledermaus.

Etymology of name:

The name refers to the country where the type specimen was collected.

Conservation status

Global- LR/lc assessed as *Eptesicus somalicus* (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs 2004c).

General distribution:

Guinea-Bissau to Ethiopia (Lavrenchenko *et al.*, 2004: 147), Somalia, south over Uganda (Kityo and Kerbis, 1996: 62) to Malawi (1st Malawi record: see Happold and Happold (1997: 825), although with some reservations), Namibia, Botswana, Zambia, Zimbabwe (Cotterill, 2004: 261) and South Africa; Madagascar.

Specimens from southern Africa might possibly represent *Neoromicia zuluensis*, since the distinction between the two species (*zuluensis* and *somalicus*) has not been made throughout the literature.

Molecular biology:

DNA - See Hooper and Van Den Bussche (2003) for the results of a specimen from Kenya.

Karyotype - McBee *et al.* (1987) reported $2n = 26$, FN = 48, BA = 24, a subtelocentric X chromosome, and an acrocentric Y chromosome. Protein / allozyme - Unknown.

Figure 197. Distribution of *Neoromicia somalicus*

Distribution based on voucher specimens:

"Africa", Angola, Benin, Botswana, Burkina Faso, Cameroon, Central African Republic, Chad, Congo (Democratic Republic of the), Cote D'Ivoire, Eritrea, Ethiopia, Ghana, Guinea-Bissau, Kenya, Namibia, Nigeria, Rwanda, Sierra Leone, Somalia, South Africa, Sudan, Tanzania, Togo, Uganda, Zimbabwe.

Figure 196. Clockwise from top lateral, ventral and dorsal skull images of BMNH 1898.6.9.1, holotype of *Vespertilio minutus somalicus* Thomas, 1901.

Neoromicia tenuipinnis (Peters, 1872)

- *1872. *Vesperus tenuipinnis* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 263. Type locality: "Guinea": no specific locality. - Publication date: 1872.
1878. *Vesperugo (Vesperus) tenuipinnis*: Dobson, Catalogue of the Chiroptera of the collection of the British Museum: 200. Name combination.
1889. *Vesperus bicolor* Bocage, J. Sci. mat. Phys. Nat., Lisboa, ser. 2, 1 (1): 5. Type locality: Angola: Caconda [13 42 S 15 05 E, 1 900 m]. Type specimen: BMNH 1889.5.1.3 (Syntype, ad M, skull and alcoholic, collector José de Anchieta). Publication date: March 1889.
1889. *Vesperus tenuipennis* Noack, Zool. Jb. Syst., 4: xxx. Lapsus.
1897. *Eptesicus tenuipinnis*: Matschie, Arch. Naturg., 1: xxx. Name combination.
1897. *Vesperugo (Vesperus) bicolor*: Trouessart, Catalogus Mammalium tam viventium quam fossilium: 110. Name combination.
1900. *Vespertilio tenuipennis* Miller, Proc. Wash. Acad. Sci., 2: xxx. Lapsus..
1916. *E[ptesicus] bicolor*: Wettstein, Anz. kais. Akad. Wiss., Wien: 201. Name combination.
1917. *Eptesicus ater* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 443. Type locality: Democratic Republic of the Congo: NE Congo, Oriental Province, Faradjé [03 44 N 29 43 E]. Type specimen: AMNH 48988 (ad M, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 1 March 1911, original number 1466). Publication date: 29 September 1917.
1923. *Eptesicus tenuipennis*: Kershaw, Rev. Zool. afr., 11 (4): 358. Lapsus.
1935. *Pipistrellus bicolor*: Monard, Arq. Mus. Bocage, 6: xx. Name combination.
1936. *Eptesicus bicolor*: St. Leger, Novit. Zool., 40: 79. Name combination.
1950. *Eptesicus tenuipinnis ater*: Sanborn, Publ. Cult. Comp. Diamantes Angola, Lisboa, 10: xxx. Name combination.
1952. *Eptesicus tenuipinnis* Cozens and Marchant, The Nigerian Field, 17 (3): 127. Lapsus.
1953. *Eptesicus (Eptesicus) bicolor*: Ellerman, Morrison-Scott and Hayman, Southern African Mammals: 77. Name combination.
1953. *Eptesicus (Eptesicus) tenuipinnis ater*: Ellerman, Morrison-Scott and Hayman, Southern African Mammals: 77. Name combination.
1953. *Eptesicus (Eptesicus) tenuipinnis tenuipinnis*: Ellerman, Morrison-Scott and Hayman, Southern African Mammals: 77. Name combination.
1953. *Eptesicus (Eptesicus) tenuipinnis*: Ellerman, Morrison-Scott and Hayman, Southern African Mammals: 77. Name combination.
1956. *Eptesicus tenuipinnis* Theodor, Parasitology, 46: xxx. Lapsus.
1956. *Eptesicus tenuipinnis tenuipinnis*: Eisentraut, Zool. Jb. Syst., 84 (3): 531. Name combination.
1987. *Nycterikaupius tenuipinnis*: Menu, Palaeovertebrata, 17 (3): 109. Name combinationa.
1987. *Pipistrellus (Neoromicia) tenuipinnis*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 282. Name combination.
1992. *Pipistrellus tenuipinnis*: Duckworth and Timmins, The bats of Nechisar National Park: 36. Name combination.
1993. *Eptesicus (Neoromicia) tenuipinnis*: Koopman, Chiroptera: 218. Name combination.
1994. *P[ipistrellus (Neoromicia)] t[tenuipinnis] ater*: Koopman, Chiroptera: 117. Name combination.
1994. *P[ipistrellus (Neoromicia)] t[tenuipinnis] tenuipinnis*: Koopman, Chiroptera: 117. Name combination.
1994. *P[ipistrellus (Pipistrellus)] bicolor*: Koopman, Chiroptera: 114. Name combination.
2002. *Eptesicus tenuipinnis* Fenton and Bogdanowicz, Can. J. Zool., 80: 1008. Lapsus.
2002. *Eptesicus tenuipinnis* Fenton and Bogdanowicz, Can. J. Zool., 80: 1013. Lapsus.
2006. *Neoromicia tenuipinnis*: African Chiroptera Report, African Chiroptera Project, Pretoria, p. 140-142. Name combination.

Taxonomy:

Eptesicus bicolor was tentatively included here by Hayman and Hill (1971: 43), but this may be an older name for *Pipistrellus anchietai*; see Koopman (1975: 404). Koopman (1994: 117)

mentions this species in the genus *Pipistrellus*.

Common names:

English: Slender-winged Pipistrelle Bat, White-winged Pipistrelle Bat, White-winged serotine,

White-winged bat. French: Sérotine à ailes blanches. German: Weissflügel-Zwergfledermaus, Weissflügel Pipistrelle.

Conservation status:

Global- LR/lc assessed as *Eptesicus tenuipinnis* (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Fahr 2004j).

General distribution:

Senegal over Guinea (Konstantinov *et al.*, 2000: 145), Republic of the Congo (Dowsett *et al.*, 1991: 259), Uganda (Kityo and Kerbis, 1996: 62) to Ethiopia (Lavrenchenko *et al.*, 2004: 147), Kenya, south to Angola and Democratic Republic of the Congo.

Distribution based on voucher specimens:

"Africa", Angola, [Burundi](#), Burundi?, [Cameroon](#), [Central African Republic](#), [Congo](#), [Congo \(Democratic Republic of the\)](#), [Cote D'Ivoire](#), [Côte d'Ivoire](#), [Ethiopia](#), [Gabon](#), [Ghana](#), Guinea, [Kenya](#), [Liberia](#), [Nigeria](#), [Rwanda](#), [Sierra Leone](#), [Somalia](#), Tanzania, Togo, [Uganda](#).

Figure 198. Distribution of *Neoromicia tenuipinnis*

Neoromicia zuluensis (Roberts, 1924)

- *1924. *Eptesicus zuluensis* Roberts, Ann. Transv. Mus., 10: 60, text-fig. 1. Type locality: Republic of South Africa: Natal, Zululand, White Umfolosi Game Reserve [28 19 S 31 50 E]. Type specimen: TM 3024 (ad F, skin and skull, collector: Austin Roberts [other label has G.M. Allen as collector], collection date: 29 June 1922 original number: 14, note: Shot at dusk). Publication date: 31 January 1924.
1926. *Neoromicia zuluensis*: Roberts, Ann. Transvaal Mus., 11: xxx. Name combination.
1932. *Neoromicia vansoni* Roberts, Ann. Transv. Mus., 15: 15. Type locality: Botswana: Ngamiland, N of Tsotsoroga Pan, Zweizwe river waterhole. Type specimen: TM 6553 (ad F, skin and skull, collector: Vernay-Lang Kalahari Expedition 1930, collection date: 7 July [June on label] 1930, original number 882) Publication date: 1 October 1932.
1934. *Neoromicia pusilla vansoni*: Shortridge, The mammals of South West Africa: xxx. Name combination.
1939. *Eptesicus vansoni*: G.M. Allen, Bull. Mus. comp. Zool., 83: 92. Name combination.
1951. *Neoromicia zuluensis vansoni*: Roberts, The mammals of South Africa: 85. Name combination.
1951. *Neoromicia zuluensis zuluensis*: Roberts, The mammals of South Africa: 84. Name combination.
1953. *Eptesicus (Eptesicus) zuluensis vansoni*: Ellerman, Morrison-Scott and Hayman, Southern African mammals 1758 to 1951: 77. Name combination.
1953. *Eptesicus (Eptesicus) zuluensis zuluensis*: Ellerman, Morrison-Scott and Hayman, Southern African mammals 1758 to 1951: 77. Name combination.
1953. *Eptesicus (Eptesicus) zuluensis*: Ellerman, Morrison-Scott and Hayman, Southern African mammals 1758 to 1951: 77. Name combination.
1962. [*Eptesicus zuluensis*] *zuluensis*: Meester, Ann. Transv. Mus., 24 (2/3): xxx. Name combination.
1970. *Eptesicus zuluensis vansoni*: Roer, Bijdr. Dierk., 40 (1): 7x. Name combination.
1978. *Eptesicus somalicus zuluensis*: Ansell, The mammals of Zambia: 25. Name combination.
1984. *Eptesicus (Eptesicus) somalicus zuluensis*: Anceaux de Faveaux, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., 244: 39. Name combination.
1987. *Pipistrellus (Neoromicia) zuluensis*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 282. Name combination.
1988. *P[ipistrellus] zuluensis*: Thorn, Mammalia, 52 (2): 2xx. Name combination.
1992. *Eptesicus zulensis* Freitas, Bogo, and Christoff, Z. Säugetierk., 57: 331. Lapsus.
1994. *P[ipistrellus (Neoromicia)] s[somalicus] zuluensis*: Koopman, Chiroptera: 117. Name combination.

Taxonomy:

Bronner *et al.* (2003) state that although Ellerman *et al.* (1953) and Hayman and Hill (1971) recognised *Eptesicus (=Neoromicia) zuluensis* as a distinct species, Koopman (1975, 1993), Honacki *et al.* (1982), Meester *et al.* (1986) and Corbet and Hill (1992) treated it as a subspecies of *Eptesicus (=Pipistrellus) somalicus*. Rautenbach *et al.* (1993) confirmed its distinctness from the latter on the grounds of interspecific chromosomal differences.

As a separate species by many authors, e.g. Volleth *et al.* (2001: 44), who assigned it to the genus *Neoromicia*.

Common names:

Afrikaans: Aalwyndakvlermuis; Aalwynvlermuis.
English: Zulu Pipistrelle Bat, Aloe Bat, Aloe Serotine, Aloe Serotine Bat, Zulu serotine bat.

French: Serotine des aloes, Pipistrelle zouloue.
German: Zulu-Zwergfledermaus.

Etymology of name:

Roberts (1924) collected the original specimen at his camp and records in his description of the species that it was the Cape serotine bat, *N. capensis*, that he found in an aloe. He used the name aloe bat and it has remained associated with *N. zuluensis* (Taylor 2005).

Conservation status:

Global- LR/nt assessed as *Eptesicus zuluensis* (Hilton-Taylor 2000); LC ver 3.1 (2001) (IUCN 2004; Jacobs and Cotterill 2004b).

Regional- South Africa- Indeterminate (Smithers 1986); LC ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Malawi (Ansell and Dowsett (1988: 42), Zambia to Namibia, Botswana and KwaZulu-Natal; Ethiopia (Lavrenchenko *et al.* (2004: 147).

Molecular biology:

DNA - Unknown.

Karyotype - Both Rautenbach *et al.* (1993) and Kearney *et al.* (2002) recorded $2n = 28$, $FN = 48$, $BA = 22$, and a subtelocentric X chromosome. However, as can be seen from Figure 9 in Kearney *et al.* (2002) the FN number was incorrectly reported and should be $FN = 50$, and $BA = 24$. Rautenbach *et al.* (1993) also reported an acrocentric Y chromosome. GTG-bands identified three Robertsonian fusion chromosomes (7/11, 8/9, 10,12), considered as distinguishing characters for the genus *Neoromicia* Kearney *et al.* (2002).

Protein / allozyme - See Morales *et al.* (1991) for results from three specimens from South Africa.

Distribution based on voucher specimens:

Angola, Botswana, Ethiopia, Kenya, Malawi, Namibia, Rwanda, South Africa, Sudan, Swaziland, Zambia, Zimbabwe.

Figure 199. Distribution of *Neoromicia zuluensis*

Genus **Nyctalus** Bowdich, 1825

- *1825. **Nyctalus** Bowdich, Excursions in Madeira and Porto Santo, 36, footnote. Type species: *Nyctalus verrucosus* Bowdich, 1825 (= *Vespertilio leisleri* Kuhl, 1817). Publication date: 1825.
1829. **Pterygistes** Kaup, Skizz. Entw.-Gesch. Natürl. Syst. Europ. Thierwelt, 1: 90. Type species: *Vespertilio noctula* Schreber, 1774. Publication date: 1829.
1839. **Vesperugo** Keyserling and Blasius, Arch. Naturgesch. Berlin, 5 (1): 317. Publication date: 1839. In part (see Allen 1939a: 92; Pavlinov *et al.*, 1995: 104).
1842. **Noctulinia** Grey, Ann. Mag. nat. Hist., [ser. 1], 10 (65): 258. Publication date: 1 December 1842. Mentioned as "in part" by Allen (1939a: 92. Contained two species (*Noctulinia proterus* Kuhl, 1818 = *Nyctalus noctula* Schreber, 1774, and *N. fulvus* Grey, 1843 = *Scotophilus kuhlii* Leach, 1821; see Allen 1939a: 92, one a synonym of *Vespertilio noctula* Schreber, 1774 (see Corbet and Hill 1992: 143).
1856. **Panugo** Kolenati, Allg. deutsch. naturh. Zeitung, ser. 2, 2: 131. Type species: *Vespertilio noctula* Schreber, 1774 and *Vespertilio leisleri* Kuhl, 1817. Publication date: 1856.
1914. **Noctulinia** Cabrera, Fauna Ibérica: 123. Lapsus (also mentioned by Allen (1939: 92), Corbet (1978: 54), and Simmons (2005))?
2002. **Nyctalis** Sheshurak and Kedrov, *Plecotus et al.*, pars. spec.: 62. Lapsus

Taxonomy:

Included in *Pipistrellus* as a subgenus by Hooper and Van Den Bussche (2003: 38).

Etymology of name:

From the Greek "*nyctos*" meaning night and "*ala*" meaning wing (see Kapteyn 1995: 115).

Common names:

English: Noctules, Noctule Bats. French: Noctules, Chauve-souris à nez large.

Nyctalus azoreum (Thomas, 1901)

- *1901. ***Pterygistes azoreum*** Thomas, Ann. Mag. Nat. Hist., ser. 7, 8 (43): 33. Type locality: [Portugal]: Azores, St. Michael. Type specimen: BMNH 1865.10.2.1 (Holotype, M, collected and presented by F. DuCane Godman, Esq.). Publication date: 1 July 1901.
- ? ***Nyctalus azoreum***: Name combination.
- ? ***Nyctalus leisleri azoreum***: Name combination.

Taxonomy:

Listed as a subspecies of *N. leisleri* by Corbet (1978c) and Koopman (1994: 118), but see Palmeirim (1991), Koopman (1993: 216), Horáček *et al.* (2000: 133), Salgueiro *et al.* (2004: 3357).

Conservation status:

Global- VU A2c, B1+2c ver 2.3 (1994).

General distribution:

Azores (Portugal).

Distribution based on voucher specimens:

Azores [Portugal].

Common names:

English: Azores noctule. French: Noctule des Açores. Portuguese: Morcego dos Açores.

Etymology of name:

The name refers to the Island group where the species occurs.

Nyctalus lasiopterus (Schreber, 1780)

- *1780. *Vespertilio lasiopterus* Schreber, in Zimmermann, Geogr. Gesch. Mensch. Vierf. Thiere, 2: 412. Type locality: Italy: Northern Italy (Uncertain. Horáček *et al.* (2000: 132) mention "? Pisa").
1827. *Vespertilio ferrugineus* Brehm, Ornith., 3: 26.
1868. *sicula* Mina-Palumbo,
1869. *maxima* Fatio, Faun. Vertébr. Suisse.
- ? *Nyctalus lasiopterus*: Name combination.

Taxonomy:

See Corbet (1978c: 55 - 56) for content of this species.

Etymology of name:

From the Greek "*lasios*", meaning hairy and "*pteros*", meaning wing (see Kapteyn 1995: 154).

Common names:

Catalonian: Rat penat noctul gran. Dutch: Grote rosse vleermuis. English: Giant Noctule Bat, Giant noctule, Greater noctule bat, Greater noctule. French: Grande Noctule, Noctule géante. German: Riesen Abendsegler, Großabendsegler. Italian: Nottola gigante. Portuguese: Morcego-arborícola-gigante. Roman: Sgolanotg gigant. Russian: Gigantskaya vechernicha. Spanish (Castilian): Noctulo gigante.

Conservation status:

Global- LR/nt ver 2.3 (1994).

General distribution:

W Europe (France, Portugal, Spain, Switzerland, Italy) over SE Poland, Slovakia, Hungary, Balkan countries (incl. Greece) to Urals and Caucasus (incl. Abkhazia), Asia Minor, Iran and Ust-Urt Plateau (Kazakhstan); Morocco; Algeria; Libya.

Nyctalus leisleri (Kuhl, 1817)

- *1817. *Vespertilio Leisleri* Kuhl, Die Deutschen Fledermäuse, Hanau, p. 14, 46. Type locality: Germany: Hessen, Hanau. - Publication date: Koopman (1992) mentions 1817. Corbet and Hill (1992: 144), however, mention "1819: 46". Baagøe (2001: 90) mentions 1818.
1819. *Vespertilio dasykarpos* Kuhl, Die Deutschen Fledermäuse, Hanau, 49.
1825. *Nyctalus verrucosus* Bowdich, Excursions in Madeira and Porto Santo, p. 36, and footnote. Type locality: [Portugal]: Madeira. Publication date: 1825.
1839. *pachygnathus* Michahelles, ?
1906. *Pterygistes madeiræ* Barrett-Hamilton, Ann. Mag. Nat. Hist., ser. 7, 17 (97): 98. Type locality: [Portugal]: Madeira. Type specimen: BMNH 1907.1.1.392 (skull and alcoholic body). Publication date: 1 January 1906.
- ? *Nyctalus leisleri*: Name combination.

Taxonomy:

Includes *verrucosus*, see Corbet (1978: 55), who also included *azoreum*; but see Palmeirim (1991).

Swedish: Leislers fladdermus.

Etymology of name:

In honour of Philipp Achilles Leisler (1772 - 1813) (see Kozhurina 2002: 16).

Common names:

Basque: Leisler gau-saguzar. Catalanian: Rat penat noctul petit. Czech: Netopýr stromový. Danish: Leisler's flagermus. Dutch: Bosvleermuis. English: Leisler's bat, Lesser Noctule Bat, Lesser noctule, Leisler's noctule. French: Noctule de Leisler, Petite Noctule. Gallician: Morcego de Leisler. German: Kleine Abendsegler, Kleiner Abendsegler. Hungarian: sz?röskarú denevér. Italian: Nottola di Leisler. Portuguese: Morcego-arborícola-pequeno. Roman: Sgolanotg pitschen. Russian: Mapaya vechernicha. Spanish (Castilian): Murciélago nocturno, Noctulo de Leisler, Noctulo menor, Noctulo pequeño.

Conservation status:

Global- LR/nt ver 2.3 (1994).

General distribution:

W Europe (incl. the Netherlands) to Urals and Caucasus (incl. Abkhazia); Britain; Ireland; Madeira Isl (Portugal); Azores (Portugal); S Sweden, S Finland (?), Baltic states (Lithuania); Portugal; Czech Republic, Austria; Albania; Greece; W Himalayas; E Afghanistan, N Pakistan, N India, NW Africa (incl. Morocco (Benda *et al.*, 2004b), Algeria (Gaisler, 1984:

89)), Libya and Morocco.

Distribution based on voucher specimens:
Madeira [Portugal].

Nyctalus noctula (Schreber, 1774)

- *1774. *Vespertilio noctula* Schreber, Die Säugethiere, 1 (7): pl. 52 + 1 (9): 166. Type locality: France: no specific locality. Publication date: 1774.
- 1806. *Vespertilio serotinus* E. Geoffroy Saint-Hilaire, Ann. Mus. Hist. Nat. Paris, 8: 194, pl. 46, fig. 1. Not of Schreber, 1774.
- 1852. *Vespertilio macuanus* Peters, Naturw. Reise Mossamb., Säugethiere, p. 61, pl. 16, fig. 1. Type locality: Mozambique: Cabaceira peninsula (Simmons (2005): type locality = Mozambique, but this provenance is dubious; Koopman (1994). Allen (1939: 92) mentioned "Reference uncertain"). Publication date: 1852.
- ? *Nyctalus noctula*: Name combination.

Taxonomy:

Koopman (1994: 118) states that it is possible that there is more than one species represented in this complex.

Common names:

Basque: Gau-saguzarra. Catalanian: Rat penat nóctul. Czech: netopýr rezavý. Danish: Brunflagermus. Dutch: Rosse vleermuis. English: Common noctule, Noctule, Common Noctule Bat. Estonian: Suurvidevlane. French: Noctule commune. Gallician: Morcego ruivo. German: Große Abendsegler; Großer Abendsegler, Abendsegler. Hungarian: korai denevér, Közönséges koraidenevér. Italian: Nottola, Nottola comune. Maltese: Noktula. Norwegian: Storflaggermus. Polish: Borowiec wielki. Portuguese: Morcego-arborícola-grande, Morcego caseiro comun. Roman: Sgolanotg grond. Russian: Ryzhaya vechernicha. Spanish (Castilian): Nóctulo, Nóctulo mediano, Nóctulo común. Swedish: Stor fladdermus.

Etymology of name:

From the Latin "*noctis*" meaning night (see Kapteyn 1995: 115)

Conservation status:

Global- LR: lc.

General distribution:

Europe (S Scandinavia, Sweden, Finland, Estonia, Lithuania, Great Britain, the Netherlands, France, Iberian peninsula (incl. Portugal), Czech Republic, Austria, Albania, Greece) to Urals and Caucasus (incl. Abkhazia); Azores; Morocco (?); Algeria; SE Asia Minor to Israel; Jordan (?); Lebanon; Masirah Isl (Oman); Western Turkmenistan, W Kazakhstan, Uzbekistan, Kirghizia, Tadjikistan to SW Siberia, Himalayas; N Pakistan, N India, and China, south to Myanmar and W Malaysia (doubtful), Vietnam; east to Taiwan; Honshu (Japan); a dubious record from Mozambique.

Distribution based on voucher specimens:
Egypt, Mozambique.

Genus *Nycticeinops* Hill & Harrison, 1987

1987. *Nycticeinops* Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 254. Type species: *Nycticejus schlieffeni* Peters, 1859.

Taxonomy:

Bronner *et al.* (2003) state that the genus *Nycticeius* has long been considered to comprise two species: *N. humeralis*, from North America, and *N. schlieffenii* from Africa and Arabia. Koopman (1978) found these species so similar that he retained them in the same genus, a treatment disputed by Kitchener and Caputi (1985). Hill and Harrison (1987) demonstrated consistent differences between these species in baculum morphology and proposed the allocation of *schlieffeni* to the distinct genus *Nycticeinops*. Extensive karyotypic differences between the American *humeralis* (2n= 46 and FN= 48; Baker & Patton 1967; Bickham 1979) and East African *schlieffeni* (2n= 34 and FN= 52) provide additional evidence that the two species are not congeneric (Ruedas *et al.* 1990) and mtDNA sequence divergence data strongly support their allocation to distinct genera (Hooper and van den Busche 2001). However, Rautenbach *et al.* (1993) report an intermediate karyotype of 2n= 42 and FN= 50 for *schlieffeni* from South Africa. This not only suggests the existence of two species in Africa, but also casts some doubt on

the karyotypic basis for generic distinction between these forms. We nevertheless recognise these as distinct genera owing to clearcut differences in bacular and mtDNA properties.

Meester *et al.* (1986) state that *Scoteinus* Dobson, 1875 has frequently been included in this genus for the species *schlieffenii*, either as a subgenus (Ellerman *et al.*, 1953, Hayman and Hill 1971), or as a synonym (Rosevear 1965). Allen (1939a) and Roberts (1951) regard *Scoteinus* as a valid genus, which includes *schlieffenii*. However, Sinha and Chakraborty (1971) place *Nycticeius emarginatus* (Dobson, 1871), the type species of *Scoteinus*, in the distinct Indo-Malayan genus *Scotomanes*, and Koopman (1975, 1978) accordingly regards *schlieffenii* as a *Nycticeius sensu stricto*.

Etymology of name:

From the Greek "*nycticeinops*" meaning night and aspect (see Johnston 2006: 3).

Nycticeinops schlieffenii (Peters, 1859)

- *1859. *Nycticejus schlieffenii* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 223. Type locality: Egypt: Cairo. -. Publication date. Allen (1939: 97) mentioned 1860, Kock (1969: 186) mentions 1859.
1877. [*Nycticejus*] *adovanus* Heuglin, Reise in Nordost Afrika, 2: 34. Type locality: Ethiopia: Tigré, Asam River, at Adowa. Publication date: 1877.
1887. *Scotophilus minimus* Noack, Zool. Jahrb., Syst., 2 (2): 280, pl. 10, fig. 36, 37. Type locality: Tanzania: Marungu, Qua Mpala (Kock (1969: 187), Meester *et al.* (1986: 62) situate the locality in Zaire). Publication date: 7 May 1887.
1905. *Scotophilus schliefferi* Schwann, Novit. Zool., 12 (1): 1. Lapsus.
1908. *Scoteinus schlieffeni albiventer* Thomas and Wroughton, Proc. zool. Soc. Lond., 1908, III: 540. Type locality: Sudan: Northern Province, Naikhala. Publication date: 30 October 1908.
1908. *Scoteinus schlieffeni australis* Thomas and Wroughton, Proc. zool. Soc. Lond., 1908, III: 539. Type locality: Mozambique: 120 km SW Inhambane, Coguno. Publication date: 30 October 1908. Considered a valid subspecies of *Nycticeius schlieffeni* by Taylor (1998: 56).
1911. *Nycticeius africanus* G.M. Allen, Bull. Mus. comp. Zool., 54: 328. Type locality: Kenya: Northern Guaso Nyiro, Meru River (effluent of northern Guaso Nyiro [=Ewaso Ngiro]). Type specimen: MCZ 8272 (M, skin and skull, collector Glover M. Allen, collection date 11 August 1909; original number 113; see Allen, 1911: 328; Helgen and McFadden, 2001: 147). Publication date: December 1911.
1916. *Scotoecus cinnamomeus* Wettstein, Anz. K. Akad. Wiss., Wien, math.-nat. Kl., 53: 191. Type locality: Sudan: Kordofan, Nubbaka [=En Nabbaka]. Publication date: 1916.
1926. *Scoteinus schlieffeni* Cabrera and Ruxton, Ann. Mag. nat. Hist., ser. 9, 17 (103): 594. Publication date: 1 May 1926. Lapsus.
1932. *Scoteinus schlieffenii fitzsimonsi* Roberts, Ann. Transv. Mus., 15 (1): 17. Type locality:

Botswana: N Bechuanaland [=N Botswana], Ngamiland, Tsotsoroga Pan [18 44 S 24 24 E]. Type specimen: TM 6550 (ad M, skin and skull, collected during the Vernay-Lang Kalahari Expedition 1930 (VLKE), collection date: 19 June 1930, original number: 833) Type specimen: TM 6551 (Cotype: ad M, skin and skull, collected during the Vernay-Lang Kalahari Expedition 1930 (VLKE) collection date: 19 June 1930, original number: 830) Publication date: 1 October 1932.

- ? *Nycticeinops schlieffenii*: Name combination.
- ? *Nycticeius schlieffeni australis*: Name combination.
- ? *Nycticeius schlieffenii*: Name combination.

Taxonomy:

Includes *cinnamomeus*; see Koopman (1975: 412 - 413). Assigned to the genus *Nycticeinops* by Harrison and Bates (1991: 94) and Hutson *et al.* (2001: 29), which is considered a subgenus of *Nycticeius* by Pavlinov *et al.* (1995: 116).

Mauritania and Ghana to Sudan and Tanzania; Mali (Meinig, 2000: 105); Benin (Capo-Chichi *et al.*, 2004: 163).

Echolocation:

See Taylor (1999) and Taylor *et al.*, (2005).

Figure 200. *Nycticeinops schlieffenii*

Molecular biology:

DNA - Unknown.

Karyotype - Ruedas *et al.* (1990) reported $2n = 34$, $FN = 52$, and $BA = 20$, for specimens from Somalia, whereas Rautenbach *et al.*, (1993) reported $2n = 42$, $FN = 50$, and $BA = 10$, for specimens from South Africa. However, both Ruedas *et al.* (1990) and Rautenbach *et al.*, (1993) reported submetacentric X, and acrocentric Y chromosomes. Unfortunately, Rautenbach *et al.*, (1993) do not identify the actual voucher specimens associated with the work, since further work should be done to ascertain whether this variation is an indication of two distinct species.

Protein / allozyme - Unknown.

Common names:

Afrikaans: Schlieffen se vlermuis, Schlieffen-vlermuis, Klein dakvlermuis. English: Schlieffen's bat, Schlieffen's Twilight Bat. French: Chauve-souris du crépuscule, Chauve-souris de Schlieffen. Portuguese: Morcego de Schlieffens.

Etymology of name:

In honour of the collector Count Wilhelm von Schlieffen-Schlieffenburg (Smithers 1983: 111). Johnston (2006: 3) mentions Schlieffen-Schlieffiennburg.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004am).

Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

SW Arabia; Egypt to Ethiopia (Lavrenchenko *et al.*, 2004: 147), Somalia, Djibouti (Pearch *et al.*, 2001: 388), Uganda (Kityo and Kerbis, 1996: 62), Mozambique, Botswana, Zimbabwe, Zambia, Malawi, Angola, Namibia, South Africa;

Figure 201. Distribution of *Nycticeinops schlieffenii*

Distribution based on voucher specimens:

Botswana, Egypt, Ethiopia, Kenya, Mozambique, Namibia, Senegal, South Africa, Sudan, Swaziland, Tanzania, Togo, Zambia, Zimbabwe.

Genus *Otonycteris* Peters, 1859

- *1859. *Otonycteris* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 223. Type species: *Otonycteris hemprichi* Peters, 1859. Publication date: 1859.

Taxonomy:
See Simmons (2005).

Common names:
English: Desert Bats, Desert Long-eared Bats,
Long-eared Desert Bats, Desert Big-eared Bats.

Etymology of name:
From the Greek "otos" meaning ear and "nycteris"
meaning bat (see Gharaibeh and Qumsiyeh 1995:
3).

Otonycteris hemprichii Peters, 1859

- *1859. *Otonycteris hemprichii* Peters, Monatsb. K. preuss. Akad. Wiss. Berlin, p. 223. Type locality: Egypt/Sudan: Nile Valley south of Assuan (Aswan) in Egypt and Chondek, Northern Province in Sudan. - - Publication date: 1859.
1866. *Plecotus ustus* Fitzinger and Heuglin, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 54 (1): 546. Type locality: Sudan: Northern Province, Wadi Halfa. Publication date: 1866. Nomen nudum: see Anderson and de Winton (1902: 118), Allen (1939a: 93), Kock (1969: 183), Qumsiyeh (1985: 59), Gharaibeh and Qumsiyeh (1995: 1).
1936. *Plecotus auritus saharae* Laurent, Bull. Soc. Hist. Nat. Afrique Nord, 27: 408, fig. Type locality: Algeria: El Goléa. Publication date: December 1936.

Taxonomy:
See Gharaibeh and Qumsiyeh (1995, Mammalian Species, 514). Horáček *et al.* (2000: 133) indicate that geographic variation in size and pelage colouration is rather clinal than categorical what does not support the idea to distinguish local populations as separate subspecies.

Common names:
Arabian: Khafash abiad. English: Hemprich's Long-eared Bat, Hemprich's Desert Bat, Hemprich's Desert Long-eared Bat, Hemprich's Long-eared Desert Bat, Long-eared Desert Bat, Desert Long-eared bat, Hemprich's Arrow-headed Bat, Hemprich's Big-eared Bat, Hemprich's arrow-eared bat. French: Chauve-souris à oreilles pointues de Hemprich, Oreillard d'Hemprich.

Etymology of name:
In honour of Friedrich Wilhelm Hemprich (1796 - 1825) (see Kozhurina 2002: 15).

Conservation status:
Global- LR: lc.

General distribution:
The desert zone from Morocco (Algeria, Tunisia, Libya) and Niger through Egypt, Saudi Arabia, Oman, Israel, Jordan, Syria to Turkmenistan,

Uzbekistan, Kirghizia, Tadzhikistan, Afghanistan, Pakistan and Kashmir.

Figure 202. Distribution of *Otonycteris hemprichii*

Distribution based on voucher specimens:
Algeria, Egypt, Egypt/Sudan.

Genus *Pipistrellus* Kaup, 1829

- *1829. *Pipistrellus* Kaup, Skizz. Entw.-Gesch. Natürl. Syst. Europ. Thierwelt, 1: 98. Type species: *Vespertilio pipistrellus* Schreber, 1774. Publication date: 1829.
1837. *Pipistrella* Bonaparte, Icon. fauna Ital.
1838. *Romicia* Gray, Mag. Zool. Bot., 2 (12): 495. Type species: *Romicia calcarata* Gray, 1838 (= *Vespertilio kuhlii* Kuhl, 1817). Publication date: 1 February 1838.
1839. *Vesperugo* Keyserling and Blasius, Arch. Naturgesch. Berlin, 5 (1): 312. Included 13 species now referred to *Eptesicus*, *Pipistrellus*, *Neoromicia*, *Hypsugo*.
1840. *Romicius* Blyth, Cuvier's Animal Kingdom, 75. Publication date: 1840. Variant of *Romicia* (see Allen, 1939a: 93); Meester *et al.*, 1986: 50).
1856. *Nannugo* Kolenati, Allg. deutsch. naturh. Zeitung, ser. 2, 2: 131. Publication date: 1856. Included *Vespertilio nathusii* Keyserling and Blasius, *V. kuhlii* Kuhl and *V. pipistrellus* Schreber (see Corbet and Hill, 1992: 133).
1868. *Alobus* Peters, Monatsb. k. preuss. Akad. Wiss. Berlin, p. 707 (for 1867). Type species: *Vespertilio temminckii* Cretzschmar, 1826 (= *Pipistrellus rueppellii* Fischer, 1829). Publication date: 1867. Not of Le Conte, 1856.
1899. *Euvesperugo* Aclouque, Faune de France, Mammifères, 35. In part: Included six species, one of which was *Vespertilio pipistrellus* Schreber, 1774 (see Meester *et al.*, 1986: 50. Cabrera (1914: 123) also included it in part into *Nyctalus*).
1926. *Eptesicops* Roberts, Ann. Transv. Mus., 11: 245. Type species: *Scotophilus rusticus* Tomes, 1861. Publication date: 14 September 1926.
1946. *Vansonia* Roberts, Ann. Transv. Mus., 20: 304. Type species: *Pipistrellus vernayi* Roberts, 1932 (= *Vespertilio rüppellii* Fischer, 1829).
1951. *Pipiestrellus* Watson, Uganda J., 15 (1): xxx. Lapsus.
1987. *Attalepharca* Menu, Palaeovertebrata, 17 (3): 126. Not type species designated, therefore not available (see Corbet and Hill, 1992: 133).
1987. *Nycterikaupius* Menu, Palaeovertebrata, 17 (3): 108. In part.
1992. *Attelepharca* Corbet and Hill, Mamm. Indomal. Reg., 131.
1999. *Pipistallus* Salleh, Hang, Rahman and Abdulla, ASEAN Review of Biodiversity and Environmental Conservation (ARBEC). September-October 1999: 1. Lapsus.
2000. *Pipistrellis* Qui, Han, Qi and Yufen, Acta Anthropol. Sin., 4 (1): 19. Lapsus.

Taxonomy:

For synonyms see Ellerman and Morrison-Scott (1951: 162); but also see Hill (1976: 25); Kitchener *et al.* (1986); and Menu (1984). *Hypsugo* was considered a full genus by Tiunov (1986). Hill and Harrison (1987) would transfer *Neoromicia* and *Vespadelus* to *Pipistrellus* from *Eptesicus*.

Etymology of name:

From the Italian "*pipistrello*" meaning bat (see Fujita and Kunz 1984: 4; Flannery 1995: 393). From the Latin "*pipio*" meaning squeaking and "*strellus*", which is an attion indicating a "small animal" (see Kapteyn, 1995: 83).

Distribution based on voucher specimens:

Egypt, **South Africa**.

Common names:

English: Pipistrelle Bats, Pipistrelles.

Pipistrellus "incertae-sedis"

1858. *Nannugo Kolenatii* Müller, Lotos (Prag), 8: 75. Type locality: Egypt: no specific locality.
1862. *Vespertilio (Nannugo) Kolenatii*: Koch, Nass. naturw. Jahrb., 18: 397. Name combination.

Taxonomy:

Müller (1858: 75) called *Nannugo Kolenatii* one of the smallest Nord African bat species. Its German name "Die weissgesäumte Buschfledermaus" indicates that a white edge on the wing membrane was present.

Koch (1862-1863: 397) considers this form a

relative of *Nannugo marginatus*, which in turn is a synonym of *P. kuhlii*. Except for these two publications, no other references to this form were found.

The description does not enable us to assign this name to either *Pipistrellus kuhlii* Kuhl, 1817 or

Pipistrellus deserti Thomas, 1902. In the latter case this name might be a senior synonym, provided *aegyptius* Fischer, 1829 is to be ignored. However, this name clearly does qualify for the status of "nomen oblitum", and should therefore probably be ignored.

Pipistrellus aero Heller, 1912

- *1912. *Pipistrellus aero* Heller, Smithson. Misc. Coll., 60 (12): 3. Type locality: Kenya: Mathews Range, Mt. Gargues [00 57 N 37 24 E, 7 100 ft (= 2 164 m)]. Type specimen: USNM 181812 (ad M, collector Edmund Heller, collection date 26 August 1911, original number 4110). Publication date: 4 November 1912.
- 1971. *Pipistrellus [(Pipistrellus)] aero*: Hayman and Hill, Mammals of Africa: Chiroptera: 41. Name combination.
- 1971. *Pipistrellus altae*: Hayman and Hill, Mammals of Africa: Chiroptera: 41. Name combination? Hayman and Hill (1971) refer to specimens in the BMNH labeled as "*P. altae*" but do not mention an original author.

Taxonomy:

The Ethiopian specimens in the British Museum are clearly *P. kuhlii*; see Hayman and Hill (1971: 41). Koopman (1994: 114) states that this species is probably a subspecies of *P. aegyptius* (= *deserti*).

Common names:

English: Mt Gargues Pipistrelle Bat, Aerial Pipistrelle Bat, Mt. Gargues pipistrelle, Kenya pipistrelle. French: Pipistrelle du Kenya. German: Luftige Zwergfledermaus.

Conservation status:

Global- DD (Baillie and Groombridge 1996); VU D2 ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004ae).

General distribution:

NW Kenya. Ethiopia confirmed by Lavrenchenko *et al.* (2004: 135).

Figure 203. Distribution of *Pipistrellus aero*

Distribution based on voucher specimens:
Ethiopia, Kenya.

Pipistrellus cf. kuhlii Volleth, Bronner, Göpfert, Heller, von Helversen and Yong, 2001

- *2001. *Pipistrellus cf kuhlii* Volleth, Bronner, Göpfert, Heller, von Helversen and Yong, Chromosome Res., 9 (1): 26.

Taxonomy:

Volleth *et al.* (2001: 25) report a *Pipistrellus kuhlii*-like species from Madagascar, which they separated from the European *Pipistrellus* based on a different diploid chromosome number. This form might possibly be conspecific with *Pipistrellus hesperidus* Temminck, 1840, since Bates *et al.* (2006: 299) mention *P. hesperidus* from Madagascar.

Pipistrellus deserti Thomas, 1902

1829. *Vespertilio pipistrellus* var. *β aegyptius* J.B. Fischer, Synopsis Mamm., p. 105. Type locality: Egypt: Luxor. Harrison (1964: 151) mentions Thebes as type locality. Publication date: 1829.
- *1902. *Pipistrellus deserti* Thomas, Proc. Zool. Soc. Lond., 1902, II, I: 4. Type locality: Libya: Fezzan, Murzuk [25 56 N 13 57 E]. Type specimen: BMNH 1902.11.4.1 (Holotype, ad M, skin and skull, collector J.I.S. Whitaker, collection date 30 May 1901, original number: 71). Publication date: October 1902.
1953. *Pipistrellus (Pipistrellus) deserti*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: xxx. Name combination.
1975. *Pipistrellus kuhli aegyptius*: Koopman, Bull. Am. Mus. Nat. Hist., 154 (4): 400. Name combination.
1984. *Pipistrellus (Pipistrellus) kuhli aegyptius*: Anciaux de Faveaux, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., 244: 47. Name combination.
1985. *Pipistrellus aegyptius*: Qumsiyeh, Spec. Publ. Mus. Texas Tech. Univ., 23: 51. Name combination.
1993. *Pipistrellus (Pipistrellus) aegyptius*: Koopman, Mammals of the World. Chiroptera: 219. Name combination.
1997. *Pipistrellus aegyptiacus* Decher, Z. Säugetierk., 62: 132. Lapsus.

Taxonomy:

Benda *et al.* (2004b) indicate that it might be a subspecies of *kuhlii*.

For use of the name *aegyptius* in place of *deserti* see Qumsiyeh (1985). However, see Kock (1999b), Horáček *et al.* (2000: 130) who consider *aegyptius* a "nomen dubium".

Common names: English: Desert Pipistrelle Bat, Egyptian Pipistrelle, Egypt pipistrelle. French: Pipistrelle du désert, Pipistrelle d'Égypte. German: Wüsten-Zwergfledermaus. Italian: Pipistrelle del deserto.

Conservation status:

Global- LR/lc assessed as *P. aegyptius* (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Benda 2004a).

General distribution:

Egypt, N Sudan, Libya, Algeria, Burkina Fasso.

Senegal, Somalia, Sudan.

Figure 205. Distribution of *Pipistrellus deserti*

Pipistrellus hanaki Hulva and Benda, 2004

- *2004. *Pipistrellus hanaki* Benda, Hulva and Gaisler, Acta Chiropt., 6 (2): 207. Type locality: Libya: Cyrenaica, SW of Al Bayda, Wadi al Kuf [32 44 N 21 41 E, 495 m]. Type specimen: NMP 49897 (ad M, alcoholic and skull, collector: P. Benda, V. Hanak, M. Andreas, A. Reiter and M. Uhrin, collection date: 19 May 2002; and 3 paratypes: see Benda *et al.* (2004b: 207)).

Taxonomy:
See Benda *et al.* (2004b).

Republic), who significantly contributed to the knowledge of the Palaearctic bat fauna (see Benda *et al.*, 2004: 208).

Conservation status:
IUCN - V: A2c + D2.

General distribution:
N Cyrenaica (Libya).

Etymology of name:
In honour of prof. Vladimír Hanák (Prague, Czech

Pipistrellus hesperidus (Temminck, 1840)

1832. *Vespertilio platycephalus* Temminck, in Smuts, Enumer. Mamm. Capensium, 107. Type locality: Republic of South Africa: Cape Town.
- *1840. *Vespertilio hesperida* Temminck, Monogr. Mamm., 2: 211. Type locality: Eritrea: Abyssinia, Shores of the Red Sea [Shoa: 09 N 39 E]. Type specimen: SMF 12381 (lectotype: ad M, skull and skin, collector Edward Rüppell, collection date 1842, original number: II.N.9*).
1969. *Vesperugo hesperida*: Kock, Abh. Senckenberg. naturforsch. Ges., 521: 206. Name combination.
2001. *Pipistrellus hesperidus*: Kock, Senckenb. biol., 81 (1/2): 277. Name combination.
2002. *Pipistrellus cf. kuhlii*: Kearney, Volleth, Contrafatto and Taylor, Acta Chiropt., 4 (1): 55. Not of Kuhl, 1817.
- ? *Pipistrellus kuhlii*: Not of Kuhl, 1817.

Taxonomy:
Pipistrellus hesperidus was separated from *kuhlii* by Kock (2001b: 277).

Regional- South Africa- Indeterminate, assessed as *P. kuhlii* (Smithers 1986); LC ver 3.1 (2001) (Friedmann and Daly 2004).

Vespertilio platycephalus Temminck, 1832 is according to Roberts (1951) a synonym of *P. kuhlii*, which would make this the senior synonym. However, both Allen (1939a) and Ellerman *et al.* (1953) regard this taxon as unidentifiable, besides which it seems to fall outside the known distribution of this species (Meester *et al.*, 1986: 52).

General distribution:
Sub-Saharan Africa (incl. Botswana, Namibia (?), Zambia, Zimbabwe (Cotterill, 2004: 261, as *P. kuhlii*); Ethiopia (Lavrenchenko *et al.*, 2004: 134), Madagascar (Bates *et al.*, 2006: 317).

Echolocation:
See Taylor (1999).

Common name: English: African pipistrelle.

Molecular biology:
DNA - Unknown.

Etymology of name:
Since sub-Saharan Africa populations are specifically distinct from Kuhl's pipistrelle occurring in the Palaearctic region (Kock 2001?a), the name African pipistrelle serves to distinguish it from Kuhl's pipistrelle (Bronner *et al.* 2003; Taylor 2005).

Karyotype - Rautenbach *et al.* (1993), Volleth *et al.* (2001) and Kearney *et al.* (2002) all reported $2n = 42$, FN = 50, BA = 10, and a metacentric X chromosome, for specimens from South Africa and Madagascar. These results were the same as those obtained for *P. rusticus* (Kearney *et al.*, 2002). Rautenbach *et al.* (1993) also reported an acrocentric Y chromosome. GTG banding also identified that *P. hesperidus* and *P. rusticus* share the same Robertsonian fusion of chromosomes 11/12 (Kearney *et al.*, 2002).

Conservation status:
Global- LC ver 3.1 (2001) may be assessed as part of *P. kuhlii* (IUCN 2004).

Protein / allozyme - Unknown.

Figure 206. Distribution of *Pipistrellus hesperidus*

Distribution based on voucher specimens:

Burundi, Congo (Democratic Republic of the), Ethiopia, Kenya, Madagascar, Malawi, Nigeria, Rwanda, South Africa, Swaziland, Tanzania, Uganda, Zimbabwe.

Pipistrellus hesperidus broomi Roberts, 1948

- *1948. *Pipistrellus (Romicia) kuhli broomi* Roberts, Spec. Publ. Roy. Soc. South Africa, Robert Broom Commemorative volume, 9. Type locality: Republic of South Africa: Natal, Durban, Malvern, but more likely to be Tzaneen Estates, Tzaneen, northeastern Transvaal (R.H.N. Smithers, in litt): see Meester *et al.*, (1986: 52).
- 1951. *Romicia kuhli broomi*: Roberts, The mammals of South Africa: 82. Name combination.
- 1953. *Pipistrellus (Pipistrellus) kuhli broomi*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 78. Name combination.
- 1957. *P[ipistrellus] kuhli broomi*: Ansell, Ann. Mag. nat. Hist., ser. 12, 10 (115): xxx. Name combination. Publication date: 29 October 1957.
- 1968. *P[ipistrellus] kuhli broomi*: Hill, Bonn. zool. Beitr., 19 (1/2): xxx. Alternate spelling.
- 1969. *Pipistrellus (Romicia) kuhli broomi*: Kock, Abh. Senckenberg. naturforsch. Ges., 521: 167. Alternate spelling for the name used by Roberts, 1948.
- 1971. *Pipistrellus [(Pipistrellus)] kuhli broomi*: Hayman and Hill, Order Chiroptera: 40. Alternate spelling.
- 1992. *Pipistrellus kuhli broomi*: Trujillo, Murcielagos de las Islas Canarias: 23. Name combination.
- ? *Pipistrellus hesperidus broomi*: Name combination.
- ? *Pipistrellus kuhli broomi*: Name combination.

General distribution:

KwaZulu-Natal (RSA).

Pipistrellus hesperidus hesperidus (Temminck, 1840)

- *1840. *Vespertilio hesperida* Temminck, Monogr. Mamm., 2: 211. Type locality: Eritrea: Abyssinia, Shores of the Red Sea [Shoa: 09 N 39 E]. Type specimen: SMF 12381 (lectotype: ad M, skin only, collector Edward Rüppell).
- 1901. *Pipistrellus Kuhlii fuscatus* Thomas, Ann. Mag. Nat. Hist., ser. 7, 8 (43): 34. Type locality: Kenya: Naivasha [00 46 S 36 21 E]. Type specimen: BMNH 1901.8.9.96 (Holotype, ad M, skull and alcoholic, collected and presented by Sir H.H. Johnston, collection date: 19 October 1900). Publication date: 1 July 1901.
- 1913. *Pipistrellus kuhli fuscatus*: Roberts, Ann. Transv. Mus., 4: 67. Alternate spelling for the name used by Thomas, 1901.
- 1951. *Pipistrellus (Pipistrellus) kuhli fuscatus*: Swynnerton and Hayman, J. East Afr. Nat. Hist. Soc., 20 (6-7) (90): xxx (for 1950). Name combination.
- ? *Pipistrellus hesperidus hesperidus*: Name combination.

General distribution: extreme southeastern part of the continent.
 Sub-Saharan Africa with the exception of the

Pipistrellus hesperidus subtilis (Sundevall, 1846)

- *1846. *Vespertilio subtilis* Sundevall, Öfvers. Kongl. Sv. Vet.-Akad. Förhandl., 3 (5): 119. Type locality: Republic of South Africa?: "Interior of Caffraria". Collector: J. Wahlberg.
- 1855. *Vespertilio (Vesperugo) subtilis*: Wagner, Schreber's Säuget., Suppl. 5: 746. Name combination.
- 1860. *Hypsugo subtilis*: Kolenati, Monographie der Europäischen Chiroptern: 20. Name combination.
- 1917. *Pipistrellus kuhlii subtilis*: G.M. Allen, Bull. Mus. comp. Zool., 83: 94. Name combination.
- 1931. *Pipistrellus subtilis*: Hewitt, A guide to the Vertebrate fauna of the Eastern Cape Province: 23. Name combination.
- 1951. *Eptesicops subtilis*: Roberts, The mammals of South Africa.: 83. Name combination.
- 1971. *Pipistrellus [(Pipistrellus)] kuhlii subtilis*: Hayman and Hill, Order Chiroptera: 40. Name combination.
- 1993. *subtilis* Koopman, Mammal Species of the world: 221. Lapsus.
- ? *Pipistrellus hesperidus subtilis*: Name combination.

General distribution:
 SE Africa.

Pipistrellus inexpectatus Aellen, 1959

- *1959. *Pipistrellus inexpectatus* Aellen, Arch. Sci. Genève, 12: 226. Type locality: Cameroon: Upper Benoue Valley, Ngaouyanga [07 59 N 13 36 E]. Type specimen (Museum de la Chaux-de-Fonds, ad M, alcoholic, collector A. Monard and V. Aellen, collection date 11 July 1947, original number: 954: see Aellen, 1959a: 226 - A5).
1966. *Pipistrellus inexpectatus* Hayman, Misonne and Verheyen, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., (8) 154: 52. Lapsus.
1971. *Pipistrellus [(Pipistrellus)] inexpectatus*: Hayman and Hill, Mammals of Africa: Chiroptera: 41. Name combination (and lapsus).
1987. *Nycterikaupius inexpectatus*: Menu, Palaeovertebrata, 17 (3): 109. Name combination (and lapsus).
1987. *Pipistrellus (Pipistrellus) inexpectatus*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 281. Name combination.
1993. *Pipistrellus (Hypsugo) inexpectatus*: Koopman, Mammals of the world: Chiroptera: 220. Name combination.

Taxonomy:

See Simmons (2005).

Common names:

English: Aellen's Pipistrelle Bat, Aellen's pipistrelle, Central Africa pipistrelle. French: Pipistrelle d'Afrique centrale, Pipistrelle d'Aellen. German: Unerwartete Zwergfledermaus.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Fahr 2004i).

General distribution:

Benin, Cameroon, Democratic Republic of the Congo, Uganda, Kenya, perhaps Sudan.

Distribution based on voucher specimens:

Benin, Cameroon, Ghana, Kenya, Malawi, Nigeria, Sierra Leone.

Figure 207. Distribution of *Pipistrellus inexpectatus*

Pipistrellus kuhlii (Kuhl, 1817)

- *1817. *Vespertilio Kuhlii* Kuhl, Die Deutschen Fledermäuse, Hanau, p. 14. Type locality: Italy: Friuli-Venezia Giulia and Trieste. Publication date; Koopman (1993a: 221) mentioned 1817, whereas Meester *et al.* (1986: 51), Harrison and Bates (1991: 85), Corbet and Hill (1992: 137) and Bates and Harrison (1997: 179) mention "1819: Ann. Wetterau Ges. Naturk., 4 (2) 199".
1830. *Vespertilio marginatus* Cretzschmar, in Rüppell Atlas Reise Nördl. Afr., Zool. Säugeth., 74, figs. 29a. Type locality: Country uncertain: Nile valley or eastern desert of Egypt (Kock (1969: 167) mentions "Arabia Petraea (=Sinai) und Nubien"). Type specimen: SMF 4307 (type; ad ?, skin and skull, collector Edward Rüppell, collection date 1822; don 1882; old catalog II.N.10.a: see Mertens, 1925: 21).
1838. *Scotophilus Kuhlii*: Gray, Mag. Zool. Bot., Edinburgh, 2 (12): 497. Name combination.
1839. *Vesperugo Kuhlii*: Keyserling and Blasius, Arch. Naturg.: 5 (1): 319. Name combination.
1853. *V[esperugo (Vesperugo)] Kuhlii* Blasius, Arch. Naturg., 19 (1): 46. Name combination.
1855. *Vespertilio (Vesperugo) Kuhlii*: Wagner, Schreber's Säugethiere, Suppl. 5: 729. Name combination.
1856. *Nannugo Kuhlii*: Kolenati, Allg. deutsche naturh. Zeitung, N.F., 2 (4): 131. Name combination.
1857. *S[cotophilus] marginatus*: Tomes, Proc. zool. Soc. Lond., XXV (cccxxx): 50. Name combination.
1862. *Vespertilio (Nannugo) Kuhlii*: Koch, Nass. naturw. Jahrb., 18: 396. Name combination.
1862. *Vespertilio (Nannugo) marginatus*: Koch, Nass. naturw. Jahrb., 18: 397. Name combination.
1865. *V[espertilio] (Pipistrellus) marginatus*: De Filippi, Note di un viaggio in Persia nel 1862: 343. Name combination.
1866. *Vesperugo marginatus*: Heuglin and Fitzinger, Sber. Akad. Wiss. Wien, math. naturw. Kl., 54 (6 - 10): xxx. Name combination.
1867. *Pipistrella marginata*: Loche, Exploration scientifique de l'Algérie: 77. Name combination.
1867. *Pipistrellus minuta* Loche, Expl. Sci. Algérie, Zool., Mamm., p. 78. Type locality: Algeria: Messad Oasis. Publication date: 1867.
1871. *Pipistrellus marginatus*: Dobson, J. Asiatic Soc., 40 (2): 460. Name combination.
1871. *Vesperugo Kuhlii*: Doderlein, Alcune generalita intorno la Fauna Sicula de Vertebrati. xxx. Name combination.
1878. *Vesperugo (Vesperugo) kuhlii*: Dobson, Cat. Chiroptera Brit. Mus.: 230. Name combination.
1880. *Vesperugo Kühlii*: Dobson, Bull. Soc. zool. France, 5: 23x. Name combination.
1885. *Pipistrella minuta*: Loche, Act. Soc. Linn. Bordeaux, 39: xxx. Name combination or lapsus.
1891. *Vesperugo (Vesperugo) kuhlii*: Blanford, The fauna of British India: 315. Alternate spelling.
1898. *P[ipistrellus] kuhlii*: Thomas, Proc. zool. Soc. Lond., 1897, IV: 927. Name combination. Publication date: April 1898.
1899. *Vesperugo (Euvesperugo) kuhlii*: Acloque, Faune de France: 36. Name combination.
1900. *Pipistrellus kuhlii*: Méhely, Monographia Chiropteroorum Hungariae: 261. Name combination.
1905. *Vespertilio (Pipistrellus) kuhlii*: Trouessart, Caus. sci. Soc. zool. France, 1 (10): xxx. Name combination.
1909. *Pipistrellus kühlii*: Satunin, Mitt. Kauk. Mus., 4: 299. Name combination.
1918. *Pipistrellus kuhli kuhlii*: Wroughton, J. Bomb. nat. Hist. Soc., 25: 588. Name combination.
1936. *P[ipistrellus] k[ühlii] pallidus* Heim de Balsac, Supp. Bull. Biol. Fr. & Belg., Paris, 21: 43, 50, 180. Type locality: Algeria: Northern Sahara, to the A'hagggar. Publication date: 1936. Considered a nomen nudum by Allen (1939a: 94), Rode (1947: 138), Kock (1969: 167).
1936. *Pipistrellus kuhlii kuhlii*: Heim de Balsac, Supp. Bull. Biol. Fr. & Belg., 21: 91. Name combination.
1937. *Pipistrellus Kühli Kühlii*: Laurent, Mammalia, 1: 157. Name combination.
1951. *Pipistrellus kuhlii albolimbatus*: Panouse, Trav. Inst. Sci. Cherifien, 1: xx. Name combination.

1953. *Pipistrellus (Pipistrellus) kuhli kuhli*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 78. Name combination.
1953. *Pipistrellus (Pipistrellus) kuhli subtilis*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 78. Name combination.
1953. *Pipistrellus (Pipistrellus) kuhli*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: xxx. Name combination.
1959. *Pipistrellus (Romicia) kuhli*: Anonymus, Koedoe, 3: 5x. Name combination.
1966. *Pipistrellus (Pipistrellus) kuhli pallidus*: Ellerman and Morrison-Scott, Checklist Palaeartic and Indian mammals: xxx. Name combination.
1969. [*Pipistrellus kuhli*] *pallidus*: Aellen and Strinati, Rev. suisse Zool., 76 (16): 427. Name combination.
1971. *Pipistrellus [(Pipistrellus)] kuhlii kuhlii*: Hayman and Hill, Order Chiroptera: 40. Name combination.
1971. *Pipistrellus [(Pipistrellus)] kuhlii pallidus*: Hayman and Hill, Order Chiroptera: 40. Name combination.
1971. *Pipistrellus [(Pipistrellus)] kuhlii*: Hayman and Hill, Order Chiroptera: 40. Alternate spelling.
1972. *Pipistrellus k[uhli] marginatus*: Gaisler, Madkour and Pelikan, Acta sc. nat. Brno, 6 (8): 32. Name combination.
1976. *Pipistrellus (Pipistrellus) kuhli palludus*: Anciaux de Faveaux, Bull. Soc. Hist. nat. Afr. Nord, 67 (1/2): 73. Lapsus.
1976. *Pipistrellus (Pipistrellus) kuhli palludus*: Anciaux de Faveaux, Bull. Soc. Hist. nat. Afr. Nord, 67 (1-2): xx. Lapsus.
1978. *Pipistrellus kuhli marginatus*: Madkour, Zool. Anz., 201 (5/6): 38x. Name combination.
1978. *Pipistrellus kuhli subtilis*: Ansell, The mammals of Zambia. Name combination.
1985. *Pipistrellus kuhlii marginatus*: Qumsiyeh, Spec. Publ. Mus. Texas Tech. Univ., 23: 47. Name combination.
1986. *Pipistrellus kunli*: Chastel, Launay, Le Lay, Bailly-Choumara, Hellal, Valle, Bach-Hamba and Beaucournu, Cah. ORSTOM, sér Ent. méd. et Parasitol., 24 (1): 71. Lapsus.
1990. *Pipistrellus latastei*: Le Berre, Faune du Sahara: 93. Name combination.
1994. *Pipistrellus [(Pipistrellus)] k[uhlii] marginatus*: Koopman, Chiroptera: 114. Name combination.
- ? *Nannugo marginatus*: Name combination.

Taxonomy:

Koopman (1994: 114) states that the allocation of many populations to subspecies is uncertain. Sub-Saharan specimens belong to *hesperidus*.

The authorship and description date for *Vespertilio kuhlii* has been debated for years. It has been assigned to either Kuhl, Natterer or "Natterer (in Kuhl)". The publication year was mentioned as either 1817 or 1819. This confusing situation has been cleared by Bogdanowicz and Kock (1989), who fixed author and date to Kuhl, 1817.

Similarly, the authorship of *marginatus* has been assigned to various authors: Cretzschmar, 1826-1830, Rüppell, 1826, Wagner, 1840, Bonaparte, 1841, and Kolenati, 1856.

In the synonyms list for this species, we did not make a difference for the author and/or year of publication mentioned by the various publications when dealing with *kuhlii*.

Common names:

Afrikaans: Kuhl se vlermuis, Kuhl-vlermuis. Basque: Kuhl saguzar. Catalanian: Rat penat de vores clares. Czech: netopýr jižní. Dutch: Kuhl's dwergvleermuis. English: Kuhl's pipistrelle, Kuhl's Pipistrelle Bat, Kuhl's Bat, Great pipistrelle. French: Pipistrelle de Kuhl, Pipistrelle géante. Gallician: Morcego de beira branca. German: Weißrandfledermaus. Hungarian: Fehérszélű törpedenevér. Italian: Pipistrello albolimbato, Pipistrello de Kühli. Maltees: Pipistrell ta' Kuhl. Portuguese: Morcego de Kuhl, Morcego anao de Kuhl. Roman: Pipistrel da Kuhl. Russian: Средиземноморский нетопыр. Slovenian: belorobi netopir. Spanish: Murciélago de borde claro. Swedish: Kuhls fladdermus.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) assessment included *P. hesperidus* (IUCN 2004; Aulagnier 2004c).

General distribution:

S Europe (from Iberian peninsula (incl. Portugal), S France, Switzerland, Austria, Hungary, Balkan

states (incl. Albania, Greece), Crimea, Caucasus[, incl. Abkhasia]) to Kazakhstan and Afghanistan, Pakistan, India; SW Asia (including Israel and Jordan, Saudi Arabia, Kuwait, Oman, Bahrain, Yemen, Iraq, Iran, Turkmenistan); Northern Africa (incl. Morocco (Benda *et al.*, 2004b)); Canary Isls (Spain) and Cape Verde Isls (Azzaroli Puccetti and Zava, 1988).

Molecular biology:

DNA - Unknown.

Karyotype - Both Baker *et al.* (1975) and Iliopoulou-Georgudaki and Giagia (1986) reported $2n = 44$, FN = 50, and BA = 8. However, Baker *et al.* (1975) reported a submetacentric X chromosome and an acrocentric Y chromosome, whereas Iliopoulou-Georgudaki and Giagia (1986) reported metacentric X and Y chromosomes.

Protein / allozyme - Unknown.

Distribution based on voucher specimens:

"Africa", Algeria, Cameroon, Cape Verde, Cote D'Ivoire, Djibouti, Egypt, Ethiopia, Libya, Morocco, Sudan, Tunisia.

Figure 208. Distribution of *Pipistrellus kuhlii*

Pipistrellus maderensis (Dobson, 1878)

- *1878. *Vesperugo maderensis* Dobson, Cat. Chiroptera Brit. Mus., p. 231, pl. 12, fig 5. Type locality: [Portugal]: Madeira Islands, Madeira Island [32 44 N 15 58 W]. Type specimen BMNH 1855.8.16.34 (ad F, skull and alcoholic, collector William S. MacGillivray). Publication date: June 1878.
1908. *P[ipistrellus] maderensis*: K. Andersen, Ann. Mag. nat. Hist., ser. 8, 1 (5): 435. Name combination.
1922. *Pipistrellus maderensis*: Bannerman, The Canary Islands: 153. Name combination.
1966. *Pipistrellus (Pipistrellus) maderensis*: Ellerman and Morrison-Scott, Checklist of Palaearctic and Indian Mammals: xxx. Name combination.
1999. *Pipistrellus madarensis* Ohlendorf, Nyctalus (N.F.), 7: 193 - 195. Lapsus.

Taxonomy:

Pestano *et al.* (2003: 61) indicate that *P. maderensis* is more closely related to the Canary Island *P. kuhlii* clade than the latter is to *P. kuhlii* from outside the Canaries.

Common names:

Basque: Pipistrello madeiar. Catalanian: Rat penat de Madeira. English: Madeira pipistrelle. French: Pipistrelle de Madère. Gallician: Morcego de Madeira. Portuguese: Morcego da Madeira. Spanish. (Castillian): Murciélago de Madeira.

Etymology of name:

The name refers to the island where the type specimen was collected.

Conservation status:

Global- VU A2c, B1 + 2c ver 2.3 (1994).

General distribution:

Madeira Isl (Portugal); Canary Isls (Spain).

Distribution based on voucher specimens:

Madeira [Portugal].

Figure 209. Clockwise from top lateral, ventral and dorsal skull images of BMNH 1955.8.16.34, holotype of *Vesperugo maderensis* Dobson, 1878.

Pipistrellus nanulus Thomas, 1904

- *1904. *Pipistrellus nanulus* Thomas, Ann. Mag. Nat. Hist., ser. 7, 14 (81): 198. Type locality: Cameroon: Efulen [02 47 N 10 32 E]. Type specimen: BMNH 1904.2.8.8 (Holotype, ad M, skull and alcoholic, collector G.L. Bates). Publication date: 31 August 1904.
1966. *Pipistrellus (Pipistrellus) nanulus*: Hayman, Misonne and Verheyen, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., (8) 154: 16. Name combination.
1994. *Pipistrellus (Vansonia) nanulus*: Koopman, Chiroptera: 116. Name combination.

Taxonomy:

See Simmons (2005).

Common names:

English: Tiny Pipistrelle Bat, Dwarf Pipistrelle Bat, Tiny pipistrelle. French: Pipistrelle minuscule. German: Kleine Zwergfledermaus.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Fahr 2004h).

Figure 210. Clockwise from top lateral, ventral and dorsal skull images of BMNH 1904.2.8.8, holotype of *Pipistrellus nanulus* Thomas, 1904.

General distribution:

Sierra Leone over Benin (Capo-Chichi *et al.*, 2004: 163) to Kenya; Bioko.

Figure 211. Distribution of *Pipistrellus nanulus*

Distribution based on voucher specimens:

Equatorial Guinea, Gabon, Ghana, Kenya, Liberia, Senegal, Sierra Leone, Togo, Uganda, Benin, Burkina Faso, Cameroon, Congo (Democratic Republic of the), Côte d'Ivoire.

Pipistrellus nanus (Peters, 1852)

1842. *Vespertilio Pipistrellus varietas africana* Rüppell, Mus. Senckenberg., 3 (2): 156. Type locality: Ethiopia: Shoa province [c 09 00 N 39 00 E]. Type specimen: SMF 4306 (Lectotype: ad F, skin and skull, collector: Edward Rüppell, collection date: 1842, original number II.N.9*.a).
- *1852. *Vespertilio nanus* Peters, Naturw. Reise Mossamb., Säugethiere, p. 63, pl. 16, fig. 2. Type locality: Mozambique: Inhambane [24 00 S 35 28 E]. Type specimens: BMNH 1907.1.1.421 (Syntype, ad ?; skin and skull; collector: W.C.H. Peters); BMNH 1907.1.1.422 (Syntype, ad F, skull and alcoholic, collector: W.C.H. Peters); NMW 19644 (syntype, ad M, alcoholic, collector: W.C.H. Peters). Publication date: 1852.
1855. *Vespertilio (Vesperugo) nanus*: Wagner, Schreber's Säugeth., Suppl. 5: 746. Name combination.
1860. *Hypsugo nanus*: Kolenati, Monographie der Europäischen Chiroptern: 18. Name combination.
1870. *Vesperugo pusillulus* Peters, J. Sci. mat. Phys. Nat., Lisboa, ser. 1, 3 (10): 124. Type locality: Democratic Republic of the Congo: Loango (not in Angola; see Kock *et al.* (in prep)) -. Publication date: December 1870.
1875. *Vesperugo nanus*: Dobson, Proc. zool. Soc. Lond., 1875, III: 472. Name combination.
1878. *Vesperugo (Vesperugo) nanus*: Dobson, Cat. Chiroptera Brit. Mus.: 237. Name combination.
1888. *Vesperugo stampflii* Jentink, Notes Leyden Mus., 10: 54 (for 1887). Type locality: Liberia: Farmington River. Type specimen: RMNH 17836 (ad M, skull only, collector: F.X. Stampfli, collection date: 1 July 1887). Publication date: April 1888.
1889. *Vesperugo pagenstecheri* Noack, Zool. Jahrb., Syst., 4: 220, pl. 2, fig. 3, pl. 5, fig. 64-65. Type locality: Democratic Republic of the Congo: Banana Creek, Netonna [05 58 S 12 27 E]. Type specimen: SMF 2524 (Lectotype: ad F, skull only, collector: P. Hesse, collection date: 1887; see Mertens (1925: 22); SMF 2525 (paralectotype)). Publication date: 28 February 1889.
1889. *Vesperus pusillus* Noack, Zool. Jahrb., Syst., 4: 216. Type locality: Democratic Republic of the Congo: Congo River, Boma [05 50 S 13 03 E, 30 m]. Type specimen: SMF 2523 (imm M, skull only, collector: P. Hesse, collection date: 1887). Publication date: 28 February 1889.
1897. *Vesperugo (Vesperugo) Pagenstecheri*: Trouessart, Catalogus Mammalium tam viventium quam fossilium: 112. Name combination.
1900. *Pipistrellus minusculus* Miller, Proc. Washington Acad. Sci., 2: 647, fig. 43. Type locality: Liberia: Mount Coffee [06 34 N 10 33 W]. Type specimen: USNM 84500 (ad F; skull and alcoholic; collector: O.F. Cook, collection date: May 1894). Publication date: 28 December 1900.
1900. *Pipistrellus stampflii*: Miller, Proc. Wash. Acad. Sci., 2: xxx. Name combination.
1901. *Vespertilio (Pipistrellus) nanus*: Sclater, The mammals of South Africa: 123, 126. Name combination.
1903. *Pipistrellus nanus*: Cabrera, Mem. Soc. espan. Hist. nat., 1: xxx. Name combination.
1907. *Myotis nanus*: Matschie, Liste der von Herrn V.B. Schillings gesammelten Säugetier-Arten.: 534. Name combination.
1908. *Vespertilio (Glischropus) nanus*: Lönnerberg, Sjöstedts Kilimanjaro-Meru Expedition. 2: xxx. Name combination.
1911. *Pipistrellus culex* Thomas, Ann. Mag. Nat. Hist., ser. 8, 7 (41): 458. Type locality: Nigeria: N Nigeria, Kabir [09 24 N 09 34 E, 2 500 ft (=762 m)]. Type specimen: BMNH 1911.3.24.4 (Holotype, ad F, skin and skull, collector: Rév. G.J. Fox, collection date: 15 May 1910, original number 100). Publication date: 29 April 1911.
1913. *Pipistrellus nanus australis* Roberts, Ann. Transv. Mus., 4: 67. Type locality: Republic of South Africa: Port St. Johns Dist., Western Pondoland 200ft. Type specimen: TM 1076 (ad F, skin and skull, collector: H.H. Swinny, collection date: 20 April 1908). Publication date: 20 October 1913. Not of Miller (1897). Replaced by *P. africanus meesteri* by Kock (2001: 129 - K271).
1917. *Pipistrellus abaensis* J.A. Allen, Bull. Am. Mus. Nat. Hist., 37 (18): 442. Type locality: Democratic Republic of the Congo: NE Congo, Aba [03 53 N 30 17 E]. Type specimen: AMNH 48979 (ad F, skin and skull, collector: Herbert Lang and James P. Chapin (American Museum Congo Expedition), collection date: 18 December 1910, original

- number 1825). Publication date: 29 September 1917.
1925. *Pipistrellus pagenstecheri*: Mertens, Senckenb. biol., 7 (1/2): xxx. Name combination.
1926. *Pipistrellus fouriei* Thomas, Proc. Zool. Soc. Lond., 1926, I: 288. Type locality: Namibia: NW Ovamboland, 32 miles NW of Rehoboth Mission Station, Ukualukasi; 3400 feet; [17 32 S 14 37 E, 1 100 m]. Type specimen: BMNH 1925.12.4.20 (Holotype, ad F, skin and skull, collector: Captain Guy C. Shortridge, collection date: 7 October 1924, original number 1390). Publication date: 29 April 1926.
1934. *Neoromicia pusilla pusilla*: Shortridge, The mammals of South West Africa: xxx. Name combination.
1939. *Pipistrellus nanus nanus*: G.M. Allen, Bull. Mus. comp. Zool., 83: 95. Name combination.
1951. *Eptesicops fouriei*: Roberts, The mammals of South Africa: 84. Name combination.
1951. *Pipistrellus (Pipistrellus) nanus nanus*: Swynnerton and Hayman, J. East Afr. Nat. Hist. Soc., 20 (6-7) (90): xxx (for 1950). Name combination.
1953. *Pipistrellus (Pipistrellus) culex culex*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 78. Name combination.
1953. *Pipistrellus (Pipistrellus) culex fouriei*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 78. Name combination.
1953. *Pipistrellus (Pipistrellus) culex*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 78. Name combination.
1953. *Pipistrellus (Pipistrellus) nanus*: Ellerman, Morrison-Scott and Hayman, Southern African mammals: 78. Name combination.
1956. *Pipistrellus culex culex*: Eisentraut, Zool. Jb. Syst., 84 (3): 530. Name combination.
1957. [*Pipistrellus*] *stampflii*: Aellen, Rev. suisse Zool., 64 (6): 202. Name combination.

1994. *Pipistrellus (Pipistrellus) africanus*: Koopman, Handbook of Zoology: Chiroptera: 112. Name combination.
1998. *Pipistrellus (Hypsugo) nanus nanus*: Grubb, Jones, Davies, Edberg, Starin and Hill, Mammals of Ghana, Sierra Leone and The Gambia: 85. Name combination.
1998. *Pipistrellus (Hypsugo) nanus stampflii*: Grubb, Jones, Davies, Edberg, Starin and Hill, Mammals of Ghana, Sierra Leone and The Gambia: 85. Name combination.
2001. *Pipistrellus africanus meesteri* Kock, Acta Chiropt., 3 (1): 129. Type locality: Republic of South Africa: Transkei. Replacement name for *P. nanus australis* Roberts, 1913 (preoccupied by *P. hesperus australis* Miller, 1897).
2002. *Neoromicia nanus*: Kearney, Volleth, Contrafatto and Taylor, Acta Chiropt., 4 (1): 58, 60. Name combination.
2002. *Pipistrellus (Hypsugo) africanus stampflii*: Kock, Barnett, Fahr and Emms, Acta Chiropt., 4 (1): 88. Name combination.

Taxonomy:

The oldest name for this species is (possibly) *africanus*; see Koopman (1975: 400), but most authors still remained using the name *nanus*, until Koopman (1994: 112) and Simmons (2005), who mention this species under the name *P. africanus*. In Opinion 2120 (Anonymous 2005), however, the ICZN ruled that the name *Pipistrellus nanus* should be given precedence over *africanus*, whenever the two are considered to be synonyms.

Bronner *et al.* (2003) state that Volleth *et al.* (2001) and Kearney *et al.* (2002) provided karyotypic evidence for the inclusion of the banana bat ("*Pipistrellus nanus*") in *Neoromicia*. Ansell and Dowsett (1988) and Koopman (1966) point out that *africanus* Ruppell, 1842 antedates *nanus* (Peters, 1852) as the valid name for this species. However, they continue to use the better-known name *nanus*, as topotypical *africanus* is restricted to Ethiopia (and is thus unlikely to be conspecific with *nanus*) and Happold (2003) has applied to the International Commission on Zoological Nomenclature for conservation of this specific epithet on the grounds of nomenclatural stability. Van Cakenberghe (2003) suggested to give *nanus* precedence over *africanus*, whenever the two are considered synonyms, a view which was followed in Opinion 2120 (Anonymous 2005).

Grubb *et al.* (1998: 85) include it - as *nanus* - in the subgenus *Hypsugo*. Volleth *et al.* (2001: 44) consider *nanus* to be a representative of the genus *Neoromicia*.

Hoofer and Van De Bussche (2003: 38) include this taxon as ("*Hypsugo nanus*") in a separate, unnamed genus.

The generic alliance of *nanus* is certainly not clear at this stage. Most authors mention this species in the genus *Pipistrellus*, but as pointed out in the previous paragraphs, present taxonomical investigations seem to indicate that it should be included in *Neoromicia*. However, the assignment to *Hypsugo* or a even a new genus is not yet excluded. Further research is needed to fix its generic assignment.

Recently, Meri Happold (pers. comm.) reported that unlike all other pipistrelles placed in *Neoromicia* by Simmons (2005) and also unlike all African species placed in *Hypsugo* (ibid.), *P. nanus* has nyctalodont lower molars (as have all African species in *Pipistrellus*). The taxonomic implications need investigating.

Happold (ibid) also reported that the following subspecies of *P. nanus* (as *P. africanus*) were recognized by Koopman (1994) and/or Kock (2001), but their status and geographic ranges are uncertain:

P. n. stampflii. Sierra Leone to Côte d'Ivoire.

P. n. culex. Nigeria, Ghana.

P. n. africanus. Zaire to Ethiopia, mostly in highlands.

P. n. nanus. Zaire, Kenya and Tanzania to South Africa, also Cameroon (Rosevear 1965).

P. n. fouriei. S Angola, W Zambia, N Namibia.

P. n. meesteri. Transkei, South Africa.

P. n. minusculus. Liberia

Figure 212. *Pipistrellus nanus*

Common names:

Afrikaans: Piesangvlermuis. Arabian: Khouchaf al matoussat. English: Banana Pipistrelle Bat, Banana Bat, Banana pipistrelle. French: Pipistrelle naine aux ailes brunes, Pipistrelle naine. German: Bananen Zwergfledermaus. Portuguese: Morcego das bananeiras.

Etymology of name:

From the Latin "*nanus*" meaning dwarf (see Lausen and Barclay 2005: 5).

Characteristically this species roosts during the day in the rolled-up, sprouting terminal leaves of banana plants and has become associated with them in particular (Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) assessed as *Neoromicia nanus* (IUCN 2004; Jacobs 2004d).

Regional assessmet- LC ver 3.1 (2001), assessed as *Neoromicia nanus* (Friedmann and Daly 2004).

General distribution:

South Africa over Botswana, Namibia (?), Malawi (Ansell and Dowsett, 1988: 41), Zambia, Zimbabwe, to Djibouti (Pearch *et al.*, 2001: 388), Ethiopia, Sudan, Uganda (Kityo and Kerbis, 1996: 61), Republic of the Congo (Dowsett *et al.*, 1991:

259), Benin (Capo-Chichi *et al.*, 2004: 163), Niger, Mali, and Senegal; Madagascar; Pemba and Zanzibar.

Echolocation:

See Fenton and Bell (1981), Taylor (1999) and Taylor *et al.*, (2005).

Molecular biology:

DNA - See Hoofer and Van Den Bussche (2003) for the results of a specimen from Kenya.

Karyotype - Both Peterson and Nagorsen (1975) and Rautenbach *et al.*, (1993) reported $2n = 36$, FN = 50, BA = 16, a metacentric X chromosome, and an acrocentric Y chromosome.

GTG-bands identified three Robertsonian fusion chromosomes (7/11, 8/9, 10,12), considered as distinguishing characters for the genus *Neoromicia* Kearney *et al.* (2002).

Protein / allozyme - See Morales *et al.* (1991) for results from two specimens from South Africa.

Distribution based on voucher specimens:

"Africa", Angola, Benin, Botswana, Burkina Faso, Burundi, Burundi?, Cameroon, Central African Republic, Comoro Islands, Congo, Congo (Democratic Republic of the), Cote D'Ivoire, Côte d'Ivoire, Djibouti, Ethiopia, Gabon, Ghana, Guinea, Guinea-Bissau, Kenya, Liberia,

Madagascar, Malawi, Mali, Mozambique, Namibia, Nigeria, Rwanda, Senegal, Sierra Leone, Somalia, South Africa, Sudan, Swaziland, Tanzania, The Gambia, Togo, Uganda, Unknown country, Zambia, Zimbabwe.

Figure 213. Distribution of *Pipistrellus nanus*

Pipistrellus permixtus Aellen, 1957

- *1957. *Pipistrellus (Pipistrellus) permixtus* Aellen, Rev. Suisse Zool., 64: 200. Type locality: Tanzania: Dar-es-Salaam. Type specimen: MZStrassbourg 12c (ad F, skull and alcoholic, collector Hürstel, collection date 1905).
1966. *P[ipistrellus] permixtus*: Koopman, The Puku, 4: xxx. Name combination.
1982. *Pipistrellus permixtus*: Seal and Makey, ISIS Mammalian Taxonomic Director: xxx. Name combination.

Taxonomy:

This is a very illusive species. It is only known from the type specimen, which shows more affiliation to the European *P. nathusii* than to any of the African species. Since the type specimen was collected in Dar-es-Salaam, a port, it can not be excluded that this animal was transported by ship from Europe to Africa...

Common names:

English: Dar-es-Salaam Pipistrelle Bat, Dar-es-salaam pipistrelle, Tanzania pipistrelle. French: Pipistrelle de Tanzanie. German: Verwechsete Zwergfledermaus.

Conservation status:

Global- DD (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004ac).

General distribution:

NE Tanzania.

1962. *Scotozous rüppelli*: Wassif, Proc. zool. Soc. Lond.: 811. Alternate spelling.
1964. *Scotozous temmincki*: Lehmann, In Niethammer: Alexander Koenigs Reisen am Nil. xxx. Name combination.
1969. *Vespertilio temmincki*: Kock, Abh. Senckenberg. naturforsch. Ges., 521: 174. Alternate spelling.
1980. *Pipistrellus rueppellii*: Swanepoel, Smithers and Rautenbach, Ann. Transv. Mus., 32 (7): xxx. Name combination.
1981. *Pipistrellus (Pipistrellus) rueppellii*: Hill and Harrison, Bull. Br. Mus. nat. Hist. (Zool.), 52 (7): 281. Name combination.
1983. *Pipistrellus (Scotozous) rueppellii*: Smithers, The mammals of the Southern African subregion: 97. Name combination.
1985. *Pipistrellus rueppellii*: Rautenbach, Fenton and Braack, Koedoe, 28: xxx. Lapsus.
1986. *Pipistrellus (Vansonia) rueppellii*: Meester, Rautenbach, Dippenaar and Baker, Transvaal Museum Monograph, 5: 50. Name combination.

1990. *Pipistrellus ruppellii*: Yom-Tov, Cohen and Wollberg, *Mammalia*, 54 (2): 281. Name combination.
1993. *Pipistrellus (Pipistrellus) rueppelli*: Koopman, *Mammal species of the world. Chiroptera*: 222. Name combination.
1995. *Pipistrellus (?Hypsugo) rueppelli*: Pavlinov, Borissenko, Kruskop and Jahontov, *Arch. Zool. Mus. Moscow State Univ.*, 133: 107. Name combination.
1995. *Pipistrellus (Pipistrellus) rueppelli* Nowak, *Walker's Bats of the World*: 94. Lapsus.
1996. *Eptesicus rueppellii*: Kityo and Kerbis, *J. East Afr. Nat. Hist.*, 85: 53. Name combination.
- ? *Scotozous rueppellii*: Name combination.
- ? *Vesperugo hesperida*: Name combination.

Taxonomy:

Renaming of *V. temminckii* Cretzschmar, 1826 (see Allen, 1939a: 95). Mentioned in the subgenus *Vansonia* by Koopman (1994: 116). Mentioned in the subgenus *Hypsugo* inc. sedis by Pavlinov *et al.* (1995: 107).

Meester *et al.* (1986) state that Ellerman *et al.* (1953: 79) do not recognize *Vansonia*, and instead place *Pipistrellus rueppellii* in the subgenus *Scotozous*, as do later authors (Rosevear 1965, Hayman and Hill 1971: 41, Smithers 1983). Corbet and Hill (1980: 68), however, retain *Scotozous* as a full genus for the Indian *S. dormeri* Dobson, 1875, and both J.E. Hill (in litt.) and K.F. Koopman (in litt.) agree that it is incorrect to use this name for *rueppellii*. *Vansonia* is therefore the prior subgeneric name for this species.

The original name was spelled as *Rüppellii*, so the present spelling should probably be *rueppellii*. However, this spelling was only found one single time in all of the literature data: as a misspelling in Koopman (1975). There are a number of earlier authors which use *rueppelli* (e.g. Anderson and De Winton, 1902). Older literature data are: Wagner (1855) as *Vespertilio (Vesperugo) rüppelli*, Kolenati (1860) as *Panugo rüppellii*, and Heuglin (1877) as *Vesperugo rüppellii*. So the earliest record we were able to find was Wagner, 1855 who already used the double "ll" (and double "ii"), but still used "ü", as did Heuglin, 1877. Only Kolenati, 1860 used a single "l". So if we consider Wagner to be the first reviewer, the name should be spelled as "*rueppellii*" with double "ll" and double "ii" and with "ue" since diacritics are no longer allowed in scientific names.

Common names:

Afrikaans: Rüppell se vlermuis, Rüppell-vlermuis.
 English: Rüppell's Bat, Ruppell's Pipistrelle, Rüppell's Pipistrelle Bat. French: Pipistrelle de Rueppel, Pipistrelle de Rüppell.

Etymology of name:

The type (*Vespertilio temminckii*) was described

in Rüppell's (1827) *Atlas zu der Reise im Nordlichen Afrika* and renamed by Fisher (1829) after Rüppell (*V. rüppellii*) (Taylor 2005).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004ag).

Regional- South Africa- Indeterminate (Smithers 1986); considered a vagrant not assessed, only one locality in SA (Augrabies Falls) (Friedmann and Daly 2004).

General distribution:

Senegal, Mauritania (Padial and Ibáñez, 2005: 240), Morocco (Benda *et al.*, 2004b), Algeria, Libya (1st record: Benda *et al.*, 2004a: 91), Egypt, Israel, Jordan, and Iraq, south over Sudan, Uganda (Kityo and Kerbis, 1996: 62) to Zambia, Zimbabwe, Botswana, Namibia, Malawi (Ansell and Dowsett, 1988: 40), and Transvaal (South Africa); Zanzibar; Nigeria (Benda *et al.*, 2004a: 91); Central African Republic (Benda *et al.*, 2004a: 91).

Echolocation:

See Fenton and Bell (1981), Taylor (1999) and Taylor *et al.*, (2005).

Molecular biology:

DNA - Unknown.

Karyotype - Rautenbach *et al.* (1993) reported $2n = 36$, FN = 54, BA = 20, a submetacentric X chromosome, and an acrocentric Y chromosome, for specimens from South Africa.

Protein / allozyme - Unknown.

Distribution based on voucher specimens:
 Angola, Botswana, Cameroon, Congo (Democratic Republic of the), Egypt, Malawi, Mauritania, Morocco, Nigeria, Senegal, South Africa, Sudan, Tanzania, Tunisia, Uganda, Zambia, Zimbabwe.

Figure 216. Distribution of *Pipistrellus rueppellii*

Pipistrellus rueppellii fuscipes Thomas, 1913

- *1913. *Pipistrellus fuscipes* Thomas, Ann. Mag. Nat. Hist., ser. 8, 11 (63): 315. Type locality: Uganda: 60 mi (90 km) W Entebbe [00 04 N 32 20 E, 3 700 ft (=1 128 m)]. Type specimen: BMNH 1906.7.1.5 (Holotype, ad M, skull and skin, collector R.E. Dent, Ruwenzori expedition, collection date 29 November 19xx, original number 1: see Thomas, 1913: 315 - T32). Publication date: 1 March 1913.
- 1939. *Pipistrellus rüppellii fuscipes*: G.M. Allen, Bull. Mus. comp. Zool., 83: 96. Name combination.
- 1951. *Pipistrellus (Scotozous) ruppellii fuscipes*: Swynnerton and Hayman, J. East Afr. Nat. Hist. Soc., 20 (6-7) (90): xxx (for 1950). Name combination.
- 1960. *Pipistrellus ruppelli fuscipes*: Harrison, J. East Afr. Nat. Hist. Soc., 23 (7)(104): xxx. Name combination and alternate spelling.
- 1966. *Pipistrellus (Scotozous) rüppellii fuscipes*: Hayman, Misonne and Verheyen, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., 8 (154): 55. Name combination.
- 1975. *P[ipistrellus] r[ueppellii] fuscipes*: Koopman, Bull. Am. Mus. Nat. Hist., 154 (4): 404. Name combination.
- 1984. *Pipistrellus (Scotozous) rueppelli fuscipes*: Anciaux de Faveaux, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., 244: 49. Name combination.
- 1994. *P[ipistrellus (Vansonia)] r[ueppellii] fuscipes*: Koopman, Chiroptera: 116. Name combination.
- ? *Pipistrellus (Vansonia) rueppellii fuscipes*: Name combination.
- ? *Pipistrellus rueppellii fuscipes*: Name combination.

General distribution:

Ethiopia to northern Angola.

Pipistrellus rueppellii pulcher (Dobson, 1875)

- *1875. *Vesperugo pulcher* Dobson, Proc. Zool. Soc. Lond., 1875, III: 471. Type locality: Tanzania: Zanzibar. Type specimen: BMNH 1868.12.22.3. Publication date: October 1875.
- 1878. *Vesperugo (Vesperugo) pulcher*: Dobson, Cat. Chiroptera Brit. Mus.: 233. Name combination.
- 1902. *P[ipistrellus] pulcher*: Anderson and de Winton, Zoology of Egypt: xxx. Name combination.
- 1910. *Pipistrellus pulcher*: Thomas and Wroughton, Trans. zool. Soc. Lond., 19 (5) (63): 489. Name combination.

1984. *Pipistrellus (Scotozous) rueppelli pulcher*: Anciaux de Faveaux, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., 244: 49. Name combination.
1994. *P[ipistrellus (Vansonia)] r[ueppellii] pulcher*: Koopman, Chiroptera: 116. Name combination.
- ? *Pipistrellus rueppellii pulcher*: Name combination.

General distribution:

Northeastern Tanzania and Zanzibar.

Pipistrellus rueppellii rueppellii (Fischer, 1829)

1827. *Vespertilio temminckii* Cretzschmar, in Rüppell, Atlas Reise Nördl. Afr., Zool. Säugeth., p. 17, pl. 6. Type locality: Sudan: Northern Province, Dongola (The label of the type skin has Shendy as locality [16 41 N 33 22 E]). Type specimen: SMF 4308 (Lectotype: ad M, skin only, collector Edward Rüppell, collection date 1824). Pre-occupied by *temminckii* Horsfield, 1824 (a *Scotophilus*): see Allen (1939: 95), Meester *et al.* (1986: 51), Simmons (2005).
- *1829. *Vespertilio ruppellii* J.B. Fischer, Synopsis Mamm., p. 109. Type locality: Sudan: Northern Province, Dongola. Publication date: 1829.
1866. *Vesperugo hypoleucus* Heuglin and Fitzinger, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 54 (1): 546. Type locality: Sudan: between Kéréri, Halfaye and Surerát on the Nile near Khartoum, Sennaar. Type specimen: NMW 24574 (skin and skull, collection date 1853). Publication date: 1866. Meester *et al.* (1986: 51) assigned it to Fitzinger only.
1866. *Vesperugo sennaariensis* Heuglin and Fitzinger, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 54 (1): 546. Type locality: Sudan: Khartoum. Publication date: 1866. Nomen nudum (see Allen, 1939: 95; Meester *et al.*, 1986: 51).
1877. *Vesperugo senarensis* Heuglin, Reise in Nordost Afrika, 2: 32. Publication date: 1877. Nomen nudum (see Allen, 1939: 95; Meester *et al.*, 1986: 51).
1939. *Pipistrellus rüppellii rüppellii*: G.M. Allen, Bull. Mus. comp. Zool., 83: 95. Name combination.
1955. *Pipistrellus ruppelli ruppelli*: Sanborn and Hoogstraal, J. Egypt. Publ. Health Ass., 30 (4): xxx. Name combination.
1958. *Pipistrellus (Scotozous) rueppelli rueppelli*: Anciaux de Faveaux, Bull. IFAN, (A) 20 (1): 273. Name combination and alternate spelling.
1962. *Pipistrellus ruppellii ruppellii*: Heyneman and Macy, J. Egypt. Publ. Health Ass., 37 (4): xxx. Name combination and alternate spelling.
1964. *Scotozous rüppelli rüppelli*: Niethammer, Alexander Koenigs Reisen am Nil: xxx. Name combination.
1966. *Pipistrellus (Scotozous) rüppelli rüppelli*: Ellerman and Morrison-Scott, Checklist of Palaearctic and Indian Mammals 1758 to 1946: xxx. Name combination.
1974. *Pipistrellus rueppelli rueppelli*: Lagen, Kock and Yalden, Mon. Zool. ital., (N.S.) 16 (Suppl. 5):2xx. Name combination.
1978. *Pipistrellus rüppelli rüppelli*: Madkour, Zool. Anz., 201 (5/6): 38x. Alternate spelling.
1983. *P[ipistrellus (Vansonia)] r[ueppellii] rueppellii*: Smithers, The mammals of the Southern African subregion: 97. Name combination.
1984. *Pipistrellus rueppellii rueppellii*: Rautenbach, Schlitter and Braack, Koedoe, 27: xxx. Name combination.
1988. *Pipistrellus (Pipistrellus) rueppellii rueppellii*: Ansell and Dowsett, Mammals of Malawi: 39. Name combination.
1994. *P[ipistrellus (Vansonia)] r[ueppellii] rueppelli*: Koopman, Chiroptera: 116. Alternate spelling.

General distribution:

Egypt to Nigeria and Central Sudan.

Distribution based on voucher specimens:

Sudan.

Pipistrellus rueppellii senegalensis Dorst, 1960

- *1960. *Pipistrellus rüppelli senegalensis* Dorst, Bull. Mus. natn. Hist. nat., Paris, ser. 2, 31: 473 (for 1959). Type locality: Senegal: Richard Toll [16 48 N 15 42 W]. Type specimen MNHN 1960-81 (ad F, skull and alcoholic, collector Francis Roux, collection date September 1958).
- 1965. *Pipistrellus (Scotozous) rueppelli senegalensis*: Rosevear, Bats of West Africa: 272. Name combination.
- 1972. *P[ipistrellus] ruepelli senegalensis*: Adam and Hubert, Mammalia, 36 (1): 59. Lapsus
- 1972. *Pipistrellus rueppeli senegalensis*: Adam and Hubert, Mammalia, 36 (1): 64. Name combination.
- 1972. *Pipistrellus rueppelli senegalensis* Adam and Hubert, Mammalia, 36 (1): 59. Lapsus.
- 1982. *Pipistrellus ruppelli senegalensis*: Verschuren, Mém. IFAN, 92: 307. Alternate spelling.
- 1994. *P[ipistrellus (Vansonia)] r[ueppellii] senegalensis*: Koopman, Chiroptera: 116. Name combination.
- 1998. *P[ipistrellus (Pipistrellus)] r[ueppellii] senegalensis*: Grubb, Jones, Davies, Edberg, Starin and Hill, Mammals of Ghana, Sierra Leone and The Gambia: 84.
- ? *Pipistrellus rueppellii senegalensis*: Current spelling.

General distribution:
Algeria to Senegal.

Pipistrellus rueppellii vernayi Roberts, 1932

- *1932. *Pipistrellus vernayi* Roberts, Ann. Transv. Mus., 15: 16. Type locality: Botswana: Ngamiland, Maun [19 59 S 23 25 E) Type specimen: TM 6546 (ad M, skin and skull, collector: Vernay-Lang Kalahari Expedition 1930 collection date: 29 May 1930, original number: 648). Publication date: 1 October 1932.
- 1933. *Pipistrellus leucomelas* Monard, Bull. Soc. Neuchâteloise Sci. Nat., Neuchâtel, 57: 47 (for 1932?). Type locality: Angola: Vila da Ponte. Publication date: 1933.
- 1939. *Pipistrellus rüppellii vernayi*: G.M. Allen, Bull. Mus. comp. Zool., 83: 96. Name combination.
- 1946. *[Vansonia] vernayi*: Roberts, Ann. Transv. Mus., 20 (4): xxx. Name combination.
- 1951. *Vansonia vernayi*: Roberts, The mammals of South Africa: 82. Name combination.
- 1953. *Pipistrellus (Scotozous) rueppellii vernayi*: Ellerman, Morrison-Scott and Hayman, Southern African mammals 1758 to 1951: 78. Name combination.
- 1978. *Pipistrellus rueppellii vernayi*: Ansell, The mammals of Zambia.: 24. Name combination.
- 1983. *P[ipistrellus (Scotozous)] r[ueppellii] vernayi*: Smithers, The mammals of the Southern African subregion: 97. Name combination.
- 1984. *Pipistrellus (Scotozous) rueppellii leucomelas*: Anciaux de Faveaux, Ann. Kon. Mus. Mid. Afr., Zool. Wetensch., 244: 49. Name combination.
- 1986. *Pipistrellus (Vansonia) rueppellii vernayi*: Meester, Rautenbach, Dippenaar and Baker, Transvaal Museum Monograph, 5: 51. Name combination.
- 1994. *P[ipistrellus (Vansonia)] r[ueppellii] leucomelas*: Koopman, Chiroptera: 116. Name combination.
- ? *Pipistrellus (Vansonia) rueppellii leucomelas*: Name combination.
- ? *Pipistrellus rueppellii leucomelas*: Name combination.

Taxonomy:

If *vernayi* and *leucomelas* indeed represent the same form, then it might become important to check the actual publication date of *leucomelas*. This name was published in the 1932 issue of the "Bulletin de la Société Neuchâteloise de Sciences Naturelles", but the issue seemed to have appeared in 1933. Otherwise, this name might have priority over *Pipistrellus vernayi* which was published on 1 October 1932.

At present, we synonymize both names and consider *vernayi* to be the oldest name.

Kock (1969: 174) points out that *leucomelas* might be a homonym of *Vespertilio leucomela* Cretzschmar, 1830.

General distribution:
Malawi to Transvaal and Southern Angola.

Pipistrellus rusticus (Tomes, 1861)

- *1861. *Scotophilus rusticus* Tomes, Proc. Zool. Soc. Lond., 1861, I: 31, 35. Type locality: Namibia: Damaraland, Olifants Vlei [18 00 S 17 30 E]. Type specimens: BMNH 1907.1.1.419 (Lectotype, ad F, skin and skull, collector Mr. Anderson, original number 176a); BMNH 1907.1.1.420 (Paralectotype, ad ?, skull and alcoholic, coll. M. Anderson, collection date November 1899, original number 176b). Publication Date: May 1861.
1913. *Pipistrellus rusticus*: Roberts, Ann. Transv. Mus., 4: 67. Name combination.
1923. *Pipistrellus marrensis* Thomas and Hinton, Proc. Zool. Soc. Lond., 1923, II: 249. Type locality: Sudan: foothills S Jebel Marra, Darfur [12 54 N 24 21 E, 4 000 ft (=1 219 m)]. Type specimen: BMNH 1823.1.1.15 (ad M, collector Rear-Admiral Hubert Lynes and Mr. Willoughby P. Lowe., collection date 3 April 1924, original number: 633). Publication date: 6 July 1923.
1934. *Eptesicops rusticus*: Shortridge, The mammals of South West Africa. xxx. Name combination.
1953. *Pipistrellus (Pipistrellus) rusticus*: Ellerman, Morrison-Scott and Hayman, Southern African mammals 1758 to 1951: 78. Name combination.
1959. *Pipistrellus (Eptesicops) rusticus*: Anonymus, Koedoe, 3: 5x. Name combination.
1968. *Pipistrellus (Pipistrellus) rusticus rusticus*: Smithers, A check list and atlas of the mammals of Botswana (Africa): xxx. Name combination.
1971. *Pipistrellus [(Pipistrellus)] rusticus marrensis*: Hayman and Hill, Mammals of Africa: Chiroptera: 40. Name combination.
1975. *Pipistrellus rusticus rusticus* Wilson, Mus. Mem., Salisbury, 5: xxx. Name combination.
- ? *Pipistrellus rusticus marrensis*: Name combination.
- ? *Pipistrellus rusticus rusticus*: Name combination.

Taxonomy:
See Simmons (2005).

2004).

Figure 217. *Pipistrellus rusticus*

Common names:
Afrikaans: Roeskleurvlermuis. English: Rusty bat, Rusty Pipistrelle Bat, Rusty pipistrelle. French: Pipistrelle rouille.

Etymology of name:
The colloquial name refers to the rusty colour of their fur (Taylor 2005).

Conservation status:
Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004ao).
Regional- South Africa- Indeterminate (Smithers 1986); NT ver 3.1 (2001) (Friedmann and Daly

General distribution:

Gambia (Kock *et al.*, 2002: 87), Liberia over Central African Republic (Kock *et al.*, 2002: 87) to Sudan (Kock *et al.*, 2002: 87), Ethiopia, Kenya, Tanzania (Kock *et al.*, 2002: 87); also from Zambia, Zimbabwe, Malawi (Ansell and Dowsett, 1988: 40) to Angola, Namibia, Botswana and Transvaal (South Africa).

Echolocation:
See Taylor (1999).

Molecular biology:
DNA - Unknown.

Karyotype - Both Rautenbach *et al.* (1993) and Kearney *et al.* (2002) reported $2n = 42$, $FN = 50$, $BA = 10$, and an acrocentric Y chromosome, for specimens from South Africa. However, while Rautenbach *et al.* (1993) reported a submetacentric X chromosome, Kearney *et al.* (2002) reported a metacentric X chromosome. GTG banding identified that *P. hesperidus* and *P. rusticus* share the same Robertsonian fusion of chromosomes 11/12 (Kearney *et al.*, 2002).
Protein / allozyme - Unknown.

Distribution based on voucher specimens:
Botswana, Burkina Faso, Cameroon, Central African Republic, Congo (Democratic Republic of the), Ethiopia, Madagascar, Namibia, Senegal, Somalia, South Africa, Sudan, Zambia, Zimbabwe.

Figure 218. Distribution of *Pipistrellus rusticus*

Genus *Plecotus* E. Geoffroy St.-Hilaire, 1818

1816. *Macrotus* Leach, Preoccupied by *Macropus* Gray, 1842, Nomen nudum by Pavlinov *et al.* (1995: 103).
- *1818. *Plecotus* E. Geoffroy Saint-Hilaire, *Descrip. de l'Egypte*, 2: 112, pl. 2, No 3. Type species: *Vespertilio auritus* Linnaeus, 1758. Publication date: 1818.
1829. *Plecautus* F. Cuvier, *Lapsus*: see Cabrera (1914).

Taxonomy:

A key to the genus was published by C. Jones (1977). Mediterranean and Atlantic islands forms reviewed by Juste *et al.* (2004).

Benda *et al.* (2006) indicated that Benda *et al.* (2004c) and Spitzenberger *et al.* (2006) performed combined genetic and morphological analyses of Mediterranean plecotine bats with very similar results but with a slightly different interpretation. The difference is in the taxonomic evaluation of the *kolombatovici* clade of the *austriacus* group (in the sense of Juste *et al.* 2004a). This clade consists of a mosaic of morphotypes with a relatively very shallow genetic divergence. Benda *et al.* (2004c) identified this group with one species *P. teneriffae*, containing three to four more or less distinct forms living in allopatry (*teneriffae*, *kolombatovici*, *gaisleri*, and a possible fourth form in the Maghreb but preliminary included into *gaisleri*). Spitzenberger *et al.* (2006) distinguished two species in the clade, the monotypic *P. teneriffae* and *P. kolombatovici* with three forms, *kolombatovici*, *gaisleri*, and the unnamed Maghrebian form. A third possible interpretation, considering three species within the clade (which we confirm with the morphological evidence) was recently suggested by Mayer *et al.* (2007). Since all three analyses used almost the same types of character sets, their interpretations are alternatives arising from almost identical results. Thus, until new evidence is available for evaluation of relations within the clade, Benda *et al.* (2006) suggest to follow the 'intermediate' designation for the members of the clade, *P. teneriffae/kolombatovici* on the species level (considering the clade), *P. (teneriffae) gaisleri* for the populations of the Maghreb and Cyrenaica, and *P. (teneriffae) kolombatovici* for the populations of the clade inhabiting the Balkans and Asia Minor.

Common names:

English: Long-eared bats, Old World Big-eared Bats, Big-eared Bats, Old World Long-eared Bats. French: Oreillard, Chauve-souris à grandes oreilles. German: Langohrfledermäuse, Langohren.

Etymology of name:

From the Greek "*pleko*" meaning folded or twisted and "*otis*" meaning ear (see C. Jones, 1977: 3; Álvarez-Castañeda and Álvarez Solórzano, 1996: 43). Gardner (2005: 184) considers this to be masculine ("*Plec*" = twisted + "*ot*" = ear(ed) + "*us*" (Latin second declension ending)).

Distribution based on voucher specimens:

Cape Verde.

Plecotus balensis Kruskop & Lavrenchenko, 2000

- *2000. *Plecotus balensis* Kruskop and Lavrenchenko, *Myotis*, 38: 6. Type locality: Ethiopia: Southern Ethiopia, Bale Mountains National Park, Harenna Forest [06 45 N 39 44 E, 2 760 m]. Type specimen: ZMMU S-164904 (ad M, skin and skull, collector S.V. Kruskop, collection date 29 December 1995). Publication date: December 2000.

Taxonomy:

See Simmons (2005).

Common names:

English: Bale Big-eared Bat, Bale Long-eared Bat, Ethiopian Big-eared Bat, Ethiopian Long-eared Bat.

Etymology of name:

In reference to the Bale mountains, the area from where the type specimen originated (see Kruskop and Lavranchenko 2000: 8).

Conservation status:

Global- VU D2 ver 3.1 (2001) (IUCN 2004; Lavrenchenko *et al.*, 2004).

General distribution:

Higher regions of Ethiopia (Shoa, Bale Mts, Simenian Mts).

Distribution based on voucher specimens:

Ethiopia.

Figure 219. Distribution of *Plecotus balensis*

Plecotus christii Gray, 1838

1829. *Vespertilio auritus* β *aegyptius* J.B. Fischer, Synopsis Mamm., p. 117. Publication date: 1829. Junior homonym of *Vespertilio pipistrellus* var *aegyptius*: see Qumsiyeh (1985: 65). Allen (1939: 96) mentioned this form to be based on the description by E. Geoffroy, 1818: Description de l'Egypte, 2: 119.
- *1838. *Plecotus christii* Gray, Mag. Zool. Bot., 2 (12): 495. Type locality: Egypt: Originally North Africa, but restricted by Qumsiyeh (1985: 65, 67) to southern Egypt, Nile valley between Qena and Aswan. Type specimen: BMNH GMCM66a (skin in poor condition; collector Major Turnbull Christie). Publication date: 1 February 1838.
1866. *Plecotus aethiopicus* Heuglin, Sber. k. Akad. Wiss. Wien, math. naturw. Kl., 54 (1): 546. Type locality: Sudan: Bahr-el-Abiad. Publication date: 1866. Nomen nudum. Mentioned by Allen (1939: 96) as a synonym of *Plecotus auritus aegyptiacus* Geoffroy.
1878. *Plecotus aegyptiacus* Dobson, Allen (1939: 96) mentioned "l. Geoffroy, Mag. de Zool., 2: cl. 1, p. 2 of description of pl. 2-3, 1832, who repeats characters given by E. Geoffroy, in Description de l'Egypte, 2: 119, 1818. Egypt". Kock (1969: 179) also mentions "l. Geoffr.", but refers to Fitzinger (1866: 545) as first reference, who reported it from Egypt, Abyssinia and Shoa. Pavlinov *et al.* (1995) mentioned Dobson, 1878 as author.
1911. *Plecotus christiei*: Thomas, Proc. zool. Soc. Lond., 1: 160. Unjustified emendation (Benda *et al.* 2006).
1964. *Plecotus austriacus christiei*: Unjustified emendation (see Thomas 1911, Benda *et al.* 2006).
2002. *Plecotus cristiei*: Kiefer and Veith, Myotis, 39: 12. Lapsus

Taxonomy:

Generally considered to be a subspecies of *austriacus*, but see Benda *et al.* (2004: 23), who raised it to species rank.

African desert region, Mayer *et al.* (2007) suggested its occurrence also in the desert southern Levant.

Since *Plecotus austriacus* is a strictly European species (Juste *et al.* 2004, Mayer *et al.* 2007), this species is removed from the list of African species. All of the African records of *P. austriacus* in fact belong to *P. christii*, *P. (teneriffae) gaisleri* or to *P. balensis*. This also means that some of the synonyms assigned to *P. austriacus* in ACR 2006 should be assigned to these current species.

**Etymology of name:**

In honour of Dr. Turnbull Christie, the collector of the type specimen (see Gray, 1838: 495).

Conservation status:

Global- DD ver 3.1 (2001) assessed as *Plecitus christiei* (IUCN 2004; Aulagnier and Benda 2004b), corrected in IUCN (2006) update.

General distribution:

Arabia (provisionally); N Africa (Egypt, Libya, Sudan) (Horáček *et al.*, 2000: 135), SW Asia (incl. Turkey). Benda *et al.* (2004: 26) restricted its confirmed distribution to the north-eastern

Figure 220. Distribution of *Plecotus christii*

Distribution based on voucher specimens: Egypt.

Plecotus teneriffae Barrett-Hamilton, 1907

- *1907. *Plecotus teneriffae* Barrett-Hamilton, Ann. Mag. nat. Hist., ser. 7, 20 (120): 520. Type locality: Canary Islands [Spain]: Tenerife Island, Orotava [28 23 N 16 31 W]. Type specimen: BMNH 1887.4.18.1 (skin and skull; collector Ramon Gomez; collection date 3 April 1887: see Benda *et al.*, 2004: 39). Publication date: 1 December 1907.

Taxonomy:

Synonymized with *P. austriacus* by Corbet (1978c); but see Ibáñez and Fernández (1985). Juste *et al.* (2004: 10) suggest *teneriffae* is closely related with *kolombatovici*. Pestano *et al.* (2003: 306) indicate *P. christii* [= *P. (teneriffae) gaisleri*] to be the closest relative.

Common names:

Basque: Belarrihandi kanariar. Catalanian: Rat penat orellut canari. English: Canary big-eared bat, Canary Long-eared bat. French: Oreillard de Ténérife. Spanish (Castilian): Murciélago orejudo canario.

Etymology of name:

Referring to the island where the type specimen was collected.

Conservation status:

Global- VU (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Juste *et al.*, 2004a).

General distribution:

(Tenerife, La Palma, El Hiero) Canary Isls (Spain) (Benda *et al.*, 2004: 28).

Figure 221. Distribution of *Plecotus teneriffae*

Distribution based on voucher specimens: Algeria, **Canary Islands [Spain]**, **Libya**, Morocco, Tunisia.

Plecotus teneriffae gaisleri Benda, Kiefer, Hanak & Veith, 2004

- *2004. *Plecotus teneriffae gaisleri* Benda, Kiefer, Hanák and Vieth, Folia Zool., 53 (Monogr. 1): 28. Type locality: Libya: Cyrenaica, Al Jabal Al Akhdar district, 8 km SW Massah, Wadi al Kuf (Jabal Akhdar Mts) [32 42 N 21 35 E, c 330 m]. Type specimen: NMP 49911 (Holotype, ad F, skull and alcoholic, collectors: Petr Benda, Vladimír Hanák, Michal Andreas, Antonín Reiter and Marcel Uhrin, collection date: 20 May 2002; paratypes: 4 MM + 2 FF, NMP 49905-49907, 49908-49910, see Benda *et al.*, (2004c: 29)).

Taxonomy:

See under *Plecotus* above. Formerly considered as *P. auritus* or *P. austriacus*, for details see Benda *et al.* (2004).

Conservation status:

Global- VU (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Juste *et al.*, 2004a) as *P. teneriffae*.

Common names:

English: Gaisler's Long-eared Bat. French: Oreillard du Gaisler.

General distribution:

Northern Cyrenaica (Libya); north-west Africa (Maghreb: Morocco, Algeria, Tunisia); Pantelleria island (Italy) and Malta.

Etymology of name:

In honour of professor Jiri Gaisler (Brno, Czech Republic) who significantly contributed to the knowledge of the North African bat fauna (see Benda *et al.*, 2004: 29).

Plecotus teneriffae teneriffae Barrett-Hamilton, 1907

- *1907. *Plecotus teneriffae* Barrett-Hamilton, Ann. Mag. nat. Hist., ser. 7, 20 (120): 520. Type locality: Spain: Canary Islands, Tenerife Island, Orotava. Type specimen: BMNH 1887.4.18.1 (skin and skull; collector R. Gomez; collection date 3 April 1887: see Benda *et al.*, 2004: 39). Publication date: 1 December 1907.
- ? *Plecotus teneriffae teneriffae*: Name combination.

Genus **Scotoecus** Thomas, 1901

- *1901. **Scotoecus** Thomas, Ann. Mag. nat. Hist., ser. 7, 7 (39): 263. Type species: *Scotophilus albofuscus* Thomas, 1890. Publication date: 1 March 1901.
 1917. **Scotoecus** Thomas, Ann. Mag. nat. Hist., ser. 8, 19 (111): 280. Lapsus.
 ? **Scotoecus**: Current spelling.

Taxonomy:

Scotoecus has been treated as a subgenus of *Nycticeius* (Ellerman *et al.* 1953, Hayman and Hill 1971), but more often as a full genus (Allen 1939a; Rosevear 1965; Kock 1969; Hill 1974b; Koopman 1975, 1978; Corbet and Hill 1980; Swanepoel *et al.*, 1980; Honacki *et al.*, 1982). Of the two (Honacki *et al.*, 1982) or three (Corbet and Hill 1980) recognized African species only *albofuscus* occurs in Southern Africa, having been recorded from a single locality in Mozambique.

Bronner *et al.* (2003) report the light-winged lesser house bat (*Scotoecus albofuscus*) in South Africa. This represents a significant extension in the known ranges of both species and testifies to the need for more intensive field surveys targeting poorly known taxa. Cotterill (2001b) also recorded *Scotoecus albigula* and *S. hindei* from Zinave, Mozambique, based on the re-identification of two museum specimens originally

assigned to *Scotophilus viridis*. Compared with the light-winged *albofuscus*, species identification of the dark-winged taxa of *Scotoecus* (*albigula*, *hindei*, *hirundo*, *falabae*) is more complicated. Indeed, Koopman (1993a) included all these taxa in *S. hirundo*. A study of cranial variation involving a small sample of Malawian specimens (Taylor and van der Merwe 1998) revealed that *hindei*, *hirundo* and *albigula* are distinguishable on morphometric grounds, with *albigula* and *hindei* apparently having larger canines and cheekteeth (as well as larger skulls) than *hirundo*, while *albigula* and *hindei* differ from each other in skull proportions. However, we provisionally retain these within *S. hirundo*, pending a broader study of the dark-winged forms including a larger sample of specimens from across the range.

Common names:

English: Lesser House Bats, House Bats.

Scotoecus albigula Thomas, 1909

- *1909. **Scotoecus albigula** Thomas, Ann. Mag. nat. Hist., ser. 8, 4 (24): 544. Type locality: Kenya: Mount Elgon, Kirui [6 000 ft (=1 829 m)]. Type specimen: BMNH (ad M, collector: Robin Kemp, Rudd Collection, collection date: 5 September 1909, original number 200). Publication date: 1 December 1909.

Taxonomy:

Included in *hirundo* by Koopman (1993a: 226), but considered a valid species by Ansell and Dowsett (1988: 44), Simmons (2005).

Common names:

English: White-throated Lesser House Bat, White-bellied Lesser House Bat.

Conservation status:

Global- DD ver 3.1 (2001) (IUCN 2004; Jacobs and Cotterill 2004c).

General distribution:

Angola, Zambia, Mozambique, Uganda, Kenya, Malawi, Somalia.

Echolocation:

See Taylor *et al.*, (2005).

Distribution based on voucher specimens:

Angola.

Scotoecus albofuscus (Thomas, 1890)

- *1890. *Scotophilus albofuscus* Thomas, Ann. Mus. Civ. Stor. Nat. Genova, ser. 2a, (O.S. 29) 9: 84. Type locality: Gambia: Bathurst [=Banjul]. Type specimen: BMNH 1889.12.12.2 (Holotype, ad M, alcoholic, collector: dr. Percy Rendall). Publication date: 3 February 1890.
1917. *Scotoecus woodi* Thomas, Ann. Mag. Nat. Hist., ser. 8, 19 (111): 280. Type locality: Malawi: Chiromo [16 32 S 35 09 E, 200 ft (=61 m)]. Type specimen: BMNH 1917.2.1.1 (Holotype, ad M, collected and presented by Rodeny C. Wood, Esq., collection date: 2 October 1916, original number 173). Publication date: 1 March 1917.
- ? *Scotoecus albofuscus woodi*: Name combination.
- ? *Scotoecus albofuscus*: Name combination.

Taxonomy:

See Simmons (2005).

Common names:

Afrikaans: Thomas se vlermuis, Thomas-vlermuis. English: Thomas' House Bat, Light-winged Lesser House Bat, Thomas's Lesser House Bat. French: Scotophile du crépuscule, Chauve-souris de Thomas. Portuguese: Morcego pequeno das casas.

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Jacobs 2004h).

Regional- South Africa- VU D2 ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Gambia over Benin (Capo-Chichi *et al.*, 2004: 163) to Uganda (Kityo and Kerbis, 1996: 62), Kenya and Mozambique, Malawi (Happold and Happold, 1997: 819), and South Africa (Kwazulu-Natal; Kearney & Taylor, 1997: 53).

Figure 222. Distribution of *Scotoecus albofuscus*

Distribution based on voucher specimens:
Malawi, South Africa, The Gambia.

Scotoecus hindei Thomas, 1901

- *1901. *Scotoecus hindei* Thomas, Ann. Mag. nat. Hist., ser. 7, 7 (39): 264. Type locality: Kenya: Kitui [3 500 ft (=1 150 m)]. Type specimen: BMNH 1901.2.5.1 (M, collector: S.L. Hinde, collection date: 26 November 1900, original number 63). Publication date: 1 March 1901.
1904. *Nyctinomus hindei* Thomas, Name combination?
1915. *Scotoecus falabæ* Thomas, Ann. Mag. Nat. Hist., ser. 8, 16 (95): 447. Type locality: Nigeria: N Nigeria, Kabwir. Type specimen: BMNH 1915.10.8.1 (Holotype). Publication date: 1 November 1915. Considered a valid subspecies by Grubb *et al.* (1998: 87).
- ? *Scotoecus hindei falabæ*: Name combination.

Taxonomy:

Included in *hirundo* by Kock (1969: 192), Koopman (1993a: 226), but considered a valid species by Ansell and Dowsett (1988: 44), Simmons (2005).

Etymology of name:

In honour of S.L. Hinde, the collector of the type specimen (see Allen 1939: 98).

Conservation status:

Global- DD ver 3.1 (2001) (IUCN 2004; Jacobs *et al.*, 2004q).

Common names:

English: Hinde's Lesser House Bat.

General distribution:

Nigeria and Cameroon to S Sudan, Ethiopia (Lavrenchenko *et al.*, 2004: 141), and Somalia; south to SE Congo (Democratic Republic of the Congo), Kenya, Tanzania, Zambia, Mozambique, Malawi.

Echolocation:

See Taylor *et al.*, (2005).

Distribution based on voucher specimens:

Kenya, Malawi, Nigeria.

Figure 223. Distribution of *Scotoecus hindei*

Scotoecus hirundo (de Winton, 1899)

- *1899. *Scotophilus hirundo* de Winton, Ann. Mag. Nat. Hist., ser. 7, 4 (23): 355. Type locality: Ghana: Gambaga. Type specimen: BMNH 1899.6.15.8 (Holotype). Publication date: 1 November 1899.
- 1923. *Scotoecus artinii* de Beaux, Atti Soc. ital. Sci. nat., 62: 98. Type locality: Kenya: Northern Guaso Nyiro, Archer's Post. Type specimen (F, skin and skull, collector L. Franchetti and L. Tonker, collection date 26 December 1919, original number N 1443 ; 2 paratypes: see de Beaux, 1923: 98).
- ? *Scotoecus hirundo*: Name combination.

Taxonomy:

Koopman (1993a: 226) included *hindei*; see Hayman and Hill (1971: 36) and Robbins (1980: 84); but see also J.E. Hill (1974).

Common names:

English: Dark-winged Lesser House Bat, Swallow Lesser House Bat. French: Scotophile à ailes noires.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); DD ver 3.1 (2001) (IUCN 2004; Jacobs 2004g).

General distribution:

Senegal over Benin (Capo-Chichi *et al.*, 2004: 163) to Uganda (Kityo and Kerbis, 1996: 63), Ethiopia.

Distribution based on voucher specimens:

Ghana.

Figure 224. Distribution of *Scotoecus hirundo*

Genus *Scotophilus* Leach, 1821

- *1821. *Scotophilus* Leach, Trans. Linn. Soc. Lond., 13 (1): 69, 71. Type species: *Scotophilus kuhlii* Leach, 1821 (According to Meester *et al.* 1986: 59 "juvenile *Vespertilio temmincki* Horsfield"). Publication date: 23 May - 21 June 1821.
1831. *Pachyotus* Gray, Zool. Misc., 1: 38. Type species: *Scotophilus kuhlii* Leach, 1821. Publication date: 1831.
1842. *Nycticejus* Rüppell, Mus. Senckenberg., 3 (2): 157, 189. Type species: *Nycticejus leucogaster* Cretzschmar, 1826.

Taxonomy:

Bronner *et al.* (2003) states that the taxonomy of African *Scotophilus* remains problematic. Three species, differing mainly in body size, probably occur in the [southern African] subregion, but species limits and phylogenetic inter-relationships are unclear (Meester *et al.* 1986). Ellerman *et al.* (1953) referred to the largest species as *gigas*, but Robbins (1978) showed that in describing *gigas*, Dobson (1875) had in fact re-described *nigrita*, the name used by Ellerman *et al.* (1953) for the medium-sized species. Koopman (in Honacki *et al.* 1982) accepted *nigrita* as a senior synonym of *gigas*, but argued that *nigrita* is a nomen dubium and should therefore not be used; a position later recanted (Koopman 1993, 1994). Since *nigrita* was no longer available for the medium-sized species, Robbins (1978) used *dinganii* as the next valid name. Koopman (1975, 1978), however, regarded *leucogaster* as a senior synonym of *dinganii*, but later revised this opinion and recognised these as discrete species (Koopman 1993). Shortly thereafter he reverted to his earlier treatment and again listed *dinganii* under *leucogaster* (Koopman 1994).

Ellerman *et al.* (1953) referred to the smallest of the three species in the [southern African] subregion as *viridis*, containing two subspecies (*S. v. viridis* and *S. v. damarensis*), which they recognised as distinct from *borbonicus* on Reunion Island. Hill (1980) regarded these taxa as conspecific and, therefore, used *borbonicus* as the prior name for this taxon. Corbet and Hill (1980) followed Koopman (1975) in confining *borbonicus* to Madagascar and Reunion, and thus once again recognised *viridis* as a mainland species, a treatment followed by Swanepoel *et al.* (1980) and Koopman (in Honacki *et al.* 1982). Robbins *et al.* (1985) followed suit, but also listed *leucogaster* to accommodate *damarensis*, which they considered distinct from *viridis*, a treatment endorsed by Corbet and Hill (1991). Koopman (1993a) considered *damarensis* synonymous with *viridis*, but subsequently recognised both of these as only subspecies of *borbonicus* (Koopman 1994).

Karyotype:

Due to the systematic problems in the naming of African *Scotophilus*, it is not known to which species certain work refers. Both Schlitter *et al.* (1980) and Ruedas *et al.* (1990) karyotyped specimens from mainland Africa that were identified as *S. borbonicus*. Schlitter *et al.* (1980) reported $2n = 36$, $FN = 54$, $BA = 20$, an acrocentric X chromosome, and a metacentric Y chromosome. Whereas, Ruedas *et al.* (1990) reported $2n = 36$, $FN = 50$, $BA = 16$, an acrocentric X chromosome, and a metacentric Y chromosome. *Scotophilus borbonicus* has since been restricted to Madagascar, leaving the smaller mainland forms as *S. viridis* and *S. leucogaster*, but to which of these species the karyotype results relate is still unknown.

Scotophilus borbonicus (E. Geoffroy St.-Hilaire, 1803)

- *1803. *Vespertilio borbonicus* E. Geoffroy Saint-Hilaire, Cat. Mamm. Mus. Nat. Hist. nat., Paris, 55. Type locality: [France]: Ile Bourbon [=Reunion Island]. Type specimen: RMNH 28508 (Lectotype; "individu adulte monté, figuré dans la Mammalogie de Temminck, T.H. Pl. XLVII, fig. 6. Bourbon. Du voyage de M. Macé": see Goodman *et al.* (2005: 871)). Allen (1939a: 99), Kock (1969: 192) mentioned "Ann. Mus. d'Hist. Nat. Paris, 8: 201, pl. 46, 1806"
- ? *Scotophilus borbonicus*: Name combination.

Taxonomy:

Included equivocally in *leucogaster* by Hayman and Hill (1971: 50 - 51), but see Koopman (1975: 414 - 416). Hill (1980b) considered African *viridis* and *damarensis*, and possibly *leucogaster* to be conspecific with *borbonicus*; but C.B. Robbins *et al.* (1985) rejected any affinity with African mainland species. Also see comment under *leucogaster* and genus. Koopman (1986) included *viridis*, *damarensis*, and *nigritellus* (but not *leucogaster*) in this species.

Common names:

English: Lesser Yellow Bat, Lesser Yellow House Bat, Madagascar yellow house bat. French: Scotophile de Madagascar, Petite Chauve-souris jaune des maisons. Portuguese: Morcego amarelo pequeno.

Etymology of name:

Referring to "Ile Bourbon" where the type specimen was collected.

Conservation status:

Global- CR: A1c (Mickleburgh *et al.*, 2002: 22); CR A1c ver 2.3 (1994) (IUCN 2004).

General distribution:

Madagascar, Reunion Isl (Mascarene Isls). Records from Mauritius (Mascarene Isls) are erroneous, see Cheke and Dahl (1981: 217). Peterson *et al.* (1995) could not confirm its occurrence on Madagascar.

Molecular biology:

DNA - See Hooper and Van Den Bussche (2003) for the results of a specimen from Kenya. Karyotype, Protein / allozyme - Unknown.

Distribution based on voucher specimens:

Madagascar, Reunion.

Scotophilus dinganii (A. Smith, 1833)

1832. *Vespertilio epichrysus* Temminck, in Smuts, Enumer. Mamm. Capensium, 106. Type locality: Republic of South Africa: Cape Town. Allen (1939a) and Ellerman *et al.* (1953) regard this taxon as unidentifiable, besides which it appears to fall outside the known range of the species as a whole (see Roberts (1951: 90), Meester *et al.* (1986: 60), who include it with a question mark). However, if valid, this is the senior name for the species.
- *1833. *Vespertilio dinganii* A. Smith, S. Afr. Quart. J., ser. 2, 1 (2): 59. Type locality: Republic of South Africa: Between Port Natal (= Durban) and Delagoa Bay (=Maputo). Publication date: November 1833.
1852. *Nycticejus planirostris* Peters, Naturw. Reise Mossamb., Säugethiere, p. 65, pl; 17, fig. 1, a-e. Type locality: Mozambique: Zambezi, Tete. - Publication date: 1852.
1904. *Scotophilus nigrita colias* Thomas, Ann. Mag. Nat. Hist., ser. 7, 13 (75): 207. Type locality: Kenya: Fort Hall. Type specimen: BMNH 1902.7.6.11 (Holotype, M, presented by Mrs. Hinde, collection date: 25 January 1902). Publication date: 1 March 1904.
1906. *Scotophilus nigrita herero* Thomas, Ann. Mag. Nat. Hist., ser. 7, 17 (98): 174. Type locality: Namibia: Ovamboland, Olifants Vlei [c 18 S 17 30 E] (Ellerman *et al.* (1953) point out that this locality is not in Damaraland, as claimed by Thomas for both *herero* and *damarensis*: see Meester *et al.* (1986: 60)). Type specimen: BMNH 1907.1.1.449 (Holotype, ad F, skin and skull, collector: Mr. C.J. Andersson, collection date: 8 August 1859, original number 260, received in the Tomes collection). Publication date: 1 February 1906.
1946. *Scotophilus nigrita pondoensis* Roberts, Ann. Transv. Mus., 20 (4): 304. Type locality: Republic of South Africa: Transkei, Pondoland, Port St.Johns.
1951. *Vespertilio epichrysurus* Roberts, Mammals of South Africa: 90. Lapsus.
1958. *Scotophilus nigrita coreas* Eisentraut, Veröff. Überseemus. Bremen, (A) 3: 23. Lapsus for *colias* (see Kock, 1969: 193).
- ? *Scotophilus dinganii*: Name combination.

Taxonomy:

Placed in *leucogaster* by Koopman (1975: 414 - 416, as *nigrita*; 1986) and Koopman *et al.* (1978: 4 - 5); but see also Schlitter *et al.* (1980).

africaine, Chauve-souris jaune des maisons, Scotophile à ventre jaune. German: Gelbbäuchige Hausfledermaus. Portuguese: Morcego caseiro amarelo.

See also the discussion under the genus and under *nigrita* and *leucogaster*.

Palaeontological / archaeological records:
This species has been recovered from the upper Pleistocene at Border Cave, South Africa (Avery 1991: 6).

Figure 225. *Scotophilus dinganii*

Common names:

Afrikaans: Geel Dakvlermuis. English: Yellow House Bat, Dingaans House Bat, Yellow-bellied House Bat, Dingaans Yellow Bat, African Yellow Bat, African yellow house bat. French: Scotophile

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Griffin 2004b).
Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Senegal and Sierra Leone east over Benin (Capo-Chichi *et al.*, 2004: 163), Republic of the Congo (Dowsett *et al.*, 1991: 259) to Ethiopia (Lavrenchenko *et al.*, 2004: 131), Somalia, Djibouti (Pearch *et al.*, 2001: 398) and S Yemen and south to Malawi (Ansell and Dowsett, 1988: 38), Zambia, Zimbabwe, Botswana, Namibia, Angola (Cotterill, 2004: 262), South Africa.

Echolocation:

See Taylor (1999) and Taylor *et al.*, (2005).

Molecular biology:

DNA - See Hooper and Van Den Bussche (2003) for the results of a specimen from Tanzania.

Karyotype - Peterson and Nagorsen (1975), Schlitter *et al.* (1980) and Ruedas *et al.* (1990) all reported $2n = 36$. However, while Schlitter *et al.* (1980) reported FN = 52, BA = 18, an acrocentric X chromosome, and a metacentric Y chromosome, Ruedas *et al.* (1990) reported FN = 50, BA = 16, a submetacentric X chromosome, and a telocentric Y chromosome.

Protein / allozyme - Unknown.

Distribution based on voucher specimens:

Angola, Botswana, Burundi, Congo, Congo (Democratic Republic of the), Djibouti, Eritrea, Ethiopia, Ghana, Kenya, Malawi, Mozambique, Namibia, Nigeria, Sierra Leone, Somalia, South Africa, Sudan, Swaziland, Tanzania, Togo, Uganda, Zambia, Zimbabwe.

Figure 226. Distribution of *Scotophilus dinganii*

Scotophilus leucogaster (Cretzschmar, 1826)

- *1826. *Nycticejus leucogaster* Cretzschmar, in Rüppell, Atlas Reise Nördl. Afr., Zool. Säugeth., 71, pl. 28a, 1, 2. Type locality: Sudan: Kordofan, Brunnen Nedger (Nedger Well) [=Bir Nedger]. Type specimen: RMNH 27432 (Mertens (1925: 22) mentions SMF 4309 (old catalog II.O.1.b, coll. E. Rüppell, 1825) as lectotype). Publication date: 1826.
1861. *Nycticejus flavigaster* Heuglin, Nova Acta Acad. Cæs. Leop.-Carol., Halle, 29 (8): 5, 14. Type locality: Eritrea: Keren [c 15 45 N 38 20 E]. Publication date: 1861.
1861. *Nycticejus murino-flavus* Heuglin, Nova Acta Acad. Cæs. Leop.-Carol., Halle, 29 (8): 5, 15. Type locality: Ethiopia: near Massaua, M'kullu. Type specimen: ? (ad M). Publication date: 1861.
1877. *Nycticejus serratus* Heuglin, Reise in Nordost Afrika, 2: 35. Type locality: Ethiopia: "Sherq el Aqabah, am Araschkol und den benachbarten Granitgebirgen". Publication date: 1877. Mentioned as synonym of *Scotophilus nigrita leucogaster* by Allen (1939a: 99), so this might represent either *leucogaster* or *dinganii*.
1906. *Scotophilus damarensis* Thomas, Ann. Mag. Nat. Hist., ser. 7, 17 (98): 175. Type locality: Namibia: Ovamboland, Olifants Vlei [c 18 S 17 30 E]. Type specimen: BMNH 1907.1.1.463 (Holotype, ad M, skin and skull, collector: Mr. C.J. Andersson, collection date: 10 August 1859, original number: 276, received in the Tomes collection). Publication date: 1 February 1906. Included in *borbonicus* by Meester *et al.* (1986: 61), in *viridis* by Koopman (1993: 228), but in *leucogaster* by Simmons (2005).
1914. *Scotophilus atilis* G.M. Allen, Bull. Mus. Comp. Zool., 58: 350. Type locality: Sudan: Blue Nile, north of [Er] Roseires, Aradeiba. Type specimen: MCZ 14463 (holotype; ad M, skin and skull; collector: Glover M. Allen (Philips Sudan Expedition), collection date: 22 January 1913; original number: 73: see Helgen and McFadden, 2001: 147). Helgen and McFadden (2001: 147) also mention three paratypes (2 in MCZ [14610, 14611] and one exchanged with FMNH [former MCZ 14462]). Publication date: July 1914.
- ? *Scotophilus leucogaster*: Name combination.
- ? *Scotophilus nigrita leucogaster*: Name combination.

Taxonomy:

Does not include *damarensis*, see Koopman (1986); but see Robbins *et al.* (1985). Includes *nucella*; but see Robbins *et al.* (1985). For scope of this species see Koopman (1975: 414 - 416); as *nigrita* and Koopman *et al.* (1978: 4 - 5). However Robbins (1978: 212 - 213) has shown that the name *nigrita* was misapplied to another species, for which the next available name was *dinganii*, and which would be included in *leucogaster* if Koopman's (1975) reasoning were followed. However Schlitter *et al.* (1980) listed *dinganii* as distinct from *leucogaster*, as did Robbins *et al.* (1985). See Koopman (1986).

General distribution:

Mauritania and Senegal over Mali (Meinig, 2000: 105), Benin (Capo-Chichi *et al.*, 2004: 163) to Uganda (Kityo and Kerbis, 1996: 62), N Kenya and Ethiopia; Yemen, Saudi Arabia.

Molecular biology:

DNA - See Hooper and Van Den Bussche (2003) for the results of a specimen from Kenya.
Karyotype - See discussion in generic account.
Protein / allozyme - Unknown.

Common names:

English: Lesser Yellow House Bat, White-bellied House Bat, White-bellied Yellow Bat, Cretzschmar's Brown Bat. French: Scotophile à ventre blanc. German: Weißbäuchige Hausfledermaus.

Etymology of name:

From the Greek "*leugos*" and "*gaster*" meaning white-bellied (see Kozhurina, 2002: 16).

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Griffin 2004a).

Distribution based on voucher specimens:
Botswana, Cameroon, Central African Republic,
Chad, Ethiopia, Ghana, Guinea-Bissau, Kenya,
Malawi, Mozambique, Namibia, Nigeria, Senegal,
Sierra Leone, South Africa, Sudan, Tanzania,
Togo, Uganda, Zambia, Zimbabwe.

Figure 227. Distribution of *Scotophilus leucogaster*

Scotophilus marovaza Goodman, Ratrimomanarivo and Randrianandrianina, 2006

- *2006. *Scotophilus marovaza* Goodman, Ratrimomanarivo and Randrianandrianina, Acta Chiropterologica, 8(1): 21-37. Type locality: Madagascar: Province de Mahajanga - Marovaza [14 56 S 47 16 E, 5m asl]. Type specimens: FMNH 184050 (Holotype, ad M, skull and formalin, collector: S.M. Goodman and F.H. Ratrimomanarivo, collection date: 11 December 2004); MNHN 1984.433 (Paratype, collector: Goodman *et al.* (2006: 25) Alphonse Grandidier, as the collection date conforms to the period visited the village of Mahabo (Verin and Mantaux 1971: 22), collection date: 29 April 1869); UADBA 46965 (Paratype, locality: Madagascar: Antafinimihakatra, Parc National d' Ankarafantsika [16 16 S 46 48 E], collector: Felicien H. Randrianandrianina and Hanta Julie Razafimanahaka, collection number: RBJ 215, collection date: 24 November 2004); FMNH 184051, 184052, 184085, 184086 (Paratypes, locality: Madagascar: Province de Mahajanga - Marovaza [14 56 S 47 16 E, 5 m asl], collector: Steven M. Goodman and Mamy Ravokatra, collection date: 21 - 22 April 2005).

Taxonomy:

See Goodman *et al.* (2006a).

Habitat:

See Goodman *et al.* (2006a).

Etymology of the name:

The name of the type locality (Marovaza) is placed in apposition to the generic name (Goodman *et al.*, 2006a).

Habits:

Unknown.

Palaeontological / archaeological records:

Unknown.

Roost:

The type specimen was collected day roosting in dry palm leaves (*Bismarckia nobilis*) forming the roof of a building (Goodman *et al.*, 2006a).

Conservation status:

Global- Not assessed (IUCN 2004).

Migration:

Unknown.

General distribution:

Madagascar (Goodman *et al.* 2006a).

Diet:

Unknown.

Geographic variation:

Unknown.

Predators:

Unknown.

General description of external morphology:

See Goodman *et al.* (2006a).

Population:

Structure and density - Unknown.

General description of cranial and dental morphology:

See Goodman *et al.* (2006a).

Lifespan:

Unknown.

Detailed morphology:

For a description of the crania, teeth, ears and tragus see Goodman *et al.* (2006a).

Activity and behaviour:

Unknown.

Functional morphology:

Unknown.

Reproduction and ontogeny:

See Goodman *et al.* (2006a).

Sexual dimorphism:

Unknown.

Mating:

Unknown.

Echolocation:

Unknown.

Post-natal development:

Unknown.

Molecular biology:

DNA, karyotype, protein / allozyme - Unknown.

Parasites:

Unknown.

Viruses:

Unknown.

Utilization:
Unknown.

Anthropophilous:
Known to roost in the palm roofs of houses
(Goodman *et al.*, 2006a).

Scotophilus nigrita (Schreber, 1774)

- *1774. *Vespertilio Nigrita* Schreber, Die Säugethiere, 1 (8): pl. 58 + 1 (9): 171. Type locality: Senegal: no specific locality. Publication date: 1774.
- 1875. *Scotophilus gigas* Dobson, Ann. Mag. Nat. Hist., ser. 4, 16 (92): 122. Type locality: Nigeria: Lagos. Type specimen: BMNH 1872.10.24.5 (ad F, skull and alcoholic). Publication date: 1 August 1875.
- 1965. *Scotophilus alvenslebeni* Dalquest, J. Mamm., 46 (2): 258. Type locality: Mozambique: S bank Save River, Zinave National Park ("S Bank Save River, bei Zinave, 212 km SSW Beira": see Kock 1969: 204).
- ? *Scotophilus nigrita*: Name combination.

Taxonomy:

For a review of this species see Robbins (1978). The identity of this species is clear and *nigrita* is the senior synonym of *gigas*. Most specimens called *nigrita* prior to 1978 should be called *dinganii* (see Robbins, 1978: 212 - 213).

Common names:

Afrikaans: Groot geel dakvlermuis. English: Giant House Bat, Giant Brown House Bat, Brown House Bat, Great Brown House Bat, Giant Yellow House Bat, Schreber's Yellow Bat, Geat Brown Bat, Giant brown bat. French: Grand scotophile africain. German: Riesen-Hausfledermaus. Portuguese: Morcego gigante amarelo das casas.

Etymology of name:

From "*nigrita*" meaning black.

Most of the colloquial names refer to its colour (yellow) and being a House bat.

The colloquial name Schreber's Yellow bat refers to J. von Schreber, who originally described the species (Taylor 2005).

Conservation status:

Global- LR/nt (Baillie and Groombridge 1996); NT ver 3.1 (2001) (IUCN 2004; Cotterill 2004d).

Regional- South Africa- considered a vagrant not assessed, not recorded in SA (Friedmann and Daly 2004).

General distribution:

Senegal to Uganda (Kityo and Kerbis, 1996: 63), Sudan and Kenya to Zimbabwe, Malawi (Ansell and Dowsett, 1988: 37) and Mozambique.

Figure 228. Distribution of *Scotophilus nigrita*

Distribution based on voucher specimens: Benin, Congo (Democratic Republic of the), Ethiopia, Ghana, Kenya, Malawi, Nigeria, Senegal, Somalia, Sudan, Tanzania, Togo, Zimbabwe.

Scotophilus nucella Robbins, 1984

- *1984. *Scotophilus nucella* Robbins, Ann. Kon. Mus. Mid. Afr. Zool. Wetensch., 273: 19 (for 1983). Type locality: Ghana: Eastern region, 1 mi N Nkawkaw [06 33 N 00 44 W]. Type specimen: USNM 412141 (ad M, skin and skull, collector Bruce J. Hayward, collection date 5 August 1967).

Taxonomy:

Included in *leucogaster* by Koopman (1993a: 227), Grubb *et al.* (1998: 91).

Common names:

English: Lesser Nut-coloured House Bat, Rainforest House Bat, Robbins's House Bat, Nucella House Bat, Little Nut-coloured House Bat, Robbins's Yellow Bat. French: Scotophile des hauteurs, Scotophile de Robbins. German: Robbins Hausfledermaus.

Etymology of name:

nucella is a diminutive of *nux*. Following the rules for construction of a diminutive, the latin root of *nux* is used (= "*nuc*"). Although *Scotophilus* is masculine in gender, formation of a diminutive of a noun in apposition (*nux*) must retain the same gender as its root (*nuc*) which is feminine. The only ending then possible are *-ula* or *-ella*.

Conservation status:

Global- VU A2a; B2ab(iii) ver 3.1 (2001) (IUCN 2004; Fahr 2004b).

General distribution:

Known from the high forest vegetation zone in Ghana and Uganda, but it may occur in the high forest areas of West, Central and East Africa (Robbins 1984).

Figure 229. Distribution of *Scotophilus nucella*

Distribution based on voucher specimens:
[Ghana](#).

Scotophilus nux Thomas, 1904

- *1904. *Scotophilus nigrita nux* Thomas, Ann. Mag. Nat. Hist., ser. 7, 13 (75): 208. Type locality: Cameroon: Efulen. Type specimen: BMNH 1903.2.4.5 (Holotype, ad M, collector: Mr. G.L; Bates) Publication date: 1 March 1904.
- ? *Scotophilus dinganii nux*: Name combination.
- ? *Scotophilus nux*: Name combination.

Taxonomy:

S. nux has been most often recognized as a subspecies of *nigrita*, when *nigrita* was used for the species now called *dinganii*; see Allen (1939a), Rosevear (1965), and Hayman and Hill (1971: 50). Koopman *et al.* (1978: 4 - 5) listed it as a subspecies of *leucogaster*. Grubb *et al.* (1998: 90) include *nux* as a subspecies of *dinganii*.

Common names:

English: Nut-coloured House Bat, Dark House Bat, Nut-colored yellow bat, Nux yellow house bat. French: Scotophile nux, Scotophile noisettes. German: Nußfarbene Hausfledermaus.

Etymology of name:

From the Latin "*nux*" meaning nut.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Fahr 2004q).

General distribution:

High forest zones from Sierra Leone over Republic of the Congo to Kenya.

Figure 230. Distribution of *Scotophilus nux*

Distribution based on voucher specimens: "Congo", Cameroon, Congo (Democratic Republic of the), Côte d'Ivoire, Kenya.

Scotophilus robustus A. Milne-Edwards, 1881

- *1881. *Scotophilus robustus* A. Milne-Edwards, C. R. Acad. Sci., Paris, 91: 1035. Type locality: Madagascar: no specific locality. Goodman *et al.* (2005: 873) mention "entre Foulpointe et le lac d'Alaoutre" in the central portion of the eastern humid forest. Type specimen: MNHN 1997.1883a (F, alcoholic, skull not removed, collector: M. Humblot, nr 218: see Rode 1941, Peterson *et al.*, 1995: 112, Goodman *et al.* (2005: 873)). Goodman *et al.* (2005: 873) also mention that the jar with the type specimen contains two specimens (1997.1883a and 1997.1883b), but that not can be determined which of the two is the holotype.). Publication date: 1881.
- ? *Scotophilus nigrita robustus*: Name combination.

Taxonomy:

Recognized as a subspecies of *nigrita* (when *nigrita* was used for the species now called *dinganii*) by Hayman and Hill (1971: 50). However, Robbins *et al.* (1985) considered it specifically distinct from *dinganii* and *borbonicus*.

Common names:

English: Robust yellow bat. French: Chauve-souris domestique malgache, Scotophile robuste.

Conservation status:

Global- LR/nt ver 2.3 (1994).

General distribution:

N Madagascar (Russ *et al.*, 2001).

Distribution based on voucher specimens:

Madagascar.

Scotophilus tandrefana Goodman, Jenkins and Rattrimomanarivo, 2005

- *2005. *Scotophilus tandrefana* Goodman, Jenkins and Rattrimomanarivo, Zoosystema, 27 (5): 875. Type locality: Madagascar: Mahajanga province, just outside the limit of the Parc national de Bemaraha, 1.8 km SE Bekopake and 0.6 km NE Andadoany [19 08 S 44 49 E, 50 m]? Type specimen UADBA 46923 (ad M, Coll. R.K.B. Jenkins and F.H. Rattrimomanarivo, collection date 27 July 2003, original number RB 161).

Taxonomy:

See Goodman *et al.* (2005).

Common names:

None known.

Etymology of name:

From the Malagasy meaning "from the west" (see Goodman *et al.*, 2005: 875).

Conservation status:

Global- Not assessed (IUCN 2004).

General distribution:

Known from three localities in western Madagascar.

Distribution based on voucher specimens:

Madagascar.

Figure 231. Distribution of *Scotophilus tandrefana*

Scotophilus viridis (Peters, 1852)

- *1852. *Nycticejus viridis* Peters, Naturw. Reise Mossamb., Säugethiere, p. 67, pl. 17, fig. 2, a-e. Type locality: Mozambique: Mozambique Island [15 S 40 42 E]. - Publication date: 1852.
1899. *Scotophilus nigrnellus* de Winton, Ann. Mag. Nat. Hist., ser. 7, 4 (23): 355. Type locality: Ghana: Gambaga [10 32 N 00 26 W]. Type specimen: BMNH 1899.6.15.9 (Holotype). Publication date: 1 November 1899.
- ? *Scotophilus leucogaster nigrnellus*: Name combination.
- ? *Scotophilus viridis*: Name combination.

Taxonomy:

Included in *leucogaster* by Hayman and Hill (1971: 50), but see Koopman (1975: 414 - 416) and Schlitter *et al.* (1980). Includes *nigrnellus*, see Robbins *et al.* (1985). Included *damarensis*, but see Robbins *et al.* (1985).

Echolocation:

See Taylor (1999).

Molecular biology:

DNA - See Hooper and Van Den Bussche (2003) for the results of a specimen from Tanzania.
Karyotype - See discussion in generic account.
Protein / allozyme - Unknown.

Figure 232. *Scotophilus viridis*

Common names:

Afrikaans: Klein geel dakvlermuis. English: Green House Bat, Greenish Yellow Bat, Lesser Yellow House Bat. French: Scotophile verdâtre, Petit scotophile africain. German: Grünliche Hausfledermaus.

Conservation status:

Global- LR/lc (Baillie and Groombridge 1996); LC ver 3.1 (2001) (IUCN 2004; Griffin 2004c).
Regional- South Africa- LC ver 3.1 (2001) (Friedmann and Daly 2004).

General distribution:

Senegal over Benin (Capo-Chichi *et al.*, 2004: 163) to Ethiopia south to Angola, Namibia, Botswana, Zambia, Zimbabwe (Cotterill, 2004: 262), Malawi (Ansell and Dowsett, 1988: 38) and South Africa.

Figure 233. Distribution of *Scotophilus viridis*

Distribution based on voucher specimens:

Cameroon, Central African Republic, Cote D'Ivoire, Ethiopia, Ghana, Kenya, Mali, Mozambique, Nigeria, Senegal, South Africa, Sudan, Swaziland, Tanzania, The Gambia, Togo, Uganda, Zambia, Zimbabwe.

Acknowledgements

The editors wish to thank all the contributors, and especially the curators and collection managers of the museums which were ever so helpful to provide information concerning the specimens in their holdings: Dr Paula Jenkins, Ms Daphne Hills and Ms Louise Tomsett (Natural History Museum, London); Wim Wendelen (Royal Museum of Central Africa, Tervuren); Dr. Paul Bates, Dr. David Harrison and Malcolm Pearch (Harrison Institute, Sevenoaks); Dr. Peter Taylor (Durban Natural Science Museum); Ms Denise Hamerton (Iziko South African Museum); Dr. Lloyd Wingate (Amatola Museum); Dr. Nico Avenant, Ms Wanda Kaiser (National Museum, Bloemfontein); Mr Woody Cotterill (National Museum, Bulawayo); Dr. Fritz Dieterlen, Dr. Doris Möricke (Staatliches Museum für Naturkunde, Stuttgart); Dr. Alfred Feiler (Staatliches Museum für Tierkunde, Dresden); Ms Beryl Wilson-Aitchison (Macgregor Museum, Kimberley); Dr. Michel Tranier, Dr. J. Cuisin (Museum National D'Histoire Naturelle, Paris), Dr. Nancy Simmons (American Museum of Natural History, New York), Karen Cebra (California Academy of Sciences, San Francisco), Suzanne B. McLaren (Carnegie Museum, Pittsburgh), J. Crawford Cabral (Centro de Zoologia, Lisbon), Dr. David Happold, Dr. Meri Happold (David C.D. Happold Collection, Canberra), Dr. Steve M. Goodman, Dr. Bruce D. Patterson, Dr. Bill Stanley (Field Museum of Natural History, Chicago), Dr. Andres Demeter, Dr. Gabor Csorba (Hungarian Natural History Museum, Budapest), Dr. Xavier Misonne, Dr. George Lenglet (Koninklijk Belgisch Instituut voor Natuurwetenschappen, Brussels), Dr. Robert M. Timm (University of Kansas Museum of Natural History, Lawrence), Mrs. Maria E. Rutzmoser (Museum of Comparative Zoology, Harvard), Dr. Louis de Roguin (Muséum d'Histoire Naturelle de Genève), Dr. Oresta Elter (Museo ed Istituto Zoologia, Torino), Dr. Luigi Cagnolaro (Museo Civico di Storia Naturale, Milan), Mrs. Laura Abraczinskas (Michigan State University, Mammal Collection, East Lansing), Frederick B. Stangl (Midwestern State University, Wichita Falls), Paolo Agnelli (Museo Zoologico de "la Specola", Florence), Tad Theimer (Northern Arizona University, Flagstaff), Paul Schmid (Naturhistorisches Museum Bern), Dr. Frederike Spitzenberger (Naturhistorisches Museum, Vienna), Olav Grönwall (Naturhistoriska Riksmuseet Stockholm), Anthony A. Echelle (Oklahoma State University, Stillwater), Dr. Patrick Barrière (Université de Rennes), Dr. Chris Smeenk (Nationaal Natuurhistorisch Museum, Leiden), Dr. Judith Eger, Dr. Burton Lim (Royal Ontario Museum, Toronto), Ms Katrin Krohmann, Dr. Dieter Kock (Senckenberg Museum, Frankfurt), Dr. Michael D. Carleton (United States National Museum, Washington), Bruce J. Hayward (Western New Mexico University), Fred Sibley (Western New Mexico University), Dr. Rainer Hutterer (Zoologisches Forschungsinstitut und Museum Alexander Koenig, Bonn), Dr. Peter Van Bree, Dr. Wim Bergmans (Zoologisch Museum, Universiteit Amsterdam), Dr. Alex Borissenko, Dr. Sergey V. Kruskop (Zoological Museum Moscow University), Dr. Hans Baagoe (Zoologisk Museum Universitet, Copenhagen), Dr. C. Claude (Zoologisches Museum der Universität, Zürich).

The editors are also indebted to Dr. Dieter Kock, and the late Dr. Karl F. Koopman and John Edwards Hill for their stimulating discussions over the years.

For providing electronic information about specimens in their collections: Museum für naturkunde, Berlin; National Museum, Bloemfontein; and Transvaal Museum, Pretoria.

For permission to include images of type specimens: The Natural History Museum, London; and Transvaal Museum, Pretoria.

For assistance with citations and layout, Ms Tersia Perrigill (Transvaal Museum). For assistance with data entry, Ms Shavane Maduray (Pretoria University and Transvaal Museum).

The NRF for providing financial support (GUN 2073200) for the purchase of TAXIS licenses, equipment for digitizing specimens, and a weeks visit to The Natural History Museum, London.

Glossary

The following abbreviations have been used:

<i>2n</i>	diploid number
<i>a.</i>	adjective
Art.,	Arts. Article, Articles of the Code
BA	total number of biarmed autosomal chromosomes
CR	Critically Endangered
DD	Data Deficient
e.g.	for example (Latin: <i>exempli gratia</i>)
EN	Endangered
EW	Extinct in the wild
EX	Extinct
FN	fundamental number of autosomal chromosome arms
ICZN	International Commission of Zoological Nomenclature
i.e.	that is (Latin: <i>id est</i>)
LC	Least Concern
<i>n.</i>	noun
NE	Not Evaluated
<i>neut.</i>	Neuter
NT	Near Threatened
<i>pl.</i>	plural
<i>q.v.</i>	which see (Latin: <i>quod vide</i>)
RE	Regionally Extinct
<i>sing.</i>	Singular
<i>v.</i>	verb
VU	Vulnerable
X	female sex chromosome
Y	male sex chromosome

The glossary follows the definitions from:

International Commission on Zoological Nomenclature. (1999). *International Code of Zoological Nomenclature*. 4th edition. The International Trust for Zoological Nomenclature, London.

IUCN. (2001). *IUCN Red List Categories and Criteria: Version 3.1*. IUCN Species Survival Commission. IUCN, Gland, Switzerland and Cambridge, UK. ii + 30 pp.

IUCN. (2003). *Guidelines for Application of IUCN Red List Criteria at Regional Levels: Version 3.0*. IUCN Species Survival Commission. IUCN, Gland, Switzerland and Cambridge, UK. ii + 26 pp.

allotype *n.* See under type.

Articles *n.* The mandatory provisions of the ICZN

available name A scientific name applied to an animal taxon that is not excluded under Article 1.3 and that conforms to the provisions of Articles 10 to 20.

Code *n.* (1) An abbreviation of the title International Code of Zoological Nomenclature

conserved name A name otherwise unavailable or invalid that the Commission, by the use of its plenary power, has enabled to be used as a valid name by removal of the known obstacles to such use (see conserve).

cotype *n.* See under type.

Critically Endangered (CR) A taxon is Critically Endangered when the best available evidence indicates that it meets any of the criteria A to E for Critically Endangered (see Section V), and it is therefore considered to be facing an extremely high risk in the wild.

Data Deficient (DD) A taxon is Data Deficient when there is inadequate information to make a direct, or indirect, assessment of its risk of extinction based on its distribution and/or population status. A taxon in this category may be well studied, and its biology well known, but appropriate data on abundance and/or distribution are lacking. Data Deficient is therefore not a category of threat. Listing of taxa in this category indicates that more information is required and acknowledges the possibility that future research will show that threatened classification is appropriate. It is important to make positive use of whatever data are available. In many cases great care should be exercised in choosing between DD and a threatened status. If the range of a taxon is suspected to be relatively circumscribed, and a considerable period of time has

elapsed since the last record of the taxon, threatened status may well be justified.

Date of publication *n.* Of a work (and of a contained name and nomenclatural act): the date on which copies of the work become available by purchase or free distribution. If the actual date is not known, the date to be adopted is regulated by the provisions of Article 21.2-7.

description *n.* A statement in words of taxonomic characters of a specimen or a taxon [Arts. 12,13].

original description The description of a nominal taxon when it is established.

Endangered (EN) A taxon is Endangered when the best available evidence indicates that it meets any of the criteria A to E for Endangered (see Section V), and it is therefore considered to be facing a very high risk of extinction in the wild.

extant *a.* (1) Of a taxon: having living representatives. (2) Of specimen: still in existence.

Extinct (EX) *a.* Of a taxon: having no living representatives. IUCN - A taxon is Extinct when there is no reasonable doubt that the last individual has died. A taxon is presumed Extinct when exhaustive surveys in known and/or expected habitat, at appropriate times (diurnal, seasonal, annual) throughout its historic range have failed to record an individual. Surveys should be over a time frame appropriate to the taxon's life cycle and life form (IUCN 2001).

Extinct in the Wild (EW) *a.* A taxon is extinct in the Wild when it is known only to survive in captivity or as a naturalized population (or populations) well outside the past range. A taxon is presumed Extinct in the Wild when exhaustive surveys in known and/or expected habitat, at appropriate times (diurnal, seasonal, annual), throughout its historic range have failed to record an individual. Surveys should be over a time frame appropriate to a taxon's life cycle and life form.

homonym *n.* (1) In the family group: each of two or more available names having the same spelling, or differing only in suffix, and denoting different nominal taxa. (2) In the genus group: each of two or more names having the same spelling, and denoting different nominal taxa. (3) In the species group: each of two or more available specific or subspecific names having the same spelling, or spellings, or spellings deemed under Article 58 to be the same, and established for different nominal taxa, and either originally (primary homonymy) or subsequently (secondary homonymy) combined with the same generic name [Art. 53.3].

homonymy *n.* (1) The relationship between homonyms. (2) The state of being homonymous.

junior homonym Of two homonyms: the latter established, or in the case of simultaneous establishment to one not given precedence under Article 24.

lapsus calami (*sing.* and *pl.*), *n.* A Latin term meaning "slip (or slips) of the pen", i.e. an error (or errors) made by an author in writing a text, such as a misspelling of a name; contrasted with copyist's or printer's errors [Art. 32.5.1].

Least Concern (LC) A taxon is Least Concern when it has been evaluated against the criteria and does not qualify for Critically Endangered, Endangered, Vulnerable or Near Threatened. Widespread and abundant taxa are included in this category.

monotypy *n.* The situation arising (1) when an author establishes a nominal genus or subgenus for what he or she considers to be a single taxonomic species and denotes that species by an available name (the nominal species so named is the type-species by monotypy) [Art. 68.3]; or (2) when an author bases a nominal species-group taxon on a single specimen but does not explicitly designate it as holotype (holotype by monotypy; see Article 73.1.2).

multiple original spelling See under spelling.

Near Threatened (NT) A taxon is Near Threatened when it has been evaluated against the criteria but does not qualify for Critically Endangered, Endangered or Vulnerable now, but is close to qualifying for or is likely to qualify for a threatened category in the near future.

new replacement name (*nomen novum*) A name established expressly to replace an already established name. A nominal taxon denoted by a new replacement name (*nomen novum*) has the same name-bearing type as the nominal taxon denoted by the replaced name [Arts. 67.8, 72.7]. See emendation, substitute name.

***nomen dubium* (*pl. nomina dubia*)** *n.* A Latin term meaning "a name of unknown or doubtful application."

nomen novum (pl. nomina nova) *n.* A Latin term equivalent to new replacement name.

nomen nudum (pl. nomina nuda) *n.* A Latin term referring to a name that, if published before 1931, fails to conform to Article 12; or, if published after 1930, fails to conform to Article 13. A *nomen nudum* is not an available name, and therefore the same name may be made available later for the same or a different concept; in such a case it would take authorship and date [Arts. 50, 21] from that act of establishment, not from any earlier publication as a *nomen nudum*.

nomen oblitum (pl. nomina oblita) *n.* A Latin term (meaning forgotten name) applied after 1 January 2000 to a name, unused since 1899, which as a result of an action taken under Article 23.9.2 does not take precedence over a younger synonym or homonym in prevailing usage; the younger name which takes precedence over the *nomen oblitum* may be called a *nomen protectum (q.v.)*. The term *nomen oblitum* was also applied to a disused senior synonym rejected between 6 November 1961 and 1 January 1973 under Article 23b of the Code editions then in force (see Article 23.12.2). *Nomina oblita* remain available names; see Articles 23.9 and 23.12 for conditions controlling their use as valid names.

nomen protectum *n.* A Latin term (meaning protected name) applied to a name which has been given precedence over its unused senior synonym or senior homonym relegated to the status of *nomen oblitum (q.v.)*, and see Article 23.9.2).

Not Evaluated (NE) A taxon is Not Evaluated when it has not yet been evaluated against the criteria.

primary homonym Each of two or more identical specific or subspecific names established for different nominal taxa and originally combined with the same generic name [Art. 57.2]. For variant spellings deemed to be identical see Article 58.

Regionally Extinct (RE) Category for a taxon when there is no reasonable doubt that the last individual potentially capable of reproduction within the region has died or has disappeared from the wild in the region, or when, if it is a former visiting taxon, the last individual has died or disappeared in the wild from the region. The setting of any time limit for listing under RE is left to the discretion of the regional Red List authority, but should not normally pre-date 1500 AD.

rejected name (1) A name which, under the provisions of the Code, cannot be used as a valid name and which is set aside in favour of another name. (2) A name which, as a matter of taxonomic judgment, is either treated as a junior subjective synonym (*q.v.*) of a name used as valid or is believed not to be applicable to the taxon under consideration.

senior homonym Of two homonyms: the first established, or in the case of simultaneous establishment the one given precedence under Article 24.

Sensu lato (s. lat. or s.l.) A Latin term meaning "in the wide sense". Contrast with *sensu stricto (s. str.)*.

Sensu stricto (s. str. or s.s.) A Latin term meaning "in the strict sense". Often used in conjunction with a name when referring to the nominal taxon in the narrow sense of its subordinate nominotypical taxon (contrast with *sensu lato (s. lat.)*).

sensu A Latin term meaning "in the sense of". Often used to refer to the usage of a name by a (cited) author in a sense different from that of the original author or some other previous author. See also *auctorum*.

species (sing. and pl.) *n.* (1) The rank next below the genus group; the basic rank of zoological classification. (2) A taxon at the rank of species.

species group *n.* In the zoological classification, the lowest-ranking group of taxa the names of which are regulated by the Code. The species group includes all taxa at the ranks of species and subspecies [Art. 45.1].

species inquirenda (pl. species inquirendae) *n.* A Latin term meaning a species of doubtful identity needing further investigation.

specimen *n.* An example of an animal, or a fossil or work of an animal, or of a part of these. See Article 72.5 for the kinds of specimen eligible to be name-bearing types of nominal species-group nominal taxa.

spelling

subsequent monotypy The situation arising when a nominal genus or subgenus was established before 1931 without any included nominal species, and when only a single taxonomic species denoted by an available name was first subsequently referred to it [Art. 69.3].

suppression, *n.* (suppress, *v.*) A ruling by the Commission, using its plenary power, (1) that a work is to be deemed, for nomenclature purposes, as unpublished, or that names and acts in it are not available; or (2) that an available name is never to be used as valid because (a) it is available only for the purpose of homonymy ("partial suppression") or (b) it is not available for the purposes of priority and homonymy ("total suppression"; but a totally suppressed species-group name may still denote the type species of a nominal genus or subgenus [Art. 81.2.1]); or (3) that an available name is only to be used as valid under stated conditions (e.g. when not considered a synonym of a particular later name) ("conditional suppression").

synonym *n.* Each of two or more names of the same rank used to denote the same taxonomic taxon.

junior synonym Of two synonyms: the later established, or in the case of simultaneous establishment that not given precedence under Article 24. See also Article 23.9.

objective synonym Each of two or more synonyms that denote nominal taxa with the same name-bearing type, or (in the cases of family-group and genus-group taxa) that denote nominal taxa with name-bearing types whose own names are themselves objectively synonymous.

senior synonym Of two synonyms: the earlier established, or in the case of simultaneous establishment that given precedence under Article 24. See also Article 23.9.

subjective synonym Each of two or more names whose synonymy is only a matter of individual opinion. i.e. it is not objective. See also Article 61.3.1.

synonymy *n.* (1) The relationship between synonyms. (2) A list of synonyms.

syntype *n.* See under type.

taxon, (*pl.* taxa) *n.* A taxonomic unit, whether named or not: i.e. a population, or group of populations of organisms which are usually inferred to be phylogenetically related and which have characters in common which differentiate (*q.v.*) the unit (e.g. a geographic population, a genus, a family, an order) from other such units. A taxon encompasses all included taxa of lower rank (*q.v.*) and individual organisms. The Code fully regulates the names of taxa only between and including the ranks of superfamily and subspecies. (2) A species or infraspecific entity whose extinction risk is being assessed.

taxonomic information

taxonomy, *n.* (taxonomic, *a.*) The theory and practice of classifying organisms. See taxonomic information, taxonomic taxon.

topotype See under type.

type *n.* A term used alone, or forming part of a compound term, to denote a particular kind of specimen or taxon.

allotype A term, not regulated by the Code, for a designated specimen of opposite sex to the holotype [Recommendation 72A].

cotype A term not recognized by the Code, formerly used for either syntype or paratype, but that should not now be used in zoological nomenclature [Recommendation 73E].

genotype A term not recognized by the Code, formerly used for type species, but that should not now be used in zoological nomenclature [Recommendation 67A].

holotype The single specimen designated or otherwise fixed as the name-bearing type of a nominal species or subspecies when the nominal taxon is established.

lectotype A syntype designated as the single name-bearing type specimen subsequent to the establishment of a nominal species or subspecies [Art. 74].

name-bearing type The type genus, type species, holotype, lectotype, series of syntypes (which together constitute the name-bearing type) or neotype that provides the objective standard of reference whereby the application of the name of a nominal taxon can be determined.

neotype The single specimen designated as the name-bearing of a nominal species or subspecies when there is a need to define the nominal taxon objectively and no name-bearing type is believed to be extant. If stability and universality are threatened, because an existing name-bearing type is either taxonomically

inadequate or not in accord with the prevailing usage of a name, the Commission may use its plenary power to set aside that type and designate a neotype.

paralectotype Each specimen of a former syntype series remaining after the designation of a lectotype [Art. 721.3, Recommendation 74F].

paratype Each specimen of a type series other than the holotype [Recommendation 73D].

syntype Each specimen of a type series (*q.v.*) from which neither a holotype nor lectotype has been designated [Arts. 72.1.2, 73.2, 74]. The syntypes collectively constitute the name-bearing type.

topotype, *n.* (topotypic, *a.*) A term, not regulated by the Code, for a specimen originating from the type locality of the species or subspecies to which it is thought to belong, whether or not the specimen is part of the type series.

type genus *n.* The nominal genus that is the name-bearing type of a nominal family-group taxon.

type host *n.* The host species with which the name-bearing type of a nominal species or subspecies was associated [Recommendation 76A.1].

type locality *n.* The geographical place of capture, collection, or observation of the name-bearing type of a nominal species or subspecies [Art. 76.1, Recommendation 76A].

type series *n.* The series of specimens, defined in Articles 72.4 and 73.2, on which the original author bases a new nominal species-group taxon. In the absence of a holotype designation, any such specimen is eligible for subsequent designation as the name-bearing type (lectotype); pending lectotype designation, all the specimens of the type series are syntypes and collectively they constitute the name-bearing type. Excluded from the type series are any specimens that the original author expressly excludes or refers to as distinct variants, or doubtfully includes in the taxon.

type species *n.* The nominal species that is the name-bearing type of a nominal genus or subgenus.

type specimen A term used in previous editions of the Code for a holotype, lectotype or neotype, or for any syntype; also used generally for any specimen of the type series (*q.v.*).

Vagrant A taxon that is currently found only occasionally within the boundaries of a region.

Visitor (also, visiting taxon) A taxon that does not reproduce within a region but regularly occurs within its boundaries either now or during some period of the last century. Regions have several options on how to decide the boundaries between visitors and vagrants, e.g., using a preset percentage of the global population found in the region or predictability of occurrence.

Vulnerable (VU) A taxon is Vulnerable when the best available evidence indicates that it meets any of the criteria A to E for Vulnerable (see Section V), and it is therefore considered to be facing a high risk of extinction in the wild.

Appendices

Appendix 1: Current Taxonomy

A taxonomical overview of the taxa covered in this report. The order in which these taxa are presented is alphabetically sorted on the hierarchical categories from high (order) to low (subspecies).

The "Taxis_id" field contains the number used for the taxon in the African Chiroptera Database, and is included for reference with the database.

Category, Name and Author	Taxis_id
Order CHIROPTERA Blumenbach, 1779	242
Suborder PTEROPODIFORMI	243
Infraorder PTEROPODIFORMACEI	505
Superfamily PTEROPODOIDEA	508
Family PTEROPODIDAE Bonaparte, 1838	244
Subfamily MACROGLOSSINAE Gray, 1866	417
Genus <i>Megaloglossus</i> Pagenstecher, 1885	399
Species <i>Megaloglossus woermanni</i> Pagenstecher, 1885	400
Subfamily PTEROPODINAE Gray, 1821	416
Genus <i>Casinycteris</i> Thomas, 1910	170
Species <i>Casinycteris argynnis</i> Thomas, 1910	171
Genus <i>Eidolon</i> Rafinesque, 1815	85
Species <i>Eidolon dupreanum</i> (Schegel, 1867)	185
Species <i>Eidolon helvum</i> (Kerr, 1792)	99
Subspecies <i>Eidolon helvum helvum</i> (Kerr, 1792)	183
Genus <i>Epomophorus</i> Bennett, 1836	83
Species <i>Epomophorus angolensis</i> Gray, 1870	97
Species <i>Epomophorus anelli</i> Bergmans and Van Strien, 2004	476
Species <i>Epomophorus gambianus</i> (Ogilby, 1835)	95
Subspecies <i>Epomophorus gambianus crypturus</i> Peters, 1852	96
Subspecies <i>Epomophorus gambianus gambianus</i> (Ogilby, 1835)	186
Subspecies <i>Epomophorus gambianus pousarguesi</i> Trouessart, 1904	152
Species <i>Epomophorus grandis</i> (Sanborn, 1950)	155
Species <i>Epomophorus labiatus</i> (Temminck, 1837)	153
Subspecies <i>Epomophorus labiatus minor</i> Dobson, 1880	154
Species <i>Epomophorus minimus</i> Claessen & De Vree, 1991	401
Species <i>Epomophorus wahlbergi</i> (Sundevall, 1846)	94
Genus <i>Epomops</i> Gray, 1866	84
Species <i>Epomops buettikoferi</i> (Matschie, 1899)	160
Species <i>Epomops dobsonii</i> (Bocage, 1889)	98
Species <i>Epomops franqueti</i> (Tomes, 1860)	159
Genus <i>Hypsignathus</i> H. Allen, 1862	161
Species <i>Hypsignathus monstrosus</i> H. Allen, 1862	162
Genus <i>Lissonycteris</i> K. Andersen, 1912	199
Species <i>Lissonycteris angolensis</i> (Bocage, 1898)	101
Subspecies <i>Lissonycteris angolensis angolensis</i> (Bocage, 1898)	287
Subspecies <i>Lissonycteris angolensis ruwenzorii</i> (Eisentraut, 1965)	289
Species <i>Lissonycteris goliath</i> Bergmans, 1997	200
Species <i>Lissonycteris petraea</i> Bergmans, 1997	290
Species <i>Lissonycteris smithii</i> (Thomas, 1908)	288
Genus <i>Micropteropus</i> Matschie, 1899	156
Species <i>Micropteropus intermedius</i> Hayman, 1963	158
Species <i>Micropteropus pusillus</i> (Peters, 1868)	157
Genus <i>Myonycteris</i> Matschie, 1899	201
Subgenus <i>Myonycteris (Myonycteris)</i> Matschie, 1899	418
Species <i>Myonycteris (Myonycteris) brachyptera</i>	421
Species <i>Myonycteris (Myonycteris) relicta</i> Bergmans, 1980	202
Species <i>Myonycteris (Myonycteris) torquata</i> (Dobson, 1878)	422
Subspecies <i>Myonycteris (Myonycteris) torquata leptodon</i> K. Andersen, 1908	423
Subspecies <i>Myonycteris (Myonycteris) torquata torquata</i> (Dobson, 1878)	424
Subspecies <i>Myonycteris (Myonycteris) torquata wroughtoni</i> K. Andersen, 1908	425
Subgenus <i>Myonycteris (Phygetis)</i> K. Andersen, 1912	419
Species <i>Myonycteris (Phygetis) brachycephala</i> (Bocage, 1889)	420
Genus <i>Nanonycteris</i> Matschie, 1899	163
Species <i>Nanonycteris veldkampii</i> (Jentink, 1888)	164
Genus <i>Plerotes</i> K. Andersen, 1910	165
Species <i>Plerotes anchietae</i> (de Seabra, 1900)	166

Category, Name and Author	Taxis_id
Genus <i>Pteropus</i> Erxleben, 1777	172
Species <i>Pteropus aldabrensis</i> True, 1893	181
Species <i>Pteropus livingstonii</i> Gray, 1866	176
Species <i>Pteropus niger</i> (Kerr, 1792)	173
Species <i>Pteropus rodricensis</i> Dobson, 1878	177
Species <i>Pteropus rufus</i> E. Geoffroy St.-Hilaire, 1803	175
Species <i>Pteropus seychellensis</i> A. Milne-Edwards, 1877	178
Species <i>Pteropus subniger</i> (Kerr, 1792)	174
Species <i>Pteropus voeltzkowi</i> Matschie, 1909	182
Genus <i>Rousettus</i> Gray, 1821	86
Species <i>Rousettus aegyptiacus</i> (E. Geoffroy St.-Hilaire, 1810)	100
Species <i>Rousettus lanosus</i> Thomas, 1906	426
Species <i>Rousettus madagascariensis</i> G. Grandidier, 1929	473
Species <i>Rousettus obliviosus</i> Kock, 1978	474
Genus <i>Scotonycteris</i> Matschie, 1894	167
Species <i>Scotonycteris ophiodon</i> Pohle, 1943	169
Species <i>Scotonycteris zenkeri</i> Matschie, 1894	168
Infraorder RHINOLOPHIFORMACEI	259
Superfamily RHINOLOPHOIDEA	261
Family HIPPOSIDERIDAE Lydekker, 1891	251
Subfamily Hipposiderinae Lydekker, 1891	514
Genus <i>Asellia</i> Gray, 1838	310
Species <i>Asellia patrizii</i> de Beaux, 1931	312
Species <i>Asellia tridens</i> (E. Geoffroy St.-Hilaire, 1813)	311
Genus <i>Cloeotis</i> Thomas, 1901	195
Species <i>Cloeotis percivali</i> Thomas, 1901	196
Genus <i>Hipposideros</i> Gray, 1831	91
Species <i>Hipposideros abae</i> J.A. Allen, 1917	309
Species <i>Hipposideros beatus</i> (K. Andersen, 1906)	306
Species <i>Hipposideros caffer</i> (Sundevall, 1846)	122
Species <i>Hipposideros camerunensis</i> Eisentraut, 1956	308
Species <i>Hipposideros commersoni</i> (E. Geoffroy St.-Hilaire, 1813)	121
Species <i>Hipposideros curtus</i> G.M. Allen, 1921	302
Species <i>Hipposideros cyclops</i> (Temminck, 1853)	307
Species <i>Hipposideros fuliginosus</i> (Temminck, 1853)	303
Species <i>Hipposideros jonesi</i> Hayman, 1947	300
Species <i>Hipposideros lamottei</i> Brosset, 1985	305
Species <i>Hipposideros marisae</i> Aellen, 1954	301
Species <i>Hipposideros megalotis</i> (Heuglin, 1861)	299
Species <i>Hipposideros ruber</i> (Noack, 1893)	304
Genus <i>Triaenops</i> Dobson, 1871	93
Species <i>Triaenops auritus</i> G. Grandidier, 1912	447
Species <i>Triaenops furculus</i> Trouessart, 1906	313
Species <i>Triaenops persicus</i> Dobson, 1871	124
Species <i>Triaenops rufus</i> Milne-Edwards, 1881	448
Family MEGADERMATIDAE H. Allen, 1864	403
Genus <i>Cardioderma</i> Peters, 1873	431
Species <i>Cardioderma cor</i> (Peters, 1872)	432
Genus <i>Lavia</i> Gray, 1838	404
Species <i>Lavia frons</i> (E. Geoffroy St.-Hilaire, 1810)	405
Family RHINOLOPHIDAE Gray, 1825	249
Subfamily Rhinolophinae Gray, 1825	250
Genus <i>Rhinolophus</i> Lacépède, 1799	90
Species <i>Rhinolophus adami</i> Aellen and Brosset, 1968	433
Species <i>Rhinolophus alcyone</i> Temminck, 1853	434
Species <i>Rhinolophus blasii</i> Peters, 1867	116
Species <i>Rhinolophus capensis</i> Lichtenstein, 1823	117
Species <i>Rhinolophus clivosus</i> Cretzschmar, 1828	113
Species <i>Rhinolophus darlingi</i> K. Andersen, 1905	114
Species <i>Rhinolophus deckenii</i> Peters, 1867	435
Species <i>Rhinolophus denti</i> Thomas, 1904	119
Species <i>Rhinolophus eloquens</i> K. Andersen, 1905	436
Species <i>Rhinolophus euryale</i> Blasius, 1853	446
Species <i>Rhinolophus ferrumequinum</i> (Schreber, 1774)	437
Species <i>Rhinolophus fumigatus</i> Rüppell, 1842	112
Species <i>Rhinolophus guineensis</i> Eisentraut, 1960	513
Species <i>Rhinolophus hildebrandtii</i> Peters, 1878	111
Species <i>Rhinolophus hillorum</i> Koopman, 1989	438
Species <i>Rhinolophus hipposideros</i> (Bechstein, 1800)	439
Species <i>Rhinolophus landeri</i> Martin, 1838	115
Species <i>Rhinolophus maclaudi</i> Pousargues, 1897	440
Species <i>Rhinolophus maendeleo</i> Kock, Csorba and Howell, 2000	441
Species <i>Rhinolophus mehelyi</i> Matschie, 1901	442
Species <i>Rhinolophus ruwenzorii</i> J. Eric Hill, 1942	443

Category, Name and Author	Taxis_id
Species <i>Rhinolophus sakejensis</i> Cotterill, 2002	498
Species <i>Rhinolophus silvestris</i> Aellen, 1959	444
Species <i>Rhinolophus simulator</i> K. Andersen, 1904	118
Species <i>Rhinolophus swinnyi</i> Gough, 1908	120
Species <i>Rhinolophus ziama</i> Fahr, Vierhaus, Hutterer and Kock, 2002	445
Superfamily RHINOPOMATOIDEA	260
Family RHINOPOMATIDAE Dobson, 1872	477
Genus <i>Rhinopoma</i> E. Geoffroy St.-Hilaire, 1818	333
Species <i>Rhinopoma hardwickii</i> Gray, 1831	335
Species <i>Rhinopoma macinnesi</i> Hayman, 1937	412
Species <i>Rhinopoma microphyllum</i> (Brünnich, 1782)	334
Suborder VESPERTILIONIFORMI	245
Infraorder NOCTILIONIFORMACEI	509
Superfamily NOCTILIONOIDEA	510
Family MYZOPODIDAE Thomas, 1904	478
Genus <i>Myzopoda</i> Milne-Edwards and A. Grandidier, 1878	479
Species <i>Myzopoda aurita</i> Milne-Edwards and A. Grandidier, 1878	480
Species <i>Myzopoda schliemanni</i> Goodman, Rakotondraparany and Kofoky, 2007	512
Infraorder NYCTERIFORMACEI	257
Superfamily NYCTEROIDEA	258
Family EMBALLONURIDAE Gervais, 1855	252
Genus <i>Coleura</i> Peters, 1867	88
Species <i>Coleura afra</i> (Peters, 1852)	104
Species <i>Coleura seychellensis</i> Peters, 1868	298
Genus <i>Emballonura</i> Temminck, 1838	296
Species <i>Emballonura atrata</i> Peters, 1874	297
Species <i>Emballonura tiavato</i> Goodman, Cardiff, Ranivo, Russell, and Yoder, 2006	500
Genus <i>Saccolaimus</i> Temminck, 1838	294
Species <i>Saccolaimus peli</i> (Temminck, 1853)	295
Genus <i>Taphozous</i> E. Geoffroy St.-Hilaire, 1818	87
Species <i>Taphozous hamiltoni</i> Thomas, 1920	292
Species <i>Taphozous hildegardeae</i> Thomas, 1909	291
Species <i>Taphozous mauritanus</i> E. Geoffroy St.-Hilaire, 1818	102
Species <i>Taphozous nudiventris</i> Cretzschmar, 1830	293
Species <i>Taphozous perforatus</i> E. Geoffroy St.-Hilaire, 1818	103
Subspecies <i>Taphozous perforatus perforatus</i> E. Geoffroy St.-Hilaire, 1818	187
Subspecies <i>Taphozous perforatus sudani</i> Thomas, 1915	188
Family NYCTERIDAE Van der Hoeven, 1855	248
Genus <i>Nycteris</i> G. Cuvier and E. Geoffroy, 1795	89
Species <i>Nycteris arge</i> Thomas, 1903	395
Species <i>Nycteris aurita</i> (K. Andersen, 1912)	415
Species <i>Nycteris gambiensis</i> (K. Andersen, 1912)	398
Species <i>Nycteris grandis</i> Peters, 1865	106
Species <i>Nycteris hispida</i> (Schreber, 1774)	105
Species <i>Nycteris intermedia</i> Aellen, 1959	414
Species <i>Nycteris macrotis</i> Dobson, 1876	108
Species <i>Nycteris madagascariensis</i> G. Grandidier, 1937	429
Species <i>Nycteris major</i> (K. Andersen, 1912)	397
Species <i>Nycteris nana</i> (K. Andersen, 1912)	396
Species <i>Nycteris parisii</i> (de Beaux, 1923)	430
Species <i>Nycteris thebaica</i> E. Geoffroy St.-Hilaire, 1818	109
Species <i>Nycteris vinsoni</i> Dalquest, 1965	110
Species <i>Nycteris woodi</i> K. Andersen, 1914	107
Infraorder VESPERTILIONIFORMACEI	262
Superfamily MOLOSSOIDEA Simmons, 1998	265
Family MOLOSSIDAE Gervais, 1856	246
Subfamily Molossinae Gervais, 1856	267
Genus <i>Chaerephon</i> Dobson, 1874	204
Species <i>Chaerephon aloysiisabaudiae</i> (Festa, 1907)	322
Species <i>Chaerephon ansorgei</i> (Thomas, 1913)	145
Species <i>Chaerephon bemmellini</i> (Jentink, 1879)	320
Species <i>Chaerephon bivittatus</i> (Heuglin, 1861)	144
Species <i>Chaerephon chapini</i> J.A. Allen, 1917	147
Species <i>Chaerephon gallagheri</i> (Harrison, 1975)	323
Species <i>Chaerephon jobimena</i> Goodman and Cardiff, 2004	503
Species <i>Chaerephon leucogaster</i> (A. Grandidier, 1869)	467
Species <i>Chaerephon major</i> (Trouessart, 1897)	211
Species <i>Chaerephon nigeriae</i> Thomas, 1913	146
Subspecies <i>Chaerephon nigeriae nigeriae</i> Thomas, 1913	212
Subspecies <i>Chaerephon nigeriae spillmanni</i> (Monard, 1933)	213
Species <i>Chaerephon pumilus</i> (Cretzschmar, 1826)	148
Species <i>Chaerephon russatus</i> J.A. Allen, 1917	321
Species <i>Chaerephon tomensis</i> (Juste and Ibáñez, 1993)	468
Genus <i>Mops</i> Lesson, 1842	203

Category, Name and Author	Taxis_id
Subgenus <i>Mops</i> (<i>Mops</i>) Lesson, 1842	484
Species <i>Mops</i> (<i>Mops</i>) <i>condylurus</i> (A. Smith, 1833)	150
Species <i>Mops</i> (<i>Mops</i>) <i>congicus</i> J.A. Allen, 1917	332
Species <i>Mops</i> (<i>Mops</i>) <i>demonstrator</i> (Thomas, 1903)	330
Species <i>Mops</i> (<i>Mops</i>) <i>leucostigma</i> (G.M. Allen, 1918)	469
Species <i>Mops</i> (<i>Mops</i>) <i>midas</i> (Sundevall, 1843)	149
Subspecies <i>Mops</i> (<i>Mops</i>) <i>midas miarensis</i> (A. Grandidier, 1869)	228
Subspecies <i>Mops</i> (<i>Mops</i>) <i>midas midas</i> (Sundevall, 1843)	227
Species <i>Mops</i> (<i>Mops</i>) <i>niangarae</i> J.A. Allen, 1917	470
Species <i>Mops</i> (<i>Mops</i>) <i>niveiventer</i> Cabrera and Ruxton, 1926	329
Species <i>Mops</i> (<i>Mops</i>) <i>trevori</i> J.A. Allen, 1917	331
Subgenus <i>Mops</i> (<i>Xiphonycteris</i>) Dollman, 1911	485
Species <i>Mops</i> (<i>Xiphonycteris</i>) <i>brachypterus</i> (Peters, 1852)	222
Species <i>Mops</i> (<i>Xiphonycteris</i>) <i>nanulus</i> J.A. Allen, 1917	325
Species <i>Mops</i> (<i>Xiphonycteris</i>) <i>petersoni</i> (El Rayah, 1981)	326
Species <i>Mops</i> (<i>Xiphonycteris</i>) <i>spurrelli</i> (Dollman, 1911)	324
Species <i>Mops</i> (<i>Xiphonycteris</i>) <i>thersites</i> (Thomas, 1903)	328
Genus <i>Mormopterus</i> Peters, 1865	81
Species <i>Mormopterus</i> <i>acetabulosus</i> (Hermann, 1804)	139
Subspecies <i>Mormopterus</i> <i>acetabulosus acetabulosus</i> (Hermann, 1804)	193
Subspecies <i>Mormopterus</i> <i>acetabulosus natalensis</i> (A. Smith, 1847)	194
Species <i>Mormopterus</i> <i>jugularis</i> (Peters, 1865)	314
Genus <i>Myopterus</i> E. Geoffroy St.-Hilaire, 1818	315
Species <i>Myopterus</i> <i>daubentonii</i> Desmarest, 1820	318
Species <i>Myopterus</i> <i>whitleyi</i> (Scharff, 1900)	316
Genus <i>Otomops</i> Thomas, 1913	79
Species <i>Otomops</i> <i>madagascariensis</i> Dorst, 1953	235
Species <i>Otomops</i> <i>martiensseni</i> (Matschie, 1897)	137
Subspecies <i>Otomops</i> <i>martiensseni icarus</i> Chubb, 1917	234
Subspecies <i>Otomops</i> <i>martiensseni martiensseni</i> (Matschie, 1897)	233
Genus <i>Platymops</i> Thomas, 1906	229
Species <i>Platymops</i> <i>setiger</i> (Peters, 1878)	230
Subspecies <i>Platymops</i> <i>setiger macmillani</i> Thomas, 1906	232
Subspecies <i>Platymops</i> <i>setiger setiger</i> (Peters, 1878)	231
Genus <i>Sauromys</i> Roberts, 1917	80
Species <i>Sauromys</i> <i>petrophilus</i> (Roberts, 1917)	138
Subspecies <i>Sauromys</i> <i>petrophilus erongensis</i> (Roberts, 1946)	192
Subspecies <i>Sauromys</i> <i>petrophilus haagneri</i> (Roberts, 1917)	189
Subspecies <i>Sauromys</i> <i>petrophilus petrophilus</i> (Roberts, 1917)	190
Subspecies <i>Sauromys</i> <i>petrophilus umbratus</i> (Shortridge & Carter, 1938)	191
Genus <i>Tadarida</i> Rafinesque, 1814	82
Species <i>Tadarida</i> <i>aegyptiaca</i> (E. Geoffroy St.-Hilaire, 1818)	143
Subspecies <i>Tadarida</i> <i>aegyptiaca aegyptiaca</i> (E. Geoffroy St.-Hilaire, 1818)	236
Subspecies <i>Tadarida</i> <i>aegyptiaca bocagei</i> (Seabra, 1900)	237
Species <i>Tadarida</i> <i>fulminans</i> (Thomas, 1903)	142
Species <i>Tadarida</i> <i>lobata</i> (Thomas, 1891)	140
Species <i>Tadarida</i> <i>teniotis</i> (Rafinesque, 1814)	319
Species <i>Tadarida</i> <i>ventralis</i> (Heuglin, 1861)	141
Superfamily VESPERTILIONOIDEA Gray, 1821	268
Family MINIPTERIDAE Dobson, 1875	253
Genus <i>Miniopterus</i> Bonaparte, 1837	73
Species <i>Miniopterus</i> <i>africanus</i> Sanborn, 1936	463
Species <i>Miniopterus</i> <i>fraterculus</i> Thomas and Schwann, 1906	126
Species <i>Miniopterus</i> <i>gleni</i> Peterson, Eger and Mitchell, 1995	464
Species <i>Miniopterus</i> <i>inflatus</i> Thomas, 1903	125
Subspecies <i>Miniopterus</i> <i>inflatus inflatus</i> Thomas, 1903	276
Subspecies <i>Miniopterus</i> <i>inflatus rufus</i> Sanborn, 1936	277
Species <i>Miniopterus</i> <i>majori</i> Thomas, 1906	465
Species <i>Miniopterus</i> <i>manavi</i> Thomas, 1906	466
Species <i>Miniopterus</i> <i>minor</i> Peters, 1867	389
Species <i>Miniopterus</i> <i>natalensis</i> (A. Smith, 1833)	128
Species <i>Miniopterus</i> <i>schreibersii</i> (Kuhl, 1817)	127
Family VESPERTILIONIDAE Gray, 1821	247
Subfamily Kerivoulinae Miller, 1907	255
Genus <i>Kerivoula</i> Gray, 1842	78
Species <i>Kerivoula</i> <i>africana</i> Dobson, 1878	393
Species <i>Kerivoula</i> <i>argentata</i> Tomes, 1861	135
Species <i>Kerivoula</i> <i>cuprosa</i> Thomas, 1912	391
Species <i>Kerivoula</i> <i>eriophora</i> (Heuglin, 1877)	449
Species <i>Kerivoula</i> <i>lanosa</i> (A. Smith, 1847)	136
Species <i>Kerivoula</i> <i>phalaena</i> Thomas, 1912	392
Species <i>Kerivoula</i> <i>smithii</i> Thomas, 1880	390
Subfamily Myotinae Tate, 1942	256
Genus <i>Cistugo</i> Thomas, 1912	75

Category, Name and Author	Taxis_id
Species <i>Cistugo lesueuri</i> Roberts, 1919	131
Species <i>Cistugo seabrae</i> Thomas, 1912	130
Genus <i>Myotis</i> Kaup, 1829	74
Species <i>Myotis anjouanensis</i> (Dorst, 1960)	450

Species <i>Pipistrellus rusticus</i> (Tomes, 1861)	65
Genus <i>Plecotus</i> E. Geoffroy St.-Hilaire, 1818	386
Species <i>Plecotus balensis</i> Kruskop & Lavrenchenko, 2000	461
Species <i>Plecotus christii</i> Gray, 1838	462
Species <i>Plecotus teneriffae</i> Barrett-Hamilton, 1907	387
Subspecies <i>Plecotus teneriffae gaisleri</i> Benda, Kiefer, Hanak & Veith, 2004	472
Subspecies <i>Plecotus teneriffae teneriffae</i> Barrett-Hamilton, 1907	471
Genus <i>Scotoecus</i> Thomas, 1901	36
Species <i>Scotoecus albigula</i> Thomas, 1909	269
Species <i>Scotoecus albofuscus</i> (Thomas, 1890)	66
Species <i>Scotoecus hindei</i> Thomas, 1901	215
Species <i>Scotoecus hirundo</i> (de Winton, 1899)	67
Genus <i>Scotophilus</i> Leach, 1821	37
Species <i>Scotophilus borbonicus</i> (E. Geoffroy St.-Hilaire, 1803)	68
Species <i>Scotophilus dinganii</i> (A. Smith, 1833)	69
Species <i>Scotophilus leucogaster</i> (Cretzschmar, 1826)	72
Species <i>Scotophilus marovaza</i> Goodman, Ratrimomanarivo and Randrianandrianina, 2006	502
Species <i>Scotophilus nigrita</i> (Schreber, 1774)	70
Species <i>Scotophilus nucella</i> Robbins, 1984	380
Species <i>Scotophilus nux</i> Thomas, 1904	379
Species <i>Scotophilus robustus</i> A. Milne-Edwards, 1881	381
Species <i>Scotophilus tandrefana</i> Goodman, Jankins and Ratrimomanarivo, 2005	499
Species <i>Scotophilus viridis</i> (Peters, 1852)	71

Appendix 2: Voucher specimens

Appendix 2a: Museum Acronyms and Number of Specimens

Acronyms and full names of the museums housing the voucher specimens that are detailed in Appendix 2b, including the total number of specimens from each museum.

Acronym	Full Name	Nr
AMNH	American Museum of Natural History, New York	227
BMNH	The Natural History Museum (formerly The British Museum of Nat. Hist.)	1540
BZM	?	1
CAS	California Academy of Sciences, San Francisco	13
CAWM	College of African Wildlife Management, Mweka	3
CM	Carnegie Museum, Pittsburg	760
CNHM	Chicago Natural History Museum	1
CZL	Centro de Zoologia, Lisboa	8
DCDH	David C.D. Happold Collection	148
DNSM	Durban Natural Science Museum, Durban	456
EBD	Estacion Biologia la Doñana, Seville	1
FMNH	Field Museum of Natural History, Chicago	265
HNHM	Hungarian Natural History Museum, Budapest	6
HZM	Harrison Institute (formerly Harrison Zoological Museum)	278
IICA	Instituto de Investigação Científica de Angola	3
KBIN	Koninklijk Belgisch Instituut voor Natuurwetenschappen, Brussels	447
KM	Amathola Museum (formally Kaffarian Museum), King Williams Town	253
KU	University of Kansas Museum of Natural History	10
LACM	Natural History Museum of Los Angeles County	24
LNK	Landessammlung für Naturkunde, Karlsruhe	12
MCZ	Museum of Comparative Zoology, Harvard University	70
MCZ	Museum of Comparative Zoology, Harvard University, Cambridge Mass.	70
MHNC	Muséum d'Histoire Naturelle de La Chaux-de-Fonds	5
MHNG	Muséum d'Histoire Naturelle, Genève	132
MIZT	Museo ed Instituto Zoologia, Torino	2
MLZA	?	1
MMK	Macgregor Museum, Kimberly	99
MNCN	Madrid?	4
MNHN	Museum National d'Histoire Naturelle, Paris	286
MSB	Museum of Southwestern Biology, Albuquerque	250
MSNG	Museo Civico di Storia Naturale "Giacomo Doria"	3
MSNM	Museo Civico di Storia Naturale di Milano	11
MSU	Michigan State University, Mammal Collection, The Museum	7
MTB	Null	1
MWSU	Midwestern State University, Dept. Biology, Wichita Falls	7
MZStrassbo	Museum Stassbourg	1
urg		
MZUF	Museo Zoologico de "la Specola", Firenze	98
NAU	Northern Arizona University, Museum of Verteb.	10
NHMZ	Natural History Museum of Zimbabwe, Bulawayo	1176
NM	Durban Natural Science Museum, Durban (Pringle Collection)	11
NMB	National Museum of Bloemfontein, Bloemfontein	832
NMBE	Naturhistorisches Museum, Bern	21
NMK	National Museum of Kenya, Nairobi	6
NMP	National Museum (Natural History), Prague	7
NMW	Naturhistorisches Museum, Wien	104
NMZL	National Museum of Zambia, Livingstone	2
NRM	Naturhistoriska Riksmuseet Stockholm	21
NZM	Null	1
OSU	Oklahoma State University, Stillwater	9

Acronym	Full Name	Nr
Rennes	University of Rennes	1
RMCA	Royal Museum of Central Africa, Tervuren	2730
RMNH	National Natuurhistorisch Museum, Leiden	190
ROM	Royal Ontario Museum, Toronto	630

ZMA	Zoologisch Museum, Amsterdam	144
ZMB	Zoologisches Museum Berlin	1525
ZMH	Zoologisches Institut und Zoologisches Museum, Hamburg	16
ZMMU	Zoological Museum Moscow University	12
ZMUC	Zoologisk Museum Universitet, Kobenhavn	90
ZMZ	Zoologisches Museum der Universität, Zurich	32

Appendix 2b: Voucher Specimen Details

An overview of all voucher specimens that were included in the African Chiroptera Database from various contributors who have examined them, from supporting museums, or entered from published sources.

The taxa are presented in the same order as the main text and Appendix 1. In each taxon the specimens are alphabetically order according to their country of origin, locality, museum and museum number.

To stand out, the type specimens are explicitly mentioned with the name they were assigned by their original descriptor, and a colour code has been used to indicate the category of type:

RED: Holotype, Lectotype, Neotype, Syntype, Type

BLUE: Cotype, Paralectotype, Paratype

GREEN: Allotype, Genotype, Topotype

(for details on the definition of these types, see the Glossary).

Sudan:

Bados (1210N 3420E): **FMNH**: 34161.

Swaziland:

Mlawula Nature Reserve 1 (261048.58S 320257.48E): **TM**: 47745.

Tanzania:

Bagamoyo (0626S 3855E, 0 m): **ZMB**: 62427 - Kisarawe (0653S 3903E): **ZFMK**: 61106 - Liwale (0947S 3800E): **BMNH**: 1964.1771 - Morogoro (0648S 3740E): **BMNH**: 1922.7.17.75 - Zanzibar (0610S 3912E): **ZMB**: 3087.

The Gambia:

Kontaur (1337N 1454W): **BMNH**: 1949.483.

Togo:

no specific locality: **ZMB**: 54515, 62434, 85544, 85545, 85546, 85547, 85548, 85549, 85550.

Uganda:

Waisoke river (0146N 3133E): **ROM**: 46574.

Zambia:

Loangwa valley (1310S 3130E): **BMNH**: 1909.12.4.3 - Luangwa (1307S 3145E): **BMNH**: 1966.5465, 1966.5467, 1966.5469, 1966.5470 - Mfuwe (1305S 3147E): **BMNH**: 1966.5462.

Zimbabwe:

Mana Pools National Park (1543S 2925E): **TM**: 45055, 45056, 45060 - Sengwa Wildlife Research Station (1810S 2813E): **TM**: 34893, 34894, 34896, 34897, 34898, 34899, 34902, 34903, 34904, 34952, 34953, 34954, 34955, 34956, 34957, 34976, 34977.

Appendix 2c: Voucher Specimens per Museum

An overview of voucher specimens arranged by museum, taxon, and country of origin, as well as the number of specimens per country, taxon, and museum, and the total number of specimens currently in the African Chiroptera Database.

AMNH: American Museum of Natural History, New York

- Chaerephon chapini* J.A. Allen, 1917
Congo (Democratic Republic of the): 1 [1].
- Chaerephon leucogaster* (A. Grandidier, 1869)
Congo (Democratic Republic of the): 2 [2].
- Chaerephon major* (Trouessart, 1897)
Congo (Democratic Republic of the): 1 [1].
- Chaerephon russatus* J.A. Allen, 1917
Congo (Democratic Republic of the): 1 [1].
- Epomophorus gambianus* (Ogilby, 1835)
Cameroon: 1, Chad: 3, Ghana: 1, Namibia: 1 [6].
- Epomophorus labiatus* (Temminck, 1837)
Malawi: 1, Sudan: 1, Uganda: 1 [3].
- Epomophorus minimus* Claessen & De Vree, 1991
Kenya: 1 [1].
- Eptesicus hottentotus* (A. Smith, 1833)
Namibia: 2 [2].
- Glauconycteris alboguttata* J.A. Allen, 1917
Congo (Democratic Republic of the): 1 [1].
- Glauconycteris humeralis* J.A. Allen, 1917
Congo (Democratic Republic of the): 1 [1].
- Hipposideros abae* J.A. Allen, 1917
Congo (Democratic Republic of the): 1 [1].
- Hipposideros caffer* (Sundevall, 1846)
Congo (Democratic Republic of the): 1 [1].
- Hipposideros commersoni* (E. Geoffroy St.-Hilaire, 1813)
Congo (Democratic Republic of the): 1 [1].
- Hipposideros cyclops* (Temminck, 1853)
Congo (Democratic Republic of the): 1 [1].
- Hipposideros ruber* (Noack, 1893)
Congo (Democratic Republic of the): 1 [1].
- Hypsugo anchietae* (de Seabra, 1900)
Angola: 8, Congo (Democratic Republic of the): 2, Zambia: 10 [20].
- Hypsugo eisentrauti* (Hill, 1968)
Congo (Democratic Republic of the): 1, Kenya: 1, Liberia: 1 [3].
- Hypsugo musciculus* (Thomas, 1913)
Gabon: 1 [1].
- Kerivoula argentata* Tomes, 1861
South Africa: 1 [1].
- Laephotis angolensis* Monard, 1935
Angola: 2 [2].
- Mimetillus moloneyi* (Thomas, 1891)
Angola: 5, Cameroon: 4, Congo (Democratic Republic of the): 4, Kenya: 2, Zambia: 9 [24].
- Miniopterus natalensis* (A. Smith, 1833)
Congo (Democratic Republic of the): 1 [1].
- Mops (Mops) condylurus* (A. Smith, 1833)
Congo (Democratic Republic of the): 1 [1].
- Mops (Mops) congicus* J.A. Allen, 1917
Congo (Democratic Republic of the): 1 [1].
- Mops (Mops) demonstrator* (Thomas, 1903)
Congo (Democratic Republic of the): 1 [1].
- Mops (Mops) niangarae* J.A. Allen, 1917
Congo (Democratic Republic of the): 1 [1].
- Mops (Mops) niveiventer* Cabrera and Ruxton, 1926
Zambia: 2 [2].
- Mops (Mops) trevori* J.A. Allen, 1917
Congo (Democratic Republic of the): 1 [1].
- Mops (Xiphonycteris) brachypterus* (Peters, 1852)
Congo (Democratic Republic of the): 1 [1].
- Mops (Xiphonycteris) nanulus* J.A. Allen, 1917
Congo (Democratic Republic of the): 1 [1].
- Mops (Xiphonycteris) thersites* (Thomas, 1903)
Congo (Democratic Republic of the): 1 [1].
- Neoromicia brunneus* (Thomas, 1880)

- Cameroon: 1, Congo (Democratic Republic of the): 1, Liberia: 1 [3].
Neoromicia capensis (A. Smith, 1829)
 Angola: 3, Congo (Democratic Republic of the): 1, Namibia: 1, South Africa: 11, Zambia: 4 [20].
Neoromicia flavescens (de Seabra, 1900)
 Angola: 17 [17].
Neoromicia guineensis (Bocage, 1889)
 Chad: 1, Congo (Democratic Republic of the): 2 [3].
Neoromicia helios (Heller, 1912)
 Sudan: 3 [3].
Neoromicia rendalli (Thomas, 1889)
 Congo (Democratic Republic of the): 8, Kenya: 1, Sudan: 5 [14].
Neoromicia somalicus (Thomas, 1901)
 Congo (Democratic Republic of the): 1, Ethiopia: 2, Kenya: 1, Namibia: 1, South Africa: 2, Tanzania: 1 [8].
Neoromicia tenuipinnis (Peters, 1872)
 Cameroon: 1, Congo (Democratic Republic of the): 6, Liberia: 1, Uganda: 1 [9].
Nycteris hispida (Schreber, 1774)
 Congo (Democratic Republic of the): 1 [1].
Nycteris major (K. Andersen, 1912)
 Congo (Democratic Republic of the): 1 [1].
Pipistrellus hesperidus (Temminck, 1840)
 Kenya: 2 [2].
Pipistrellus kuhlii (Kuhl, 1817)
 "Africa": 1, Ethiopia: 3 [4].
Pipistrellus nanulus Thomas, 1904
 Cameroon: 1, Congo (Democratic Republic of the): 1, Equatorial Guinea: 2, Gabon: 1, Liberia: 2, Uganda: 2 [9].
Pipistrellus nanus (Peters, 1852)
 Angola: 1, Congo (Democratic Republic of the): 1, Cote D'Ivoire: 2, Ghana: 4, Nigeria: 1, Zambia: 5 [14].
Pipistrellus rueppellii (Fischer, 1829)
 Botswana: 1, Congo (Democratic Republic of the): 1, South Africa: 2, Sudan: 3, Tanzania: 1, Uganda: 1, Zambia: 1 [10].
Pipistrellus rusticus (Tomes, 1861)
 South Africa: 8, Zambia: 1 [9].
Rhinolophus fumigatus Rüppell, 1842
 Congo (Democratic Republic of the): 1 [1].
Rhinolophus hillorum Koopman, 1989
 Liberia: 1 [1].
Rhinolophus landeri Martin, 1838
 Congo (Democratic Republic of the): 1 [1].
Rhinolophus ruwenzorii J. Eric Hill, 1942
 Congo (Democratic Republic of the): 1 [1].
Rhinopoma hardwickii Gray, 1831
 Egypt: 2 [2].
Rhinopoma macinnesi Hayman, 1937
 Kenya: 3 [3].
Scotophilus nigrita (Schreber, 1774)
 Congo (Democratic Republic of the): 5 [5].

Total Specimens for AMNH: 227

BMNH: The Natural History Museum (formerly The British Museum of Nat. Hist.)

- Asellia tridens* (E. Geoffroy St.-Hilaire, 1813)
 Algeria: 2, Egypt: 1 [3].
Casinycteris argynnis Thomas, 1910
 Cameroon: 1 [1].
Chaerephon ansorgei (Thomas, 1913)
 Angola: 1 [1].
Chaerephon bemmellini (Jentink, 1879)
 Sudan: 1 [1].
Chaerephon chapini J.A. Allen, 1917
 Namibia: 1, Zimbabwe: 1 [2].
Chaerephon gallagheri (Harrison, 1975)
 Congo (Democratic Republic of the): 3 [3].
Chaerephon leucogaster (A. Grandidier, 1869)
 Nigeria: 1 [1].
Chaerephon major (Trouessart, 1897)
 Tanzania: 1, Unknown Country: 1 [2].
Chaerephon nigeriae Thomas, 1913
 Nigeria: 1 [1].
Chaerephon pumilus (Cretzschmar, 1826)
 Kenya: 1, Mozambique: 1, The Gambia: 1 [3].
 CHIROPTERA Blumenbach, 1779
 Kenya: 5, Malawi: 4, Unknown Country: 11 [20].
Cistugo seabrae Thomas, 1912
 Angola: 1, Namibia: 2 [3].

- Cloeotis percivali* Thomas, 1901
Kenya: 2, Zambia: 7 [9].
- Coleura afra* (Peters, 1852)
Angola: 1, Congo (Democratic Republic of the): 2, Mozambique: 1, Somalia: 1, Sudan: 1 [6].
- Coleura seychellensis* Peters, 1868
Seychelle Islands: 2 [2].
- Epomophorus angolensis* Gray, 1870
Angola: 1, Namibia: 19 [20].
- Epomophorus gambianus* (Ogilby, 1835)
"Africa": 1, Burkina Faso: 2, Central African Republic: 1, Congo (Democratic Republic of the): 2, Ethiopia: 3, Ghana: 2, Malawi: 1, Mozambique: 4, Nigeria: 2, Senegal: 1, Sierra Leone: 2, South Africa: 1, Tanzania: 1, The Gambia: 4, Unknown Country: 1, Zambia: 16, Zimbabwe: 1 [45].
- Epomophorus labiatus* (Temminck, 1837)
Congo (Democratic Republic of the): 6, Ethiopia: 6, Kenya: 3, Malawi: 3, Sudan: 2, Tanzania: 21, Uganda: 20, Zambia: 5 [66].
- Epomophorus minimus* Claessen & De Vree, 1991
Ethiopia: 5, Kenya: 11, Somalia: 1, Tanzania: 2 [19].
- Epomophorus wahlbergi* (Sundevall, 1846)
"Africa": 1, Angola: 10, Ethiopia: 1, Gabon: 1, Kenya: 8, Malawi: 2, Mozambique: 3, Somalia: 1, South Africa: 6, Tanzania: 18, Uganda: 2, Unknown Country: 1, Zambia: 4 [58].
- Epomops franqueti* (Tomes, 1860)
Nigeria: 1 [1].
- Eptesicus bottae* (Peters, 1869)
Egypt: 1 [1].
- Eptesicus floweri* (de Winton, 1901)
Sudan: 2 [2].
- Eptesicus hottentotus* (A. Smith, 1833)
Malawi: 4 [4].
- Eptesicus platyops* (Thomas, 1901)
Nigeria: 1 [1].
- Eptesicus serotinus* (Schreber, 1774)
'Gabon': 1 [1].
- Glauconycteris argentata* (Dobson, 1875)
Cameroon: 1 [1].
- Glauconycteris beatrix* Thomas, 1901
Equatorial Guinea: 1 [1].
- Glauconycteris egeria* Thomas, 1913
Cameroon: 1 [1].
- Glauconycteris machadoi* Hayman, 1963
Angola: 1 [1].
- Glauconycteris poensis* (Gray, 1842)
Nigeria: 1 [1].
- Glauconycteris superba* Hayman, 1939
Ghana: 1 [1].
- Glauconycteris variegata* (Tomes, 1861)
Namibia: 2, Sudan: 1, Uganda: 1 [4].
- Hipposideros caffer* (Sundevall, 1846)
Angola: 1, South Africa: 2 [3].
- Hipposideros commersoni* (E. Geoffroy St.-Hilaire, 1813)
Kenya: 1, The Gambia: 1, Zambia: 1 [3].
- Hipposideros cyclops* (Temminck, 1853)
Gabon: 1 [1].
- Hipposideros jonesi* Hayman, 1947
Sierra Leone: 1 [1].
- Hipposideros ruber* (Noack, 1893)
Gabon: 1, Uganda: 1 [2].
- Hypsignathus monstrosus* H. Allen, 1862
Nigeria: 1 [1].
- Hypsugo anchietae* (de Seabra, 1900)
Angola: 1 [1].
- Hypsugo ariel* (Thomas, 1904)
Sudan: 3 [3].
- Hypsugo crassulus* (Thomas, 1904)
Cameroon: 2, Congo (Democratic Republic of the): 1 [3].
- Hypsugo musciculus* (Thomas, 1913)
Cameroon: 5, Ghana: 1, Sierra Leone: 1 [7].
- Hypsugo savii* (Bonaparte, 1837)
Canary Islands [Spain]: 1, Cape Verde: 2, Italy: 1 [4].
- Kerivoula argentata* Tomes, 1861
Mozambique: 3 [3].
- Kerivoula cuprosa* Thomas, 1912
Cameroon: 1 [1].
- Kerivoula lanosa* (A. Smith, 1847)
NE Africa: 1, South Africa: 3, Zimbabwe: 1 [5].
- Kerivoula phalaena* Thomas, 1912
Ghana: 1 [1].

- Kerivoula smithii* Thomas, 1880
Nigeria: 1 [1].
- Laephotis angolensis* Monard, 1935
Congo (Democratic Republic of the): 2 [2].
- Laephotis botswanae* Setzer, 1971
Congo (Democratic Republic of the): 2, Zambia: 2 [4].
- Laephotis wintoni* Thomas, 1901
Ethiopia: 3, Kenya: 1 [4].
- Lavia frons* (E. Geoffroy St.-Hilaire, 1810)
Zambia: 1 [1].
- Lissonycteris angolensis* (Bocage, 1898)
Angola: 1 [1].
- Lissonycteris smithii* (Thomas, 1908)
Sierra Leone: 1 [1].
- Micropteropus intermedius* Hayman, 1963
Angola: 1 [1].
- Mimetillus moloneyi* (Thomas, 1891)
Equatorial Guinea: 4, Kenya: 1, Nigeria: 1, Sierra Leone: 1, Tanzania: 3, Zambia: 1 [11].
- Mimetillus thomasi* Hinton, 1920
Zambia: 1 [1].
- Miniopterus fraterculus* Thomas and Schwann, 1906
South Africa: 1 [1].
- Miniopterus inflatus* Thomas, 1903
Cameroon: 1 [1].
- Miniopterus majori* Thomas, 1906
Madagascar: 1 [1].
- Miniopterus manavi* Thomas, 1906
Comoro Islands: 1, Madagascar: 1 [2].
- Miniopterus natalensis* (A. Smith, 1833)
Namibia: 1, South Africa: 4 [5].
- MOLOSSIDAE Gervais, 1856
Ethiopia: 2, Namibia: 1, Unknown Country: 1 [4].
- Mops (Mops) condylurus* (A. Smith, 1833)
Congo (Democratic Republic of the): 1 [1].
- Mops (Mops) demonstrator* (Thomas, 1903)
Sudan: 1 [1].
- Mops (Mops) midas* (Sundevall, 1843)
"Africa": 8, Malawi: 4, Sudan: 2, Unknown Country: 2 [16].
- Mops (Mops) niveiventer* Cabrera and Ruxton, 1926
Congo (Democratic Republic of the): 3 [3].
- Mops (Xiphonycteris) brachypterus* (Peters, 1852)
Sierra Leone: 1 [1].
- Mops (Xiphonycteris) nanulus* J.A. Allen, 1917
Cameroon: 2, Congo (Democratic Republic of the): 8, Ghana: 1, Kenya: 1, Nigeria: 3 [15].
- Mops (Xiphonycteris) spurrelli* (Dollman, 1911)
Ghana: 3 [3].
- Mops (Xiphonycteris) thersites* (Thomas, 1903)
Cameroon: 1 [1].
- Myonycteris (Myonycteris) torquata* (Dobson, 1878)
Angola: 1, Angola (?): 1, Congo (Democratic Republic of the): 1, Sierra Leone: 1, Zambia: 2 [6].
- Myopterus daubentonii* Desmarest, 1820
Congo (Democratic Republic of the): 1 [1].
- Myotis blythii* (Tomes, 1857)
'Gaboon': 1, India: 2 [3].
- Myotis bocagii bocagii* (Peters, 1870)
Kenya: 1 [1].
- Myotis bocagii cupreolus* Thomas, 1904
Cameroon: 1 [1].
- Myotis capaccinii* (Bonaparte, 1837)
Italy: 1 [1].
- Myotis goudoti* (A. Smith, 1834)
Madagascar: 1 [1].
- Myotis morrisi* Hill, 1971
Ethiopia: 1 [1].
- Myotis scotti* Thomas, 1927
Ethiopia: 1 [1].
- Myotis welwitschii* (Gray, 1866)
Angola: 1 [1].
- Neoromicia brunneus* (Thomas, 1880)
Nigeria: 1 [1].

Cloeotis percivali Thomas, 1901
 Zimbabwe: 2 [2].
Epomophorus gambianus (Ogilby, 1835)
 Botswana: 1, Cote D'Ivoire: 2, Nigeria: 8, Tanzania: 4, The Gambia: 8, Zambia: 18, Zimbabwe: 8 [49].
Epomophorus labiatus (Temminck, 1837)
 Congo (Democratic Republic of the): 1, Malawi: 6, Tanzania: 20, Zambia: 4 [31].
Epomophorus wahlbergi (Sundevall, 1846)
 Angola: 1, Kenya: 6, Malawi: 1, Mozambique: 2, South Africa: 3, Tanzania: 5, Zambia: 3, Zimbabwe: 3 [24].
Eptesicus Rafinesque, 1820
 Tanzania: 3, The Gambia: 2 [5].
Eptesicus hottentotus (A. Smith, 1833)
 Zimbabwe: 1 [1].
Eptesicus serotinus (Schreber, 1774)
 Algeria: 1 [1].
Hypsugo anchietae (de Seabra, 1900)
 Zambia: 4 [4].
Hypsugo savii (Bonaparte, 1837)
 Algeria: 1 [1].
Laephotis botswanae Setzer, 1971
 Zambia: 1 [1].
Laephotis wintoni Thomas, 1901
 Kenya: 1 [1].
Mimetillus moloneyi (Thomas, 1891)
 Congo (Democratic Republic of the): 3, Kenya: 2, Sierra Leone: 1 [6].
Mops (Mops) niveiventris Cabrera and Ruxton, 1926
 Zambia: 7 [7].
Neoromicia capensis (A. Smith, 1829)
 Botswana: 10, Malawi: 1, South Africa: 5, Unknown Country: 1, Zambia: 3, Zimbabwe: 4 [24].
Neoromicia helios (Heller, 1912)
 Kenya: 4 [4].
Neoromicia melckorum (Roberts, 1919)
 Tanzania: 2 [2].
Neoromicia rendalli (Thomas, 1889)
 Congo (Democratic Republic of the): 1, Nigeria: 3, Zambia: 1 [5].
Neoromicia somalicus (Thomas, 1901)
 "Africa": 1, Kenya: 1, Uganda: 2 [4].
Neoromicia tenuipinnis (Peters, 1872)
 Ethiopia: 1 [1].
Neoromicia zuluensis (Roberts, 1924)
 Malawi: 1, Zambia: 3 [4].
Pipistrellus hesperidus (Temminck, 1840)
 Kenya: 1 [1].
Pipistrellus kuhlii (Kuhl, 1817)
 Algeria: 9, Libya: 1, Tunisia: 2 [12].
Pipistrellus nanus (Peters, 1852)
 Congo: 3, Ethiopia: 2, Kenya: 8, Liberia: 4, Nigeria: 4, South Africa: 1, Tanzania: 2, The Gambia: 1, Zambia: 3 [28].
Pipistrellus pipistrellus (Schreber, 1774)
 Algeria: 2 [2].
Pipistrellus rueppellii (Fischer, 1829)
 Egypt: 1, Sudan: 1, Uganda: 2, Zambia: 1, Zimbabwe: 1 [6].
Pipistrellus rusticus (Tomes, 1861)
 Botswana: 2, Zambia: 3, Zimbabwe: 2 [7].
Rhinolophus sakejiensis Cotterill, 2002
 Zambia: 1 [1].
Rhinopoma hardwickii Gray, 1831
 Egypt: 1, Sudan: 8 [9].

Cameroon: 1 [1].
- Neoromicia capensis* (A. Smith, 1829)
Ethiopia: 1, Namibia: 3, South Africa: 11, Togo: 1 [16].
- Neoromicia guineensis* (Bocage, 1889)
Egypt: 1 [1].
- Neoromicia rendalli* (Thomas, 1889)
Ghana: 1, Somalia: 4, Togo: 3, Uganda: 1 [9].
- Neoromicia somalicus* (Thomas, 1901)
Ethiopia: 1, Togo: 1 [2].
- Neoromicia tenuipinnis* (Peters, 1872)
Angola: 5, Burundi?: 1, Cameroon: 2, Congo (Democratic Republic of the): 3, Guinea: 1, Tanzania: 7, Togo: 1, Uganda: 1 [21].
- Nyctalus noctula* (Schreber, 1774)
Egypt: 1, Mozambique: 1 [2].
- Nycteris arge* Thomas, 1903
Cameroon: 2 [2].
- Nycteris grandis* Peters, 1865
Cameroon: 1, Congo: 1, Tanzania: 4 [6].
- Nycteris hispida* (Schreber, 1774)
Angola: 1, Cameroon: 2, Gabon: 1, Ghana: 2, Kenya: 1, Mozambique: 1, Sudan: 1, Tanzania: 3, Unknown country: 2 [14].
- Nycteris macrotis* Dobson, 1876
Cameroon: 2, Ethiopia: 1, Namibia: 1, Tanzania: 2, Unknown country: 1 [7].
- Nycteris major* (K. Andersen, 1912)
Cameroon: 1 [1].
- Nycteris thebaica* E. Geoffroy St.-Hilaire, 1818
"Africa": 1, Angola: 2, Cameroon: 1, Egypt: 4, Ethiopia: 4, Kenya: 1, Mozambique: 5, Namibia: 4, Somalia: 1, South Africa: 2, Tanzania: 17, Unknown country: 1, Unknown country: 1 [44].
- Nycticeinops schlieffenii* (Peters, 1859)
Egypt: 2, Ethiopia: 1, Senegal: 8, Sudan: 1, Tanzania: 4, Togo: 1, Unknown Country: 2 [19].
- Otomops martiensseni* (Matschie, 1897)
Tanzania: 1 [1].
- Otonycteris hemprichii* Peters, 1859
Algeria: 4, Egypt: 4, Egypt/Sudan: 1 [9].
- Pipistrellus kuhlii* (Kuhl, 1817)
Algeria: 6, Egypt: 3, Ethiopia: 1, Tunisia: 1 [11].
- Pipistrellus nanus* (Peters, 1852)
Angola: 2, Burundi?: 1, Cameroon: 3, Comoro Islands: 1, Congo: 1, Congo (Democratic Republic of the): 2, Djibouti: 1, Gabon: 1, Guinea: 1, Kenya: 3, Mozambique: 2, Somalia: 1, Tanzania: 13, Togo: 2, Uganda: 2, Unknown country: 2 [38].
- Platymops setiger* (Peters, 1878)
Kenya: 1 [1].

- Plecotus christii* Gray, 1838
Egypt: 1 [1].
- Pteropus livingstonii* Gray, 1866
Comoro Islands: 6 [6].
- Pteropus niger* (Kerr, 1792)
Mauritius: 2, Tanzania: 1 [3].
- Pteropus rufus* E. Geoffroy St.-Hilaire, 1803
Comoro Islands: 3, Madagascar: 10, Unknown country: 2 [15].
- Pteropus subniger* (Kerr, 1792)
Mauritius: 2, Mozambique: 1, Réunion: 3 [6].
- Pteropus voeltzkowi* Matschie, 1909
Tanzania: 7 [7].
- Rhinolophus* Lacépède, 1799
Cameroon: 1, Egypt: 2, Senegal: 1, Tanzania: 7, Togo: 1 [12].
- Rhinolophus blasii* Peters, 1867
Ethiopia: 2 [2].
- Rhinolophus capensis* Lichtenstein, 1823
Kenya: 1, Namibia: 1, South Africa: 2, Tanzania: 2 [6].
- Rhinolophus clivus* Cretzschmar, 1828
Cameroon: 2, Egypt: 1, South Africa: 4, Tanzania: 1, Unknown country: 1 [9].
- Rhinolophus darlingi* K. Andersen, 1905
Namibia: 4, South Africa: 1 [5].
- Rhinolophus deckenii* Peters, 1867
Namibia: 2, Tanzania: 1 [3].
- Rhinolophus denti* Thomas, 1904
Namibia: 1 [1].
- Rhinolophus eloquens* K. Andersen, 1905
Tanzania: 3 [3].
- Rhinolophus euryale* Blasius, 1853
Algeria: 2, Morocco: 2, Tunisia: 5 [9].
- Rhinolophus fumigatus* Rüppell, 1842
Namibia: 4, Tanzania: 2 [6].
- Rhinolophus hildebrandtii* Peters, 1878
Ethiopia: 2, Kenya: 4, Tanzania: 3, Unknown country: 2 [11].
- Rhinolophus hipposideros* (Bechstein, 1800)
Algeria: 1 [1].
- Rhinolophus landeri* Martin, 1838
Cameroon: 5, Kenya: 2, Mozambique: 4, Namibia: 2, South Africa: 1, Tanzania: 5 [19].
- Rhinolophus swinnyi* Gough, 1908
Tanzania: 1 [1].
- Rhinopoma hardwickii* Gray, 1831
Algeria: 1, Egypt: 12, Sudan: 1 [14].
- Rhinopoma microphyllum* (Brünnich, 1782)
Algeria: 1, Egypt: 5, Ghana: 1, Sudan: 1 [8].
- Rousettus aegyptiacus* (E. Geoffroy St.-Hilaire, 1810)
Angola: 1, Cameroon: 4, Egypt: 5, Egypt?: 1, Ethiopia: 1, Kenya: 1, South Africa: 3, Tanzania: 20, Unknown country: 1 [37].
- Rousettus lanosus* Thomas, 1906
Kenya: 1 [1].
- Rousettus obliviosus* Kock, 1978
Comoro Islands: 11, South Africa: 1 [12].
- Saccolaimus peli* (Temminck, 1853)
Cameroon: 1 [1].
- Scotonycteris ophiodon* Pohle, 1943
Cameroon: 1 [1].
- Scotonycteris zenkeri* Matschie, 1894
Cameroon: 2, Equatorial Guinea: 1 [3].
- Scotophilus* Leach, 1821
Kenya: 1, Tanzania: 2 [3].
- Scotophilus dinganii* (A. Smith, 1833)
Ghana: 2, Kenya: 1, Mozambique: 1, Somalia: 1, Tanzania: 1 [6].
- Scotophilus nigrata* (Schreber, 1774)
Ethiopia: 3, Ghana: 1, Senegal: 24, Somalia: 1, Tanzania: 3, Togo: 1 [33].
- Scotophilus viridis* (Peters, 1852)
Mozambique: 1, Tanzania: 2, Togo: 9 [12].
- Tadarida aegyptiaca* (E. Geoffroy St.-Hilaire, 1818)
Egypt: 1 [1].
- Tadarida lobata* (Thomas, 1891)
Tanzania: 1 [1].
- Taphozous* E. Geoffroy St.-Hilaire, 1818
Senegal: 14 [14].
- Taphozous hildegardae* Thomas, 1909
Kenya: 2 [2].
- Taphozous mauritanianus* E. Geoffroy St.-Hilaire, 1818
Angola: 2, Cameroon: 4, Equatorial Guinea: 1, Mauritius: 1, Sudan: 1, Tanzania: 5, Uganda: 1, Unknown country: 1 [16].

- Taphozous nudiventris* Cretzschmar, 1830
Egypt: 5 [5].
- Taphozous perforatus* E. Geoffroy St.-Hilaire, 1818
"Africa": 1, Egypt: 8, Sudan: 1 [10].
- Triaenops* Dobson, 1871
Ethiopia: 1 [1].
- Triaenops persicus* Dobson, 1871
Kenya: 1 [1].
- Vespertilioninae* Gray, 1821
Senegal: 1 [1].

Total Specimens for ZMB: 1524

ZMH: Zoologisches Institut und Zoologisches Museum, Hamburg

- Eptesicus bottae* (Peters, 1869)
Egypt: 1 [1].
- Nycteris arge* Thomas, 1903
Congo (Democratic Republic of the): 1 [1].
- Nycteris hispida* (Schreber, 1774)
"Africa": 2, Cameroon: 1, Chad: 1, Mozambique: 1, Unknown Country: 1 [6].
- Nycteris thebaica* E. Geoffroy St.-Hilaire, 1818
Namibia: 3, Tanzania: 1 [4].
- Pipistrellus nanus* (Peters, 1852)
Congo (Democratic Republic of the): 2 [2].
- Pipistrellus rueppellii* (Fischer, 1829)
Tanzania: 1 [1].
- Rhinopoma hardwickii* Gray, 1831
Egypt: 1 [1].

Total Specimens for ZMH: 16

ZMMU: Zoological Museum Moscow University

- Laephotis wintoni* Thomas, 1901
Ethiopia: 2 [2].
- Neoromicia helios* (Heller, 1912)
Tanzania: 1 [1].
- Pipistrellus aero* Heller, 1912
Ethiopia: 1 [1].
- Pipistrellus kuhlii* (Kuhl, 1817)
Ethiopia: 1 [1].
- Pipistrellus rusticus* (Tomes, 1861)
Ethiopia: 6 [6].
- Plecotus balensis* Kruskop & Lavrenchenko, 2000
Ethiopia: 1 [1].

Total Specimens for ZMMU: 12

ZMUC: Zoologisk Museum Universitet, Kobenhavn

- Nycteris aurita* (K. Andersen, 1912)
Kenya: 1 [1].
- Nycteris hispida* (Schreber, 1774)
Sudan: 13 [13].
- Nycteris macrotis* Dobson, 1876
Sudan: 1 [1].
- Nycteris thebaica* E. Geoffroy St.-Hilaire, 1818
Sudan: 21, Tanzania: 26 [47].
- Pipistrellus hesperidus* (Temminck, 1840)
Tanzania: 8 [8].
- Pipistrellus nanus* (Peters, 1852)
Congo (Democratic Republic of the): 3, Mali: 8, Nigeria: 2, Sudan: 3, Tanzania: 3 [19].
- Rhinopoma microphyllum* (Brünnich, 1782)
Egypt: 1 [1].

Total Specimens for ZMUC: 90

ZMZ: Zoologisches Museum der Universität, Zurich

- Epomophorus labiatus* (Temminck, 1837)
Congo (Democratic Republic of the): 8, Rwanda: 11 [19].
- Epomophorus wahlbergi* (Sundevall, 1846)
Tanzania: 8 [8].
- Neoromicia zuluensis* (Roberts, 1924)

Rwanda: 1 [1].
Nycteris hispida (Schreber, 1774)
Congo (Democratic Republic of the): 1 [1].
Pipistrellus nanus (Peters, 1852)
Congo (Democratic Republic of the): 2 [2].
Rhinolophus ruwenzorii J. Eric Hill, 1942
Rwanda: 1 [1].

Total Specimens for ZMZ: 32

Grand total: 24887

Appendix 2d: Voucher Specimens per country

An overview of the voucher specimens arranged by country of origin, taxon, and museum of origin, as well as the number of specimens per museum, taxon, and country, and the total number of specimens currently in the African Chiroptera Database.

"Africa"

Chaerephon pumilus (Cretzschmar, 1826)
DNSM: 1, TM: 1 [2].

CHIROPTERA Blumenbach, 1779
SAMC: 1 [1].

Eidolon helvum (Kerr, 1792)
ZMB: 7 [7].

Epomophorus gambianus (Ogilby, 1835)
BMNH: 1, ZFMK: 1 [2].

Epomophorus wahlbergi (Sundevall, 1846)
BMNH: 1 [1].

Glauconycteris variegata (Tomes, 1861)
DNSM: 1 [1].

Hypsignathus monstrosus H. Allen, 1862
TM: 2 [2].

Kerivoula argentata Tomes, 1861
ZMB: 2 [2].

Miniopterus Bonaparte, 1837
ZMB: 2 [2].

Mops (Mops) midas (Sundevall, 1843)
BMNH: 8 [8].

Neoromicia capensis (A. Smith, 1829)
BMNH: 1, MNHN: 1 [2].

Neoromicia somalicus (Thomas, 1901)
HZM: 1, MZUF: 1 [2].

Neoromicia tenuipinnis (Peters, 1872)
NMBE: 7 [7].

Nycteris arge Thomas, 1903
RMCA: 1 [1].

Nycteris hispida (Schreber, 1774)
RMCA: 3, ROM: 1, ZMH: 2 [6].

Nycteris macrotis Dobson, 1876
BMNH: 2, RMCA: 5 [7].

Nycteris thebaica E. Geoffroy St.-Hilaire, 1818
BMNH: 1, KBIN: 1, NMW: 1, RMNH: 2, SMNS: 1, USNM: 1, ZMB: 1 [8].

Pipistrellus kuhlii (Kuhl, 1817)
AMNH: 1, BMNH: 1, KBIN: 1, MHNG: 2 [5].

Pipistrellus nanus (Peters, 1852)
RMCA: 3 [3].

Pipistrellus pipistrellus (Schreber, 1774)
BMNH: 1 [1].

Rhinolophus clivosus Cretzschmar, 1828
TM: 2 [2].

Rhinolophus swinnyi Gough, 1908
DNSM: 1 [1].

Rhinopoma hardwickii Gray, 1831
MNHN: 3 [3].

Rhinopoma microphyllum (Brünnich, 1782)
BMNH: 1 [1].

Tadarida aegyptiaca (E. Geoffroy St.-Hilaire, 1818)
TM: 1 [1].

Taphozous perforatus E. Geoffroy St.-Hilaire, 1818
ZMB: 1 [1].

Total Specimens for "Africa": 79

"Congo"

Epomophorus wahlbergi (Sundevall, 1846)
KBIN: 1 [1].

Nycteris macrotis Dobson, 1876
MIZT: 1 [1].

Scotophilus nux Thomas, 1904
MNHN: 2 [2].

Total Specimens for "Congo": 4

"Senegal or Mauritania"

Rhinopoma microphyllum (Brünnich, 1782)
MNHN: 15 [15].

Total Specimens for "Senegal or Mauritania": 15

Algeria

Asellia tridens (E. Geoffroy St.-Hilaire, 1813)
BMNH: 2 [2].
CHIROPTERA Blumenbach, 1779
ZMB: 1 [1].
Eptesicus serotinus (Schreber, 1774)
HZM: 1, MNHN: 2, ZMB: 2 [5].
Hypsugo savii (Bonaparte, 1837)
CM: 5, HZM: 1 [6].
Miniopterus Bonaparte, 1837
ZMB: 5 [5].
Myotis blythii (Tomes, 1857)
ZMB: 1 [1].
Myotis myotis (Borkhausen, 1797)
ZMB: 2 [2].
Otonycteris hemprichii Peters, 1859
ZMB: 4 [4].
Pipistrellus deserti Thomas, 1902
BMNH: 2, CM: 10, USNM: 1 [13].
Pipistrellus kuhlii (Kuhl, 1817)
CM: 20, FMNH: 1, HZM: 9, KBIN: 1, MHNG: 1, MNHN: 6, RMCA: 1, USNM: 5, ZFMK: 6, ZMB: 6 [56].
Pipistrellus pipistrellus (Schreber, 1774)
HZM: 2, MHNG: 1 [3].
Plecotus teneriffae Barrett-Hamilton, 1907
BMNH: 1, UANK: 2 [3].
Rhinolophus euryale Blasius, 1853
ZMB: 2 [2].
Rhinolophus hipposideros (Bechstein, 1800)
ZMB: 1 [1].
Rhinopoma hardwickii Gray, 1831
SMF: 1, ZFMK: 1, ZMB: 1 [3].
Rhinopoma microphyllum (Brünnich, 1782)
ZMB: 1 [1].

Total Specimens for Algeria: 108

Angola

Chaerephon ansorgei (Thomas, 1913)
BMNH: 1 [1].
Cistugo seabrae Thomas, 1912
BMNH: 1 [1].
Coleura afra (Peters, 1852)
BMNH: 1 [1].
Eidolon helvum (Kerr, 1792)
ZMB: 10 [10].
Epomophorus angolensis Gray, 1870
BMNH: 1, MZUF: 1, RMNH: 1, ZMB: 8 [11].
Epomophorus wahlbergi (Sundevall, 1846)
BMNH: 10, FMNH: 1, HZM: 1, USNM: 1, ZMB: 8 [21].
Eptesicus Rafinesque, 1820
MHNG: 1 [1].
Eptesicus hottentotus (A. Smith, 1833)
IICA: 3 [3].
Glauconycteris machadoi Hayman, 1963
BMNH: 1 [1].
Hipposideros caffer (Sundevall, 1846)
BMNH: 1, ZMB: 2 [3].
Hipposideros commersoni (E. Geoffroy St.-Hilaire, 1813)
ZMB: 1 [1].
Hypsugo anchietae (de Seabra, 1900)
AMNH: 8, BMNH: 1, CM: 3, MNHN: 1 [13].
Hypsugo crassulus (Thomas, 1904)
FMNH: 1 [1].

- Laephotis angolensis* Monard, 1935
AMNH: 2, MHNC: 3 [5].
- Laephotis botswanae* Setzer, 1971
FMNH: 2 [2].
- Lissonycteris angolensis* (Bocage, 1898)
BMNH: 1 [1].
- Micropteropus intermedius* Hayman, 1963
BMNH: 1, CNHM: 1 [2].
- Micropteropus pusillus* (Peters, 1868)
ZMB: 2 [2].
- Mimetillus moloneyi* (Thomas, 1891)
AMNH: 5 [5].
- Mops (Mops) condylurus* (A. Smith, 1833)
ZMB: 1 [1].
- Myonycteris (Myonycteris) torquata* (Dobson, 1878)
BMNH: 1 [1].
- Myotis bocagii* (Peters, 1870)
ZMB: 1 [1].
- Myotis welwitschii* (Gray, 1866)
BMNH: 1 [1].
- Nanonycteris veldkampii* (Jentink, 1888)
ZMB: 1 [1].
- Neoromicia capensis* (A. Smith, 1829)
AMNH: 3, CM: 2, FMNH: 1 [6].
- Neoromicia flavescens* (de Seabra, 1900)
AMNH: 17, MNHN: 2 [19].
- Neoromicia somalicus* (Thomas, 1901)
FMNH: 4 [4].
- Neoromicia tenuipinnis* (Peters, 1872)
BMNH: 1, ZMB: 5 [6].
- Neoromicia zuluensis* (Roberts, 1924)
CZL: 1 [1].
- Nycteris hispida* (Schreber, 1774)
BMNH: 3, ZMB: 1 [4].
- Nycteris intermedia* Aellen, 1959
BMNH: 1 [1].
- Nycteris macrotis* Dobson, 1876
BMNH: 2, USNM: 1 [3].
- Nycteris thebaica* E. Geoffroy St.-Hilaire, 1818
BMNH: 6, MHNG: 2, MSNG: 1, ZMB: 2 [11].
- Pipistrellus nanus* (Peters, 1852)
AMNH: 1, FMNH: 3, YPM: 3, ZMB: 2 [9].
- Pipistrellus rueppellii* (Fischer, 1829)
MHNG: 1 [1].
- Rousettus aegyptiacus* (E. Geoffroy St.-Hilaire, 1810)
BMNH: 1, ZMB: 1 [2].
- Scotoecus albigula* Thomas, 1909
BMNH: 1 [1].
- Scotophilus dinganii* (A. Smith, 1833)
BMNH: 3, FMNH: 2, RMNH: 1 [6].
- Taphozous mauritanus* E. Geoffroy St.-Hilaire, 1818
ZMB: 2 [2].

Total Specimens for Angola: 166

Angola (?)

- Myonycteris (Myonycteris) torquata* (Dobson, 1878)
BMNH: 1 [1].

Total Specimens for Angola (?): 1

Azores [Portugal]

- Nyctalus azoreum* (Thomas, 1901)
BMNH: 1 [1].

Total Specimens for Azores [Portugal]: 1

Benin

- Epomophorus gambianus* (Ogilby, 1835)
USNM: 47 [47].
- Epomops franqueti* (Tomes, 1860)
ZMB: 1 [1].

- Hypsugo savii* (Bonaparte, 1837)
USNM: 1 [1].
- Neoromicia capensis* (A. Smith, 1829)
USNM: 1 [1].
- Neoromicia guineensis* (Bocage, 1889)
USNM: 1 [1].
- Neoromicia rendalli* (Thomas, 1889)
MNHN: 1, USNM: 1 [2].
- Neoromicia somalicus* (Thomas, 1901)
USNM: 2 [2].
- Nycteris gambiensis* (K. Andersen, 1912)
USNM: 63 [63].
- Nycteris grandis* Peters, 1865
BMNH: 1 [1].
- Nycteris hispida* (Schreber, 1774)
USNM: 38 [38].
- Nycteris macrotis* Dobson, 1876
USNM: 7 [7].
- Nycteris thebaica* E. Geoffroy St.-Hilaire, 1818
USNM: 2 [2].
- Pipistrellus inexpectatus* Aellen, 1959
USNM: 2 [2].
- Pipistrellus nanulus* Thomas, 1904
MNHN: 1, USNM: 2 [3].
- Pipistrellus nanus* (Peters, 1852)
USNM: 11 [11].
- Scotophilus nigrata* (Schreber, 1774)
MNHN: 1 [1].

Total Specimens for Benin: 183

Botswana

- Chaerephon pumilus* (Cretzschmar, 1826)
TM: 1 [1].
- CHIROPTERA* Blumenbach, 1779
TM: 2 [2].
- Epomophorus gambianus* (Ogilby, 1835)
FMNH: 1, HZM: 1, TM: 1, USNM: 15 [18].
- Hipposideros caffer* (Sundevall, 1846)
TM: 1 [1].
- Hipposideros commersoni* (E. Geoffroy St.-Hilaire, 1813)
NHMZ: 17, TM: 6 [23].
- Kerivoula lanosa* (A. Smith, 1847)
USNM: 1 [1].
- Laephotis botswanae* Setzer, 1971
NHMZ: 1, USNM: 1 [2].
- Miniopterus natalensis* (A. Smith, 1833)
TM: 2 [2].
- Mops (Mops) midas* (Sundevall, 1843)
SMF: 1 [1].
- Neoromicia capensis* (A. Smith, 1829)
FMNH: 4, HZM: 10, NHMZ: 9, SMF: 1, TM: 2, USNM: 18, ZFMK: 4 [48].
- Neoromicia rendalli* (Thomas, 1889)
USNM: 1 [1].
- Neoromicia somalicus* (Thomas, 1901)
FMNH: 1, USNM: 2 [3].
- Neoromicia zuluensis* (Roberts, 1924)
TM: 2 [2].
- Nycteris hispida* (Schreber, 1774)
USNM: 4 [4].
- Nycteris macrotis* Dobson, 1876
USNM: 1 [1].
- Nycteris thebaica* E. Geoffroy St.-Hilaire, 1818
BMNH: 3, KU: 4, SMF: 2, SMNS: 2, TM: 1, USNM: 68, ZFMK: 4 [84].
- Nycticeinops schlieffenii* (Peters, 1859)
TM: 4 [4].
- Pipistrellus nanus* (Peters, 1852)
NHMZ: 1, USNM: 5 [6].
- Pipistrellus rueppellii* (Fischer, 1829)
AMNH: 1, FMNH: 7, TM: 2 [10].
- Pipistrellus rusticus* (Tomes, 1861)
HZM: 2, NHMZ: 9, USNM: 1 [12].
- Rhinolophus blasii* Peters, 1867
TM: 1 [1].

- Sauromys petrophilus* (Roberts, 1917)
TM: 5 [5].
- Scotophilus* Leach, 1821
TM: 1 [1].
- Scotophilus dinganii* (A. Smith, 1833)
USNM: 20, ZFMK: 3 [23].
- Scotophilus leucogaster* (Cretzschmar, 1826)
ZMA: 1 [1].
- Tadarida aegyptiaca* (E. Geoffroy St.-Hilaire, 1818)
TM: 2 [2].

Total Specimens for Botswana: 259

British East Africa

- Nycteris macrotis* Dobson, 1876
ZFMK: 1 [1].

Total Specimens for British East Africa: 1

Burkina Faso

- Epomophorus gambianus* (Ogilby, 1835)
BMNH: 2, SMF: 2, USNM: 35 [39].
- Neoromicia guineensis* (Bocage, 1889)
SMF: 4, USNM: 2 [6].

Total Specimens for Tanzania [=former Tanganyika]: 55

The Gambia

- Chaerephon pumilus* (Cretzschmar, 1826)
BMNH: 1 [1].
- Epomophorus gambianus* (Ogilby, 1835)
BMNH: 4, HZM: 8, SMNS: 1, USNM: 6 [19].
- Eptesicus Rafinesque*, 1820
HZM: 2 [2].
- Hipposideros commersoni* (E. Geoffroy St.-Hilaire, 1813)
BMNH: 1 [1].
- Neoromicia rendalli* (Thomas, 1889)
BMNH: 2 [2].
- Nycteris gambiensis* (K. Andersen, 1912)
BMNH: 3, USNM: 19 [22].
- Nycteris macrotis* Dobson, 1876
BMNH: 6, USNM: 23 [29].
- Pipistrellus nanus* (Peters, 1852)
HZM: 1 [1].
- Scotoecus albofuscus* (Thomas, 1890)
BMNH: 1 [1].
- Scotophilus viridis* (Peters, 1852)
BMNH: 1 [1].

Total Specimens for The Gambia: 79

Togo

- Eidolon helvum* (Kerr, 1792)
ZMB: 1 [1].
- Epomophorus gambianus* (Ogilby, 1835)
USNM: 5, ZMB: 5 [10].
- Epomops franqueti* (Tomes, 1860)
ZMB: 3 [3].
- Hypsignathus monstrosus* H. Allen, 1862
ZMB: 3 [3].
- Lavia frons* (E. Geoffroy St.-Hilaire, 1810)
ZMB: 3 [3].
- Lissonycteris angolensis* (Bocage, 1898)
ZMB: 4 [4].
- Micropteropus pusillus* (Peters, 1868)
ZMB: 5 [5].
- Mops (Xiphonycteris) spurrelli* (Dollman, 1911)
RMCA: 4 [4].
- Nanonycteris veldkampii* (Jentink, 1888)
ZMB: 3 [3].
- Neoromicia capensis* (A. Smith, 1829)
ZMB: 1 [1].
- Neoromicia rendalli* (Thomas, 1889)
RMCA: 3, ZMB: 3 [6].
- Neoromicia somalicus* (Thomas, 1901)
RMCA: 3, ZMB: 1 [4].
- Neoromicia tenuipinnis* (Peters, 1872)
ZMB: 1 [1].
- Nycteris arge* Thomas, 1903
BMNH: 1 [1].
- Nycteris gambiensis* (K. Andersen, 1912)
RMCA: 6, USNM: 5 [11].
- Nycteris grandis* Peters, 1865
RMCA: 1, USNM: 4 [5].
- Nycteris hispida* (Schreber, 1774)
RMCA: 46, USNM: 3 [49].
- Nycteris macrotis* Dobson, 1876
RMCA: 16, USNM: 7 [23].
- Nycticeinops schlieffenii* (Peters, 1859)
ZMB: 1 [1].
- Pipistrellus nanulus* Thomas, 1904
RMCA: 1 [1].
- Pipistrellus nanus* (Peters, 1852)
RMCA: 2, USNM: 5, ZMB: 2 [9].
- Rhinolophus Lacépède*, 1799
ZMB: 1 [1].
- Scotophilus dinganii* (A. Smith, 1833)

- RMCA: 7 [7].
Scotophilus leucogaster (Cretzschmar, 1826)
 RMCA: 14 [14].
Scotophilus nigrita (Schreber, 1774)
 RMCA: 1, ZMB: 1 [2].
Scotophilus viridis (Peters, 1852)
 ZMB: 9 [9].

Total Specimens for Togo: 181

Tunisia

- Eptesicus serotinus* (Schreber, 1774)
 MNHN: 1, ZMB: 2 [3].
Miniopterus Bonaparte, 1837
 ZMB: 12 [12].
Myotis blythii (Tomes, 1857)
 ZMB: 2 [2].
Myotis capaccinii (Bonaparte, 1837)
 ZMB: 6 [6].
Myotis myotis (Borkhausen, 1797)
 ZMB: 79 [79].
Pipistrellus kuhlii (Kuhl, 1817)
 FMNH: 2, HZM: 2, MHNG: 2, MNHN: 3, NRM: 2, SMF: 3, ZFMK: 8, ZMB: 1 [23].
Pipistrellus rueppellii (Fischer, 1829)
 ZFMK: 1 [1].
Plecotus teneriffae Barrett-Hamilton, 1907
 BMNH: 5 [5].
Rhinolophus euryale Blasius, 1853
 ZMB: 5 [5].
Rhinopoma hardwickii Gray, 1831
 MNHN: 2 [2].

Total Specimens for Tunisia: 138

Uganda

- Cardioderma cor* (Peters, 1872)
 ZMB: 2 [2].
Chaerephon aloysiisabaudiae (Festa, 1907)
 ZMB: 1 [1].
Epomophorus labiatus (Temminck, 1837)
 AMNH: 1, BMNH: 20, CM: 2, FMNH: 3, MIZT: 1, NMW: 1, ROM: 1, USNM: 7, ZMB: 4 [40].
Epomophorus minimus Claessen & De Vree, 1991
 USNM: 2 [2].
Epomophorus wahlbergi (Sundevall, 1846)
 BMNH: 2 [2].
Glauconycteris variegata (Tomes, 1861)
 BMNH: 1, ZMB: 1 [2].
Hipposideros ruber (Noack, 1893)
 BMNH: 1 [1].
Hypsugo crassulus (Thomas, 1904)
 ROM: 2 [2].
Kerivoula phalaena Thomas, 1912
 LACM: 2 [2].
Kerivoula smithii Thomas, 1880
 LACM: 3 [3].
Lavia frons (E. Geoffroy St.-Hilaire, 1810)
 ZMB: 6 [6].
Mimetillus moloneyi (Thomas, 1891)
 LACM: 3, ROM: 2 [5].
Mops (Mops) condylurus (A. Smith, 1833)
 ZMB: 1 [1].
Neoromicia helios (Heller, 1912)
 ROM: 1 [1].
Neoromicia rendalli (Thomas, 1889)
 CAS: 1, RMCA: 1, ZMB: 1 [3].
Neoromicia somalicus (Thomas, 1901)
 FMNH: 1, HZM: 2, SMF: 1, USNM: 5 [9].
Neoromicia tenuipinnis (Peters, 1872)
 AMNH: 1, FMNH: 1, MHNG: 1, ZMB: 1 [4].
Nycteris arge Thomas, 1903
 ROM: 1 [1].
Nycteris hispida (Schreber, 1774)
 BMNH: 5, CAS: 2, ROM: 3 [10].

- Nycteris macrotis* Dobson, 1876
BMNH: 3 [3].
- Nycteris nana* (K. Andersen, 1912)
ROM: 1 [1].
- Nycteris thebaica* E. Geoffroy St.-Hilaire, 1818
BMNH: 13 [13].
- Pipistrellus hesperidus* (Temminck, 1840)
FMNH: 1 [1].
- Pipistrellus nanulus* Thomas, 1904
AMNH: 2, BMNH: 1 [3].
- Pipistrellus nanus* (Peters, 1852)
SMF: 2, USNM: 1, ZMB: 2 [5].
- Pipistrellus rueppellii* (Fischer, 1829)
AMNH: 1, BMNH: 1, FMNH: 1, HZM: 2, RMCA: 3, SMF: 2 [10].
- Rhinolophus eloquens* K. Andersen, 1905
BMNH: 1 [1].
- Rousettus lanosus* Thomas, 1906
BMNH: 1 [1].
- Scotophilus dinganii* (A. Smith, 1833)
ROM: 11 [11].
- Scotophilus leucogaster* (Cretzschmar, 1826)
ROM: 10 [10].
- Scotophilus viridis* (Peters, 1852)
ROM: 1 [1].
- Taphozous mauritanus* E. Geoffroy St.-Hilaire, 1818
ZMB: 1 [1].

Total Specimens for Uganda: 158

Unknown country

- Asellia tridens* (E. Geoffroy St.-Hilaire, 1813)
ZMB: 1 [1].
- Cardioderma cor* (Peters, 1872)
ZMB: 2 [2].
- Chaerephon major* (Trouessart, 1897)
BMNH: 1 [1].
- CHIROPTERA** Blumenbach, 1779
BMNH: 11, DNSM: 1, HZM: 26, MMK: 5, RMCA: 25, SAMC: 7, SMF: 34, SMG: 24, SNP: 1, TM: 6, UCT: 1 [141].
- Cistugo lesueurii* Roberts, 1919
KM: 1, NMB: 2 [3].
- Cloeotis percivali* Thomas, 1901
TM: 2 [2].
- Coleura afra* (Peters, 1852)
